Boys Agricultural Club of Hedley Have Hog Judging Lesson

Oa the afternoon of June 6th the Hedley club boys met at the hog farm of F. M. Clark for a lending money at 51 per cent to lesson in judging hogs for breed farmers who owe money on their ing animals. Each boy was consider in judging or selecting points, and showed the boys how they are applied in judging hogs. After this a class of five senior gilts, three of which were good enough for any show, were placed, by the club mem bers. Each boy wrote down his placings privately, and later in the lesson was called on to give reasons for the way he placed them. The members were graded on a basis of 50 per cent for placing them correctly, and 50 per cent for giving the best reasons. In general, the boys ners, and after hearing their business at the same place reasons anyone would believe they had a clear conception of part of of our stock what the score card had de scribed. Garvin Cathey placed Come in and see us. the class correctly. Earl Stew art placed the class very near correct, and gave excellent reasons for his placings. KLANSMEN VISIT REVIVAL MEETING

Rev. I L. Campbell has returned from Childress, having closed a revival meeting in his church there last Sunday night. This meeting was a great success, resulting in seventy conversions. Both preaching music are said to have been of

high quality. At the closing service last Snaday evening, six robed Klansmen visited the tabernacle, marched up the aisle to the pul pit, presented \$50 to the Pastor, and stated that they most emphatically endorsed the preach ing that had been done, and wished to help them in the good work they were doing.

Their unexpected appearance created something of a stir in the congregation, but the Klans. men went about their mission in quiet and orderly manner, and were gone in a few minutes.

SCHOOL DAYS

FEEDERS AVOID HEAVY LOSS

Cattle Cost Studies in Corn Belt Show Losses Are Small When Roughages Are Used.

(Prepared by the United States Department of Agriculture.)

Cost figures on 20,217 head of beef cattle fed in five corn belt states, summarized in a statement issued by the United States Department of Agriculture, show that scattering droves made good profits last season, in spite of the fact that there was an average loss of \$20.87 per steer. Department investigators cite the fact that some of these droves made profits under the most adverse conditions, as emphasizing the extreme importance of watching the details of feeding and management in slump periods in the cattle business.

The feeders in the areas studied who made the most economic gains, in general, used standard rations. In Illinois and Indiana this ration consisted of corn, protein meal, mixed clover and timothy hay, and silage, with some stover and fodder. In Nebraska and Iowa the standard rations consisted of corn and alfalfa hay, while in Missouri it consisted of corn, protein meal, hay and fodder. In the latter state some of the cattle covered in the study were finished on grass.

"The average loss of \$20.87 per head," one of the department investigators explains, "should be looked at in the light of the fact that all feeds were charged to the cattle at farm prices for all home grown feeds, and store prices for feeds bought." Thus the effect of the loss in question on the farm business as a whole was in some measure offset by the return from 1,000 to 2,600 pounds of unmarketable roughage fed to the average steer in the different localities. Even

Cattle Finished on Grass.

though the cattle-feeding enterprise may show a presumptive loss, there may be a profit for the farm operation as a whole, provided home-grown feeds have been produced at a cost far enough below the market price.

"No inidivdual feeder could be sure profit, including stover and low-grade hay, if he were to choose to sell crops rather than feed them to live stock. If all feeders, or even if a considerable number of feeders, were to try such a shift, the market for all field products would be glutted, with the probable result that the farmers could not even dispose of their corn. The cattle feeder, though he knows that his business for the time being is a precarious one, hesitates to turn to crop farming as a possible relief, because he realizes that cattle feeding is the business he is best fitted for, and because he believes a recovery to profitable production is not far distant."

The studies in question were made by the United States Department of Agriculture in co-operation with the state agricultural colleges of Nebraska, Iowa, Illinois, Indiana and Missouri. Preliminary reports issued by the department, and by the several state institutions concerned, give in detail the quantities of feed and hours of labor used in ordinary feed lot produc tion of fat cattle

All reports may be obtained upon request to the Department of Agriculture, Washington, D. C., or single reports from the state agricultural coleges co-operating. Farmers' Builetin 1218. "Beef Production in the Corn Belt," gives a discussion of feeding.

ESSENTIAL TO CONTROL LICE

Plenty of Nutritious Feed and Thorough Cleaning Up of Surroundings Are Needed.

In the control of cattle lice, plenty of nutritious food and a thorough cleaning up of the animals and their surroundings are essential to success, whatever method of control you choose to adopt.

