How It Started By Jean Newton

Suiting the Action to the Word

"S UITING the action to the word, he bauled off and landed a punch quare on the jaw, laying the man out at his feet."

We have that from a boxing story in a current magazine. Quite a contrast in language, the vernacular hauling off" and the elegant "sulting the action to the word," though the latter is a familiar phrase in modern writing. To say something and then do it, to threaten or describe an action and then carry it out, is to suit the action to the word.

In its origin, however, the expression had a more technical significance, the words being addressed to actors who were being instructed as to their gestures, and told to "suit the action to the word."

We have the phrase from that famous passage in Shakespeare where Hamlet gives advice to the players by whose performance he expects to confound his mother and his uncle. He has just told them not to overdo their gestures. Then, "Be not too tame." neither, but let your own discretion be your tutor; suit the action to the word, the word to the action, with this special observance, that you o'erstep not the modesty of nature." GEORGE MANNERS was very much in love with Mary Lascelles, of Middlesex, England, and proposed marriage to her.

She was an orphan and lived with her brother Edmund, but for some unaccountable reason he opposed the match.

The girl, who was one of the beauties of the neighborhood, was very fond of her brother, and in deference to his wishes she consented to postpone the wedding for an indefinite period.

Love deferred is very likely to be love enkindled, and George Manners was more than ever desirous of making the girl his wife.

They corresponded frequently, and one night Manners called unexpectedly to renew his suit.

The brother was not at home at the time and Manners consented to wait and see him.

The interview between the two men was not a pleasant one,

They retired to an adjoining room, and when they emerged, twenty minutes later, Manners had a very flushed face and Edmund Lascelles wore a look of dogged determination.

On leaving, the suitor offered to shake hands with Lascelles, but was repulsed.

As he left the house he freed his mind:

"I've asked you for the hand of you: sister for the last time. I have tried to be nice, but my patience is at an end. The next time we meet the results may be a little different."

The girl was naturally distracted at this guarrel between the two men she loved most.

Lascelles was morose and silent for long time and then he took his hat and left the house.

Shortly after ten o'clock that night two men came to the door of the cottage, carrying between them the dead body of Edmund Lascelles.

It was a terrible shock and Mary almost fainted. But before she had time to recover, George Manuers came to the house, with his face and hands marked with blood.

He said that he had found the body in a ditch and had sent the men home with it while he remained to try to find some clue to the tragedy.

The circumstances were all against George Manners.

Nearly everybody was positive that he had murdered Lascelles, and it must be admitted that the evidence was against him.

But there was one who accepted his protestations of innocence and that was Mary Lascelles, the sister of the victim.

She did everything in her power for him at the trial, but in spite of that he was convicted and condemned to death.

It contained a costly sapphire ring that he had been in the habit of wearing.

No trace of the missing hand had been obtained before the trial of Manners, and when the detective-James Shropshire-began his belated task he kept this fact steadily in mind.

What had become of the hand containing the sapphire ring?

That was the question he asked bimself, not once but a hundred times. The first clue that he obtained was in the nature of footprints around the Lascelles home.

Although many weeks had passed Shropshire found footprints in the grass.

These prints were carefully mean ured, as they did not correspond with the size of Manners' shoes.

The detective sought the village shoemaker and learned that they were about the size of the shoes worn by a farmer named James Parker.

More than this, the footprints when followed led to the house of this man, An examination of his barn disclosed a knife that had been hidden in one of the stalls.

There was a loose board in the floor of the barn, and when this was removed the detective found the miss ing hand buried in the earth.

Parker, confronted with the evidence, confessed that he had mur dered Lascelles.

He said he had been tempted by the sapphire ring, glistening in the moonlight, and that being unable to get it off, had severed the hand from the arm.

He was tried and condemned and soon after that George Manners and Mary Lascelles were married. WNU Bervice.

Predicts New Ice Age For America

10,000 Years.

London .- Another Ice age, in which the polar cap will creep far down into Europe and North America, is coming In ten thousand years or so, says Dr. G. C. Simpson, director of the British meteorological office.

it will be followed by a warm era, when the semitropical conditions, in which monstrous saurians splashed under giant ferns in what is now the United States, will return.

Deserting the rule which he enforces to his own office, that weather forecasts must be limited to the next 48 bours, Doctor Simpson told what it would be like on the earth hundreds of thousands of years ahead.

He based his prophecies on a the ory of solar changes which he has lately shown to be confirmed by the story of world weather in the period covered by the last four Ice ages.

Sun's Heat Changes.

It is the sun's heat, he says, that changes. A complete cycle of change takes anything from 100,000 to 1,000. 000 years, and the difference in radiation represents a range of about 40 per cent.

