## TWO HOMES Made Happy

By Women Who Used Lydia E. Pinkham's Vegetable Compound.

"I have taken Lydia E. Pinkham's Vegetable Compound and I think it

nd and I think it is the most wonderful medicine I ever tried," is the statement made by Mrs. Goldie Shoup of St. Joseph, Illinois, She declares that after taking the Compound she is in better health

than before. Mrs. J. Storms of 29 Lane Street, Paterson, N. J., writes: "I cannot speak too highly of your medicine and I recommend

of your medicine and I recommend it to all my friends." These statements were taken from two enthusiastic letters which tell of the help that has been received from using the Vegetable Compound. Both Mrs. Shoup and Mrs. Storms were in a run-down condition which caused them much unhappiness. When women are suffering from lack of strength and from weakness, their own life and that of their famly is affected. When they feel well and strong and are able to do their housework easily, happy homes are the result.

1928. Hundreds of catchy phrases were offered in the contest, but the one gon country. In the war with Mexico submitted by Mrs. Wilbur Hubbard of Chestertown, Md., was selected as the one most likely to offset the votegetting powers of "Coolidge prosperity," which the Republicans are expected to emphasize.

Whether or not they have guessed right remains to be seen. There is no denying the power of a good slogan in a nation which thinks in terms of catchy phrases and one of whose popplar deities is the great god. Advertising, who utters his Jovian wisdom in slogans. But to get a good slogan -ay, there's the mb!

Slogans have won elections even before the American public became "slogan conscious." Perhaps the earliest example of this was the political campaign of 1840. For 40 years (since 1800 when Jefferson was elected) the Democrats had been in power and the Whigs, the successors and heirs of the Federalists, had longed for the fleshpots of government power. They nominated Gen. William Henry Harrison, a veteran of the War of 1812, famous for his victory over the Indians at the Battle of Tippecanoe, but at the time of his election living on a frontier farm in Ohio. His running mate was John Tyler of Virginia and early in the campaign the battle cry of the Whigs became the "three T's"-"Tippecanoe and Tyler, too." The alliteration was pleasing to the ear of the voter, but even more effective was the symbolism of the Whig party. Harrison was known as "the Log Cabin candidate," because of his pioneer career in Indiana and in all of the campaign parades there appeared floats bearing a log cabin with a coonskin nailed on the walls and a barrel of hard cider standing beside the door. Both the symbolism and the slogan of Harrison's "log cabin and hard cider" campaign were such as would appeal most to the West, which had begun to rise to political power with the election of "Old Hickory" Jackson, and Harrison was swept into the White House by an immense majority over Martin Van Buren of New York.

as the basis of our claims in the Oreone of our victorious generals was Zachary Taylor and from an incident in the battle of Buena Vista there came a slogan which helped elect Taylor President in 1848. It was the famous "A little more grape, Captain Bragg" which struck the popular fancy. As a matter of fact what Taylor really said on that occasion was the laconic "Give 'em hell." But that didn't matter especially. The main thing was that the combination of the "grape" slogan and his nickname of "Old Rough and Ready" had much the same appeal as the Harrison combina-

tion in 1840. Next to a good slogan a picturesque nickname apparently is a powerful factor in a Presidential election, as witness "Old Hickory" Jackson, "Old Tippecanoe" Harrison and "Old Rough and Ready" Taylor. Lincoln's military record was not one which had any special appeal but the pioneer symbolism of the "Rail-Splitter Candidate" and "Honest Abe." no doubt had some thing to do with his election. After the Civil war the nation honored another military hero when it elected "Unconditional Surrender" Grant and the Spanish American war produced the "Rough Rider' candidate in the election of 1904 when "Teddy" became President.

