NOTICE TO PRODUCE HOUSES

It is a violation of the law to sell chickens or hides or any kind of fowls or animals without the parties selling same having a bill of sale or making affidavit of ownership. This law is going to be enforced in this county. From now on a person buying produce, knowing it to be stolen, is just as guilty as the persons stealing them. If you do not know absolutely that the stuff is O.K. that you are buying, make the persons selling same produce a bill of sale or an affidavit of ownership. It is unlawful for a person to transport any fowl or animal without a bill of sale or an affidavit of ownership, so stay in the clear by observing the law.

If not it is going to cost some one plenty. I will get down on my knees and thank the person that uses a shotgun on the next chicken thief he catches, and will pay him a reward also. Please call me just as soon as you miss any chickens or anything else.
Guy S. Pierce, Sheriff.

1919 STUDY CLUB

The 1919 Study club met at the home of Mrs. Kinslow on Sept 26. Roll call was answered with a Bible quotation.

The following Bible characters were discussed:

Abraham, Mrs. Simmons.
Saul, Mrs. Spalding.
David, Mrs. Burden.
Jonathan, Mrs. C. E. Johnson.
Hannah, Mrs. Webb.
Esther, Mrs. Moffitt.
Song, "Blest be the Tie," by club.

Leader, Mrs. Roy Kutch.
The hostess served delicious refreshments to the following members: Mesdames Spalding, Kutch, Johnson, Moffitt, Simmons, Burden, Webb and Wells. Guests were Mrs. Whittington, Mrs. Bramley and little daughter and Hilda Ruth Burden.

Program for Oct 9,
Subject, France.
Roll call, beauty spots of France.

Report of educational chairman.

Old French cities of the Pyrenees, Mrs. Simmons.
A night in Monte Carlo, Mrs. C. E. Johnson.

French cathedrals, Mrs. Kutch.
The Chateay country, Mrs. Moffitt.

In and about Paris, Mrs. Kinslow.

Leader, Mrs. Wells.
Hostess, Mrs. Simmons.

Hedley friends will be glad to know that Mrs. O. R. Culwell, who is under medical treatment at McKinney is improving.

Cypress cotton sack duck.
B. & B. Variety

Dressmaking and alteration at reasonable rates. Will also exchange sewing for quilting. Satisfaction guaranteed.
478t Mrs. L. Z. Land

Mr. and Mrs. Jiggs Mosley were called to Clarendon Friday to the bedside of her father, Hugh Riley, who is seriously ill.

Mr. and Mrs. Bill Bremley of Clarendon spent Sunday with the lady's parents, Mr. and Mrs. M. W. Mosley.

Mrs. Elba Harkness spent last week in Wichita Falls with her husband.

PROJECTS APPROVED

A telegram to the editor from Marvin Jones states that the Hedley W. P. A. project to improve the streets has been approved. This will amount to approximately \$10,000.

We are also informed that Hedley's application for \$29,000 for a sewer system and disposal plant has been approved.

NOTICE

We are in receipt of a letter from Rep. Eugene Worley, which states that agents, claiming to be able to rush through old age pension applications, are working in this district. These agents are misrepresenting facts, and usually collect a small amount from the old people who would probably be eligible for pensions, when the legislature enacts suitable laws. Elderly people are warned not to pay any money to so called pension agents.

Mrs. H. E. Plumie visited in Lelia Lake Sunday.

Mr. and Mrs. Richard Longshore spent Sunday in Memphis.

WEEK OF PRAYER

A "week of prayer" will be observed at the First Baptist Church next week, from Monday to Friday night inclusive. There will be speakers, singers, and an interesting program each night. The public is invited to attend each evening from 7:30 to 8:30.

All kinds of novelties and notions.
B. & B. Variety

ACCIDENT

Misses Geneva Whittington, Edna Mae Smith and Ruth McQueen narrowly escaped injury Sunday, when their car was struck by a motorist on the high way near Giles. We understand the girls were exonerated from blame.