Calves intended for beef should beold. A mixture of equal parts oats, bran and corn (preferably ground) is the best grain ration.

Pay Attention to Worms, Successful growers of swine are each year paying more attention to the prevention of worms in swise.

Dock Early.

Lambs should be docked and gelded while yet quite small.

CAKE FILLINGS

IF ONE is fortunate enough to have a cupful of sour cream a most de-Ilcious cake filling may be prepared with sugar and suts. Boll one cupful of brown sugar, one cupful of white, or two of either, with one cupful of cream until it may be stirred into a waxy mass, then add one cupful of minced blokory nuts or any nuts at hand-pecans are especially good. Beat until cool and creamy, then spread on

Maple Raisin Filling. Take one cupful of maple sugar, one-half cupful of chopped raisins, two tablespoonfuls of cream and onehalf cupful of chopped beechnuts. Cook the sugar and cream, adding the raisins. Stir until cool, adding the nuts after taking from the heat. Fine filling for gold cake.

Strawberry Whip. Boll one-half cupful of water and one cupful of sugar until it spins a thread, pour ever the stiffly beaten whites of two eggs and beat until smooth. Add one cupful of crushed strawberries and use on top of angel

THE FRIENDLY PATH

By WALTER I. ROBINSON.

"If you hit the mark, you must aim a little above it: every arrow that flies feels the attraction of the earth."

This was the advice of the great poet, Longfellow. By following this rule he won lasting honor, and scattered sunshine throughout the world. But even with all his success, one finds conclusive evidence in many of his writings that he was never satisfied. He never quite gained the place he aimed to reach, ac-

cording to the estimate placed upon his work by himself. A man is unfortunate if he is absolutely satisfied. This assertion has been widely contradicted. But proof of its logic is found in the careers of all the

truly great. If he is satisfied with what he has done or is doing, he never is likely to get much further unless pushed ahead by sheer

To everyone there comes a feeling of satisfaction and happiness whenever he accomplished something which brings him returns in gold or honor. But there may still he something lacking to make his joy complete if he does not see the benefits of his labors reflected in

the smiles of the world. No matter how high he may go in the opinion of others, there is certain to be a feeling of resentment in his own breast if he believes he is leaving undone some service which will add to the joys of his fel-

The most inviting pathways are bordered by blossoms. The happiest lives are surrounded by smiles.

\$365 IN PRIZES FOR BEST RHYMES

A new contest is just being started which will interest everyone who reads this paper. Anyone can enter this Contest—anyone can win! All it is necessary to do is to write a 4-line rhyme on Dr. Price's Phosphate Baking Powder, using only the words which appear on the label of the Dr. Price can (front and back).

Isn't that easy? Everyone likes to make rhymes and here is a chance to spend a fascinating hour or two writing rhymes on this popular Baking Powder and perhaps winning a substantial prize for your efforts.

27 CASH PRIZES For the rhyme selected as best a prize of \$100 will be given; for the second, third and fourth best rhymes prizes of \$75, \$50, and \$25, respectively will be given. And besides these prizes there will be 23 prizes of \$5 aach for the next 23 best rhymes. With such a long list of prizes as these, it would be a pity not to try your hand. Here's a 4-line rhyme as example:

Biscuits, muffins, pie or caks, With Dr. Price's Powder baks. The Price's Co., guarantes No alum in the cans to be.

No alum in the cans to be.

As Dr. Price's Phosphate Baking Powder sells for only 25 cents a 12 oz. can, some rhymes could play up the great economy of this pure and wholesome baking powder.

All rhymes must be received by July 1, 1922. Only words appearing on the label of the Dr. Price can (front and back) may be used. These words may be used as often as desired, but no other words will be allowed. If you haven't a can of Dr. Price's, you can see one free at almost any grocer's. It is not a requirement that you purchase a can in order to be eligible in this Contest.

Anyone may enter the Contest, but only one rhyme from each person will be considered. In case of ties, the full amount of the prize will be given to each tying contestant. Write plainly on only one side of a sheet of paper and be sure to give your name and address. Send your rhyme before July 1st to Price Baking Powder Factory, 1003 Independence Blvd, Chicago, Ill.