The Presidential aspirations of James G. Blaine were favored by the "Plumed Knight" and the "Rupert of Debate," nicknames as well as the tuneful "Blaine of Maine." These, however, were more than offset by "Nosey Blaine," "The Tattooed Man," and "Jim the Penman" (alluding to the famous Mulligan Letters) appellations. But the fatal thrust to his chances was applied when Rev. R. B. Burchard declared in a speech for Blaine that all conscientious Americans should vote the Republican ticket because the Democrats stood for "Rum, Romanism and Rebellion." Blaine did not hear him distinctly enough to repudiate this slur upon the religious belief of millions of Americans and the slogan which the Republicans had Monday in November, 1928.

#### dividual interest in politics. In the close race of 1916 who can say but that the slogan "He kept us out of war" swung the scales in favor of Woodrow Wilson over Charles Evans Hughes, even though the next six months saw us in the war? Although Wilson was as different from Roose velt as two men can well be, like T. R. he had the gift of apt expression which the average American was quick to appreciate and appropriate. So "watchful waiting," "make the world safe for democracy" and "open covenants openly arrived at" became

WA/TERS

a part of the current speech. When a war-weary and disillusioned world began to take stock of itself and learned again that there can be defeat in victory, the Presidential campaign of 1920 found America already eager to forget war and everything connected with war. So Warren G Harding's "back to normaley' slogan was one well-calculated to appeal to the popular fancy after all the turmoil of the past two years and anything savoring of calmness and serenity was looked upon with favor. So the American voters elected Harding, a calm man, who sat conferring with the "best minds" on the conduct of his "front porch campaign." Four years later the same appeal to the desire for calmness, for letting well enough alone, this time summed up in the slogan "Keep Cool With Coolidge." again won an election for the Republican party.

What will the spirit of the campaign of 1928 be-one of rest or unrest, satisfaction or dissatisfaction, and in the words of what slogan will that spirit be expressed? Will the stogan written by a Maryland woman help put a Democrat in the White House after eight years of Republican rule, will the country continue to "Keep Cool with Coolidge." and enjoy "Coolidge Prosperity," or will there be other standard bearers in both parties for whom new slogans will have to be coined? The answer to all of these questions will be written by History on the first Tuesday after the first

#### **Really Mace Should** Produce an Affidavit

Mace Liverwurst was telling a crowd in front of the blacksmith shop about a cyclone he was in one time at the close of the Civil war. He said it was the worst wind and electrical storm he ever saw, and that a bolt of lightning killed a big fat hog for him. and the wind twisted it in such a manner that the fat was rendered into lard, a frying pan came bouncing through the air and fell right side up beside the hog so that the rendered lard ran into it.

Mace said about that time the wind blew the feathers off a big spring chicken and tore the chicken into pieces, which fell into the pan of grease, the lightning set the grass afire and the grease got hot and the pieces of chicken in the skillet fried nice and brown. When Mace hesitated, to take a chew of tobacco, all his listeners left in disgust, and as we sauntered off we heard him say he could prove it by a dozen persons. Mace can prove anything by his cre nies.-Altoona (Kan.) Tribune.

No Uniform Length

The length of a league varies in different countries. The Roman league was 1.376 modern English miles, while the league brought to England by the Normans was equal to 2.9 modern English miles. The metric league is four kilometers. At present the league is a nautical measure equal to the twentieth part of a degree-that is, three geographical miles, or 3.657 stat ute miles.

Is Handshake Unhygienic?

In the storehouse of a coal mine near Dortmund there is a curlous placard on the wall. It reads as follows:

"Gentlemen, commercial travelers and others coming here for business are requested to omit handshaking from their visits.

"Shaking hands is a waste of time is unhygienic, is often badly received, and will not have the slightest influ-ence on the placing of ord-m from our frm."

CALIFORNIA FIG SYRUP IS CHILD'S BEST LAXATIVE

MOTHER! When baby is constipated, has wind-colic, feverish breath, coated-tongue, or diarrhea, a half-teaspoonful of genuine "California Fig Syrup" promptly moves the poisons, gases, bile, souring food and waste right out. Never cramps or overacts. Babies love its delicious taste.

Ask your druggist for genuine "Cal-Hornia Fig Syrup" which has full directions for infants in arms, and children of all ages, plainly printed on bottle. Always say "California" or you may get an imitation fig syrup.