CARD OF THANKS

I wish to express my appreciation to my many friends here for their kindnesses during my illness, and especially for the letters and gifts. May God's blessings rest upon each and every one of you.

Mrs. A. G. Nipper

NEW RADIO PROGRAM

An outstanding musical radio program, sponsored by Chesterfield Cigarettes, begins this week over the Columbia Broadcasting System.

Broadcasts will be given each Wednesday and Saturday evening from 8:00 to 8:30. The nearest Texas stations broadcasting this program are KGEK, Wichita Falls, KRLD, Dallas, and WACO, Waco. The program includes such stars as Lily Pons, Nine Martini and Andre Kostelanetz.

MEN WANTED for Raleigh Routes in Hall and Childress Counties. Write today, Raleigh Co., Dept. TXJ-343-SB Memphis, Tenn.

Inhale Pine Oil for Hay fever, Asthma and Catarrh. Zimmerman's Salve gets Piles, Eczema or any sore. Sold at Wilson Drug, Hedley; Lelia Lake Drug and Crabtree Grocery, Quail.

1916 and 1935

Since 1916 this store has helped in the growth of Hedley and Donley county. Today, as in the past, we are ready to serve you at all times.

Becoming Sports Frock
With Jabot Is "The Top"

PATTERN 2341

It is not easy to find a sports frock that plays No Favorites when it comes to showing up the imperfect figure. But here's one that flatters regardless, by the very simple device of a rippling jabot collar. But notice that our designer has not sacrificed one whit of the tailored chic and easy freedom of the sports frock needs. The pleated sleeve for arm action—plants in back bodice and skirt for freedom. Here is just the most perfect model for one of the lovely new printed satins that are being shown in such delicious pastel shades. A tie silk would be lovely and any number of cottons are available for a simpler version. Accent with matching buttons.

Pattern 2341 is available in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42. Size 16 takes 3 3/4 yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

SEND FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for this pattern. Write plainly name, address and style number. BE SURE TO STATE SIZE.

Address orders to the Sewing Circle Pattern Department, 243 West Seventeenth St., New York City.

AND THAT... THAT

Husband—Will you miss me when I am away.
Wife—I guess I will. You're always been too good a dodger at home.

Preaching every 2nd and 4th Sundays and on Saturday before the 2nd Sunday. Morning service 11:00 a. m. Evening service 8:00. Visitors are always welcome.

B. Y. P. U. and adult Bible Sunday at 7:00 P. M.

Hedley's school spirit of basket ball was renewed last Thursday night when our girls played a tight game with the outside team. The game ended with a score of 17 to 18 in favor of the outside girls.

The starting line up of school team was as follows:

Forwards, Vera Alley, Geraldine Howard and Imogene Bell, Guards, Jack Leach, Lillian Sharp and Sue Beth Edwards.

Immediately after the game, we enjoyed the warmth and fun of a big bonfire. After the fire was started, Mr. Thomas and the pep leaders gathered the group together and produced a smile from the faces and yells from the lips until a joyful noise could be heard from all parts of town. In order to show Mr. Bailey that pep still existed in Hedley High, we marched through main street singing songs and giving yells.

TO LOAN on Donley County Farms and Ranches
C. L. JOHNSON, Sec. Treas.
Hedley National Farm Loan Association

In their first home appearance of the season the Hedley Owls were handed a crushing defeat by the heavier, superior Alanreed Longhorns. The score was 20 to 6. Hedley's offense failed to click, while their defense was completely baffled by the double reverses and off tackle plays of the visitors.

Alanreed brought a colorful, well drilled pep squad, who contributed their part to the winning of the game. Throughout the entire game their yells and songs sent out encouragement and cheer to their grid warriors.

The Alanreed game was the Owl's second conference contest, and now with one victory and one defeat, their conference standing is 500. Friday, October 4, they play the strong Lakeview Eagles at Hedley. Lakeview has two victories and no defeats to their credit.

