LUNCHEON CLUB

The Hedley Luncheon Club held its regular meeting Tuesday night at the Cooper hotel. After an excellent meal was enjoyed, a number of interesting discussions were given on various projects for this community.

Work on highway 52, putting callie on some of the Hedley streets and several other important topics were discussed. A group of the club members plan to attend a meeting to be held at Quail next Tuesday, when definite plans will be made for work on highway 52.

One of the most interesting talks of the evening was made by Rev. A. V. Hendricks, who advocated a Boy Scout troop for Hedley. The suggestion met with the approval of the club, and president Noel appointed a committee to take care of the necessary preliminary steps. At the conclusion of the business session, the club adjourned, to meet again Tuesday, June 25.

Having observed Frank Kendall going about with a broad smile on his face, we ask the reason for the pleased expression, and learned that it was all on account of a new granddaughter, which was born to Mr. and Mrs. Buford Hines of Tye on Thursday, June 6. The young lady has been named Marjorie Anne. Mrs. Hines was formerly Miss Virginia Kendall.

REVIVAL

A revival meeting will begin at the Church of Christ Sunday, July 21, and will continue to Sunday, July 28. John E. Banister of Memphis will do the preaching. Everybody invited.

L. A. Stread left Wednesday for a visit of several weeks at Marlin.

Frank Heath underwent an operation in an Amarillo hospital Monday. He is reported getting along very well at present.

Mrs. H. H. Hall returned Monday from a visit in Denton and Decatur. Jane Ruth and Bobbie Lee Hall, who have been visiting their grandparents in Denton, returned home with her.

Mrs. J. G. McDougal returned to Dallas Tuesday night, where she will resume medical treatment.

Mr. and Mrs. H. M. Horshler and son, G. C., are visiting in San Antonio.

For windmill and well repair work at reasonable prices see Mack Shaw. 814tp

The owners of all cows caught loose on my property will be charged \$1.00
C. E. Thompson

We have Fly Dead in the small cans 15c B & B Variety

We are now stocking wall paper and canvas. See us before you buy. 29 3t
Cleare Smith Lumber Co.

Bawberries selling at W. J. Luttrells. Two miles west of Hedley. 30 8tp

Morse Rose cotton seed \$2.00 per bushel. Also some Quail seed \$1.00 per bushel.
See Roy C. Jewell

SCHOOL GETS CREDITS

W. C. Payne, superintendent of the local schools, has received a letter from J. W. O'Banion, director of the Division of Supervision of the State Dept. of Education, stating that the supervisor who visited the Hedley schools recommends that credits be granted as follows: Commercial Arithmetic, 1 unit. Commercial Law, 1 unit. Agriculture, 1 unit.

Hedley high school now has 2 1/2 affiliated units.

Mr. Payne states that high school students who finished a course the past year with a D average will be given an opportunity to gain credit on the course by a special examination to be given at the beginning of the next school term.

YOU'RE-SETTLE

A surprise to their many friends was the marriage of Miss Helen Settle and Gene D. Youree which took place Thursday, June 6, at the Methodist parsonage in Memphis. Rev. T. J. Res, pastor, officiating. J. D. Shaw and Miss Ruth McQueen attended the couple.

The bride wore a 'going away' suit of tan and green, with accessories to match. She is the daughter of Mr. and Mrs. H. B. Settle of this city and is very popular among the younger set, having been elected queen of Hedley High School this year. She was a member of the 1935 graduating class.

Mr. Youree is the son of Mrs. N. E. Youree of Fairplay, Colo. He has lived in Hedley most of his life and has a host of friends here. He is a graduate of Memphis High School, having finished with the class of 1933. He attended West Texas State Teachers College at Canyon in 1934.

The couple left, with best wishes from their friends, immediately after the ceremony for a honeymoon trip in the Rocky Mountains and in Southern California.

After July 1, they will be at home to their friends in Denver, Colo. where Mr. Youree will be employed with the Eureka Sugar Refining Co.

Miss Je Ella Stewart, society editor of the Clarendon News was a Hedley visitor Saturday.

Mrs. John Aafil has returned from Decatur, where she has been at the bedside of Mrs. A. G. Nipper, who recently underwent an operation. Mrs. Nipper is reported doing nicely.

ALLRED IN CLARENDON

Governor Jimmy Allred visited in Clarendon last Friday morning and attended a breakfast given in his honor. He was en route to the Young Democrats Convention in Amarillo.

Born, to Mr. and Mrs. Ott Sunders, Thursday, June 6, a fine 9 lb. girl baby.

Mrs. Ed Golladay visited in Wichita Falls last week end.

W. T. Hall returned this week from an extended visit at Sildell.

O. E. Culwell and wife visited in Clayton, N. Mex., the past week end.

Miss Emma Lowell Plunk visited in Memphis over the week end.

Modern Mother

By MAUD ENLOW BARZE
McClure Newspaper Syndicate
WNU Service

JEANNETTE was washing the kitchen window when she saw the roadster turn into the drive next door. Jim's tricycle was on the driveway. She ran out quickly and grabbed it up.

The roadster had stopped. A young man was alighting. He grinned and called out, "Thanks, but you needn't have bothered."

Jeannette gave an answering smile as she pushed her tumbled hair back from her face.

She was wishing she had powdered her nose.

"This moving business and trying to keep up with a boy of three—" she began.

"Is something else I can well imagine," he interrupted.

The tanned face that was undeniably handsome broke up into patchy twinklings. Brown eyes assured understanding.

"Are you settled?"

"No, not all, of course—"

A scream rent the air.

Jeannette cried, "It's Jim!" and ran toward the garage whence the sound seemed to emanate.

The young man followed.

Halfway up the inside of the garage hanging perilously to a wobbly board that had pulled loose at one end, was Jim.

