I think if mothers would only take your wonderful medicine they would not dread childbirth as they do. I recommend the Vegetable Com-pound to every woman."- Mrs. JOS. FALCOIN, JR., 552 S. 11th Street, Hamilton. Ohio.

Detours Bring Customers.

Detours Bring Customers. The motoring public is frequently annoyed by signs marked "Detour" which compet them to leave a good road for a bad one for some distance. They are even more annoyed when the new route is not properly marked out and as a result they sometimes get temporarily lost. A small boy upstate, quick to grasp the situation, fashioned a few detour signs of his own which he erected and which diverted traffic by his father's house. Edible Drinking Cup Appears. With the increase in popularity of anter ices among patrons of refresh-ment pushcarts, ball park caterers and ther venders the edible drinking cup appearing. If Properly Built It Is Good Investment for Farm.

CARE OF STOCK IS IMPORTANT

Dairy Barn Cannot Be Genuinely Useful Unless Planned With Reference to Requirements of Each Farmer's Herd.

By WILLIAM A. RADFORD By WILLIAM A. RADFORD Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Rad-ford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply. reply.

A modern dairy barn with its silo and yard demands fully as careful planning as the farm house and its attendant buildings. Just as the farm house must serve its occupants the whole year through, so does the dairy barn serve the herd day by day, for even in summer its care adds to the ever-present chores.

labor. All the modern developments

and proper ventilation and drainage

moves any particular worry over

Of course, stalls, mangers, gutters, alleys and pens are nowadays stand-

reference to the other buildings of the

farm. It was placed a distance of 200

feet from the house, and in a direction

which sheltered it from the direct blow

of hot summer winds. This left the

open yard running across the south

and east angle, with the barn's long

axis north and south. By this means sunlight was inveigled into the stalls

The width of the main structure is 36

feet; the length, over all, is 94 feet,

and two rows of stalls run lengthwise of the barn. As a general rule it will be found that the width of a dairy barn

is best kept between 32 and 38 feet.

This width makes the framing less an expense than it otherwise might be, the storage of hay becomes more unsat-

isfactory and the light is cut off from

the inside to a great extent. Of course the objection to width does not

apply to length. This latter dimen-

sion can be made to fit the herd re-

quirements, and the barn even carried around in an L or U shape, to give a

more sheltered yard. Observe that the cows face a cen-tral feed alley, equipped with steel car-vier tracks. This gives entrance by two doors, and lessens the danger of srowding in and eut, there is better

FOR HEALTH

There's a Reason

tellectual curiosity cannot be kept within national limits. Stendahl was born with a passion for analysis. The fortunes of a certain lieutenant of artillery created within him an abnormai appetite for knowledge and sensa-tion. If he was ruthless in satisfying these cravings, he was at least ruthlessly honest in recording the fact to himself and to posterity. He will never be as popular abroad as he is at home, because the Frenchman thrills to what is not and to what is clear to a degree that no foreigner can understand. We envy his intellect and

we respect his sincerity; but for all that, we pass by on the other side. He'd Prove the Reverse

THE SPIDER'S STORY

ONCE in a deserted old castle ther lived a white spider. Whethe it had always been white or whethe it was so old it had turned gray an then white no one who lived in th castle knew. And no one dared to as questions of this haughty White Sp der, for it sat on a throne.

ies, in the very throne room o the very throne where once had so a king did the White Spider spin he silver webs! And the mice and rat that lived there never dared even t speak to her, for somehow, witho anyone saying so, they all knew sh ruled the deserted old castle. One day little Brown Mouse, whi

was very nice-mannered and neve

"Don't Run Away, Little Mouse.

made a noise running about at nig as did the others. sa, at the foot the throne nibbling something he has found when White Spider let hers down by a slender thread right clo beside him. Little Brown Mou started to run away, for he was afre he should not have been so near her royal throne. But White Spice said, not in a cross voice but in a pleasant tone, "Don't run away. It is mouse. Come back here and sit is the throne beside me, and I will the you a story."