SYNOPSIS .- In a preface Mary Marie explains her apparent Marie explains her apparent "dou-ble personality" and just why is a "cross-current and a contradic-tion"; she also tells her reasons for writing the diary-later to be a novel. The diary is commenced at Andersonville. Mary begins with Nurse Sarah's account of her (Mary's) birth, which seemingly in-terested her father, who is a fa-mous astronomer, less than a new mous astronomer, less than a new star which was discovered the same night. Her name is a compromise; her mother wanted to call her her mother wanted to call her viola and her father insisted on Abigail Jane. The child quickly learned that her home was in some way different from those of her small friends, and was puzzled thereat. Nurse Sarah tells her of her mother's arrival at Anderson-ville as a bride and how astonished they all were at the sight of the they all were at the sight of the dainty eighteen-year-old girl whom the sedate professor had chosen for a wife. Nurse Sarah makes it plain why the household seemed a strange why the household seemed a strange one to the child and how her father and mother drifted apart through misunderstanding, each too proud to in any way attempt to smooth over the situation. Mary tells of the time spent "out west" where the "perfectly all right and genteel and respectable" divorce was being arranged for, and her mother's (to her) unaccountable behavior. By the court's decree the havior. By the court's decree the child is to spend six months of the year with her mother and six ar with her mother and six onths with her father. Boston is

CHAPTER III-Continued.

Everything seems awfully queer. Maybe because Father isn't here, for one thing. He wrote very polite and asked us to come to get our things, and he said he was going to New York on business for several days, so Mother need not fear he should annoy her with his presence. Then, another thing. Mother's queer. This morning she was singing away at the top of her voice and running all over the house picking up things she wanted; and seemed so happy. But this afternoon I found her down on the floor in the library crying as if her heart would break, with her head in Father's big chair before the fireplace. But she jumped up the minute I came in and said, no, no, she didn't want anything. She was just tired; that's all. And when I asked her if she was sorry, after all, that she was going to Boston to live, she said, no, no, no, indeed, she guessed she wasn't. She was just going only she wished Monday would hurry up and come so we could be

And that's all. It's a Saturday now. and we go just day after tomorrow Our trunks are 'most packed, and Mother says she wishes she'd planned to go today. I've said good-bye to all the girls, and promised to write loads of letters about Boston and everything. They are almost as excited as I am; and I've promised, "cross my heart and hope to die," that I won't love those Boston girls better than I do them-specially Carrie Heywood, of course, my dearest friend.

Nurse Sarah is hovering around everywhere, asking to help, and pretending she's sorry we're going. But she isn't sorry. She's glad. I know she is. She never did appreciate Mother, and she thinks she'll have everything her own way now. But she like Father's in Andersonville. won't. I could tell her a thing or two If I wanted to. But I shan't.

Father's sister, Aunt Jane Anderson, from St. Paul, is coming to keep house for him, partly on account of Father, and partly on account of me. "If that child is going to be with her father six months of the time, she's got to have some woman there beside a meddling old nurse and a nosey servant They didn't know I heard that. But I did. And now Aunt Jane is coming. My! how mad Nurse Sarah would

be if she knew. But she doesn't. I guess I'll end this chapter here and begin a fresh one down in Boston. Oh, I do so wonder what it'll be like-Boston, Mother's home, Grandpa Desmond, and all the rest. I'm so excited for what they called a week-end when I can hardly wait. You see, Mother never took me home with her but once, and then I was a very small child. 1 don't know why, but I guess Father didn't want me to go. It's safe to say he didn't, anyway. He never wants me to do anything, hardly. That's why I suspect him of not wanting me to go down to Grandpa Desmond's. And

Mother didn't go only once, in ages. Now this will be the end. And when I begin again it will be in Boston. Only think of it-really, truly Boston!

CHAPTER IV.

When I Am Marie.

Bunker hill and museums, and moving Yes, I'm bere. I've been here a lictures, and one play. But we didn't stay at the play.

But we didn't stay at the play.

But we didn't stay at the play.

Started out all right, but pretty soon a man and a woman on the stage began ored children in Masanchagetts was been so busy just being here. And so man and a woman on the stage began ored children in Masanchagetts was been such a lot to quarrel. They were married (not

really, but in the play, I mean), and I guess it was some more of that incompatibility stuff. Anyhow, as they began to talk more and more, Mother egan to fidget, and pretty soon I saw she was gathering up our things; and the minute the curtain went down after the first act, she says:

"Come, dear, we're going home. Itit isn't very warm here."

