US WILLIAMS has a habit, when some one is telling a story, of saying, "I don't believe it."

Gus doesn't mean anything by it. He doesn't intend to be rude or contrary

It is just an expression which, for some unexplainable and forgotten reason, he has adopted and injected into his casual conversations.

Gus says, "I don't believe it." quite in the same tone and manner as other folks exclaim, "Is that so?" or "Oh, really !" or "Do tell !"

But despite the fact that all the above statements are true, Gus' "I don't believe it" is a source of annoymce and exasperation to Lacey Rogers, who is Gus' cousin and with whom he frequently associates in a social

Lacey is a great story teller. He prides himself on being a good spinner of yarns.

He loves to talk.

And to make things pleasant and inducive to his story-telling inclinations, folks like to hear Lacey tell stories. Whenever the Rogerses attend a party, Lacey is always called upon to tell a story.

He expounds a great length.

He is a much traveled young man and has many interesting tales to tell concerning his own experiences.

He recites these tales in a modest sort of way, thereby dispelling any possibility of boring his listeners. . . .

Gus Williams is as interested a listener to Lacey's stories as the next man.

And because of the fact that Gus and his wife and Lacey and his wife are very close friends, it naturally follows that the two couples are in attendance at many and the same parties, hence most of Lacey's stories have been heard by Gus and his wife on more than one occasion.

In spite of this, however, Gus and Bertha always sit and listen attentively while Lacey unfolds what to them is a twice-told-tale.

In fact, Gus makes it a point to display his appreciation and interest by interrupting the story-teller at intervals with, "I don't believe it."

When this happens Lacey is apt to pause, try hard not to glare or curse, wait until the ripple of laughter dies down, and pick up the thread of his tale at the point of interruption.

But always after Gus' "I don't believe it" has severed the continuity of Lacey's theme, his tone somehow lacks in enthusiasm and interest.

The donouement is inclined to be flat.

Of course, Gus is all unsuspecting of the annovance he is causing Lacey. No one has ever suggested that he is being rude.

His whole purpose is to be conge

ELMO SCOTT WATSON

#### One of the "Long Hunters"

By

H E SIGNED ms manne H Mansker," but you'll find him referred to in frontier bistory as "Casper Mansko," as "Gasper Mansker" and as "Caspar Mansco." But whatever the spelling of his name, the fact remains that this German-American (who was probably born in some "Pennsylvania Dutch" settlement early in the Eighteenth century) was one of the greatest hunters and Indian fighters in all border history. He spoke only broken English but the voice of his favorite long rifle, to which he gave the affectionate name of "Nancy," was a sharp, clear crack that spelled doom for many a deer and many a hostile red man.

In 1769 he was one of a party of 40 "Long Hunters" who passed through Cumberland Gap and began exploring the rich country of Kentucky and Tennessee. During the course of his wanderings Mansker discovered the salt licks in the present Davidson county, Tennessee, which were after-

wards to bear his name. After several months of hunting, some of the party returned home to North Carolina, some went north into Kentucky and the remainder under the leadership of Mansker built boats and started down the Cumberland. After a series of adventures they reached Natchez on the Mississippi, where they sold their furs, hides and tallow. The next year Mansker was back in the Kentucky country as the leader of another party of hunters. They gath ered together an enormous store of buffalo, elk and deer hides. Then a party of Cherokees swept down upon their camp while they were absent and destroyed all their peltries, whereupon one af Mansker's party carved on the bark of a poplar tree this embittered record: "2,300 Deer Skins Lost Ruination by God !"

But they continued their hunting and on the banks of the Green river one day an amusing adventure befell Mansker. To his ears came a strange sound. Like a shadow he crept among the trees in its direction. Before him he saw "a man bare-headed, stretched flat on the gound, singing merrily at the top of his voice !" The singer was Daniel Boone, thus consoling himself in the solitude of the wilderness while he awaited the return to camp of his brother. Squire Boone. Such was the first meeting of these two great pioneers.

In 1779 Mansker established a settlement near the salt licks he had discovered and to the end of his days "was a strong and helpful prop of the community whose first foundations he had helped lay." . . .