Little Brown Mouse dearly loved story so be climbed up to the throne seat while White Spider sat her silvery thread house in a cor by one arm and told him about a pi cess who once lived in the castle. "Long, long ago, in the tower this castle, a beautiful princess

"But this all happened a long, long time ago and the old castle is deserted; and here 1 am Queen on the very throne where the little Princess once sat.' When the White Spider stopped

talking Little Brown Mouse asked: "Did they reward you for saving the Prince's?

"Well, you see they could never find prisoned," said the White Spider. me. I hid every time anyone came to Her mother was dead and the King the tower and then no one really ever had married again. A had, selfish believed what the little Princess told woman was the new Queen. She did not love the little Princess, because shout the White Snider. They said she was delirious with fright on that she would some day be Queen and night. the stepmother wanted her own daugh-

"But never was a spider harmed that lived in this castle and so you "So she coaxed the King into taksee I was rewarded, for here I am, ing a journey and leaving a servant when all the royal folk are gone; who was in the pay of the new Queen queen on a throne when all those who to take care of the castle and the lixed here long ago are gone."

"That is a very nice story," said Little Brown Mouse, "and I am glad wicked servant imprisoned the little know you were always white, too, Some of those who live here thought you were very old and had turned servant had arranged to tell the King white with age,"

when he came home that the Princess "Oh, that is the enchantment the had been sick and died while he was witch threw over me," said the White Spider. "I shall never grow old." "Then the wicked Queen expected (@. 1923, by McClure Newspaper Syndicate.)

Variation in Butterfat Tests Nothing Unusual

The pure-bred dairyman as well as the commercial dairyman is interested in the tests for butterfat upon their cattle. Quite frequently these tests are made either upon the entire herd or upon individuals of the herds. When these tests are compared with tests made previously, a wide variation or fluctuation is noted. There are times when these tests are made within a few days of each other and the variation is surprising. Such fluctuations are often looked upon with suspicion, while it should be realized that it is quite natural for cows to vary in their tests for butterfat. In fact when this point is investigated it is found that cows vary more in their tests than is commonly thought.

Some years ago the Michigan Agricultural college published a special bulletin containing the work of Anderson upon the variations in the percentage of butterfat of single milkings of cows upon test. The seven-day tests of 200 cows handled under ordinary herd conditions were studied as well as similar records upon 2,000 cows entered in the advanced registry of their respective breeds. Any conclusions reached by these investigations can be looked upon as being indicative of the real condition, as the number of milkings studied is large enough to warrant this. It may be expected that 30 per. cent

of the cows in a herd will vary in the percentage of butterfat in the milk produced at individual milkings in a seven-day period 1 per cent or less. Fifty per cent of the cows during a like period will vary in their tests from 1.1 to 2 per cent, 14 per cent will vary from 2.1 per cent to 3 per cent, while the remaining 6 per cent will show a variation between milkings of more than 3 per cent. From these facts we may conclude that it is not surprising to have a cow test 3 per cent at one milking and test 6 per cent at the next milking. I have actually seen a cow test 1.8 per cent in the morning and test over 6 per cent in the afternoon. In a herd of 100 cows the average variation of the entire herd test would be 1.49 per cent based upon these figures.--B, W. Falrbanks, Colorado Agricultural College.

Basis of Dairy Profits in Food, Feed and Care

"One cow, well fed and cared for, will make more milk and profit than two or more cows poorly fed and cared for," is the keynote expressed in Wisconsin Circular 151 by George C. Humphrey of the animal husbandry department of the Wisconsin College of Agriculture. "Don't be satisfied to buy or raise

anything but good dairy cows. "Don't try to keep more cows than

it is possible to feed and care for well. "Treat the cows kindly. Rough treatment greatly reduces the amount of milk she produces.

"Feed liberal rations. . Make this

MANY GOOD DISHES FOR DESSERT

-Chocolate Tarts With Whipped Gream.