#### New Moving Picture Screen

A metal alloy for moving picture screens which shows pictures clearly with half the usual electric current has been invented and successfully applied in Leningrad, it is reported. A screen of specially designed shape is necessary.

#### Great River of Oil

The \$5,000 miles of trunk and gathering pipe lines in the United States represent an investment of \$800,000,-600 and transport 2,000,000 barrels of crude oil daily.

NEWS REVIEW OF

CURRENT EVENTS

Naval Conference Resumed

With Not Much Hope of

an Agreement.

BY EDWARD W. PICKARD

The crux of this was that he consid-

71TH the return to Geneva of the

lows: 1. That, since an agreement has practically been reached on submarines and destroyers, a convention shall be framed providing for 90,000 tons of submarines and 180,000 tons of destroyers, with an approximate 66 per cent ratio for Japan.

2. That a quota of 300,000 tons shall be adopted for all cruiser types.

ed States, Great Britain, and Japan for 10,000-ton cruisers carrying 8-inch guns shall be 12-12-8, or, if this is not acceptable, 15-15-10,

4. That the next smaller cruiser class shall be limited to 7,500 tons, carrying 6-inch guns.

5. That the question of providing extra smaller cruisers for Great Britain from its obsolete vessels shall be left to the Washington conference in 1931.

Congressman Martin B. Madden of Illinois, chairman of the house appropriations committee, who has been traveling in England, gave an interview at Torquay in which he said that if Great Britain was not willing to give America the equivalent of English ship power with respect to speed. range, tonnage, etc., there was every reason to believe that the United States naval building program would have the support of the appropriations committee. An agreement putting our navy out of balance with Britain's would not be ratified by congress, he said. Ambassador Gibson has been told by the State department that the United States would rather have him return to Washington without a treaty than to sign an agreement which fails to safeguard American interests or make possible real navat economies.

For three days about two dozen governors of states and some guests, in annual conference at Mackinac island, Mich., discussed all manner of topics related to the public welface, devoting a large part of the time to flood control and farm relief. The executives do not adopt resolutions at these meetings, but they were unanimous in favoring flood control of the Mississippi river and its tributaries by the federal government and in blaming that government for past neglect of that problem and the consequent losses. Governors of the Middle West and West had a lot to say bout the agricultural problem and most of them seemed to favor a measare like the McNary-Haugen bill

#### STORY FROM THE START

Carth Guthrie, Canadian war veteran, having to live in the open on account of weakened lungs, is factor of a Hudson's Bay post at Elkwan. He came back from the conflict with a permanently scarred face, which he realizes cost him the love of his fiancee, Edith Falconer. Sir Charles Guthrie, his brother, is a millionaire war profiteer. Etienne Savanne, halfbreed, his firm friend; Garth meets Doctor Quarrier, geologist, and his sis-Their schooner ter Joan. Their schooner has drifted ashore. Quarrier complains he has been robbed by a man known as "Laughing Mc-Donald." At Elkwan an Indian girl, Ninda, tuberculosis victim, whom Garth has befriended, is dying. Joan, trained war nurse, cares for Ninda, but the girl dies Charles Guthrie writes reproach ing his brother for not coming home. Charles' wife assures him Ethel still loves him, but Garth in his heart knows better. Three of McDonald's party visit Elkwan seeking to buy gun shells. From them Garth learns of evil talk among the Indians concerning among the Ind him and Ninda.

#### CHAPTER V -7-

The winter wood cut, the geese salted and cached, the whitefish platform groaning with the spoil of the nets which would not be lifted until the ice, Guthrie and Etienne sat in council of war.

"How many of our people are wintering on the Island?" asked Garth.

The half-breed closed his small eyes, his face contracted into a network of lines as he counted the famflies which had, through the summer. crossed the strait to hunt on the great island, instead of taking the river trail for the forest and muskegs of the Elkwan headwaters.

"We got twelve-fifteen hunter dere. Attawapiskat and Kapiskau got more dan dat." "That means a lot of for nelts if

the mice and rabbits are plentiful, and the litters came through the summer." scowled. "We not get

we are two dam' fool."

sands to us."

across."