As if I didn't know what she was really leaving for! Do old folks honestly think they are fooling us all the ime, I wonder? But even if I hadn't known then, I'd have known it later, for that evening I heard Mother and Aunt Hattie talking in the library.

No, I didn't listen. I heard. And that's a very different matter. You listen when you mean to, and that's sneaking. You hear when you can't help yourself, and that you can't be blamed for. Sometimes it's your good luck, and sometimes it's your luck--just according to what you hear!

Well, I was in the window-seat in the library reading when Mother and now to begin at the beginning and tell Aunt Hattie came in; and Mother was

"Of course I came out! Do you suppose I'd have had that child see that play, after I realized what it was? As if she hasn't had enough of sucl wretched stuff already in her short life! Oh, Hattle, Hattle, I want that child to laugh, to sing, to fairly tingle with the joy of living every minute that she is with me. I know so we what she has had and what she will have-in that-tomb. You know in six months she goes back-"

Mother saw me then, I know; for she stopped right off short, and after a moment began to talk of something else, very fast. And pretty quick to went out into the hall again.

Dear little Mother! Bless her. old heart! Isn't she the ducky dear to vant me to have all the good times ossible now so as to make up for the six menths I've got to be with Father? You see, she knows what it is to live with Father even better than I do.

But I know now why I've been having such a perfectly beautiful time all this week, and why Mother has been filling every minute so full o same," she choked, hurrying-over to fun and good times. Why, even when me and putting both arms around me. we're at home here, she's always hunting up little Lester and getting him to have a romp with us.

> But of course next week I've got to go to school, and it can't be quite so jolly then. Well, I guess that's all for

ABOUT A MUNTH LATER

I didn't make a chapter of that last. It wasn't long enowh. And, really, I don't know as I've rot much to add to it now. There's nithing much hap-

I go to school now, and don't have so much time for fun. School's pretty good, and there are two co three girls most as nice as the ones of Andersonville. But not quite. Out of school Mother keeps things just as lively as ever, and we have beautiful times. Mother is having a lovely time with her own friends, too. Seems as if there is always some one here when 1 get home, and lots of times there ara : 2as and parties, and people to dinner.

There are gentlemen, too. I suppose one of them will be Mother's lover by and by; but of course I don't know which one yet. I'm awfully interested in them, though. And of course it's perfectly natural that I should be. Wouldn't you be interested in the man that was going to be your new father? Well, I just guess you would! Anybody would.

There are quite a lot of them, and they're all different. They'd make very different kinds of fathers, I'm sure, and I'm afraid I wouldn't like some of them. But, after all, it's Mother that ought to settle which to havenot me. She's the one to be pleased. Twould be such a pity to have to change again. Though she could, of course, same as she did Father, I sup-Four O'clock Monday Afternoon, and pose.

As I said, they're all different. There are only two that are anywhere near alike, and they aren't quite the same, for one's a lawyer and the other's in a bank. But they both carry canes and wear tall silk hats, and part their hair in the middle, and look at you through the kind of big round eyeglasses with dark rims that would make you look awfully homely if they didn't make you look so stylish. But I don't think Mother cares very much for either the lawyer or the bank man, and I'm glad. I wouldn't like to live with those glasses every day, even if they are stylish. I'd much rather have Father's kind.

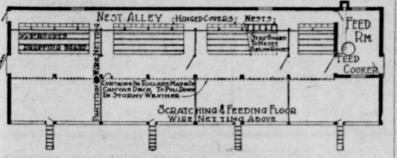

Then there's the man that pain's pictures. He's tall and slim, and wears queer ties and long hair. He's always standing back and looking at things with his head on one side, and ex-claiming "Oh!" and "Ah!" with a long breath. He says Mother's coloring & wonderful. I heard him. And I didn't like it very well, either. Why, tt sounded as if she put it on herself ort of a box on her bureau, same as some other ladies do!

"Dr. Anderson is not a wretch at all. He's an honorable, scholarly gentleman."

(TO BE CONTINUED.)

Even should a man make it a rule Lots of her old friends have been to to read nothing until he has a definite see her; and when there hasn't been estimate of its merit, he will find in anybody else around she's taken Peter the end that he has lost little. For and had him drive us all over Boston any purpose of the cultivation of the to see things-all kinds of things; mind or the imagination the book which is good to read today is good to read tomorrow.-Arlo Rates.