"We are at present approaching a minimum," he said, "and our climate is cold, and dry. All the evidence points to the conclusion that the earth will continue to get colder and drier for a long time yet." But even after the sun's radiation

has begun to increase again, he explained, Europe would have to go

Savant Says It Will Come in through another Ice age before we once again got really warm weather, with temperatures from five to ten degrees higher than they are now and, no doubt, another influx of semi-tropical

life. An increase in solar radiation, he said, would mean that there was more difference in temperature between the equator and the poles. There would, therefore, be stronger winds, more cloud, and more rain and snow.

"At first," he explained, "the increased precipitation would result in greater accumulation of snow, and the increased cloud would prevent summer melting. The polar ice caps and the ice fields on mountains would extend, spreading into lower latitudes and down to lower heights."

Warm Period to Follow.

That would bring the next Ice age to its maximum tens, perhaps hun-dreds of thousands of years hence. Then, as the sun's radiation further increased in strength, the ice would be first checked in its advance and finally melted. There would follow the warmest time of all, "a warm, wet interglacial period," with half as much cloud again as there is now.

Next, as the sun's radiation began to decrease in intensity again, the same sea of changes would be reversed, and after another Ice age we would drift slowly back to present conditions. We should have had two Ice ages in the course of the one solar cycle, while in the tropics there would have been a single wet period corresponding with the wet, interglacial perlod nearer the poles.

When the next Ice ages are on; the Atlantic will be a much less healthy place for ships than will the Pacific. It will be largely filled up with ice, because Arctic ice has a much greater tendency at this time to drift down by that route than into the Pacific.

Cherry Jelly.

(Any kind except wild cherry or chokecherry). 3 cups (11/2 pounds) juice 61/2 cups (2% pounds) sugar

1 bottle fruit pectin. To prepare juice, stem and crush about three pounds fully ripe cherries. Do not pit, Add one-half cup water, bring to a boil, cover, and simmer 10 ninutes. (For stronger cherry flavor, add one-fourth teaspoon almond extract before pouring). Place fruit in jelly cloth or bag and squeeze out juice. Measure sugar and juice into large saucepan and mix. Bring to a boll over hottest fire and at once add fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard one-half minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once. Makes about nine glasses.

THE problem of keeping your ward-robe spic and span when traveling or on a vacation, and at the same time not increasing expenses materially, is one which the suggestions given here should help to solve. Speed of the work is needed also. When garments are sent to be laundered, several days are generally required for the job. In the meantime you are minus clothes

Lay the article to be pressed smooth ly on it, or in pleats according to the way the garment is made. With a damp piece of cloth (a clean handkerchief or a face cloth will do), rub the wrinkle gently until it disappears. The moisture will do the work quickly. Continue rubbing lightly until dry and smooth. Many wrinkles can be taken out in a few moments. Mussed places respond to this same treatment. Hang garments carefully on coat hangers being sure to have shoulders fitted smoothly over hangers.

Laundering Handkerchiefs. Handkerchiefs can be laundered well by washing in cold water first, and then in hot preferably. Stretch smooth on any hard smooth surface. Window panes offer just the right surfaces but it is unwise to use them as they show from the outside, and objections will

be raised. A mirror or the marble

places supply good surfaces. Stockings and wash gloves of all kinds can be kept spotlessly clean with very little labor. When worn they will stretch smooth. Fancy cuffs to gloves can be carefully pressed and smoothed by rubbing as in cold water pressing. Then arrange smooth and flat and put under a weight. If a book or magazine is used for the weight, be sure to cover it well with paper, and place a sufficient thickness of dry white cloth (a thickness of towel for instance) over the gloves to absorb any dampness. Never use any but an old or cheap book.

It is wise to have crinkly crepe night gowns, silk crepe of this sort can be bought, and gowns made of it also. These will launder beautifully and should never be ironed anyway. Glove silk lingerie is recommended for easiness of laundering at no extra cost. C. Bell Syndicate .--- WNU Service.

No Perfect Vacuum

Completely empty space probably does not exist anywhere in the universe, according to studies made at Mt. Wilson observatory. These studies showed that the region be tween the stars is an excellent but not a perfect vacuum, there is about one atom of matter in every cubic inch of space. A single drop of water, containing about one thousand bill lion atoms, would furnish enough matter to fill three and three quarter million cubic miles of space to that density .-- Literary Digest.

ago, we are seriously impressed with the absence of this element of chivalry. The so-called modern novel makes its appeal to sex and the morbid depressions, with delineations of character largely in the field of psychoanalysis. This is not true of all literature which has come from our press or that of Europe, but is quite characteristic of what we call the American novel. Books of this nature have been sold in large quantities, which indicates a demand of a certain type. On the other hand, books on philosophy and biography have had an equally large sale, which clearly indicates that popular demand was not wholly on the side of the novel.