(Prepared by the United States Department of Agriculture.) The rest of dinner or luncheon is

usually easier to plan than the dessert. What is generally wanted is something light and attractive-a sort of climax to the meal. Sweets in some form are necessary to a wellrounded diet. Dessert is the logical time to serve them.

Any dessert must be chosen with segard to the other dishes of the same meal. After a heavy course of roast meat and vegetables, a custard br other dessert containing milk and eggs adds unnecessary protein to the meal; it is better to serve fruit, whole o cut, fresh or canned, or several fruits cut up together; or if a combination is used at the beginning of a meat meal. the dessert may be omitted entirely. Italians rarely have cooked desserts

of any sort. It is their custom to complete a dinner, which frequently has a number of courses, with whole fresh fruit-apples, pears, bananas, oranges, grapes-according to the season or the market. This is a very good practice which offers an easy dessert for many days.

Fruit preserve, jelly, fruit butter. honey or maple syrup is frequent ly liked for dessert with bread and butter, biscuits, cake or in pastry. To save work in the middle of the day. these sweets are more often used at lunch time than at dinner.

Puddings Too Fat.

A steamed or baked pudding, such as suct or plum pudding, with a hard sauce or a sauce made with egg. is often too rich in starch, protein and fat to be suitable after these foods have been previously served at the same meal in the form of potatoes. gravy, meat. meat fat or salad dress ing. Rich hot desserts help to "fill up" in cold weather after a less hearty meal or a very light lunch. In the summer time they are not, as a rule,

relished. Well-made pastry, particularly fruit ple, has its place as a dessert, but not in the ordinary diet. Recipes for many at the end of a very hearty meal. simple puddings and other desserts Salad, bread and butter, and a piece may also be found in the following of pie very often constitute a satisfactory and filling lunch. Biscuit- the Home; No. 1236, Corn and Its topped fruit ples, served hot, which Uses as Food; No. 653, Honey and are sometimes called "cobblers," are Its Uses in the Home; No. 487, Cheese considered more wholesome than rich and Its Economical Uses in the Diet; pastry and can be served for a change No. 712, School Lunches; No. 817. at any time a hot dessert is accept-able. They furnish a good vehicle for Protein; No. 871, Fresh Fruits and as peaches, apricots, apples,

| made with canned cherries, raspberries or blackberries. On the cos midsummer days when fresh berries are in season, cobblers can be served.

Desserts made with milk are high in food value. Cornstarch or Irish moss, blancmange, custard, junket and milk gelatins, taploca and rice pudding are good desserts to have after "madeover" dishes like hashes, stews or croquettes in which the quantity of meat actually eaten per person is sometimes less than when chops, steaks or roasts have been provided.

Gelatin Desserts Easy. Gelatin desserts with fruit flavors are quick and easy to make, even without the commercially flavored preparations. As they must stand several hours in a cold place to harden, they can be made early in the day and thus eliminate the last-minute cooking that so often makes dinner a trying meal to prepare,

Ices and sherbets made of fruit juices without milk cost less than ice cream and are suitable after a rich meal. Ice cream supplies fat when made with part or all cream. Ice cream containing eggs and frozen custards occupy a similar place to custards in the menu-that is, they are suitable when light courses precede them.

Many people enjoy a piece of cake for dessert. In addition to the different flavors and varieties possible in frosted and unfrosted cakes, loaf, layer and cup cakes, there are numerous special cakelike desserts, such as Washington ple, charlotte russe, pineapple charlotte, English "trifle," zweibach, nut cake, cream puffs, eclairs and cakes made of yeast-raised dough such as baba cakes and coffee rings.

Farmers' Bulletin 1313, Good Proportions in the Diet, which may be had from the United States Department of Agriculture, as well as the other farmers' bulletins listed, as long as the supply lasts, gives information as to the quantity of sweets suitable farm bulletins: No. 1136, Baking in the various dried fruits in winter, such Vegetables as Conservers of Staple No

THE ROMANCE OF WORDS.