COMMUNITY PROGRAM

October 11 has been designated as Music Day for all the schools of the county. We are planning to include the community and have a night program. There will be no admission and we want everybody to plan to come for an evening of fun and entertainment. The fun begins between 7:45 and 8:00 o'clock. Watch for the program next week.

We have a full supply of school supplies.
B & B Variety

HIGH SCHOOL LIBRARY

Submitted by S. J. Lovell

Our library is keeping pace with other improvements in our school system. Members of the faculty have studied volume by volume, selecting and classifying material for the various departments. The books have been classified in the ten standard divisions and will be numbered according to the Dewey Decimal System as soon as time permits. Many worn and disreputable volumes have been discarded, and all useable material has been displayed prominently, making the library more attractive and convenient. Last but not least, we have added a new Americana, a thirty volume set of reference work, which is recognized as the best throughout America. We are very proud of this set which added to our World Book Encyclopedia, and three other standard works gives us adequate reference material.

This improvement and addition in our library, which is served by four very pleasant student librarians who are rapidly familiarizing themselves with our new system, leaves us wish-

Motorized "Zipper" Houses of Future

By WILLIAM C. UTLEY

POSSIBLY within five years—certainly within ten—our houses will be built around the machine, in the most literal sense of the term.

Our new houses will be pre-fabricated houses, manufactured on a mass-production basis that will bring the most scientifically modern of them within the reach of the family of moderate means, just as mass production has brought the automobile into millions of family garages.

Every new house will be a sort of "zipper" house whose parts can be "buttoned" together and "unbuttoned" again with the greatest of ease. All houses will be of a pleasing simplicity of design. All will have flat roofs that will be so much more "living surface" in pleasant weather. All houses will be air-conditioned in all kinds of weather.

In the center of every house will be a compact, electrically driven motor unit which will furnish power for the hundreds of tasks which make house-keeping a chore today, will heat the house in winter and cool it in summer.

These are not idealistic fancies, framed in fragile smoke rings from the dream pipes of impractical social planning bugs. They are facts.

For such houses already exist, both individually and in communities. Their manufacture and design is being fostered by some of the biggest and most progressive industrial giants of the day.

Houses for Low Incomes.
For the principal strides in developing houses of this sort the credit must go to Owen D. Young, head of General Electric company and to Foster Gunnison, president of Houses, Inc. Houses, Inc., has been formed not to build houses, but to conduct research for the entire building trade through which new ideas in home building will be tested and cleared and also to culture, assist in the management of, or help finance any worthy project designed to produce modern homes that will be within easy financial reach of those with low incomes.

Houses, Inc., has been subsidized by General Electric. Mr. Gunnison has been one of the leaders in the pre-fabricated housing movement. Motorized, pre-fabricated houses, already past the experimental stage, have been assembled at White Plains, N. Y., Garden City, L. I., New York city, Boston and Philadelphia. At Boston there is a whole colony of such houses which is visited by thousands of persons daily.

Purdue university, at Lafayette, Ind., for the administration of its new course, "The New Science of Better Living," is preparing to start a whole modern community to use as a permanent laboratory for the study of tomorrow's scientific housing.

David Ross, chairman of the board of trustees of the university, has donated 143 acres of land where the new village will be assembled. Here every house will be subjected to extreme temperatures and weather conditions and even man-made earthquakes and cyclones. In thirty days it will go through the same rigors that the ordinary house suffers in the course of twenty years.

What interesting possibilities these new houses offer!

Suppose Jack Edwards of Chicago and Mrs. Edwards have just finished paying for their new house. At last, after long saving and struggle their ambition to "own their own home" has become a glorious and happy reality. Then, suddenly, Jack's firm decides to transfer him to New Orleans. Must they give up the lovely dwelling they have worked so hard to own?

House-Moving Is Easy.

No, indeed. Jack simply calls the movers. They take screw-drivers and unbutton the little house, lift it rolling zaily along to Dixie. Only a new cement foundation need be built. That is a simple matter that should take no more than a couple of weeks.