#### An Early Empire Builder

THEY say that "trade follows the flag" but quite as often "the flag follows trade," and it is not at all impossible that the American flag might not have flown over the Middle West if George Morgan, trader, had not shown it the way before the Revolution. As the junior member of the famous firm of Baynton, Wharton and Morgan, Indian traders, this young Philadelphian took charge of its newly-organized Indiana company in the Illinois country which Great Britain had just taken over from France. From the beginning Morgan made himself popular with the wild Indian tribesmen of the West. In fact, the Delawares thought so highly of him that they conferred upon him the name of their greatest chieftain, Taimenend, or Tammany. Unlike so many other white men of the time, he treated the Indians kindly and justly and so great was his influence over them that soon after the outbreak of the Revolution the Continental congress appointed him Indian agent at Fort Pitt. Finding himself thwarted and his advice on how to handle the Western Indians to keep them neutral unheeded. Morgan resigned in 1779 and returned East where he entered the Continental army and rose to the rank of colonel. At the close of the war he settled in Princeton, N. J., where he became a leading citizen and a trustee of the college. But this empire-builder could not resign himself to life in a quiet college town. During his career as a trader in the West, he had seen the vast possibilities of that region and he had spent almost as much fime in encouraging the development of agriculture there as in his trading activities. So in 1788 he visioned a Utopian colony beyond the Mississippi under the flag of Spain. He secured a huge tract of 15,000,000 acres and founded the town of New Madrid opposite the mouth of the Ohio. But the plotting of Gen. James Wilkinson checked the development of the plan and when the new federal government under the Constitution extended its power in the West, Morgan abandoned his project entirely, retiring in 1796 to a vast estate, "Morganza." in Washington county, Pennsylvania. To him there came Aaron Burr with a similar colonization scheme, but a traitorous one of which he could not approve, and it was Morgan who gave to President Jefferson the first authentic information about the Burr conspiracy. Morgan died in 1810 but not until he had become a leader in scientific agriculture which was to do so much to develop the great empire of the Middle West. A 1933, Western Newspaper Union

# **Comes New Enthusiasm for Lace** By CHERIE NICHOLAS

and byways in fashionland and remain immune to the lure of lace.

In the couturier showings for spring and summer, 1934, comes before our enraptured eyes a continuous proces sion of frothy, frilly, filmy dance and dinner frocks created of tulle and lace by such artists as Lelong, Mainbocher, Dilkusha and a host of other designers of high degree. A very new, very lovely and very chic idea is to animate slim, figure-fitting soft lace gowns with myriads of crisp tulle ruffles at shoulders and hemlines. One such is fashioned of shell-pink lace with crisp, sheer ruffles posed at the arms with billowy fullness about the hemline achieved through a frou-frou of many rufflings. The all-black lace gown with crisp black tulle ruffles or fine pleatings is a particular favorite.

In contrast to the airy-fairy types of fluttery lace and tulle is the gown of classic lines fashioned of handsome soft mat lace, a lace, by the way, which is outstanding in the mode. In the illustration we are showing an exquisite evening dress of white mat lace made especially by Molyneaux for one of the major social events of Paris. It took the first prize at a ball. It would be a mistake, however, to carry the thought that the new laces are limited to the languid, glamorous social life. As a matter of fact, the most exciting doings of lace are taking place in the realm of tailleurs and

sports clothes. Especially attractive and eminently practical for daytime is the suit of beige lace with blouse of navy georgette or the jacket ensemble of green net with blouse of beige alencon lace.

Lace for bathing suits, too, which makes real news, and for hats, for handbags, for ravishing neckwear and for entire dresses, ensembles and blouses, for gloves, too, if you please, and we must not forget the "darling" lace-covered slippers that will dance to sweet strains of music under starlit skies.

Because a dress is fashioned of lace does not mean that it may not be smartly wearable and conservative. The afternoon dress of green wool lace on the seated figure in the picture is just such-one of the outstand-ing models of the house of Dilkusha. It is a princess model and is finished with a draped collar held by one of the new polished wood clips.

A delicate web of black chantilly lace for the bodice top enhances the feminine allure of the dinner and theater gown centered in the group. Exquisitely thin cobwebby laces of this sort have captured the heart of the fashionable world this season, either in black, in white or pale beige, and in every imaginable pastel tone. The contrast between this lace and the soft mat velvet of the dress illustrated serves to emphasize the high neckline which is held with a crystal bar. The close wrist sleeves display the delicately traced lace patterning to perfection.

ANTI-SKID ROADS FOUND Roads made from cast-iron moldings, which have undergone severe tests in England, are said to be antiskid, ice-free and guaranteed to last 20 years without repair.

Week's Supply of Postum Free Read the offer made by the Postum Company in another part of this pa-per. They will send a full week's supply of health giving Postum free to anyone who writes for it.-Adv.