"Aunt Nette, I've falling!"

"Hold tight. I'll get you, darling."

But big masculine arms helped Jim down.

"Thank you, so much, Mr.—" Jeannette hesitated.

"Cameron. George Cameron. Your next door neighbor."

"And I'm—"

But Jeannette had no time for more.

"Jim!"

The youngster had tripped on a can of paint and was sprawling in a pool of vermilion lacquer. His eyes were enormous.

"The bleeding, Aunt Nette!"

"No Jim, it's paint. And gracious! What a mess!"

George whistled. He picked Jim up gingerly and stood him away from the pool of paint. His eyes were turning somersaults of merriment as they met Jeannette's.

"Looks as if you had a job on your hands."

"Kather!"

Jeannette's eyes danced as they watched the young man's mouth curl with laughter.

"Say, your nose crinkles when you laugh," he announced approvingly.

They laughed together then forgetful of Jim.

George walked into the house the back way.

He was thinking.

"Antoinette, eh? One of those modern mothers. Lets her son call her by her first name. Well, a darned cute one."

His eyes sobered.

He thought of her all through the day.

Jeannette was undressing Jim that evening when the telephone rang. "It's a girl," said Bob's husky voice.

"Oh Bob, that's great. How's Marie?"

"All right, they say. Anyway I'm staying awhile. I'll be home later."

Jeannette swallowed a lump in her throat.

"Jim," she said, "you've a new baby sister. Your daddy just called."

She smiled and hugged him, but tears came to her eyes.

She suddenly remembered the young man next door. George.

The next afternoon Jeannette and Jim were in the back yard when George drove up again.

Jim went tearing across to the car on his tricycle. He hit a bump and fell in a heap and began to cry lustily.

George retrieved the tricycle and Jim and handed the latter over to Jeannette.

"He seems to have a flair for it," he told her, grinning.

Jeannette dried the little fellow's tears and told him to play with his wheelbarrow while but Jim wanted only his tricycle. He got on it and soon had tumbled again.

"Bull-headed, eh?" George teased her.

"No, pincky," Jeannette said mischievously.

"Just like his daddy."

"Oh-h I see," George said but he was thinking, "The lucky bum!"

Jim came up and pulled George toward the car.

"Take me a ride," he begged.

"O. K., little man. I'm just going up to the next town. Five miles. I'll be glad to take you if—"

His eyes met Jeannette's.

"Say, why couldn't you go, too? We'd be back by five."

"I'd love it. Just so I'm back in time to fix Bob's supper."

George thought as he opened the door for them to get in:

"If Thalia had been like this—caring about a home, a baby, supper—"

The ride was stimulating. Jim's giggles and chatter. Jeannette and George talked, laughed, fell silent. But the silences were pleasant, too.

"I'm taking you to see my new house. It's just finished. They're putting on the last lock today."

"A new house? How lovely! And it's really yours?"

"Yes. Mine."

"You—you must be going to get married," Jeannette said finding a little catch in her throat as she said it.

"I thought I was but it seems that I'm not."

George spoke without hesitation.

"Oh, I'm sorry," Jeannette said in a tiny voice feeling her heart leap with joy.

They explored the house to its last lovely detail. As they stood in front of the fireplace Jeannette said slowly, softly, "I'd love a little home like this."

A crash came from the kitchen.

"Jim!"

They ran out together to find him all mixed up with a stepladder on the kitchen floor. There was a big knot on his forehead.

"I want my mamma," he yelled.

"Aunt Nette's got you, darling."

"No, no. I want my mamma!" he insisted.

George's mouth snapped open.

"You aren't his mother?" he shouted. His intense brown eyes were demanding an answer as if it were very important.

Jeannette was mystified.

"Why, no! You didn't think—?"

"Of course I did. I've a notion to spank you."

George took her arm; pulled her toward him.

"I supposed of course you knew. His mother's in the hospital with a new baby. I'm her sister."

The rest was smothered against a tweed shoulder.

"I won't ask for more than a hug—yet—" George said close to her ear.

But he helped himself to more than one.

Peruvian Mummies Are Shown at Field Museum

An exhibit of so-called "mummies" and reproductions of two opened graves of ancient Peru are shown in the hall of Central and South American archeology at Field Museum of Natural History.

The mummies, which differ greatly from those of Egypt, are more exactly described as desiccated bodies. These were packed in bundles, which were found buried at a depth of several feet in the famous necropolis, or burying ground, of Ancon, Peru.

Two of the mummy packs have been opened, revealing the bodies inside. They are in a good state of preservation, due, according to J. Eric Thompson, assistant curator of Central and South American archeology, to the extreme aridity of the coastal plains of Peru.

The majority of Peruvian mummies were not artificially preserved, but in some cases the bodies were eviscerated, while in others resin was applied as a preservative.

The graves which have been reproduced date to the period about A. D. 1250. One contains three mummy bundles, apparently two women and a small child. The sex of the two adults is indicated by women's work baskets which were buried with them and which appear among the contents of the grave as now exhibited. Bags of coca leaves, which the ancient Peruvians chewed as a stimulant; silver ornaments, spindles and other objects are also included in the grave.

The second grave was covered by a roof two feet below the surface of the ground. This was elaborately constructed and is among the best preserved found at Ancon. This roof, shown in the exhibit, consisted of three inches of hard white clay, beneath which were a layer of plant leaves, two mats of reeds and rafters of algarroba wood.