In one of our leading magazines there recently appeared a cartoon which pictured a movie-producer looking out of his window at a crowd waiting to gain admittance to a theater where the film "Little Women" was on the screen. He could not understand why such a picture appealed to so large a crowd and remarked. "It is not in accord with human nature." One needed only to glance at the walls of his office, filled with salacious pictures, to understand how grossly he was misled in judging the demands of the popular mind. Movie producers have sensed this very fact and are now filming novels of recognized literary merit. Perhaps we shall soon have a new era for the novel as we m to be promised for the movies. . Marquette, Mich.-The Upper peninsula, agriculturally speaking, has its eye on a downstate farmer, starting in on a new place in Baraga county, who planted some strange seed beans that he had picked up, no one, not even the planter, knows where,

The Upper peninsula was not a bean country; they couldn't be grown successfully, farmers said. But in the fall of 1930 the farmer harvested a good sized crop. An agricultural agent noticed it, and spread the word. This year at least 200 acres of the beans have been planted. The bean, apparently some form

CHAPTER XIV-Continued -17-

"They would kill us both-because we know too much about them-they are breakers of the law-outlaws across the Border. Me they stole three nights ago-my man they would hang in the sun to die the slow death -and me they would give to this one

-and to their followers after." Two Fingers looked at her with quiet

"It is good," he said, "that we come."

"Ob-good !" she cried. For another moment the tall Indian

looked at her. Then he stooped and caught Manuel

as one takes a child and raised him cross-wise above his head.

Two Fingers was a tall and powerful man, and he looked like some ancient god of his fathers as he strode toward the mesa's lip.

In one horrifled second Sonya Savarin saw what he would do, and a scream escaped her, but Starr Stone turned ber face.

And Two Fingers, walking steadily toward that sharp rim, paused on its edge and cast his shricking burden far out to the empty space below.

Hard on his heels came Hosteen Nez and Hosteen T'so, with El Diablo, fighting every inch, between them. "Quince!" he cried as he passed.

"Save me and all I own is yours !" "Remember those who fed the vultures, senor," said Starr Stone, "whose bones dried in the sun. Remember the women !- the children starved ! It is your fate."

"Save me-Quince-save-" But the wind of his falling snatched

the last word from his mouth. And there was silence on the mesa's tim, five people standing still for one

preathless moment. And then three horsemen came up over the debouching lip of the ancient trail; while a fantastic form with long white hair on its shoulders was seen to emerge from some hidden cranny of the pueblo. Serge Savarin, Rodney Blake, and Mr. Marston rode forward In astounded haste; the Servant of the Lord came up between them all.

"Sonya !" cried her brother. "Oh, my God! Where have you been? What's happened to you ?"

But Rodney Blake sat silent, his aarrowed eyes taking in the group before him: the haggard woman, the scarecrow man with his right arm around her, the Indians, and the mad old preacher of the Word, And Sonya Savarin looked back, her mind racing for the words which she must say, the tale she must tell. With guarded eyes she glanced ground: at Two Fingers, at Hosteen Nez. at Hosteen T'so : these three who had cleared the world of danger for her, who had saved her and hers from death.

Diablo would never need again, trained on them both, At that grim command Rodney Blake stopped in his tracks, the other behind him.

"You, Mr. Savarin, have a right to know that your sister is free as the wind to choose-her man and her life. If I am that man, I give you my word that she shall not regret her choice through me. If that life is with me, I give you my word again that it shall be all that I can make it with my heart's very blood. But she shall choose. Sonya-remember, you are free."

"Free !" the girl cried. "And I have already chosen! To the end of life I choose you, Starr Stone."

Once more the other turned his head, put his free arm round her, smiled down with his wild blue eyes that were midnight dark by now. Then, "Padre," he said to the Ser-

vant of the Lord, "can you say the marriage service?"

"Surely, my son," the old man answered softly.

"Will you say it, here and now, for her and for me?"

"Gladly. The young heart must have its mate while the world is new. All things lose their brightness, and youth is short at best."

The shabby, thin old figure moved

forward with a strange dignity. "Thy right hand, child," he said to Sonya, "and thine, son. No," shaking his silver locks, "not with that engine of destruction in It."

So Starr Stone changed the guo from his right hand to his left, but its blunt nose never wavered from its mark. He took Sonya's hand, and with his eyes fixed on the faces of the three men held at bay before him he began to answer the lovely ques-

Hand-Knit or Crochet's the Thing!

By CHERIE NICHOLAS

THE HEDLEY INFORMER

It's a veritable knitting and crochet marathon the fair sex is staging.

For proof positive that fashion's followers are knitting and crocheting like mad in their leisure hours, just try to sidestep the hanks of bright yarn and the balls of gay crochet cotton which pop out at most any time and place from within the depths of the capacious "knitting bag" which most every woman carries along nowadays wheresoever she goes.