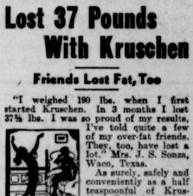

No Idle Listener "I'll say this for him, he's not the kind to stay quiet while his friends are being criticized." "No, sir-he joins right in."

Sim-ply dissolve one ounce Saxolite in half-pint witch has and use daily as face lotion.

Hence it has never once occurred to him to substitute. "my, my !" or "dear me," for his, "I don't believe it." . . .

Recently Lacey reached a point where he found himself fighting a desire to leap at Gus and plant a wellte directed blow across his mouth, to tear his hair and scream curses that would W give full expression to the annoyance he felt.

But Lacey is a well-mannered man and travels in correct society, hence convention and propriety forbid such an outburst.

However, convention and propriety cannot prevent Lacey from thinking. from grinding his teeth and muttering foul oaths when in the seclusion of his own bed chamber.

He has, also, taken to brooding about the matter.

Of course, he realizes that the thing has become an obsession with him; that he has allowed it to magnify itself and assume large proportions.

The faci that he alone is disturbed by Gus' "I don't believe it" is the one factor that restrains him from giving full leash to his feelings in the form of a physical assault upon Cousin Gus. For Gus by no means confines his "I

don't believe it" to Lacey. He encourages every one with the

same remark, and nobody but Lacey is bothered by it.

But the thing is settled now once and for all. . . .

Last week an old friend of Lacey's, Miguel de Gomez, an adventurous young Mexican, with whom Lacey had shared some exciting times during a recent sojourn below the border, terminated a motor trip from Sonora at the Rogers homestead and, being warmly received, succumbed at last to Lacey's urging and decided to remain a week.

Of course, the Rogers were delighted. To begin with Miguel was a direct descendant of a great Spanish family and was considered one of the wealthiest men in Sopora.

He was also extremely handsome. and possessed of charming manners. Immediately Lacey and his wife be gan preparations for a series of din-

ners and parties in honor of their discinguished guest. The first affair, a formal dinner, was

If scheduled for the Tuesday evening following the Sunday of Miguel's arrival. Of course, the Gus Williams were unvited and displayed as much delight

Purples and violet shades are blos soming gayly in fashion for spring. 1934. Last season some purple was seen in boucles and knitted frocks, and this year it is out in cottons and lin-For a long time it was felt that ens. heliotrope, orchid and violet shades were impossible in wash fabrics, as they came out in dull, muddy shades and did not hold their colors. These objections have been overcome, and the new violet range in handkerchief linens, French linens, ginghams, organdies and shirtings are among the smartest of the season's offerings. Cotton frocks in these colors are sometimes combined with little jackets of purple wool or velveteen.

This new trend is as important for children as for grown-ups.

#### Spring Hats Are Planned

to Show Plenty of Hair Dutch bonnets, Breton sallors' hats and the jaunty turned up brims worn by the musketeers of D'Artagnan's day inspire the first spring hats now shown in modistes' salons.

Eight out of ten roll right back from the face, making clear skins and smart colffures of prime importance.

The rest tilt forward over one eye in a line as rakish as fashion has shown, But all are as feminine in design and effect as a perfumed handkerchief.

"Show as much hair as possible." seems to be the decree. Many models are worn well back of the hair line. others tilted well to one side (generally the right) to show the other side of the head.

#### Spring Woollens

This year's wools are woven to fall in soft, heavy folds, cloaking the figure in graceful lines. Most of them are woven "tone on tone" with irregular stripes or bars of the same color maktheir design.

C by Western Newspaper Union.

Caurs mage of sheer organdles, nets and mousselines similar to the model pictured are writing a charming chapter into the history of summer wraps The theme of these dainty little shoul-ded wraps is being made much of by designers. At Paris social gatherings you see them created of the most fascinating colorful sheers fancy can pic-ture. The gown is of white transparent mousseline with large navy polka dots, for dots of every size from pin to coin and larger are the rage this season. There's nothing smarter thar white with navy for evening wear.

#### By THAYER WALDO (), by McClure Newspaper Syndicate. WNU Service

T WAS nearly two o'clock this aftertoon when we finished the big Was I glad! Standing around scene. for three hours in a mob, wearing a big hot Bohemlan peasant costume, isn't exactly fun.

I started to push my way off the set, heading toward the dressing rooms and wondering what lunch I could get for twenty cents that would stop my empty feeling.

As I reached the stairway, a man came elbowing through the crowd and grabbed my arm. He was one of the assistant directors.