Should the new climate suggest a different way of laying out the rooms, why that is a simple matter, too. They can be buttoned together again in whatever arrangement its owners desire. And if the young couple would like to have a guest room to make it more convenient for his or her folks to visit them in New Orleans next winter, a couple of new panels can be bought, buttoned on and made into a new room. When the Edwardses

The above rather elaborate conception of a colony of the new pre-fabricated, motorized houses, drawn by Hugh Ferriss, has been offered Purdue university for study in its new housing course. Inset: Part of the colony of motorized homes which is being visited by 3,000 persons an hour at Cambridge, Mass.

feel affluent enough to own something more on the scale of a southern mansion, they can add a whole new story just as easily.

Fresh air sends and those of us who like to feed poetic souls by flinging windows open to the balmy breezes of spring are likely to be a little chagrined with the new type of house. Here the spring breeze is not a pleasant zephyr, but an annoying draft. For this is an air-conditioned house, remember. The motor unit draws in the outside air with a central fan, washes it, purifies it and heats it or cools it. For that reason complete insulation from the outside temperatures is essential. The air supplied by the motor unit is in reality fresher and better to breathe than the outside air, no matter what the weather.

Roofs of the new houses can be flat for sun decks and play areas because these buildings, even though they be only one story high, are built like skyscrapers. So complete will be the insulation from heat and cold, you can invite friends over whenever you want to for a wicker roast—with the bonfire built on the roof! The houses will also be lightning-proof, cyclone-proof and even earthquake-proof.

The pre-fabricated walls are proof against sound and termites. They are made of steel, with panels of pressed asbestos and cement. They are practically indestructible. They feel like stucco and yet nails can be driven into them.

Modernists Make Concession.

Only the front door will be made of wood—a true concession on the part of the designers to allow for some little shred of the home-maker's sentiment to remain. Mr. Gunnison explains it:

"We don't want to be too modernistic. The housewife wants the 'feel' of wood on the door as she enters. It's more domestic—not so mechanical, somehow. Everything in the house has been done from her point of view."

It is easy to suppose that the housewife will really be more interested in the "feel" of machinery at her fingertips, ready to do most of her work for her. From that standard, certainly the house has been designed with her in mind. Despite the fact that it may be located in the remotest suburb or on a farm, the house is more like an efficient metropolitan apartment, set off by itself and a roof placed over it.

Everything is easy to do. Walls are of washable fabric. Closets are cedar lined. Floors are made of compressed hardwood panels. Windows are of the steel casement type, which open with a little crank, like those in an automobile. There are metal storm windows and screens.

There are no cellars in this house. There is nothing to go into the cellar. All the heating, plumbing and domestic mechanical equipment is contained in the motor unit on the first floor. This mechanical nerve center of the home has been called one of the most important scientific contributions to the building industry in years.

Machines Do It All.

A steel cabinet, hardly larger than a pantry, contains the motor unit. If there are two floors, this "core" extends also to the second floor to serve additional baths there. The front of the unit forms one wall of the kitchen. Along this wall is the kitchen "work-bench." It is a single, streamlined unit of metal and enamel, which contains a range, an electric refrigerator, electric clock, mechanical dishwasher and dryer, shadowless indirect lighting unit, basin and work table with drawers and cupboards scientifically arranged to save steps for the housewife. There are no cooking odors

in this kitchen, for, in addition to the air-conditioning, there is an exhaust fan.

On the other side of the kitchen wall, inside the unit, is all the heavier equipment—the water heater, air-conditioning machine and the furnace (which is much smaller than furnaces we are accustomed to today), all of them automatic, of course.

Next to the kitchen is the bathroom, and, this, too, has one wall facing the motor unit. From this wall come the bathtub with shower attachment, an electric heater for the extra warmth that is sometimes desirable in the bath on chilly mornings, and a lavatory big enough to bathe the baby in. The toilet also projects from this wall; it does not touch the floor, leaving plenty of room for brush and mop.