Of course there's a reason for this increasing enthusiasm among those who hand knit and crochet, and it's this-the news is going out from style centers everywhere that the vogue for things hand-knit or crocheted is extending not only into the fall but it promises to become even more exciting and fascinating as winter draws nigh

You can see for yourself from this group illustration that the newer ideas nothing less than inspiring. worked in a tight firm stitch-alto are Wouldn't you just love to have an' gether a model which glorifles the art ensemble like the one pictured, two views of which are here given? This adorable model is a Hermes creation, les from the this famous designer of hand-made fashions. The three pleces, jacket, skirt and blouse, are worked of knitting and crochet cotton, a heavy thread which comes in exquisite colors and will wash like new. It is practicable for early fall wear. Notice the cord fastenings, the draped cowl at the back of the jacket and the crochetcovered buttons-style details which fairly tingle with individualized chic. You can get this crochet cotton at most any fancywork department, and it is not at all expensive. The lines of the handsome suit shown to the left are severely simple but literally packed with smartness.

The classic tailored appearance of this patrician two-piece gives it surpassing distinction. It is knitted, as is also the roll-brim hat, of knitting and crochet cotton, the kind that is dependably washable and wearable. New notes are offered for the knitter in its high, round neck, clever hipline which savors of a peplum effect and the unusual trimming detail on the front of the blouse in the form of simulated pockets together with

vertical markings which tend to slenderize. Also from a recent Paris collection comes the high-style blouse pictured in the foreground. The diagonal stitch which is of unusual interest gives slimming lines and there is a nicety about every detail which makes appeal to discriminating taste. The collar with its frilly jabot and the turned-back cuffs are dramatic touches which greatly enhance. The belt is neatly

Besides the many alluring and novel details which beautify the newer modes, an outstanding play is being made on color. Just now fashion-informed women are choosing rich mossy greens, forest green being a favorite. Wear velvet accessories in matching green including scarf, beret bag and belt and you will be delighted with results. Rust color and allied copperish browns play a close second to the voguish green. She looked bravely in the three men's eyes, her low voice clear and quiet, even though she could not help the little gaps between her lying words. 'Is it not so?" she asked of Two Fingers, turning.

"It is so," the Indian replied.

"And you, Hosteen Nez, Hosteen T'so? Have I not spoken truly?" "Truly," these said quietly, nodding, their English limited.

"My heaven!" said Serge Savarin. "My heaven! But who is this man with you? It seems I ought to knew. Where have I seen him?"

"You have never seen him," said Sonya swiftly, "and he is my own man. I've known him since the spring. I've meant to tell you, Rod, for months that you must let me go-that I can never marry you. I think I never knew what love could be before. Now I am irrevocably lost to you, my life set to this man's life. Forgive me."

Rodney Blake did not move, his hands clasped on his pommel. "Sonya," he said, "I know this man.

"And wilt thou, Sonya, take this man, Starr, to be thy lawful husband -to love, honor, and obey . . . Sonya's clear "I will" sounded in

the high silence like the tones of a distant bell. Then Starr Stone bent and kissed her swiftly.

"The covenant," he whispered, "forever and forever."

"Forever," she repeated.

"Padre," said the man, "for this service I give you my deep thanks. Some day I'll give you gold. Gentlemen, I warn you, stay where you are. I'm leaving with my wife."

And backing away, with Sonya in the circle of his arm again, he went step by step toward the plane.

Once in its shadow he lifted her to her seat, reached for the belt, drew the buckle.

Sonya clung about his neck, laughter in her throat, tears on her cheeks, "Where?" she cried. "Oh, Starr, where?"

"To a new life," he said steadily. "to a new world-to the West."

"Wait," she said, "one minute while I leave the old."

She leaned out and called into the silver shadows where the three men

"Serge dear," she said clearly, "don't forget me ever-and forgive me if you can. My love to you always, and to Lila and to Babs. Keep Darkness for me. Rod-dear Rod-forgive me too. And Mr. Marston, if you're quick enough and smart enough, you may find that one who sends the contraband to your city-at the store in town. Good-by, Serge-some day I'll be coming back. Until then, God keep you."

She changed swiftly to Navajo

"Two Fingers," she called, "Hos-teen Nez, Hosteen T'so-my hand on my heart to you-my people-my friends. I shall not forget."

And presently there was the roar of the motor, the trembling beneath her as the little gray ship came to pulsing life, Starr Stone in the pilot's seat, the moving of the moonlit rock of the mesa's top, the turn, the surge, the gathering speed, the lift, the thrill of quiet as they lost contact and sailed away across the mesa's rim. Swiftly they rose, and the tall stars came down to meet them, glorying.

As they had faced together bravely death and danger and disaster, so not they faced together bravely life and all it held for that white fame of nortality which lights all mortal flesh, true love,