"Hold on a minute, girlie," he said; "there's somebody over here wants to see you.

I couldn't imagine who it would be, or why, but I followed him. And then, .uddenly, my heart gave one big leap. There was Mark Mansfield, the big star of this picture, standing apart from everyone else and smiling right at me-the most wonderful smile! He came forward and made a little bow, saying

"My dear young lady, all morning I've been watching you and hoping we might meet. Will you give me the pleasure of your company for this afternoon and evening?"

I was so thrilled I felt dizzy, but I just disapled my cheeks at him and answered :

"Why, how charming, Mr. Mansfield. I'd be delighted."

"Splendid; that makes me very happy." he said, in that glorious rich baritone of his. "Will you join me in half an hour at the west gate? I'll have my car walting."

Yes," I told him, still being light and casual, "that will be quite convenient, thanks."

The next thirty minutes I don't seem to remember much about. I must have been in a sort of dream or something, I guess. Getting an invitation like this from the one man I'd always wanted to know and never even seen from closer than across a sound stage, was so marvelous. Of course, I've been sure for a long time, that sooner or later some one would notice ne, but I never thought it would be Mark-I mean Mr. Mansfield.

When I came out of the dressing rooms. I could see his tall broad-shouldered figure by the gate across the lot. I walked toward him, but not with too much hurry; that would have made it look as if his waiting for me upset my poise. As I came up he gave me his arm and said :

"My dear, you look even lovelier now than in that costume, if I may say so." "Thank you," I replied, tucking one hand under the soft flannel that covered his strong arm. "You compliment adorably.'

We stepped out onto the sidewalk. By the curb just ahead was his big dark blue Duesenberg limousine. A man who wore a uniform of the same shade stood by the back door, holding It open. I remembered having seen him lots of times, driving Mark-Mr

sore.

"Jack proposed to me in such an

"He asked me ff I would permit

Then on the opposite side of the street I saw another car-a tan Rolls. Royce with black trimming. I knew that belonged to Grace Monroe, and she was the actress who went most with the man I was with now. She'd just got in and was staring across toward us. I tried to make my smile friendly and not too triumphant as I let Mark help me into his car.

When we were settled in the deep cushions, he reached for my hand and held it very gently.

"I thought," he said, "that it might be pleasant to take a short drive somewhere, then go to the Biltmore for dinner, and perhaps dance later at the Cocoanut Grove. Does that seem an attractive plan?"

I murmured, "Perfectly !" with just the proper touch of carelessness. We were stopped for the traffic signal by the studio's north end. I glanced out to see a bunch of the girls who had worked in the mob scene with me, standing on the corner waiting for a bus. I waved and, oh! how they gaped !

Pretty soon we were going up . winding road into the North Hollywood hills. Mark slipped his arm around me and I nestled close to him.

"Sweet little lady," he said, talking in a kind of soft dreamy voice, "you have no business slaving your youth away at an extra's job. Wouldn't you like to throw it all over-to travel, to see the far, mysterious places of the world, and to have romance? Those are the things I really long for. You know, my life is a lonely and dreary one, too. Don't you think it would be splendid if we could find such happiness and adventure together?"

I don't remember exactly what I answered. We'd come to the top of Crescenta Heights and there at our right lay Hollywood, looking like a fairyland as it stretched off into the mist that hung where the ocean was. Dear Mark bent down and laid his cheek against mine.

"Darling," he said, waving one hand toward the city below, "this is as near as you and I should ever be to that and all it stands for. Now that we've found each other-'

Oh, dear diary, I just can't go on! It's so terribly foolish and I guess what people would call pitiful for me to be sitting up here all by myself on Crescenta Heights, writing such a lot of wild stuff out of my imagination. Why, all the times I've played extra in Mark Mansfield's pictures, he never even looked at me-or anyone else except that beautiful, hateful wife of his!

got a job in such a big shop, and she has such a squint, too."

# SUCH IS LIFE-Pretty Mad!

# Astronomers Will Check Moon Weight

#### Observatories of World to Take Measurements.

London .- Headed by Dr. H. Spencer Jones, the astronomer royal, eightyseven observatories throughout the world are now making a co-operative survey to discover the weight of the moon and determine the scale of the entire solar system four times more accurately than at present.

The planet Eros is being used as the key to the solutions. The International Astronomical

anion, under the chairmanship of Doctor Jones, is looking after the little planet Eros, which three years ago made its nearest approach to the earth -a distance of some sixteen million miles.