Then the astute Savanne displayed his knowledge of the Indian temperament. Slowly, without emotion, he described the coming of McDonald, the free-trader, to the west coast, with a ship full of cheap trade goods, and inferior flour, tea and sugar. It was sudden wealth he was after, and to get it he would bribe the hunters, receive them with what looked like better prices in trade for their fox skins. But in a year-two years-he would be through-would not return and they would come to the company again, begging for a "debt." But the company, who had taken care of their fathers and grandfathers through many lean years, would remember who had gone to the free-trader. There would be no "advance" for these in the years to come, and their women and children would whimper through the long snows.

He, Saul Souci, a man held in great esteem by the company, could save these hunters from the cheap guns and trade goods of McDonald. who cared nothing for the Crees. The company, whose goods were bonest, as he knew, whose sugar was not sanded, whose powder never failed, and whose tea soothed the stomachs of the Crees, was as ancient as the hills, and as permanent. It would al-

the Indians with goods that never changed. He, Saul Souci, his father and his father's father had been the friend of the Hudson's Bay-had never failed it. Would he fall it now when he was needed to turn the young hunters at Akimiski from their folly? For a long time the smoke-filled tipi was silent as the swart face of Souch was grave with thought. Avoiding the anxious eyes of his wife, he sat cross legged staring into the small fire in the center of the wigwam. With eyes red and throat raw from the smoke of the tipl fire, Garth impatiently watched the old Indian's stolid face. The wife of Saul, unable to stifle her fear, at length loosed upon him a torrent of reproach-only to be silenced by a stern command. At last, the Indian, evidently having come to a decision, turned to the half-breed who waited for his answer. "My trap-lines reach far into the four winds. My fish and meat cache is heavy. There are many caribou in the muskeg; at Akimiski there are none-only rabbits and wolves and foxes."

If I go, how shall I live, for I have no cache at Akımiski? How shall I cross the water if the ice has not set?

Etlenne's dark face wrinkled with pleasure. Souci would go. "The company will make you its man, if you will go," he said. "We will set you across the open water in the York boat and give you supplies for the winter, and your sons-what they need. And if you hold the young men, there will be new guns for you and your sons and a debt double the hunt your family brings in." Etienne extended his hand to seal the bargain. "We may not cross the water before the Christmas trade-then we will lose the fur, for the trade will go to

their camps," suggested Saul. "We will cross you to the island at once, if you will return with us now." The wife of Saul was already wailing in protest at his decision, but the dark faces of his sons betrayed no feeling.

way across the second range into the "My sons and my wife will stay beadwaters of the Arkansas river, here," said the Indian without a from which many millions of dollars' glance at those interested. "I will go worth of placer gold was destined to down river with you, for the winter be washed. will not wait."

Etienne turned to the smiling Guthrie. "You see, he will go with us at once. Now, we will mak' de troubl' for McDonal' Ha! Ha! to get all dose fox skin." And he repeated his conversation with Saul.

. . . . . Through the stinging air of the blue dawn, two dog teams hurried down river. On the second night, arriving rapidity with which the news spread. at the cache of caribou hung in a tree for the return trip, they found that wolverines had destroyed the meat. ventured and almost no one had even To feed seven dogs it was necessary traveled through the region prior to to hunt, for Saul had come with a the strikes of 1860, seventy prospec-

ing breast. A tree that looks at God all day And lifts her leafy arms to pray: A tree that may in summer wear A nest of robbins in her hair: Upon whose bosom snow has lain: Who intimately lives with rain. Poems are made by fools like me, But only God can make a tree. -Joyce Kilmer.

HOUSEHOLD HELPS

If a trip to the cellar or storeroom is necessary carry a basket to save time and strength.

113

R

2

Keep on your desk a list of things to docalls, letters to write, mending and other household tasks that one may forget or slight. As the task is finished cross off the list. This is a most satisfactory way of

A camp chair or stool which can be slipped under the table when not in use is a great convenience in a small kitchen. Sit down as much as possible when working, save your legs for walks in the open air.