Perhaps the most wonderful thing about such a house is its cost. The five-room bungalow type can be built, with all mechanical equipment, for only about \$3,800; the scale is graduated to two-story affairs which cost less than \$10,000.

The advent of pre-fabricated, motorized houses at last cost may, or may not, have an immediate noticeable effect upon the building industry. Mr. Gunnison thinks it will.

"They will open up an immediate market for hundreds of thousands of homes, create a demand for much labor in the building trades, stimulate the buying and production of materials and make modern, economical and proper housing available to hundreds of thousands of families now anxious to own their own homes, but financially unable to do so because of prices far beyond the reach of their reduced incomes," he said.

Likened to Automobile.

"The application of modern industrial methods to the framework of our antiquated building practices, their inherent economies, mass production and buying of materials and equipment have been cogitated in production of the motorized home so that it has been brought to the same high plane of scientific design, engineering perfection, mechanical efficiency and economical production that removed the automobile from the 'millionaire's plaything' class of less than twenty years ago to make it standard and very necessary equipment of almost every American family."

It must be remembered that Mr. Gunnison's Houses, Inc., is not engaged in the manufacture or sale of houses of this type, but is merely conducting research, in an effort to show how better low-cost houses can be built. The motive is not altogether altruistic, of course, for Houses, Inc., is subsidized by General Electric and is assisted by American Radiator and Sanitary, both of whom will have plenty to sell when the pre-fabricated, motorized house becomes the general thing. But the work, in merit and in interest to you and me, is worthy of publicity, in the opinion of this writer.

Meanwhile, building is on the upturn. Picking key cities, it is up 100 per cent for August of this year over last in Boston; 24 per cent in New York; 14 per cent in Philadelphia; 234 per cent in Pittsburgh; 900 per cent in Atlanta; 110 per cent in Chicago; 315 per cent in Kansas City, Mo.; 210 per cent in Memphis; 255 per cent in Fort Worth; 88 per cent in Denver; 180 per cent in Los Angeles, and 135 per cent in San Francisco.

On the recent Better Housing day celebrated throughout the nation, 3,500 new and better homes were started on a single morning. Conferences are being held at important cities throughout the world in efforts of many nations to help their people build homes.

Let Our Motto Be GOOD HEALTH

BY DR. LLOYD ARNOLD
Professor of Bacteriology and Preventive Medicine, University of Illinois,
College of Medicine.

RABBIT FEVER

Rabbit fever, or tularemia, was discovered in the United States by Doctor McCoy of the United States public health service in 1911. He had been working in Tulare county in California in search of a germ causing the dreaded bubonic plague of the Orient, and in that connection had been systematically examining wild rats, mice, squirrels, rabbits and other rodents. Engaged thus he encountered a new germ, which eventually was named *Bacillus Tularensis* from Tulare county in which he first encountered it.

Within the last two decades tularemia has spread practically all over the United States, and it has been found also in Japan, but so far not in Europe. It is a new disease and doctors are watching it closely. With barely more than 20 years' history behind it, they can't know what variations it will show, as they do know about the older diseases.

Rabbit fever is the more common name for it, as it is primarily a disease of rabbits. The germ is transmitted from rabbit to rabbit by ticks.

Ticks feeding on infected rabbits get the germ and transmit it through their eggs to their young. A tick lays several thousand eggs, and each hatched tick, attaching itself to a rabbit, can give that rabbit the disease. Thus it can easily be seen that one sick rabbit can infect a whole countryside. In districts where rabbit fever is prevalent, it is common to see dead rabbits scattered over the ground.

In addition to the rabbit, squirrels, wild rats, muskrats, opossums, coyotes and woodchucks can be affected with the fever. Quail and sage hens are now also falling victims. And not only the wood tick, rabbit tick and rabbit house, but also the blood-sucking deer fly can carry the infection.