Although Eros is only about twenty miles across, it is the only planet which is bright enough and comes near enough to the earth for its position to be surveyed.

#### Problem Baffling.

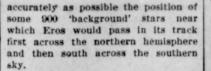

But the "baseline" of this celestial survey is nothing less than the diameter of the earth and when the astronomers have completed their task they will have weighed the moon, a feat which has always been regarded as extremely baffling, and, determined the scale of the entire solar system four times more accurately.

The astronomers commenced their survey in 1925 and hope to complete their job by 1938.

"The first task," Doctor Jones explained in an interview, "was to work out the expected path of Eros across the sky,

"It was then necessary to obtain as

**On Silver Survey** 

"From October, 1930, to May, 1931, the eighty-seven observatories were engaged in taking photographs of Eros. Most of the photographs did not include enough reference stars from which the position of Eros could be measured, so a further series of photographs had to be taken.

"In the meantime," added Doctor Jones, "Doctor Witt, the Berlin astronomer, who first discovered Eros, has just completed a calculation of what its observed path would have looked like from the center of the earth."

#### Points Out Error.

A number of observatories are now taking advantage of Doctor Witt's work

"The final answer," Doctor Jones said, "will be, not the distance of Eros from the earth, but the distance of the sun from the earth. The possible error is now about 50,000 miles in 93,-000,000 miles. We hope to reduce it to a quarter of this figure.

"All other distances in the solar system will be similarly affected, and we also will know the mass of the moon with greater accuracy.

"The mass of the moon comes into nearly all astronomers' calculations. This is because the earth as well as the moon is always moving round their common center of gravity, which is about 3,000 miles up towards the moon from the center of the earth. In fact, the moon's gravitation is pulling the earth, as well as the earth's the moon.'

# Nebraska Gives Prizes

for Hunters of Crows Lincoln, Neb.-Nebraska nimrods have been invited to participate in a state-wide crow shoot, sponsored by the Nebraska Isaak Walton league. Predictions have been made that the large, unloved, black plumed birds will fall in great numbers during the contest, which will continue throughout Awar is are to be made crow hunters turning in the largest number of "scalps" for the year.

## "PUT YOURSELF IN HIS PLACE" By

#### LEONARD A. BARRETT

An incident which occurred in the boyhood life of Lincoln is not found in many of his bi-

ographies. It runs like this: "I can remember," says Abraham Lincoln, 'going to my little bedroom after hearing the neighbors talk with my father and spending no small part of the night trying to make out the exact meaning of their sayings. I was not satisfied until I could repeat it and

put it into language plain enough for any boy I knew to comprehend." This very remarkable practice explains the clearness as well as the convincing sincerity of Mr. Lincoln's addresses. A boy can understand them and yet they challenge the thought of the wisest of men. One of these speeches is the Gettysburg address. It is a classic and has a permanent place in American literature. Edward Everett, who spoke on the same platform with Mr. Lincoln, at the time the latter gave this address, wrote to Lincoln as follows: "I should be glad if I could flatter myself that I came as near to the central idea of the occasion in two hours as you did in two minutes." Simplicity of speech is difficult. It

# **Bottles From Past**

Found by Workmen Avincourt, France.-French milltary workers engaged on construction of the steel and concrete ring of underground defenses came upon a rare find recently while mopping up some old German pill-box fortifications near here. Including personal belongings and accouterments of the defenders, a score or more bottles of Delbeck champagne were found. It was of the vintage of 1912. It is thought to have been seized back of the French lines by German raiders during the World war.

## **ODD THINGS AND NEW-By Lame Bode**

WHS Borvios

The center front closing in redingote effect and the flat rippled collar, together with the unlined fabric, Dutch blue and white checked tweed, contribute to the smartness of this spectator sports coat.

is worth all the effort necessary to attain it.

Misunderstandings are the cause of much of our worry, and particularly of our domestic troubles, which could be avoided if every person would put his thought into language "plain enough for any boy to comprehend." The use of a wrong word in an important sentence may change its entire meaning. Many an important lawsuit has been settled on the interpretation placed upon a single word. Frankness of expression is the essence of permanent friendship. Our actions which are the reactions of our thoughts many times convey a different meaning than was intended. Avoid this by cultivating clearness of thinking and expression.

One way to cultivate clearness of expression is to do just what Lincoln did-think in terms of the other man's point of view, see the problem as he sees it, try to feel the pulse of the argument as he feels it. In other words, put yourself in the other person's place.