Wall Paper

In the olden days of the feudal lords, the walls of their castles were hung with rich embroideries and handsomely woven tapestries. These served a double purpose, to decorate the walls and to make the huge, drafty rooms less cold and bleak. For many centuries walls were decorated only with hangings, until finally some clever person thought of imitating these hangings in heavy paper and of using this paper for wall decorations. This was a very successful idea, and in 1790 a wall paper factory was established in the United States. The first wall papers were quite expensive, but they were also very durable. After a great deal of experimenting there were developed cheaper types of wall paper, and since the beginning of the Nineteenth century paper has been in general use for decoration of walls in many countries of the civilized world.

Digging Through the World

A widely accepted theory regarding the earth's make-up is that a solid crust, corresponding to the rind of an orange, encloses a molten interior corresponding to the pulp, says Tit-Bits Magazine. This theory is supported by mining and boring experience which shows the average rise of temperature downwards to be one degree Fahrenheit for every 50 or 60 feet. Thus at 50 miles the temperature must be 4,900 degrees, or far higher than the fusing point of platinum, which melts at 3,080 degrees. The late Lord Kelvin declared that this planet could not maintain its shape unless the supposed crust were 2,500 miles thick, and concluded that the mass of the earth "is on the whole more rigid than a continuous solid globe of glass of the same dimensions."

Philadelphia, Publishing Center

Philadelphia publishes more medical books than any other city and more than half of the Bibles printed in the United States. Sixty per cent of the surgical instruments manufactured in the country are made there.

The Four Flush

"A four flush," says Cactus Joe, "is entitled to a certain amount of respect as somethin' to build on. It's mostly objectionable because of efforts to improve it from the bottom of the pack."

Pleated Sleeve Gives Striking New Effect

PATTERN 2212

A pleated sleeve that forms an epaulet shoulder is new and creates a striking effect. (Note the back view, too.) Add to that, the center front buttoning that is so much the rage, soft gathers above the bust line, and a patch pocket, and you've a shirtmaker frock of unrivaled chic. It's a grand thing to jump into for that unexpected jaunt, and is smartly at home in practically any daytime environment. Make it in a new printed linen or cotton, or a cravat silk. It's stunning, too, in plaided or striped sports seersucker or cotton.

Pattern 2212 is available in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 16 takes 3 1/2 yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

SEND FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for this pattern. Write plainly name, address, and style number. BE SURE TO STATE SIZE.

Address orders to the Sewing Circle Pattern Department, 243 West Seventeenth Street, New York City.

SMILES

UP AGAINST IT

A Cockney woman was addressing her small son, who looked rather guilty.

"Wotcher bin a doin' off?" she demanded suspiciously.

"Nuffin'," replied the small boy.

"Wot are yer doing, then?"

"Nuffin'."

"Wotcher goin' ter do, then?" she persisted.

"Nuffin'."

"Well, then," she exclaimed, giving him a sound cuff on the ear, "take that, yer lazy little brat!"—Bystander.

Power

"Why did that actress marry her press agent?"

"She wanted security," said Miss Cayenne. "She let him understand that if his compliments did not continue to please her, he'd lose his home and his job both at once."

Suggestive

"Stop playing 'Falling Dew'!"

"Why, pa?"

"It reminds me of the rent."—Everybody's Weekly.

SHERIFF'S NOTICE OF SALE

The State Of Texas, County Of Donley
By Virtue Of An Order Of Sale issued by order of a judgment of the 100th District Court of Donley County, Texas, by the Clerk of said Court, on the 15th day of May, A. D. 1935, in a certain suit No. 1870, wherein The State Of Texas is plaintiff and W. E. Leake, H. B. Leake and the Baptist Foundation of Texas are defendants, in favor of the said plaintiff, for the sum of Three Hundred Fifty Five and 51/100 Dollars for State and County taxes, interest, penalty and costs, with interest on said sum at the rate of six per cent, per annum from date fixed by said judgment, together with all costs of suit, that being the amount of said judgment rendered in favor of said plaintiff by the said 100th District Court of Donley County, on the 11th day of April, A. D. 1935, and to me directed and delivered as Sheriff of said Donley County, I have seized, levied upon, and will, on the first Tuesday in July, A. D. 1935, the same being the 2nd day of said month, at the Court House door of said County, in the City of Clarendon between the hours of 2:00 o'clock P. M. and 4:00 o'clock P. M. on said day, proceed to sell for cash to the highest bidder all the right, title and interest of said defendants in and to the following described real estate, levied upon as the property of said defendants, the same lying and being situated in the County of Donley, and State of Texas, to wit:
Section 15, Block 23, Abstract No. 106, H & G N. Ry. Survey, or upon the written request of said defendants or their attorney, a sufficient portion thereof to satisfy said judgment, interest, penalties and costs, subject, however, to the rights of the plaintiff for any other or further taxes or against said property that may not be included herein, and the right of redemption, the defendants or any person having an interest therein, to redeem the said property, or their interest therein, at any time two years from the date of filing of purchasers deed by paying 10% the first year or 20% the second year of the amount paid for said property, and subject to any other and further rights the defendants or anyone interested therein, may be entitled to, under the provisions of law. Said sale to be made by me to satisfy the above described judgment, together with interest, penalties and costs of suit, and the proceeds of said sale to be applied to the satisfaction thereof, and the remainder, if any, to be applied as the law directs.
Guy Pierce, Sheriff of Donley County, Texas.
By Guy Wright, Deputy.
Dated at Clarendon, Texas, this 18th day of May, A. D. 1935

REVIVAL

The B. M. A. revival will begin this year the first Sunday in August. Rev. Dick Holcomb of Amarillo will do the preaching. The public is invited.

WHOSE WORD WILL YOU TAKE FOR BLOWOUT PROTECTION?

Low wheels, larger tires, and the high speeds of today make blowout protection in your tires vital to your safety as never before. Are you accepting exaggerated and unsupported advertising and sales claims—or are you accepting the judgment of men who risk their lives on their tires and know from experience the tire that gives them the greatest blowout protection?