In man rabbit fever is a secondary infection. He gets it through cutting or handling an infected rabbit carcass or other diseased animal. Or dogs, cats, hogs and other domestic animals may contaminate their mouths by eating dead infected animals and in that way transmit the disease to man. Or the mere handling of an infected tick may result in an infection.

The occurrence of the largest number of cases in man coincide with the open hunting season for hunting wild rabbits. Hunters, cooks and market men are most prone to get it. Laboratory workers, too, who are studying the blood and tissues of infected animals are apt to contract the disease. Sometimes the entire personnel in a laboratory will be victims. The infection usually enters the skin through an abrasion, but in a number of instances no abrasion was apparent. The evidence in these cases seems to be that mere contact of the skin with infected blood is sufficient to bring on the disease.

The chills and fever usually start six or seven days after an infection. There is a swelling and soreness at the spot where the germs entered the body. This sometimes forms an ulcer. The chills and fever last for about two months. Rabbit fever in man is more serious than undulant fever, which he gets from coming in contact with contagious material from infected cattle, hogs or goats.

Our best way of prevention of rabbit fever in man is to avoid contact with the carcasses of infected wild animals. Sickly or sluggish small game should not be shot, except as an act of mercy. A rabbit that sits still and allows you to shoot him at your leisure makes a dangerous carcass. Apparently healthy rabbits can carry the infection. To be on the safe side, always wear rubber gloves when dressing rabbits, and do not let the blood come in contact with any part of the skin. Infected rabbits, when well cooked, however, can be eaten without danger of contracting the disease. The danger comes in handling the raw meat.

Laboratory tests can determine whether a patient has contracted rabbit fever. The test is very similar to the one made for typhoid fever and for undulant fever.

Science does not know of any special method of treating tularemia. So far it does not seem that vaccines are of any value. One attack evidently confers immunity.

There are reports of sheep herds being infected by ticks. If this continues, it will mean many new ways of infecting man, through the handling of meat, hides and wool.

We do not know how to control the disease in wild animals. The tick transmission and the ability of the tick to pass on through its thousands of eggs to its offspring the same germs, make control almost impossible. Then, too, the germs may take a notion to find some other feeding ground than the small wild game in the woods that they thus far have selected. Germs have population problems the same as we have. They want to live and grow. If they find another feeding ground more suitable to their needs and taste, they will move. If that feeding ground should prove to be man, then rabbit fever in man could, doubtless, no longer be classed as a mild disease.

Always I Am Awakened by an Impatient Chambermaid Crashing Around Outside My Bedroom Door With a Vacuum Cleaner—Not for Cleaning Purposes but to Bother Me and Get Me Out So She Can Do the Room.

MR. OTIS REGRETS

By JULIAN STREET

MY DEAR Mrs. Plamondin:
How kind, how very kind of you to ask me to your place in the country for the coming week-end!

Your invitation reached me a little more than two weeks ago, and I suppose I ought to have answered sooner. In fact I know I ought to have. But for reasons which I shall explain I have kept putting it off.

Having failed to answer promptly, I suppose I ought now to telegraph. In fact I know I ought to. A telegram might ease matters quite a bit. I could say I had just got back from Europe and found your letter. But there's the rub! My dear old father, Fabian P. Otis, was always the soul of honor in spite of that trouble about his bank, and he taught me from infancy never to lie if there was a chance of my being found out. If I wired that I had been in Europe you might meet somebody who had seen me in the past fortnight, or you might have been in town yourself and caught sight of me somewhere—for though I am harder up than I ever thought a member of the Otis family could be, I have devised some little economies which enable me to get about as much as ever, and I still go to the best places. Father, I know, would wish it so, for though he believed in thrift, he always said there was nothing too good for an Otis.

You will probably remember that just after the bank trouble, when father was being prosecuted, the papers used to say there was nothing too bad for an Otis, but that was mere hysteria, and the whole thing is mostly forgotten already. Moreover I want to say that in spite of father's jail sentence it wasn't his fault about the bank. People came in and drew out money against father's advice, and after a while the money was gone, so what could father do but shut the doors?