Before taking disagreeable medicine, hold a piece of ice in the mouth for a moment-it dulls the sense of taste. Grease the cork of the glue bottle, then it will open easily.

Keep old can rubbers to set on ice when dishes are to placed on the ice to cool. They keep the dish from slipping.

When relining drawers with paper, use a small sticker to hold them in place.

A fresh blood stain may be removed by rubbing with dry starch. The starch absorbs the blood and when dry it may be rubbed out, leaving no mark.

Anyone who has tried it knows that in housekeeping one cannot follow a schedule invariably. However the housekeeper is greatly assisted by a system which is carefully followed when possible. A slate or tablet hanging on the wall with an outline of the week's meals and extra duties will prove to be a wonderful step-saver as well as time-saver.

Transplant a few flowers like asters, snapdragon or cosmos in the garden between the rows of lettuce, radishes or onions. When they are pulled the plants will flourish and bloom.

A roomy market basket with a handle is a fine bed for a small child while traveling and in it ma belongings. The basket may be picked up and carried without disturbing the baby or exposing him to the weather. Kitchen aprons made of unbleached cotton make most satisfactory aprons as they are easily kept free from stains by boiling.

light sled.

ways remain on the bay to trade with

Ettenne mooch of eet," he muttered. "Dem peopl' geeve de hunter beeg price."

It was true. Cut off from the island until the ice set hard, as the post was, while the hunters could reach the schooner wintering at Seal Cove and get more for their fur, the outlook was indeed gloomy. But Garth had no idea of allowing these strangers to come into his territory and take the valuable fox trade of Akimiski away from him without a struggle. While he remained in the employ of the company, he would give the best that he had of loyalty and service. His pride was involved; and as he searched for a solution of the problem which the presence of this schooner presented, the desire to beat this freetrader in his bold try for the priceless ellver and black fox of Akimiski obessed his thoughts

From Graham at Attawapiskat and Boucher at Kapiskau, he anticipated little aid or comfort. The former was an inactive, oldish man with a large up-river trace, and Boucher, according to Cameron at Albany, already in a panic over the rumor of the machine guns aboard McDonald's schooner. So Garth had decided that he would ignore his colleagues on the coast south of him and play a lone hand.

For a space the two men nursed their pipes in silence; then the face of the white man suddenly lighted.

"Saul Souci !" he cried. "Why didn't we think of him before? Etienne. we'll hunt up old Saul and send him to winter on the island. He's got two or three sons there, and besides being Treaty Chief of the Crees, is a sort of medicine man, shaman, isn't he?"

Blowing a cloud of smoke through his teeth, the half-breed grunted his disapproval. "He winter on de Little Elkwan-up een de Winisk countree. Eet weel tak' long tam to find heem."

"Oh, I know it will be difficult to get him across the strait before the ice, but we'll put him over somehow."

"We get frozen een wid our cano' up riviere," protested the hard-headed bushman.

"We'll take a birch canoe and leave it-carry the little toboggan to come out with-the dogs can follow the shore going up," urged the enthusiastic Guthrie.

Knowing the country, Etienne realtzed only too well the difficulty of traveling between seasons; breaking the young ice in the quiet reaches of the river until compelled to abandon the canoe ; then the wait for the closing of the stream and the snow. For weeks the thin ice of the Elkwan would be a trap for the unwary dog team. To the trail-wise Etlenne, it was a foolish venture; to the man whose only thought was the salvage of the fox trade, a necessity.

Cree, which Etienne interpreted to Garth: "You take a hard moon to travel up the Elkwan." "We could not wait, so started in

the canoe," replied Etienne in the same language. "You did not break through the

Ice."

flap of his tipi.

"The geese have passed : it will not he long now until the big snow." vouchsafed the hunter, lighting his

"How are the game signs since the snow?" "There are plenty of mink and

otter, but the lynx and fox seem to have left the valley." Etienne's eyes brightened at the

remark. "There is much fox sign on Aki-

miski." This was hearsay over a month old, but the half-breed knew he would need every possible argument to gain Souci's ear to his proposition.