"FILIBUSTER"

THIS word, generally used as a synonym for "pirate," has a most interesting history, being derived in an extremely roundabout manner from the Dutch vrijbuiter, translated phonetically into English as "freebooter" and, by the nautical section of the British Isles as "flyboat." "Flyboat" and "filibuster" do not appear to have much in common. but the original vrijbuiter became filbustier in the French and filbote in the Spanish. while the pirates and smugglers who used these craft were known as filibusteros. Thus we have two words derived from the same source-"freeb which is of unmistakably Dutch origin and "filibuster" which is from the Dutch, by way of the French and Spanish,

In this connection it is also interesting to note that the "buccaneers," the generic term for the pirates that menaced the Spanish Main, were usually divided into three classes the boucaniers who hanted their prey nearby, the filibustiers who roved abroad in search of it and the habitans who remained at home and attended to the busi-(C by Whester Syndicate Ins.)

possible by laying in a store of good grains such as corn, barley and oats and some alfalfa or clover hay. These feeds make a good combination when fed with roots or sllage.

"Provide plenty of fresh water which is cool but not too cold. It takes a lot of water to make milk so it must be provided.

"Protect the cows from cold, chilling weather and storms and dampness. It helps to increase milk production. "Give the mother of the new-born calf a pail of warm water-she is feverish and this will relieve her thirst.

"Her first feed should be five or six quarts of ground oats and wheat bran."

These are but a few of the many timely suggestions offered by Mr. Humphrey in the bulletin, which with the valuable rations suggested make this a most desirable little pamphlet for the dairyman.

Inflamed Udder of Cow

May Be Avoided by Feed It is seldom, if ever, necessary to milk a cow before freshening. If the bag is badly swollen and milk drips from the teats, it is sometimes a good idea to relieve the bag by drawing a little milk but the mere presence of inflammation and "cake" in the udder does not necessarily mean that the milking should be done. It is much better to leave the cow alone in this regard as the last few days before freshening the cow secretes a peculiar quality of milk called colostrum in her udder, which is very essential to the new-born calf as it acts as a purgative and helps to clear out his system. Excessive difficulty from inflammation and caked udders may be avoided by giving laxative feeds.

GOOD CORN PUDDING RECIPE | ICELESS REFRIGERATOR PLAN

May Be Served With Meat Course and Wyoming Woman Florist Makes Good Can Be Prepared in Many Use of Old Bookcase for Storing Her Stock. Different Ways.

A corn pudding which may be served with the meat course, can be made by various recipes; it consists of cooked principle of the iceless refrigerator by corn cut from the cob (fresh or canned) blended with an approximately equal quantity of custard mixture without sugar, and baked. If one egg is used to a No. 2 can of corn, one cupful of milk may be used, and one of Agriculture and the Wyoming State teaspoonful of cornstarch or flour, to give thickening. Cornstarch should always be blended with a little cold liquid before being added to hot mixture.

To make corn pudding, simmer the milk with the corn for 10 minutes, and then add the blended cornstarch. one-half teaspoonful of salt, and a little pepper. Cook for 15 minutes in a double boiler. The beaten egg-yolk is then stirred in and cooked for a minute. The stiffly-beaten egg-white is folded in just before turning the corn pudding into a greased baking dish to cook in a hot oven for 20 minutes. As with other baked custard mixtures, it is well to set the baking dish in a pan of water to prevent curdling at the side of the dish before the pudding is done at the center. This recipe is recommended by the United States Department of Agricul-

NURSE FINDS A PERFECT REMEDY

"From my long experience as a nurse I do not hesitate to say that I consider Tanlac Nature's most perfect remedy," recently declared Mrs. I. A. Borden, 425 Pontius Ave., Seattle, Wash. Mrs. Borden is a graduate of the National Temperance Hospital, Chicago, and her wide experience in caring for the sick lends particular emphasis to her statement.