WHERE THE HENS

Colony Poultry House Will Keep Flock Productive.

MORE EGGS FROM WARM HOME

Design Illustrated Here Will Keep Out the Winds and at Same Time Permit Plenty of Fresh Air and Light.

By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue. Chicago. ford, No. 1827 Prairie avenue, Chicago. Ill., and only inclose two-cent stamp for

Owners of poultry flocks may gain ome worth while ideas about flock housing and management from the professionals who are about the only ones who succeed in making poultry pay a profit. To the average person who owns chickens they are a source of pleasure and fresh eggs, with but little actual knowledge of whether or not they are an asset or a liability.

In the Erst place, it is a pretty well recognized fact that a flock of less than 100 birds cannot be made to pay their feed bills and have anything left for the labor of caring for them. Next. the average poultry owner pays little attention to the house the flock occupies in winter-any old building that has four walls and a roof is looked upon as sufficient. The wind and snow sweep through the cracks in the poultry house and the feed the birds confreezing rather than to produce eggs. And this, too, when everyone knows that the time when eggs are worth gathering is the time when the hens, or a majority of them, are not laying.

The common, everyday hen of the American farm and backyard flocks are natives of tropical countries. True, she has been acclimated to the colder northern climate, but to do her best work she must be kept warm and comfortable in winter. That's why suc cessful poultrymen pay a great deal of attention to the house for the flock in winter, and farm building architects have designed houses that will keep out the winds, and at the same time permit a supply of fresh air and plenty

For convenience in handling goodsize flocks, there has come into general use what is known as a colony poultry house. Almost invariably these as the size of the flock requires. This size is gauged by providing four square feet of floor space for each bird. The colony house shown in the accompany-64 feet long, giving a total of 1,280 square feet of floor space, or sufficient for 320 birds,

As will be seen by the floor plan of the house, the interior is divided into four sections, each 16 feet by 20 feet. In each of these sections 80 birds are kept, although doors permit the owner to throw the whole of the interior breeding stock, few poultrymen allow the whole flock to run together.

This house is what is known as the saw-tooth roof type. It is of frame construction, set on a concrete founda The open, or saw-tooth roof front faces the south so as to get advantage of the winter sun and the warmth it provides. The front of the lower half of the building is open to provide good ventilation, but inside are burlap curtains that are lowered at night and on extremely cold days. In the upright section of the roof are large windows, one over each section to the back part of the interior. How the nests and roosts are arranged is chocolate creams, rotten eggs, and shown on the plan.

which is most important. But land Plain Dealer.

with every care the poultryman may take, he will have little success in bringing on layers during the cold months unless a proper house is provided.

Experiments by poultry specialists at the state agricultural colleges with artificial lighting to promote egg production during the short days have been most interesting. It now has been proven that artificial lights, principally electric, that are turned on early in the morning, will double winter egg production, providing, of course, the hens do not utilize all their feed to promote warmth. After the hens have gone to roost at night, their morning feed is scattered in the litter. Then when the lights are turned on, usually about 4 a. m., they get off the perch, are forced to take exercise to get their breakfasts and are kept in an active, healthy condition, and produce a comparatively large number of

Handling a flock of poultry is interesting work and can be made very profitable now that poultry products are high and feed costs low. With the proper sort of a house and careful feeding and handling, the owner will find their flock a cash-producing asset.

HAD CRUDE IDEA OF WORLD

In the Thirteenth Century People Had Very Simple Notions Concerning Geographical Facts.

Geography in the Thirteenth century was a very simple affair, which could be completely mastered by a schoolboy with a few minutes' study. The most reliable map pictured a little flat world of three continents, Europe, Asia and Africa. On its face appears the various kinds of creatures. human, animal and semi-human, which were believed to inhabit the remote regions of the earth. The holy city of Jerusalem is placed in the exact center, and at the extreme east is the Garden of Paradise, represented by an apple tree, Adam and Eve and the

The earth itself is bounded on the four quarters by the "jumping-off In the southern part of Africa appears the figure of a strange man whose face appears to be on his chest. Elsewhere are griffins, unicorns and several creatures which completely defy classification. This map is interesting to contrast with that studied in ancient China, which represented the known world as resting on the back of a cow. Some of the old Chinese declared that, after an earthquake they had found some of the cow's hairs in the fissures of the earth,

Chestnuts.