However, I hadn't meant to go into these matters. I was coming to the reason why I hadn't telegraphed you. That has something to do with father, too. I wish you could know him, but of course he isn't getting around these days. He was such a fine man, Mrs. Plamondin. He did everything for his family, even when he had to borrow money from his bank to do it. That's one of the things that blamed him for. Imagine! And yet at the same time, by a kind of paradox in his nature, father always tried to teach us children thrift. I still have the copy books he gave me when I was learning to write. They are full of quaint old maxims of the pre-Brain Trust era which I had to copy in a careful spencerian hand—things like, "From saving comes having," and "Economy is the parent of integrity, of liberty and of ease."

Of course we now realize that the people who wrote such maxims didn't know what they were talking about. Benjamin Franklin and Aesop are merely funny, and I was much interested to hear, the other day, that there's going to be a new Brain Trust copy-book with maxims containing the best modern thought on economics, and that to symbolize the spirit of the age the writing will be backhand.

My sister is grown up now and of course she doesn't wear pigtail. I don't think you've met her, and there's no change of your meeting her for at least another year, even if she gets the full deduction for good behavior. In her case it was not the bank. Her trouble was that she had always been told there was nothing too good for an Otis, so she went ahead on that basis and got into a kind of scrape.

Well, what I was coming to is this: that in spite of the fact that I still go to the best places, those old copy-book maxims ride me a bit at times. When

you've had thrift dinned into you from early childhood it's hard to throw it off completely no matter how much you read the Washington dispatches.

That's why I'm not telegraphing you. A stamp costs only three cents and the right sort of telegram would cost at least fifty. I have enough of father in me to realize that the differential is forty-seven cents. Not much money, you will say, and in a sense you are right. Yet even under present conditions, forty-seven cents is worth about thirty cents, and thirty cents will take care of the hat-check girl in one of the best places with a nickel to spare.

I can remember just when I first thought of practicing little economies like this. Last year, after father left town, I decided to have his mattress made over, and what do you think I found, Mrs. Plamondin? Money, quite a bit of money. It was the money that made the mattress so hard.

I decided to invest it, and so I went downtown and called on one of father's old banking friends who is still banking although scared to death, and asked him about investments. At first he wouldn't tell me anything. He kept trying to change the subject, wanting to play tick-tack-toe and show me card tricks. When I kept asking him about investments he said bankers weren't allowed to give advice about such matters. Bishops, bartenders, musicians and masseurs can give all the investment advice they want to, but my understanding is that bankers can be put in jail for doing such a thing. I told him I had come to him not as a banker but as a friend, so at last he sent his secretary out of the office, locked the door, pulled down the shades and whispered a tip.

And what do you suppose he told me to buy, Mrs. Plamondin? He said to buy Chateau Latour 1920, or Cill-quot 1923. I am passing the tip on to you, dear lady, because it comes from one of the most conservative and able bankers in the country, and it may repay you for any slight inconvenience caused by this tardy reply to your invitation.

Now as to the invitation, I am awfully sorry to say I shall not be coming to you for the week-end. I could easily pretend that I had a previous engagement, but I like you, Mrs. Plamondin—I really do, in spite of your painting your fingernails red—and I much prefer to be candid with those I like, red fingernails or no red fingernails. The plain truth is that I just don't want to come. Let me add, though, that this is in no way your fault.

Why don't I want to come? Because of the way I'm made. Because your household is so well ordered. Because you like to have everything planned and running on schedule, and I don't. So there you are, dear Mrs. Plamondin; and do ring me up some day when you're in town—not too early, mind—and invite me to lunch.