"I have used Tanlac exclusively for seven years in the treatment of my charity patients," continued Mrs. Borden, "and my experience has been that, for keeping the stomach, liver, kidneys and bowels functioning properly and for toning up the system in general, Tanlac has no equal. Recently I had a woman patient who could not even keep water on her stomach for fifteen minutes. Six bottles of Tanlac fixed her up so she could eat absolutely anything. Another patient, a man, seemed unable to digest any food at all. Three bottles of Tanlac put him in such fine shape he went back to work. These two cases are typical. My confidence in Tanlac is unlimited." Tanlac is sold by all good druggists.

Take no substitute. Over 40 million bottles sold.—Advertisement.

Her One Fault.

Variation in Butterfat

Tests Nothing Unusual The pure-bred dairyman as well as the commercial dairyman is interested in the tests for butterfat upon their cattle. Quite frequently these tests are made either upon the entire herd or upon individuals of the herds. When these tests are compared with tests made previously, a wide variation or fluctuation is noted. There are times when these tests are made within a few days of each other and the variation is surprising. Such fluctuations are often looked upon with suspicion, while it should be realized that it is quite natural for cows to vary in their tests for butterfat. In fact when this point is investigated it is found that cows vary more in their tests than is commonly thought.

Some years ago the Michigan Agricultural college published a special bulletin containing the work of Anderson upon the variations in the percentage of butterfat of single milkings of cows upon test. The seven-day tests of 200 cows handled under ordinary herd conditions were studied as well as similar records upon 2,000 cows entered in the advanced registry of their respective breeds. Any conclusions reached by these investigations can be looked upon as being indicative of the real condition, as the number of milkings studied is large enough to warrant this. It may be expected that 30 per. cent

of the cows in a herd will vary in the percentage of butterfat in the milk produced at individual milkings in a seven-day period 1 per cent or less. Fifty per cent of the cows during a like period will vary in their tests from 1.1 to 2 per cent, 14 per cent will vary from 2.1 per cent to 3 per cent. while the remaining 6 per cent will show a variation between milkings of more than 3 per cent. From these facts we may conclude that it is not surprising to have a cow test 3 per cent at one milking and test 6 per cent at the next milking. I have actually seen a cow test 1.8 per cent in the morning and test over 6 per cent in the afternoon. In a herd of 100 cows the average variation of the entire herd test would be 1.49 per cent based upon these figures.--B. W. Fairbanks, Colorado Agricultural College.

Basis of Dairy Profits in Food, Feed and Care

"One cow, well fed and cared for, will make more milk and profit than two or more cows poorly fed and cared for," is the keynote expressed in Wisconsin Circular 151 by George C. Humphrey of the animal husbandry department of the Wisconsin College of Agriculture.

"Don't be satisfied to buy or raise anything but good dairy cows.

"Don't try to keep more cows than it is possible to feed and care for well. "Treat the cows kindly. Rough treatment greatly reduces the amount

of milk she produces. "Feed liberal ratio

MANY GOOD DISHES FOR DESSERT

Chocolate Tarts With Whipped Cream

(Prepared by the United States Department of Agriculture.) The rest of dinner or luncheon is usually easier to plan than the dessert. What is generally wanted is something light and attractive-a sort of climax to the meal. Sweets in some form are necessary to a wellrounded diet. Dessert is the logical time to serve them.

Any dessert must be chosen with regard to the other dishes of the same meal. After a heavy course of roast meat and vegetables, a custard br other dessert containing milk and eggs adds unnecessary protein to the meal; it is better to serve fruit, whole o cut, fresh or canned, or several fruits cut up together; or if a combination is used at the beginning of a meat meal. the dessert may be omitted entirely. Italians rarely have cooked desserts

of any sort. It is their custom to complete a dinner, which frequently has a number of courses, with whole fresh fruit-apples, pears, bananas, oranges, grapes-according to the season or the market. This is a very good practice which offers an easy dessert for many days.