Thirty-three race drivers and their mechanics lined up for the dangerous, grueling grind of the 500-Mile Race at the Indianapolis Speedway May 30th. Firestone Tires were purchased and used on every one of the thirty-three cars. Not one of the drivers had tire trouble of any kind.

Gum-Dipping is one of the outstanding reasons why Firestone Tires give such amazing performance. By this process every cotton cord is soaked and every strand is insulated with pure liquid rubber, preventing internal friction and heat, the main cause of blowouts. Gum-Dipping is a patented extra process not used in any other make of tire.

Protect your life and the lives of others by equipping your car with Firestone Gum-Dipped High Speed Tires—the safest tires built. It will be worth your time to read these three questions and their answers:

QUESTION 1—"Will the tread give me the greatest traction and protection against skidding?"

ANSWER—Leading university tests show Firestone High Speed Tires stop your car 15% quicker than the best of other popular makes of tires.

QUESTION 2—"Are they built to give me the greatest blowout protection?"

ANSWER—Unequaled performance records for sixteen consecutive years prove that Gum-Dipping gives you the greatest blowout protection ever known.

QUESTION 3—"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

ANSWER—Thousands of car owners report unequalled mileage records—evidence of the longer wear and greater economy of Firestone High Speed Tires.

\$7.45 HIGH SPEED TYPE Gum-Dipped
We select from our enormous stocks of raw materials the best and highest grade rubber and cotton for the High Speed Tire. In our factory we select the most experienced and skilled tire makers to build this tire. It is accurately balanced and rigidly inspected and we know it is as perfect as human ingenuity can make it.

SIZE	PRICE	SIZE	PRICE
4.50-21	\$7.75	4.75-19RD	\$10.65
4.75-19	\$8.20	5.00-19RD	\$11.05
5.00-19	\$8.80	5.25-18RD	\$12.20
5.25-18	\$9.75	5.50-17RD	\$12.75
5.50-17	\$10.70	6.00-17RD	\$14.30

Other Sizes Proportionately Low

1 University tests show Firestone tires stop cars 15 to 25% quicker

2 Gum-Dipped cords give greater blowout protection. Gum-Dipping is not used in other tires

3 Wider, flatter tread gives more than 50% longer non-skid wear

The MASTERCIPCE OF TIRE CONSTRUCTION

Volume—Direct Purchasing—Straight Line Manufacturing and Efficient and Economical System of Distributing to 500 Stores and to 30,000 Dealers, enables Firestone to give greater values at lowest prices

DOLLARS WASTED ON UPKEEP CAN'T BUY NEW ROADS

INFERIOR roads seem cheap and easy to build. They stretch a paving fund so that it covers a lot of territory. But after a year or two, the trouble begins! Maintenance costs go up and up.
That's why it's wise—and economical—to build concrete roads. Concrete lasts! It requires almost no upkeep.
Concrete's smooth, non-skid surface is safe and satisfactory to drive on. It speeds up traffic... reduces accidents... you save in gas, oil, tires and repairs.

Build Texas Roads to Serve the Centennial and Remain for our use.

SUCH IS LIFE—A Surer Way

By Charles Sughrone

TREMENDOUS TRIFLES

By ELMO SCOTT WATSON

A COSTLY WEEK-END

LORD GEORGE GERMAIN, British secretary of state for the American colonies during the War of the Revolution, was ready to leave London for a pleasant week-end at Stoneham in Sussex. The duties of his office had tired him and he looked forward to the quiet of the English countryside.

On his way from his chambers he stopped at his office to sign some official papers. One of them, directed to Lord William Howe, British commander in New York city, ordered him to co-operate with Gen. John Burgoyne by moving north up the Hudson to join forces with Burgoyne who would start south from Canada. Between them they would smash the rebel army.

But the letter to Howe hadn't been "fair copied" and wasn't ready for the signature of the secretary of state. "So!" exclaimed my Lord Germain. "My poor horses must wait and I must lose time because of this!" Then a clerk named D'Oyly said that he would make the "fair copy" and would write from himself to Howe, enclosing the instructions to General Burgoyne which would tell him all that he would need with this and made ready to "keep his time, for he could never bear delay or disappointment."

So the "poor horses" of Lord Germain weren't kept standing in the street and he was able to hasten to his country estate for a pleasant week-end. But the five or ten minutes that he did not want to wait were costly ones for England.

D'Oyly forgot to write the letter to Howe and when his Lordship returned to his office from his week end in Sussex, he also forgot to ask about the matter. Howe stayed in New York instead of marching north along the Hudson. The result was that the unlucky "Gentleman Johnny" Burgoyne blundered south through the wilderness to the ignominious end of his expedition at Saratoga. And Saratoga was the turning point of the Revolution.

ICE-JAM

OF COURSE, an ice-jam isn't such a trifle, but the one which choked the entrance to Chesapeake Bay in the winter of 1784 was insignificant—if you compare its size to the broad expanse of the blue Atlantic. However, it was big enough and thick enough so that a ship from London was held up for two months before she could dock at Baltimore.

One of her passengers was a young German named Jacob Astor who was going to make his fortune, beginning by the sale of seven furs he was bringing with him. During the long days the ship was held in the ice-jam, young Jacob Astor had many long talks with another young fellow, also a German. He was returning to America to resume his fur-trading operations in which he foresaw possibilities for great wealth because the Indians, he said, were only too glad to exchange valuable furs for the most inexpensive toys and other baubles. Astor listened but was not particularly impressed.

At last the ship reached Baltimore and young Astor hastened on to the metropolis of New York city. But his venture in furs was a failure. Then he remembered the enthusiasm of his fellow-German over the fur trade. He guessed he'd try it.