"My sons will be glad. Three of them are there." "We have come to talk to you about

the Island." Souci's bony face clouded as he met

the frowning look of his wife, "I told you at the spring trade I

would not go."

### Army Makes Extensive Use of Finger Prints

prints in the world. 5,023,881, is in the office of the adjutant general of the army, Washington, according to the American Medical Journal. The fingerprint system was adopted in 1906 on the recommendation of a board, of which Brig. Gen. Walter D. McCaw, medical corps, was a member. Finger prints have proved invaluable to the prints. government in the administration of the adjusted compensation act, and have made possible positive identification of more than 2,800,000 applicants. They serve to assist civil authorities, also. For example, a man disappeared

#### Son Breaks the News

On a hunt with his small son a farmer shot at a hawk, but missed. a second shot brought it down. "Whatcha going to do with him,

pop?" asked the boy. "Oh, I guess we'll have him for din-

ner." replied his father jokingly. On the way to the house the bawk was dropped into the pig pen unseen by the boy. They found the minister at the house and a chicken already killed for dinner. Dinner time came and just as the minister was being served the boy piped out:

"D'you know pop had to shoot twice to get this hawk""

Ignorant of the drift of Souci's re marks, Garth watched Etienne's impassive face. Suddenly his heart quickened, as a faint gleam entered the slit-like eyes of his friend, Would old Souch come, after all?

"It is true," continued the Indian, "the company is my friend. It was the friend of my father. It is better that the young men trade with it than with these people who come and go.

over the barren, and he searched for the gray-blue shapes against the snow. Suddenly the dog at his side stiffened on his toes, his iron dorsal muscles set, and the tremor which swept the shaggy body, with the suppressed whine, signaled the taint in the air. "Steady, Shot !" The trained war dog crouched mute -athrill with the scent of game in his nostrils. Gradually the exploring

eyes of the hunter made out dim shapes, a long rifle shot distant, Slowly, with his dog at his heels, Garth circled the barren up-wind under cover of the scrub, until he had an easy shot at two cows and a bull. "Steady, Shot !" he whispered, and

took careful aim. At the flash of the Ross, the bull leaped forward, ran a few feet into the wind and crumpled on the snow. As the bewildered cows circled up-wind, Guthrie fired again. A hurt cow plunged forward, seeking the scrub edging the barren, and reaching it, disappeared.

"Go get 'em, Shot !" Like a wraith, the airedale crossed the barren in pursuit, as Guthrie followed, upbraiding himself for his poor shooting. A hundred yards inside the scrub he found the caribou pulled down and dispatched by the dog.

Replacing his rifle in its skin case and resting it against a spruce, Garth was hastily dressing out the meat before the hide froze, while Shot erplored the game trails of the vicinity, when a low laugh sounded behind him. Looking up, he saw, watching him, the Ojibwa, Joe Mokoman, who called himself the father of Ninda. Guthrie casually rose to his feet, skinning knife in hand, as he measured the sinister face of the man who

faced him, fingering the action of his gun. It was clear from the glint in the small eyes that the Ofibwa still nursed the memory of his expulsion from the trade-house. How far would he dare go? Garth asked himself.

"Bo'-jo'! The caribou are fat this year." he said coolly, moving toward the Indian. But the Ojibwa pointed the muzzle of his rifle at Garth's chest as he stepped forward.

"You move, I shoot !"

The threat of the despised Indian deeply flicked the pride of the Canadian veteran, but he was helpless. It was inconceivable that Mokomac meant to wreak personal vengeance of such a nature on a Hudson's Bas factor-shoot him in cold blood. Yet what was he after, then?

With a great show of rage and sur prise, Garth burst out with: "What d'you mean by throwing a gun on me? You know what you'll get for

this? What d'you want?"

trenches - listening for suspicious have remained practically untouched sounds. Then the first light filtered until after 1880 was due chiefly to the Jealousy with which the Sioux Indians kept whites off the mammoth reservation that had been given them by the government under the treaty of 1858. This treaty guaranteed the Sloux against the encroachment of white men.