Fruit preserve, jelly, fruit butter. honey or maple syrup is frequently liked for dessert with bread and butter, biscuits, cake or in pastry. To save work in the middle of the day. these sweets are more often used at lunch time than at dinner.

Puddings Too Fat.

A steamed or baked pudding, such as suct or plum pudding, with a hard sauce or a sauce made with egg, is often too rich in starch, protein and fat to be suitable after these foods have been previously served at the same meal in the form of potatoes. gravy, meat, meat fat or salad dress ing. Rich hot desserts help to "fill up" in cold weather after a less hearty meal or a very light lunch. In the summer time they are not, as a rule,

relished. ple, has its place as a dessert, but not in the ordinary diet. Recipes for many at the end of a very hearty meal. accompaniments for pork.

They are made by slicing only

ture.

Different Ways

made with canned cherries, raspberries or blackberries. On the cooler midsummer days when fresh berries are in season, cobblers can be served. Desserts made with milk are high in food value. Cornstarch or Irish moss, blancmange, custard, junket and milk gelatins, taploca and rice pudding are good desserts to have after "madeover" dishes like hashes, stews or croquettes in which the quantity of meat actually eaten per person is sometimes less than when chops, steaks or roasts have been provided.

Gelatin Desserts Easy.

Gelatin desserts with fruit flavors ire quick and easy to make, even without the commercially flavored preparations. As they must stand several hours in a cold place to harden, they can be made early in the day and thus eliminate the last-minute cooking that so often makes dinner a trying meal to prepare.

Ices and sherbets made of fruit juices without milk cost less than ice cream and are suitable after a rich meal. Ice cream supplies fat when made with part or all cream. Icecream containing eggs and frozen custards occupy a similar place to castards in the menu-that is, they are suitable when light courses precede them.

Many people enjoy a piece of cake for dessert. In addition to the different flavors and varieties possible in frosted and unfrosted cakes, loaf, layer and cup cakes, there are numerous special cakelike desserts, such as Washington ple, charlotte russe, pine-apple charlotte, English "trifle," zweibach, nut cake, cream puffs, eclairs and cakes made of yeast-raised dough such as baba cakes and coffee rings.

Farmers' Bulletin 1313, Good Proportions in the Diet, which may be had from the United States Department of Agriculture, as well as the other farmers' bulletins listed, as long as the supply lasts, gives information Well-made pastry, particularly fruit as to the quantity of sweets suitable simple puddings and other desserts may also be found in the following factory and filling lunch. NURSE FINDS A PERFECT REMEDY

"From my long experience as a nurse do not hesitate to say that I con sider Tanlac Nature's most perfect remedy," recently declared Mrs. I. A. Borden, 425 Pontius Ave., Seattle, Wash. Mrs. Borden is a graduate of the National Temperance Hospital, Chicago, and her wide experience in caring for the sick lends particular emphasis to her statement.

"I have used Tanlac exclusively for seven years in the treatment of my charity patients," continued Mrs. Borden, "and my experience has been that, for keeping the stomach, liver, kidneys and bowels functioning properly and for toning up the system in general, Tanlac has no equal. Recently I had a woman patient who could not even keep water on her stomach for fifteen minutes. Six bottles of Tanlac fixed her up so she could eat absolutely anything. Another patient, a man, seemed unable to digest any food at all. Three bottles of Tanlac put him in such fine shape he went back to work. These two cases are typical. My confidence in Tanlac is unlimited."

Tanlac is sold by all good druggists. Take no substitute. Over 40 million bottles sold .- Advertisement.

SWAMP-ROOT FOR **KIDNEY AILMENTS**

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and

curable aliments of the sidneys, liver and bladder.
Dr. Kilmer's Swamp-Root stands the highest for the reason that is has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.
Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.
However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Auto Ads Take Freak Shapes.