He did. And within a few years it had made him a fortune of more than \$2,000,000. Today the name of Astor is a symbol for great wealth—all because an ice-jam held up the ship which was bringing a young German immigrant to the shores of the New world.

GLITTER OF GOLD

THIS is a story with some highly important "ifs" in it.

If James Wilson Marshall had chosen to build a sawmill on Capt. John Sutter's lands instead of going to "the beautiful vale" of Coloma, forty miles away to do it.

If a mid-January flood hadn't nearly swept away the mill-frame and brush dam, making it necessary to widen and deepen the dry channel he had selected for his tail-race.

Well, the course of American history might have been entirely different!

But the fact is that Marshall did locate the sawmill on a little stream in the tiny California valley of Coloma and there was a downpour of rain in the first month of the year 1848. At dawn on Monday, January 24, Marshall went out to see if the channel was satisfactory. Glancing idly at some of the earth, excavated from the channel and now washed down by the recent downpour, he noticed some gleaming particles. He looked at them more closely, then sent back to camp for a tin plate. He "panned" out some of the dirt in the plate and soon had about a half-ounce of the yellow flakes.

Eventually those yellow flakes reduced John Sutter, "King" of New Helvetia, and James Marshall to poverty. But before doing that, they set a whole nation mad with an ancient lust, played an important part in the slavery dispute that led to the Civil war and gave to the world the "gold standard" of money.

Prophets of Doom Seen in All Ages

Wrote Pessimistically of the Tendency of Times.

London.—Taking issue with those who see the world as proceeding in a continuous downward direction and with "prophets of doom" in general, a correspondent of the London Times sends to that paper an anthology of pessimism compiled by himself.

It commences, he says, with an early Babylonian tablet lamenting the growth of irreligion, of disregard for law and disrespect for parents. It proceeds inexorably through Egyptian papyri and the inspired lamentations of the Hebrew prophets, through the melancholy forebodings of Greek writers to the ampler records of the great Latin authors of the Augustan age.

Livy, who died three years after Augustus, observes in the preface to his first book that "to most readers the earliest origins and the period immediately succeeding them will give little pleasure, for they will be in haste to reach these modern times, in which the might of a people which has long been very powerful is working its own undoing."

Tacitus Laments. Tacitus ("De Oratore"), a few years later, was loud in his denunciation of the characteristic vices of the age. The gravest of historians in each

successive age have spoken of their own times and of the immediate future in terms of almost unrelieved gloom. Claudian alone was optimistic in his prophesies of the future greatness of Rome ("De Cons. Sul." III, 150):

"Tis she who has received the conquered into her bosom and like a mother, not an empress, protected the human race with a common name, summoning those whom she has defeated to share her citizenship and drawing together distant races with bonds of affection. . . . There will never be a limit to the empire of Rome."

Within five years the jealous Honorius had murdered Stilicho, who alone might have saved Rome from destruction a few months later at the hands of Alaric.

The Anglo-Saxon Chronicles, the graffiti of despairing men scratched on the walls of the church tower of Asherell in Hertfordshire at the time of the Black Death, the passionate outbursts of Piers Plowman, the measured wisdom of Bacon and innumerable passages in Shakespeare, Spenser and Raleigh, culminating in Milton's exuberant prose—all alike show how keenly good men in every age are aware of "how many are the perils through which we have to go."

Just State of Mind.

The correspondent concludes: "Passing over Sir William Petty in 1685, and Rev. John Brown and his contemporaries, I have space only to refer to Sir Robert Giffen's evidence before the Royal Commission on Trade Depression in 1886. Almost every witness testified to the impending collapse or rapid decay of England. None could see anything but disaster ahead. Sir Robert Giffen alone stood firm. He said:

"Depression was to him a state of mind of those in business; the result very often of too much talk and too little hard work. . . . It would pass."

"It did pass. All the middle-aged witnesses proved wrong. By 1895 we had risen to fresh heights, which we have long ago over-topped. The age of gold is with us, provided free initiative remains to the individual."

Poor Posture Injurious to Health of Children

Washington.—If your child stands with his weight on his ankles and heels, knees slightly bent, head forward, chin out, chest flattened and sunken and shoulder blades protruding, his posture is poor, says the children's bureau of the Labor department.

The child with good posture, the bureau said, "stands at his full height with his weight on the balls of his feet, his head high and chin in. His abdomen is drawn in, the curves of his back are slight and his knees are straight."

PROBING THE PAST

By LEONARD A. BARRETT

The word "if" has occupied no small place in our thinking during these depression years. We have frequently heard the expression, "if only I had not done this or that—if I had only waited and not been so hasty—if only the crash could have been postponed a year or two I would have been in a better position to meet it." The remorse, created by an endeavor to reconstruct the past, would be entirely eliminated were it possible to erase from our vocabulary that little word "if." How foolish! Introspection is a valuable mental attitude providing we do not let it lead us to self-pity or remorse. A rehearsal of past motives and decisions should lead us to avoid repeating mistakes. Otherwise nothing is gained by probing the past.

When rehearsing a past decision we should have vividly in mind the conditions in which that decision was made or act performed. The difficulty with most of us is that we divorce the consideration of these conditions from our thinking when we let that little word "if" dominate our mood. Given the same conditions and the same ex-

Honored by Flower

Lucille F. McMillin, the only woman member of the United States civil service commission, photographed with the azalea named in her honor. The flower is named Lucille McMillin Azalea and is known by the scientific name of Azalea Rutherfordi. It is a salmon color and was developed by the staff of the botanical garden in Washington.

periences, the chances are that 95 times out of 100 we would do the same things again. "If I had only known" is a better way to look at it. "If I had only known the market was going to crash I would not have invested in stock. If I had only known the bank was going to fail I would not have made my deposit in that particular bank." True—if we only knew in advance, but we did not, and that is the end of it.