THE WEDDING MARCH MURDER Monte Barrett Copyright, 1933. by the Bobbs-Merrill Co. WNU Service. SYNOPSIS

Waiting in the minister's study, Jim Franklin, about to be married to Doris Carmody, is stabled to death. Peter Cardigan, with Sergeant Kilday, begins the investigation. Franklin, while waiting, had visitors, among them his mistress, "Choo Choo" Train; his in-tended wife's brother, Rylie; Daniel tended wife's brother, Rylie: Daniel Builis, politician, and a woman in a blue frock. Rylie Carmody admits try-ing to stop the wedding, after being informed by Webster Spears that Franklin was still friendly with Choo Choo, despite his approaching mar-riage. Kilday secures the dead man's keys. From Callis Shipley, one of the bridesmaids, Rylie's friend, the inves-tigators learn nothing. An interview with Bullis is fruitless. Webster Spears admits informing Rylie Carmody of admits informing Rylie Carmody of Franklin's relations with Choc Choo. An interview with Milo Dunbar, Frank-lin's law partner, and search of the lin's law partner, and search of the dead man's office, reveals nothing of importance. Choo Choo admits her re-lations with Franklin were to continue after his marriage. Six of the seven keys Franklin carried are traced. Kil-day decides to arrest Webster Spears and have Rylie Carmody shadowed. Callis Shipley vainly tries to convince Cardigan of the innocence of Rylie Carmody and Spears. She and Rylie plan to leave the city, evading Rylie's shadower. Rylie goes to do his part, and Callis reaches an appointed rendezand Callis reaches an appointed render-vous, but Rylle does not come. Frank-lin's apartment is ransacked. Neither Bpears nor Rylle Carmody could have done it, and Cardigan senses the hand of the murderer

#### CHAPTER X-Continued -20-

"No, wait," Peter cautioned. "We can't afford to overlook a single bet. Perhaps we know what the murderer was looking for here? Didn't we come here ourselves, in search of some clue that would identify the mysterious woman in blue for us? Didn't you attempt to identify those keys in the hope that, sooner or later, one of them might help in the identification of that woman? Bullis told us she was in love with Franklin. He overheard her conversation with Franklin just before the murder.

"What's to prevent the murderer from having the same hunch that we had? If it was that woman, say, and she knew Franklin possessed letters, or pictures which might identify her. wouldn't it be reasonable to expect her to make some attempt to get them Of course it would. If that evidence exists, its destruction removes our last hope of solving the mystery of Franklin's death."

"Oh, yeah?" Kilday's smile was de-

didn't take things spart quite as thoroughly, but we looked in every place it was reasonable to believe Franklin might have kept papers or pictures which could have identified this woman. We are moderately safe in assuming that he found nothing here. That being true, what would be his next move?

"The evidence he feared might betray him is still missing. He has the same reason to fear discovery that he had when he searched this place. Will he stop now? I don't think so. We've struck a warm trail, Sergeant."

"You think he'll attempt to find and destroy this evidence somewhere else?" "That's what I would do, if I were

in his shoes," declared the novelist. "I feel pretty sure I would conclude that the evidence was in the only other place it could be-his office. That's where I'd look next."

"We've looked there," the detective objected. "We didn't find anything." "We didn't go all through his files,"

Peter was emphatic. "We looked, but there are dozens of places such evidence might have been Soncealed. But that isn't the point. The murderer doesn't know we've looked, does he? I maintain that the man who was so anxious to find something here will probably look there next. Unless he's already been there. It's worth trying. Let's go there and see. You have Franklin's keys. We can set a trap for him."

Kilday, still wedded to his theory that Webster Spears was the murderer, was nevertheless impressed. "It would probably be a wild goose chase, but I'd do it if I hadn't sent word to Bullis to be at my office. I'm going to confront him with Callis Shipley and see if he can or will identify her as the woman he saw quarreling with Franklin in that study. They're both probably waiting for me by now."

"Then let me have the keys," urged Peter. "I'll go alone. It's worth trying, anyway."

Sergeant Kilday had not abandoned his previous theory. "Spears is my man, but just the same I'm not overlooking any possibilities,' he declared on the way back to his office for Franklin's keys.

"If you don't have a revolver, you'd better take this one." He thrust a blue sutomatic into his friend's hand as they parted. "Not," he added, "that I think you'll need it." Peter laughed. "It's always the unloaded gun that goes off," he retorted, "and the hunch that looks like a flivver

sometimes brings home the bacon." The offices of Franklin and Dunbar were on the second floor of the Greer building. Peter was familiar with the general floor plan as a result of his previous visit there with Dunbar and Kilday. In the taxi, he formulated a plan. Franklin's keys would admit him without difficulty. Once inside, he decided, he would wait in Franklin's private office, in darkness, in order that his presence might not be detected and frighten off the intruder, should he come.