An old writer says that horse-chestnuts are so called because "people in the East countries do with the fruit thereof cure their horses of the cough, shortness of breath, and such-like dishouses are 20 feet wide and as long leases." It is always a temptation to seek for an ingenious explanation when there is a simple one at hand, but the fact is that the horse-chestnut has no connection whatever with the ing illustration is 20 feet wide and horse. The word "horse," as used not only in horse-chestnut, but also in horse-laugh, horse-play, horse-radish, and horse-mint, is the same word as "goose," the common name of the rough, prickly shrub of our comm The horse-chestnut deserves its prefix doubly, for when inclosed in its burr It is a prickly thing to handle, and its kernel is acid and unpleasant to together. But, as success with poultry | the taste. Similarly, the horse-radish requires that the young pullets that is a pungent tuber and the horse-mint are just beginning to lay should be a pungent mint. Horse-play is rough, kept separate from the older hens, or uncouth play, and a horse-laugh is a vulgar, boisterous guffaw,

And It Is Called Food.

A Malayan diet includes, besides any amount of canned foods, an occasional fresh piece of tough goat meat or beef, oranges, always eaten green, bananas of all flavors and sizes, limes, and an unusual fruit called the durian, which is described as a huge, green, round, spikey fruit which smells worse than a combination of limberger cheese, the mephitis (our notorious musteline mammal) and a garbage and sewage plant, and tastes like a blend of strawberries, onlons cheese. Whether you like it depends There is a great deal more to insure entirely upon yourself. Then there success with a flock of poultry than a bouse, of course. This includes feed and an occasional fresh fish.—Cleve

TANLAC KEEPS HIM FIT. SAYS McGRAW

Has Used It for Years With Splendid Results-Fine for Run Down Condition.

"For four years Tanlac has kept me in the pink of condition as I take a few doses of it every time I feel a little run down and it always builds me up again," said Wm. A. McGraw, 207 Beach Place, Tampa, Fla.

"I began taking Tanlac first about four years ago when I was in a very bad state of health and had been run down for several years. I was always taking laxatives, too, but I believe they did me more harm than good.

"Tanlac made me feel like a brand new man in a very short time and I have never had a return of any of my old troubles. The reason of this I am firmly convinced is that I always have Tanlac handy and take a few doses every time I feel a bit under the

Tanlac is sold by all good druggists,

One must not only speak charitably, but must also feel charitable.

MOTHER!

Clean Baby's Bowels with

Millions of mothers depend upon genuine California Fig Syrup to clean and freshen baby's stomach and

When the little one is constipated, has wind, colic, feverish breath, coated tongue, or diarrhoea, a half-teaspoonful promptly moves the poisons, gases, bile, souring food and waste right out. Never cramps or overacts. Contains no narcotics or soothing drugs. Babies love its delicious taste.

Ask your druggist for genuine "California Fig Syrup" which has full directions for infants in arms, and children of all ages, plainly printed on bottle. Mother! You must say "California" er you may get an imitation fig syrup.

Pay day comes pretty often for the man who works for the devil.

BIG COWS GIVE MOST PROFIT

Records Show That Large Animals Are Biggest Producers of Milk and Butterfat.

(Prepared by the United States Department of Agriculture.)

Figures collected from various cowtesting associations throughout the country and compiled by the United States Department of Agriculture tend to confirm the previous conclusions of the department that within the breeds, so far as they were represented by these animals, which were mostly grades, the large cows are the biggest producers of dairy products and are also the most profitable. The evidence seems to point to the fact that in the individual farmer's herd it will be found that on the average the larger cows are more profitable than the er. smaller ones, although there are some indications that this may not hold true in the case of herds of native cattle containing much beef blood.

The cows whose records have been used by the department have been sorted out so that only mature animals were used for these comparisons, thus eliminating any differences that might have been caused by the immaturity of some cows.

In one group for which figures have been prepared there were 160 cows classified as small, 201 as medium, and 129 as large. The small cows averaged 243 pounds of butterfat a year, and made an income over the cost of feed of \$77.39. Those of medium size made 289 pounds of butterfat and an income over feed cost of \$88.91. The large cows produced 345 pounds of

Producing Cow-The Result of Good Breeding.

butterfat and a return above feed cost

In another group there were 461 small cows, 483 classed as medium, and 326 large. Those in the first classification made 240 pounds of butterfat on an average and an income over cost of feed of \$89.11. The mediums made 278 pounds of butterfat and \$106.09 over feed cost. The large ones produced 209 pounds of butterfat and an income over feed cost of \$108.29.