If we could forget the "if" and put the same amount of mental energy into the words pluck, valor, and courage, we would be better able to harness the resources that remain, and with more self-confidence and hope go forward, being sure not to commit the same mistakes again.

What every person needs today is courage and self-confidence. These are attitudes of mind and heart which are self-creative and self-assertive. William James wrote a fine book on "The Will to Believe." Somebody should write a book on "The Will to Forget." The latter is one of the secrets of progress.

Tagua Palm Nuts Edible

In the early stages of formation, the kernels of the tagua palm are edible; they are then soft, sweet, and are sought by natives as a part of diet. Squirrels, wild hogs and other animals also eat the soft nuts. After becoming thoroughly ripe, however, the substance is hard, white, fine-grained; it closely resembles the ivory of the elephant tusk.

The Household

By Lydia Le Baron Walker

One of the Latest Styles of Sheets in Which Both Featherstitching and Hemstitching Are Employed.

FINE sheets and pillow cases may be perfectly plain with hems hand stitched, machine or hand hemstitched, or ornamented with embroidery. Color may enter into the ornamentation on white bed linen, or the entire cotton or linen may be tinted. Linen remains the textile pre-eminent for these articles, but the name bed linen has become flexible, signifying, in its broad meaning, both cotton and linen. In cotton sheeting, percale holds the high place. Many homemakers are content with machine-stitched hems, while others consistently cling to hand hems.

Quaint and beautiful stitchery is now put on bed linens, chiefly in the form of fine featherstitching, of a single frond each side the main stem, or two or three. The latter makes as wide a line of work as is attractive for the articles. Sometimes the embroidery alone appears on the sheet just above the plain hem. Again the hems are machine or hand hemstitched and then the featherstitching is done by hand or machine above it. The handsomest of these styles of fancy hems has the featherstitching come between a hemstitched hem and another row of hemstitching or of drawn work if the stitchery is done by hand.

Drawing Threads.

The woman who decides to have ornamental hems of her own work either uses linen sheeting, or expects to devote as much time pulling out threads of cotton sheeting as she takes to do the embroidery. But when the linens are finished, she has handsome sheets and pillow cases whichever textile she uses. The reason why linen can have its threads more rapidly drawn out, is because good flax fibers spin into

strong fine strands which remain individual, while cotton, which has shorter fibers differs when spun. It does not keep its separateness under weaving as does linen.

Hems can be partly finished by machine and partly by hand, and a pleasing combination of works result. The sheets and pillow cases may be bought with machine hemstitched ends. Then the featherstitching can be done at home.

Rebuilding Rural America

Above, Drouth Leads to Cattle Slaughter in the West. Below, Left to Right, Henry Ford, M. L. Wilson and R. G. Tugwell.

By WILLIAM C. UTLEY
MOVING day is fast approaching for hundreds of thousands of America's most destitute farmers since President Roosevelt declared his intention of rebuilding rural America and moving poverty-stricken families into new homes where they may have a considerably better chance to make a living and find happiness. The moving bills will be paid out of Mr. Roosevelt's \$4,800,000,000 work relief allotment, and the boss foreman of the movers will be Rexford Guy Tugwell, under secretary of agriculture and pride of Columbia university, who thinks he can lift pianos easier than the farmers can lift mortgages.

For the eight main types of relief work to be done there are some 60 federal departments and divisions already existing to administer the funds and three entirely new divisions are being created. The one which deals with the retracing of the agricultural map of the United States under Tugwell is the rural resettlement division. The recent exodus of 200 farm families of the north central states of Alaska, there to begin life anew with the slate wiped clean, was only a curtainraiser to the main bout against rural poverty and privation which Mr. Tugwell and his forces will conduct.

Single farm families who have conducted something of an isolated battle against overbearing odds of depression, drouth and poor land, will be moved into new and better lands and given a fresh start at Doctor Tugwell's discretion. By the same token, whole area groups of farm families who have collectively—and in many cases literally—bitten the dust will be gathered into Doctor Tugwell's moving van and rolled away to new homes where the land and the life will give them something more closely resembling an even break. Pale and underweight communities, suffering from economic pld in their industrial sections, may be moved to where, change of climate and a few honest dollars will revive them; if they can't be moved, new and healthy industrial sections will be grafted (no double meaning intended—perish the thought!) into them.

Break for Slum Dwellers.

Citizens who have found the going a little bit too tough in the slum sections of the larger cities will be moved 20 or 30 miles out in the suburban, semi-rural territories, given small plots of land on which to raise three squares a day and found factory jobs where the hours are short and the remuneration adequate.

Officially known as the Resettlement administration, Doctor Tugwell's division has been allotted \$10,000,000 by the President for administrative expenses. What further funds are necessary for each authorized project will be allotted at a later date.

President Roosevelt himself outlined the purposes of the resettlement by dividing them into three brackets: First: To administer approved projects involving resettlement of destitute or low-income families from rural and urban areas, including the establishment, maintenance and operation, in such connection, of communities in rural and suburban areas.

Second: To initiate and administer a program of approved projects with respect to soil erosion, stream pollution, seacoast erosion, reforestation, forestation and flood control.

Third: To make loans as authorized under the emergency relief appropriation act of 1935 to finance, in whole or in part, the purchase of farm lands and necessary equipment by farmers, farm tenants, croppers or farm laborers.

In carrying out these threefold purposes, Mr. Tugwell was authorized by President Roosevelt to acquire in the name of the United States government any real property which he deems necessary. In the Resettlement administration are incorporated the en-

tire personnel and funds of the land program of the Federal Emergency Relief administration. This land program has already been extended into 23 of the states and includes in its operations the movement of farmers and their families to the Matanuska valley of Alaska.