> Stories of Black Hills gold originated in the tales told by a Belgian priest, Father De Smet, who lived with the Sloux in the first half of the Nineteenth century and reported many finds of nuggets.

In 1874 the government sent General Custer to make a military reconnoissance of the region, and he took with him Prof. N. H. Winchell, a famous geologist of the University of Minnesota, who later played a big part in the discovery of Minnesota's iron de posits. Gold was discovered by this party, and as a result of their reports a party of miners who thought themselves strong enough to fight off the Sionx established themselves in a blockade on French creek. The government, however, lived up to its treaty and brought them out. But news of the gold strike had spread and the invasion of the Indian reservation now seemed inevitable.

In 1875 the government sent another party to prospect the Black Hills under strong military escort. This expedition confined its attentions chiefly to the southern part of the hills be cause of the dense forests that made the more northern areas practically inaccessible. It did not even reach the region of the Homestake mine. One of the geologists found abundant gold in the Whitewood and Deadwood guiches and described them as "the best place in the hills for a poor miner

Much of the gold district of the northern Black Hills has been referred to as the "Homestake" without discrimination between a number of properties of which that particular mine is one. The Homestake and the Old Abe deposit, nearby, are said to have been located in 1876 by two French boys, Moses and Frederick Manuel. The Homestake property passed into the hands of a group of well known mining capitalists, among them J. B. Haggin and George Hearst, the father of William Randolph Hearst. The son is still a prominent owner in the property and its profits belped support his papers in their early days.

This mine is celebrated among geologists as one that has always been made to pay although the ore on which it is based is not of a particularly rich variety. The splendid technical skill with which operations have been carried on, however, has made it famous for its profits.

"Dressy" Dressings.

In warm weather there is no food more appetizing, wholesome and attractive than a

good salad. Almost anything edible may be used in a salad, so there is ne excuse for throwing away any small amounts of left-over vegetable or meat.

When serving salad for a company dinner it need not be especially nourishing, for the menu is usually a full one. Something plquant, appealing and crisp and green is most desirable. The following are a few to be served as a simple green, varied by the different dressings :

Thousand Island Dressing. - Take one-half cupful of oil, the juice of onehalf a lemon and half an orange, one teaspoonful of scraped or grated onion, three teaspoonfuls of chopped parsley, one-fourth teaspoonful of mustard, eight olives sliced, one teaspoonful of worcestershire sauce. onehalf cupful of mayonnaise, one-fourth teaspoonful of salt and the same of paprika. Mix the dry ingredients, dissolve them in the fruit juices, put all together into a fruit jar. Adjust the rubber and top and shake until the mixture is smooth. Set in the icebox to keep cold until the time comes to serve. Another shaking and pour over the salad, or crisp lettuce.

A good way to serve French dressing, which is the simplest of all salad dressings, is to put the ingredients in a bottle, set in the ice chest after shaking well, then shake again before serving. The dressing is usually liked with three parts of oil to one of lemon juice, a pinch of salt and sugar, cayenne and dry mustard if liked. One may vary this recipe by the addition of different seasonings, and foods. East Indian Dressing. - Add o

fourth teaspoonful of curry powder and one-third of a cuptal of chutney or chopped pickle to one cupful of mayonnaise or French dressing.

Roquefort Cheese Dressing. - Grate or crumble a two-inch square of Roquefort cheese inte a cupful of French dressing. Serve on lettuce of endive.

Ancient Jewish Tribunal

Sanhedrin was the nume of the supreme judicial council of the Jews from the time of the Maccabees to the destruction of Jerusalem by the Romans under Titus in the year 71 A. D. This council consisted of 70 members, including the chief priests, elders and scribes, and was presided over by the high priest. Its jurisdiction extended to every Jewish settlement. After Judea became a Roman province the power of inflicting the death penalty was taken from the Sanbedrin.