For advertising purposes the wild business getter has never overlooked the possibilities of the automobile. Many are the cars with big painted signs on them proclaiming the advantages of some one's particular flour or the merits of so and so's cheese. They attract considerable attention, but in no way nearly as much as those treak-bodied automobiles designed to resemble a bottle or a shoe, or some such thing with the driver's compartment carefully concealed inside, Most of these are familiar sights, but it remained for a most novel of all-a minlature house on wheels. Perfect in every exterior detail, it represents a suburban residence, and when first sighted coming around a corner is startling-New York Sun and Globe.

and then Sure Relief "They Lada't found the papers. They'd got the oilskin packet with the blanks, and they were just mad! They didn't know whether I'd changed the papers, or whether Danvers had been carrying a dummy message, while the real one was sent another way. They spoke of"-she closed her eyes-"torturing me to find out! "I began thinking madly, What could

der I didn't scream vignt out there

I do? I knew I wouldn't be able to stand up against torture very long. Suddenly something put the thought of loss of memory into my head. The subject had always interested me, and I'd read an awful lot about it. I had the whole thing at my finger-tips. If only I could succeed in carrying the bluff through, it might save me. I said a prayer, and drew a long breath. Then I opened my eyes and started babbling in French!

"Mrs. Vandemeyer came round the screen at once. Her face was so wicked I-nearly died, but I smiled up at her doubtfully, and asked her in French where I was,

"It puzzled her, I could see. She called the man she had been talking to. He stood by the screen with his face in shadow. He spoke to me in and forced her to drink them. With French. He asked me my name. I said I didn't know-that I couldn't remember anything at all.

"Suddenly he caught my wrist, and began twisting it.. The pain was awful. Her breath came more normally, and I screamed. He went on. I screamed the color was returning to her cheeks. and screamed, but I managed to shriek out things in French. I don't know how long I could have gone on, but "Am I right in thinking that the luckily I fainted. The last thing I joint venture has ended in success, heard was his voice saying: "That's and that this"-he turned to the girl not bluff! Anyway, a kid of her age wouldn't know enough.'

"When I came to, Mrs. Vandemeyer was sweet as honey to me. She'd had her orders, I guess.

"By and by she went out of the room altogether. I was suspicious still, and lay quite quiet for some time. In the end, however, I got up and seem natural enough under the circum stances. It was a squalid, dirty place. There were no windows, which seemed queer. I guessed the door would be watch for an advertisement in the locked, but I didn't try it. There were some battered old pictures on the walls, representing scenes from Faust." Jane's two listeners gave a simul-

taneous "Ah !" The girl nodded. "Yes-it was the place in Soho where Mr. Beresford was imprisoned. Of course, at the time I didn't even know if I was in London. One thing heart gave a great throb of relief when I saw my ulster lying carelessly over the back of the chair. And the

"I lay down on the bed again, and by and by Mrs. Vandemeyer brought

"That was an awful night. I'd made my plan whilst I was waiting for her. The papers were safe so far, but I couldn't take the risk of leaving them there any longer. They might throw ics. Pro that magazine away any minute. I lay awake waiting until I judged it package. must be about two o'clock in the morning. Then I got up as softly as I could, and felt in the dark along the left-hand wall. Very gently, I unhooked one of the pictures from its nail-Marguerite with her casket of jewels. I crept over to my coat and took out the magazine, and an odd envelope or two that I had shoved in. Then I went to the washstand, and damped the brown paper at the back of the picture all round. Presently I was able to pull it away. I had already torn out the two stucktogether pages from the magazine and now 'I slipped them with their precious inclosure between the picture and its brown paper backing. A little gum from the envelopes helped me to stick the latter up again. No one would dream the picture had ever been tampered with. I rehung it on the wall, put the magazine back in der the my coat pocket, and crept back to bed. ance ac "They watched me constantly for weeks. Sometimes they'd ask me questions by the hour-1 guess there was nothing they didn't know about the third degree !-- but somehow I managed to hold my own. The strain of it was awful, though . . . I felt that the horrors in store for me would up, trying to look natural and easy, be too awful once they knew I'd been only shamming. "It ended in my being sent to a sanatorium at Bournemouth. couldn't make up my mind at first whether it was a sham affair or genuine. I think I almost hypnotized myself. Jane's Story.