It was just eight o'clock, but the building was nearly deserted. Only two elevators were in operation, and neither was waiting as he entered the lobby, so Peter decided to walk up the single flight of stairs, his footfalls echoing in the deserted corridors, in spite of his caution. He paused at the e and

THE HEDLEY INFORMER

shared this coom with aim had turned off the lights. Peter gripped his revolver tighter. He was convinced that he was standing within a few feet of Jim Franklin's murderer.

CHAPTER XI

#### In the Dark The room was in darkness-a Stygian blackness that was impenetrable Peter concluded that the blinds had

been drawn against observing eyes, because almost no light filtered through the windows. He closed his eyes, to accustom them to the lack of light. When he opened them again, he could decry two rectangles, lighter than the gloom about him. The windows. They were to his left. Swiftly he outlined a plan of battle. He must reach the wall to the right, to prevent surprise from the rear. Then, hugging the wall, he could move slowly forward until his foe was silhouetted against the faint glow of the windows.

With his thumb he released the safety on his revolver. The slight metallic noise of it sounded loud against the hushed background of the room. The faint tang of tobacco was in the air. Where was that wall? Peter wished fervently that he had not advanced so far into the room. He did not dare raise his feet. Any collision with unseen furniture-any noise, no matter how slight-would betray his exact whereabouts to his quarry.

From beyond the door, the gates of the elevator clashed open and shut again. Even from this distance, the noise seemed unbelievably loud. Below in the street, a car changed gears. Queer, how outside noises drifted into this stillness here. He could even hear his own breathing. Peter stopped then, holding his breath. Perhaps he was close enough to hear the telltale whisper of the other fellow's breath-

There was no sound here-only the muffled distant noises from outside. Once more he moved cautiously forward. Again he stopped. This time it was the ticking of his own watch which disturbed him. If he could hear it, perhaps the other fellow could, too. He crouched, unbuckling the wristband, and slid the offending timeplece along the floor, several feet behind him, never once relinquishing his grip on the revolver.

Once more he peered about him, his eyes straining to pierce the blackness. Except for the barely discernible outlines of the windows, there was nothing by which he could get his bearings. He searched his mind for some memory of the room, some characteristic which might be of value to him now. He could think of nothing. Still, he could not be far from the wall opposite the windows. It was not an unusually large room. Once there, his chance of finding the other man, without himself being found, was much better. He resumed his cautious advance. His foot struck something. His grip on the revolver tightened.

He explored with his free hand. It was only a chair. He moved around it and advanced again, slowly, silently. And then he found the wall. With a feeling of relief, he backed against it, facing the room. If he were surprised now, it would not be from the rear. Then, still taking every precautio

If he appears to be indifferent to the comfort of others it is not to be worried about.

satisfying the urge that nature has put there. If he is to develop an assurance and self-confidence it is now that the seed is well-sown and fertilized.

It is quite common to give the little boy or girl material things to instill a feeling of natural pride. This is a mistake. To be sure he needs toys, and many of them, to keep him busy. Also it does set up the "possession complex" which is strongly associated with the "self complex." But when it comes to assurance of worth in himself, possessions alone fall far short of the

I thought you were convince that a woman couldn't have delivered that blow?"

"I'm coming to that." Peter hurried on impatiently. "Suppose, as we believe, that crime was committed by a man. That still doesn't eliminate this woman in blue as a possible motive for the crime. She might have been the daughter, sister or wife of the slaver. Wouldn't he still be interested in removing this evidence of her identity which might possibly identify him with the crime?

'We have a peculiar case. Sergeant. The knife with which the crime was committed; the curtain upon which it was wiped; the revolver bearing the slain man's thumb-print, and possibly that key-ring found in Franklin's pocket are the only real clues we have found. There has been an abundance of evidence, provided by the activities of eight or nine persons, most of whom had motives which might have actuated the murder. Theoretically, the theory upon which we are holding Webster Spears is sound. But since his arrest, this apartment has been rifled and we cannot afford to overlook the significance of this."

Peter paused in his restless pacing of the room to face his friend. "Suppose you were the man who murdered Franklin, and you had committed the crime because of this woman in blue. What would you be doing now? What would you be thinking? Put yourself in the criminal's place."