These tables were based mostly on figures for the years 1916 to 1919, inclusive, which accounts for the high average income over cost of feed.

CARING FOR SPRING CALVES

Young Animals Should Be Quartered in Clean Shed or Lot and Given Proper Feed.

Dairy calves should be kept in a clean shed or lot and fed regularly, according to A. C. Baer, professor of dairy husbandry at Oklahoma A. and M. college. He suggests the following

First week-Feed three times a day of mother's milk:

Second week-Feed three times, a day of whole milk. Third week-Feed three times a day

but substitute one-third skim milk. Fourth week-Feed two or three

times a day; one-half skim milk. Regulate the amount of milk to the size and vigor of the calf. "After the fourth or fifth week all

skim milk can be fed and a little grain, ground oats, corn, barley, and a little bran." Baer says. "Let them eat some good hay, as much as they can

should receive some grain and hay in addition. To prevent scours, all buckets and cans must be kept clean. The shed or lot should also be cleaned

ECONOMICAL FEED FOR COWS

Quantity of Grain Required by Animal Depends on Her Size and Milk Capacity.

Silage, fodder, shredded stover or sudan and millet hay may be depended upon for supplying carbohydrate roughness. The quantity of grain the cow requires depends upon her size and capacity as a milk producer. The most economical feeding results when cows are fed as individuals. It isn't always possible to do this on the busy farm; but sufficient attention may be given each animal to see that she receives the right proportion of feed for maintaining her milk flow.

FALL FRESHENING IN FAVOR

Cow Will Produce 10 to 15 Per Cent More Milk and at Time When Prices Are High.

The fall-freshened cow produces 10 to 15 per cent more milk than the spring-freshened cow, according to the dairy department of the North Dekota Agricultural college, while the large production of the fall-freshened cow comes at a time when dairy prod-ucts are highest in price.

Billy's "Miss Pretty"

By ROSE MEREDITH

Billy Winch halted his horse at the cross trail and slipped from the saddle to tighten a girth. As he lifted his took him to Blair's." head he heard a light footstep on the sand and bounded into the saddle.

"Ho, Miss Pretty!" he cried. The girl stopped short and looked at him from indignant blue eyes. There and-" was a lunch basket swinging from one hand and she carried some school books in the other.

"How dare you speak to me in that way?" she asked.

He bared his dark head sheepishly. "Sorry, ma'am-I didn't know that I was speaking to you," he said hum-

The lovely young face flushed deep-"Is it worth lying about?" she asked coldly.

Billy Winch stiffened until he looked like a handsome bronze statue. "Only and closed the door, one man ever called me a liar," he murmured dreamily.

"I suppose he's dead now," she retorted sarcastically. He shook his head. "He could run

too fast-I expect he's running yet." Dimples came to her face, but she girls. frowned them away and turned off into a bypath.

"I'm getting off the trail-we're hik- in the house." ing right along-don't you walk in the

"I'll be hanged!" growled the exasperated Mr. Winch. "Wimmen always dld get my goat! Oh, Pretty

Lady, have a heart-be still !" "You are impossible!" tossed Beth over her shoulder as she ran down the top of the shoe business in three trail toward Blair's ranch, where she was boarding. Mr. Blair was chairman of the board of school trustees, and Beth Carvel was the new school

teacher from the East. Beth thought Billy Winch was was the nicest cowpuncher she had met out in the Stone Gulch country. But, although she knew him slightly, she had been annoyed and finally anhaughtily when he had said it to her. but always there was the same look of dumb surprise in his hazel eyes, while today there had been more than that, a sudden awakened look-a blaze of something-what?

be, Beth had not solved that riddle, though she had tossed many a long night through.

Wise as a little schoolma'am must

The next day when she met Billy Winch she barely inclined her proud little head.

He stopped his horse and watched her until her straight, slim form was out of sight. He sat like a bronze figure, dumb misery on his face. He had been waiting for her-to tell her that he loved her—and that if it was necessary he would go to school all over again-although away back in Massachusetts he had graduated from

a well-known university. "Hang!" snarled Billy Winch, swinging his horse about, and in two seconds horse and rider were a brown streak across the plain. After a while they disappeared suddenly, and the plain was empty of moving life.