Her arm through Jane's, dragging her along, Tuppence reached the station. They arrived on the platform just as the train came to a standstill, Tuppence opened the door of an empty first-class compartment, and the two girls sank down breathless on the padded seats.

If they once reached Sir James Peel Edgerton in safety, all would be well. But would they reach him? Would oath. His hand went into his pocket. not the silent forces of Mr. Brown al-There was a flash and a report. The ready be assembling against them? bullet just missed the taller girl by Tuppence mapped out her plan of campaign.

As the train at length drew slowly "Flat on the bottom of the car. Are into Charing Cross, Jane Finn sat up with a start.

"Have we arrived? I never thought we should !"

"Oh. I thought we'd get to London all right. If there's going to be any fun, now is when it will begin. Quick, get out. We'll nip into a taxi." This was too much for the Russian. In another minute they were step

ping into a taxi. "King's Cross," directed Tuppence. Then she gave a jump. A man looked in at the window, just as they started. She was almost certain it was the same man who had got into the carriage next to them. She had a horrible feeling of being slowly hemmed in on every side.

"Sure thing. Pull up, George. The "You see," she explained to Jane, "If they think we're going to Sir gentleman's not making the return James, this will put them off the scent. trip. If I ever come to Russia, Mon-Now they'll imagine we're going to sleur Kramenin, I shall expect a rous-ing welcome, and-" Mr. Carter. His country place is north of London somewhere." . Crossing Holborn there was a block, But before Julius had finished his speech, and before the car had finally halted, the Russian had swung him-

and the taxi was held up. This was what Tuppence had been waiting for. "Quick," she whispered. "Open the

"Annette and I didn't know what right-hand door !" was going to happen to us," said Tuppence. "Old Whittington hurried The two girls stepped out into the traffic. Two minutes later they were Tuppence. "Old Whittington hurried us off. We thought it was lambs to seated in another taxi and were retracing their steps, this time direct to Carlton House terrace. the slaughter." "Annette," said Julius. "Is that what you call ber?" His mind seemed to be trying to adjust itself to a new idea.

"There," said Tuppence, with great satisfaction, "this ought to do them, I can't help thinking that I'm really rather clever! What's this thing "Shucks!" retorted Julius. "She may think it's her name, because her memory's gone, poor kid. But it's the

ried me no end. Finally I opened it out flat-there were only two sheets -and laid it between two of the advertisement pages of a magazine. I stuck the two pages together round

the edge with some gum off an envelope. I carried the magazine carelessly stuffed into the pocket of my ulster. "At Holyhead I found myself in a carriage with Mrs. Vandemeyer after all. I consoled myself with the thought that there were other people in the carriage-there was quite a nice-looking man and his wife sitting just opposite. So I felt almost happy about

it until just outside London. I had leaned back and closed my eyes. I guess they thought I was asleep, but my eyes weren't quite shut, and suddenly I saw the nice-looking man get something out of his bag and hand it to Mrs. Vandemeyer, and as he did so he winked.

"I can't tell you how that wink sort of froze me through and through. My only thought was to get out in the corridor as quick as ever I could. I got

Perhaps they saw something-I don't know-but suddenly Mrs. Vandemeyer said 'Now,' and flung something over my nose and mouth as I tried to

scream. At the same moment I felt a terrific blow on the back of my head.

She shuddered. Sir James murmared ute she resumed:

"I don't know how long it was be-

ing in the room. Mrs. Vandemeyer was believe it. However, I was careful ing in the room. Mrs. vancemeyer was one of them. I tried to listen, but at first I couldn't take much in. When at last I did begin to grasp what was at last I did begin to grasp what was going on-I was just terrified ! I won-