"I'd be trying to keep from getting caught," was the sergeant's succinct

reply. "Of course," Peter agreed. "But Now I"-he glanced at the conhow? fusion about him which marked the ent had been ransacked-"if I had been the murderer, I would be trying to remove any possible evidence that would connect me or the woman in blue with the crime. As for myself, I'd probably feel safe enough. But that woman would worry me. She loved Franklin. Probably he had letters, somewhere, or a picture which might ultimately reveal her identity to the police. And if they found her, it would be easy to find me, because the rl is some one in whom the murderer vitally interested—his sweetheart, ster or wife. That's how I would be figuring. Why isn't that the anr to the search that has been made of this apartment? This murderer is making his calculations in very much me way.

ed out. "Of course we

would not do to advertise his presence.

With the exception of one globe, burning in front of the elevator, and a red bulb at the end of the corridor. marking a fire exit, the floor was in darkness. Most of the doors were paneled with glass, so that a light within would betray their occupancy, but this was not true of the suite occupled by Franklin and Dunbar. A number of offices had been thrown into one large suite for this firm, and here a walnut paneled facade, with a solid door, barred the corridor.

Peter had not expected that. He hesitated in front of the door, keys in hand. What if the unknown visitor he was expecting were already here? Would he not be stepping into a trap of his own making? He frowned at the panels in search of some telltale gleam of light which would betray the presence of some one within, but if there were a light beyond that facade, he could not detect it. He tried peering through the key-hole, but it was a blind lock, with a key-hole only on the outer side, and defied the trick.

Well, it was a risk he had to take. He shifted the keys to his left hand and drew the revolver Kilday had loaned him. If his quarry were already here. Peter did not intend to be caught napping. Even as he took the precaution, the novelist chuckled at "I'm going in for melohimself. drama." he told himself. "There's no one here."

The first key he cautiously tried did not fit. He withdrew it and selected another whose irregularity seemed to conform with the outline of the slot in the lock. This time it fitted. There was only a slight click as he thrust the key home, but it sounded startlingly loud in the stillness of that corridor. How had the key made such a sound? Then he smiled at his nervousness again. "Don't get jumpy." he cautioned himself, as he turned the

key. The door swung open with a slight creak and Peter stepped into the dark office, his eyes straining to pierce the thickness of the gloom. His fingers groped for the light switch. It should mewhere near the door.

Then he stopped, rigid. Were his nerves playing tricks again? Or was there some one else in this room? He remembered that slight click that had startled him, outside. It hadn't been neaves, then. He recognized the sound now. It had been the throwing of an electric switch. Warned by the rattle of his key in the lock, w

against any sound which might betray his whereabouts, he sidled along the wall, his eyes exploring the room with slightly more success, now that he had the room silhouetted between himself and the windows. His straining eyes could identify a table, in vague relief against the window squares. Near by, a wide leather chair, whose blurred outline he was slow in classifying. Peter moved on slowly. His, back struck a picture on the

wall. It scraped against the plaster, but did not fall. He caught his breath and moved more quickly. If the fellow were tempted to shoot at the sound, it would be just as well not to be there.

Next he encountered a table, against the wall. His progress here was blocked. He would have to move around it, once more exposing his rear to attack. Again he paused to listen. He was tempted to believe that his nerves had deceived him-that there was no one else in this room, after all. And yet he could not forget that click of the light switch, before he opened door. Nor the odor of tobacco. And then there were the drawn blinds. Why should the shades of an office be drawn in this way? No, there was certainly some one here.

Peter thought of the picture he had nearly knocked from the wall. It had almost betrayed him. His fingers explored the table top. The incident had suggested a new strategy. If he could, by some means, cause the other man to betray his whereabouts, the rest should be simple. He found a calendar pad. Still gripping the revolver, he tossed the pad across the room with his left hand. It struck something, a chair probably, and slid to the floor with a noise that seemed uncanny in the unnatural stillness. His eyes ached with the effort to penetrate the blackness. Nothing happened. His enemy was too canny to be taken in like that, It irked him, and yet he yielded the

man a grudging admiration. It explained why the fellow hadn't attacked him as he came through the door. He was taking no chance of the struggle being overheard in the corridor. In that event, he might be in one of the other rooms by now. There might be an exit by way of a fire-escape. Or one of the other offices might have an entrance opening on the corridor. The fellow had had ample time to familiarize himself with the entire sulte. The thought hastened Peter's me He must capture the man, before he had opportunity to escape, (TO BE CONTINUED.)