Never Tried Before.

No projects such as these have been carried out by any other nations, according to M. L. Wilson, assistant secretary of agriculture.

"This only nation-wide planning with the conscious idea of removing land too poor to farm from cultivation is being done in the United States," he asserted.

Commenting on the resettlement program, he said that there are approximately half a million farm families who are unable to produce anything to be exchanged. Their homes, which often average three persons to a room, are on the poorest grade of submarginal land.

"The land must be shifted to better uses. It has been tradition in this country to get land into ownership, but the land on which families are failing because of its poorness is partly cut-over timber land, areas in the semi-arid plains, land whose surface soil has been washed away by erosion, etc. It is largely land which is not adapted to private ownership. It is breaking its private owners. The thing to do is to bring it back into the hands of the government.

"The solution is the gradual transfer of people on it to what we have been calling rural-industrial communities." Assistant Secretary Wilson estimated that three-fifths of the people on this kind of land have some idea in mind concerning what they would like to do about it and have a little money with which they might carry out their plans. The other two-fifths will require assistance from the Resettlement administration.

"Some families will be moved to better land," Mr. Wilson explained. "A richer farm may be cut up into smaller tracts. For instance, a 320-acre farm may be divided into 32 ten-acre farms. Such a move will be made only where it will not particularly increase agricultural production for sale.

"Then we'll try to get an industry located thereabouts. The people who have been relocated will find employment and will earn wages. The government will sell them land and houses. We can let them put their common labor in on the building of the houses. Farmers have their option. They make their own decisions whether to stay or go."

New Kind of Community.

Mr. Wilson even went so far as to say that there must be a great deal of shifting of population to maintain the democracy, adding that considerable economic planning would be required. He said that a new kind of community, the like of which this nation has not had, will be created.

"They will furnish a life akin to that of European villages where they raise their own food and work for wages," he declared. "It is a new type of industrial setup, in which industry to quite an extent is decentralized."

Mr. Wilson said that the economic system was developing more leisure time, and that some constructive use of it must be devised or we will degenerate.

"There are spiritual and ethical values which come from contact with the soil," he said. "I don't believe you can find anything to which everybody is adapted save gardening and flowers. Practically everybody is interested in growing things. There is value in this process of raising a garden. You produce something used by the family. If we develop in this direction, all the workers can be absorbed into industry at a five or six-hour day.

"This is not socialism. It goes counter to a great many elements of socialism. Most of the working people would own their own homes and plots

of land in the readjustment outlined. As it develops and becomes widely known, it will become very important in the program of the liberal elements of society."

About 75,000,000 acres of poor submarginal land were recommended for retirement by the national resources board last winter. The inhabitants of this land were said to be "characterized by incredibly low standards of living."

Resettlement is hardly the answer to the nation's farm problem, in the opinion of the 150 delegates to the conference of agriculture, industry and science, which met at Dearborn, Mich., to honor Henry Ford for his contributions to "chemurgic" farming and to sign a "declaration of dependence upon the soil."

Principal speaker in the conclave in the town that Henry Ford built was Louis J. Taber, master of the National Grange, who urged farmers to grow every plant and every product that can be grown in the United States. He said, "The American farmer hopes this conference will set in motion influences that will do more for rural life than the politician has ever been able to accomplish."

"Chemurgic" Farming.

What the conference, sponsored by Chemical Foundation, suggested as the remedy was, of course, "chemurgic" farming. This would shorten the distance between production and consumption by having the farmer once more assume more of the elemental services and processes, and claims that chemistry will drive man back to the farm, just as the machine age took him from it.

"Chemurgic" farmers would bend much of their efforts to raising farm products for purposes other than food. Farm production would need to be doubled if agricultural alcohol replaced petrol as a motor fuel, the conference concluded, and it would open up a new farm income of \$5,000,000,000 a year. It was said that no unsolved technical problems stood in the way "although important improvements in processes can confidently be expected."

It was only a few days later when 4,000 farmers, mostly from the South, marched (for the larger part in railroad trains and automobiles) in a pilgrimage to Washington, to express their thanks personally to the President and the AAA for what the administration is trying to do for them. Thinking they smelled a rat, opponents of the New Deal, on the floor of the senate and elsewhere, openly charged that the "marchers" were hand-picked by the AAA officials for a stunt to arouse public sympathy for the program, and that the farmers' traveling expenses were paid by the government.

At any rate the 4,000 farmers cheered the President wildly when he denounced to them the "liars" who criticized the operations of the AAA. They expressed themselves to a man as being heartily in favor of the proposed AAA amendments, some of which even propose to make it necessary for every manufacturer, wholesaler and retailer of food products to obtain a license from the Department of Agriculture. Such amendments would put in the hands of that department the prescribing of rules governing business practices, advertising and the general regulation of the manufacturers' and merchants' business. They aim at control of every step in the process of distribution of food, including the advertising—under Tugwell, who has declared advertising to be "an economic waste."

There are 110,000 food manufacturers, 62,500 wholesale and 911,000 retail dealers in food products who, no matter how small and insignificant they might be, would be subject to penalties of from \$50 to \$500 a day for violation of any rule made by the Department of Agriculture.

Abyssinian Empire Has Only One Railway Line

The empire of Abyssinia has one railroad, and even that does not belong to it. The shares of the Djibuti-Addis Ababa railroad are in French hands. There is also no time-table announcing when the trains leave and arrive.

As a matter of fact, the train goes from Addis Ababa to Djibuti and back only once a week. Usually it goes on Wednesday, but it may be that some important Abyssinian wants to leave Addis Ababa or some French official wants to leave Djibuti on Monday. In that case the train goes on Monday, and the foreign visitor who has planned to take the train on Wednesday must wait eight days until the next train leaves.