Lunch hour was over and the children in the little schoolhouse under cottonwoods were drawing near the entrance, waiting for Beth and her

Two of the larger boys who rode is taken out.

home for the midday meal came racing back to the schoolhouse

"Oh, teacher! Something happened to Billy Winch this morning-something awful!"

"What-w-was it?" chattered Beth. leaning against the doorpost, white and sick. She could see him now-sitting his horse like a young centaurthat hurt look on his face.

"He was riding like everythinglike he does when he's mad or when he's after somethin'-and his hoss stepped into a gopher hole and threw him-and he's unconscious yet-they "The doctor?" gasped Beth.

"He was on the way when I leftain't it awful-and him so kind to all us kids-letting us ride Miss Pretty

"Miss what?" screamed Beth.

"Miss Pretty-that's the name of his hoss-the one he always ridessometimes he calls her 'Pretty Lady.' " Beth smiled strangely, as she gave the school bell into Lem's capable

have a very bad headache." But it was a heartache, and much harder to cure.

hand. "Ring it, please," she said; I

That afternoon, when she approached Blair's house, she crept in unseen and tiptoed into her own room

But her room was occupied. In her pretty white bed lay the invalid-Billy Winch, pale and diffident in his strange quarters. His unhappy eyes had wistfully surveyed all the dainty belongings of this most desirable of

"Oh," she half sobbed, "I am so glad they put you here-it's the best room

"They said they'd have to till tomorrow-I'm ashamed, Miss Carvelwhen I know you don't like me-to be laid up here with a broken leg-it's an unwarranted intrusion, ma'am."

"Please don't say that, Billy Winch," she pleaded, kneeling beside him: "I was mean this morning; I'm sorry; I didn't understand that your horse was named M-Miss Pretty, and I thought you were calling me that!" Lower the head sank until it was buried in the bed covering.

She did not see the wonderful light that came into the hazel eyes, but she did feel the tender touch of his brown hand on her bonny head, and she obeyed the thrilling tone of his deep

"I love you, Beth," he told her honestly; "could you love me enough to marry me?" "I could-I could, if you will prom-

ise to call me 'Miss Pretty' sometimes,' she told him, her face against his "That's easy!" he laughed, "because

you are!"

DOESN'T ENVY MAN AT TOP

Chap at the Bottom Tells Why He Is MADE HIS MEANING CLEAR Satisfied Looking Up to Eminent Ones.

I wish I knew how young men are usually affected by that "success-inlife" feature of popular magazines wherein the great bondholder tells them to save their money and stick to their jobs and grow to resemble him. As for me, the older I grow the pleasanter it is to find that same orderly character. familiar bondholder saying the same familiar things to a world of Bolshe demanded the examining judge. vism, jazz, sanitation, short skirts, raters. There, at any rate, I do not fall behind the times. Only last month I happened by good luck on these 'men at the top" advising the young in a magazine. And there they all were just as in 1899.

There was the large financier saying that unless the young man could save his money he had not the seeds of success in him, and the leading grocer of the Middle West saying that if the young man wished to succeed he must save his money and the man at the states saying that the young man had better save his money if he wished to succeed. Then that railroad president, who is always so delighted at having had hardly any early education, was advising the young man to begin, as handsome, and secretly she believed he he himself did, in a country bank, while that other railway president, who has had a college education, was saying that it had helped to make him what he was, and would no doubt help gered by his familiarity in calling her "Miss Pretty," or "Pretty Lady." More than once she had left him Not only was the advice the same down to the last word of it, but there was no change even in the counte nances of the advisers save in the matter of beards, which for the most part had been removed since 1899. Leading citizens who advise the young may shave from time to time, but otherwise there is no difference.

To me this lesson of the men at the top has always been the justification of a somewhat careless life, and I have found some of the best reasons I ever had for remaining at the bottom simply by looking at the men at the top.-Harper's Magazine.

Ancient Greeks Salted Fish for Food. Salting of fish for food is a practice which obtained as long ago as the days of the ancient Greeks and Phoenicians, and up to the present no better method of preservation has ever been discovered. It is successful because salt has the effect of extracting the water from the meat, and decay is a series of chemical reactions for which water is necessary. Salt has in itself no antiseptic or preserving virtue, as is proven by the fact that matter freely putrefies in sea

When the time comes to eat the fish the reverse action is accomplished. The fish is exposed to water, the water

Children Cry For

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your ailing child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:-It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.