This does not disturb the Oriental, who does not understand that time has any value, for has anyone ever succeeded in pouring time into a vessel? But the hotel porter understands and, in return for a large tip, sees to it that the foreign visitor gets his train. He is informed about any changes in the schedule and thus makes his living. Anyone who cannot or will not pay must wait.

The passenger traffic on the railway is of only secondary importance. The line is primarily "strategic."

Charity's Reward

The deeds of charity we have done shall stay with us forever. Only the wealth we have bestowed do we keep; the other is not ours.—Mid-dleton.

SAVES MORE TIME and WORK than a \$100.00 WASHING MACHINE

Coleman Self-Heating Iron

No Heating with Matches or Torch... No Waiting... Lights Instantly, Like Gas

REDUCE your ironing time one-third... your labor one-half! The Coleman Self-Heating Iron will save you more time and work than a \$100 washing machine! Iron anywhere where you can be comfortable. No endless trips carrying iron from stove to board. Operating cost only 1/10¢ an hour. Helps you do better ironing, easier, quicker.

See your hardware or housefurnishing dealer. If local dealer doesn't handle, write us. THE COLEMAN LAMP & STOVE COMPANY Dept. W-100, Wichita, Kansas; Chicago, Ill.; Los Angeles, Calif.; Philadelphia, Pa.; Toronto, Ontario, Canada.

An Ordinance Prohibiting Dry Or Open Toilets Within Certain Limits, Affixing A Penalty For Violation, And Specifying Pit Toilets Permitted Within Such Limits, And Prescribing The Effective Date Thereof And Declaring An Emergency.

Be it ordained by the city council of the city or town of Hedley, that it shall be unlawful for any person or corporation to allow, keep, permit, or maintain or permit to be maintained, kept, or used upon any part of blocks two, three, twelve and thirteen or any part thereof any dry or open toilet.

Section two Any toilet complying in substance with the following specifications shall be legal and permitted within such limits, to-wit: shall contain a pit dug not less than eight feet deep by four feet long by three feet wide; the pit to be lined for at least two feet below the surface with plank or concrete; such pit shall be covered with a concrete slab at least three and one half inches thick to be properly reinforced and the seat or stool shall be of concrete and be built into such slab; the stool shall be 21" by 14" and 18" high, and shall be covered over with a lid made of wood; each toilet shall be equipped with an air vent made of wood or tin, containing an upright pipe leading up from the pit connecting with a cross or horizontal pipe to be flush with the outside of the toilet house. such vent pipe to be screened with screen wire on both ends; the house may be built of wood or tin, shall be at least 4 feet by 4 feet wide and 6 feet 6" high in front and 8 feet 6" high at back, and may be covered with wood or tin; no such toilet shall be built closer than two feet from the property line. The house and toilet shall be built so as to prevent flies. A substantial compliance with these specifications shall be sufficient, but this shall not be construed to allow any dry or open toilet upon any part of said blocks two, three, twelve or thirteen of the town of Hedley, Texas.

Section three: All dry or open toilets are hereby declared to be a nuisance and injurious to public health.

Section four: This ordinance shall take effect and be in force from and after August 1st 1935.

Section five: A violation of this ordinance shall constitute a misdemeanor and shall be punished by a fine of not less than one nor more than five dollars and each day of such violation shall constitute a separate offense.

Section six: In addition to any criminal penalty attached to a violation of this ordinance the city council of the city of Hedley, Texas, shall have the power to cause any such dry or open toilet within such limits to be abated as a public nuisance injurious to health, and to employ the necessary means to effect such purpose.

Section seven: It is ordered that a copy of this ordinance be published by posting in three public places within the town of Hedley, Texas, for at least ten days before its effective date and that a copy hereof shall be published for at least two issues of the Hedley Informer, a weekly newspaper published in Hedley, Texas.

Passed and adopted at a regular meeting of the city council of the city of Hedley, Donley county Texas, this June 4 1935, by unanimous vote of the city council of Hedley, Texas, and duly approved by the Mayor of Hedley, Texas, this June 4 1935.

Don't Forget TRADES DAY In Hedley Every Saturday

NEW DEAL BRIDGE CLUB

The New Deal Bridge club was entertained Wednesday May 29, by Mrs. Alva Simmons

E. Johnson Mayor voting Aye. G. Z. Sherman voting Aye. G. C. Heath voting Aye. W. H. Burden voting Aye. L. Spalding voting Aye. (Seal)

J. P. Devine
Secretary of the city of Hedley, Texas.

For a More Abundant Life

"WE HAVE IT" . . . for homes, for farms, for towns and cities, for industries.

ELECTRIC POWER!

West Texas is abundantly supplied with power resources. The West Texas Utilities Company's 2,600 miles of transmission lines are linked with modern, strategically located generating stations, bringing power to you wherever it is needed.

"Let's Have Cheap Power!"
We Have That, Too.

Power is a commodity which grows cheaper the more it is used. The power from this company's lines, available every hour in the day or night for a variety of uses, can be purchased cheaper than it can be manufactured by the individual city, or the individual industry, farm or homes.

"Let's Have Abundant Power, for a More Abundant Life."
We Have That in West Texas, Too.

You may recall, many years ago, when some neighbor was able to boast of his electric lights through cords hanging from the ceiling. Light was expensive then, only the well-to-do could buy this service. Today, everybody uses electric service, for the electric dollar buys now an abundant amount, about three times as much electric service as it did before the World War. Electric service is delivered to you now so cheap that its daily cost can be counted in pennies.

The area served by the West Texas Utilities Company has ample power facilities to meet the demands of this growing and progressive "Land of Opportunity." West Texas.