It is odd, now that I have made this simple statement of the case, to reflect on how I dreaded doing it. It really wasn't so difficult after all. Ah, how often life is like that. How often we dread something we must do, only to find, when we do it, that it isn't really so bad. For two weeks your letter has been kicking around my desk, unanswered, among the bills, and unanswered—another of my little economies. The longer it lay there the worse it looked. There's a cigarette hole burned in it, and it is all streaked and bulgy where someone used it as a mat for a wet glass. Is there anything more repellent, I ask you, than a rumpled, messy letter, with a cigarette hole in it, staring up at one and demanding to be answered?

Now, thank heaven, I can tear it up! Always sincerely yours,
P. FOTHERINGAY OTIS.

Quick, Pleasant Successful Elimination

Let's be frank—there's only one way for your body to rid itself of the waste material that causes acidity, gas, headaches, bloated feelings and a dozen other discomforts.

Your intestines must function and the way to make them move quickly, pleasantly, successfully, without griping or harsh irritants is to chew a Milnesia Wafer thoroughly, in accordance with directions on the bottle or tin, then swallow.

Milnesia Wafers, pure milk of magnesia in tablet form, each equivalent to a tablespoon of liquid milk of magnesia, correct acidity, bad breath, flatulence, at their source, and enable you to have the quick, pleasant, successful elimination so necessary to abundant health.

Milnesia Wafers come in bottles at 35c and 60c or in convenient tins at 25c. Recommended by thousands of physicians. All good druggists carry them. Start using these pleasant tasting effective wafers today

Campus Swank Via Knitted Fashions

By **CHERIE NICHOLAS**

FOR thrills that set your blood tingling to your very fingertips, for enthusiasm that goes skyrocketing to the heights, see the new fall knitted fashions. They are simply grand! Never has a more fascinating chapter been written in knitwear style history.

As to the college girl who is assembling her go-away-to-school wardrobe there is no more direct road to take to arrive at campus swank than via the knitted way.

The new knits are in a riotous color mood. Their bright and handsome hues are as richly colorful and fascinating as the autumnal background against which they are silhouetted. Then, too, pronounced patternings in a bewildering array of checks, plaids and stripes animate the scene in striking display. As to the styling of the new knitted costumes, designers are doing it with incomparable chic and charm. See the three modes illustrated and be convinced.

There is no doubt about the atmosphere of unusual, outstanding and undeniable style that surrounds this trio of chic autumn knits. Consider the spritely checked three-piece suit pictured to the right in the group. It is a stunning affair. It is the sort that is destined to prove the college girl's delight. For that matter every woman will realize in this model her dream come true as to the type of fall costume she has been envisioning for about-town wear. Just the thing for motor-ing and traveling.

This entire ensemble is carried out in a hairy soft yarn in a close Jacquard knit. For the knitted suit the latest is a luxurious three-quarter swagger coat such as styles this outfit. A sensible and graceful mode this, since it enables the wearing of this three-piece until well into the winter season. We see also in this model a fetching ex-

ample of the plaid-with-plaid vogue which is being so widely exploited.

Typical of the many chemises for spectator sports that are seen wherever women of fashion gather, is the ravishing three-piece suit centered in the picture. Both skirt and blouse are plain, providing a perfect foil for the colorful striped jacket. Peeping out at the top is the jaunty blouse, tie knitted in a wide drop stitch. The frog fastening identifies this model as a last-minute creation in that the very newest fashions have these military-looking accents. It is also worthwhile noting that the skirt is finished with a selvyge hemline which prevents it from sagging. A pert knitted hat with brim smartly angled at one side completes the ensemble.

What could be more unmistakably style-convincing than the tailored knit outfit to the left? The double-breasted jacket is cut according to best masculine tradition with wide lapels and straight neat fitting sleeves. Across the back is a yoke from which emerges a voguish shirred fullness. A hairy yarn is used for the plaid knit coat as compared to a smooth soft zephyr for both skirt and blouse. The latter sports a crew neck and an initialed pocket. This clever tailor is knitted in stunning color combinations.

A most important style point to remember in selecting your fall knit outfit is that soft zephyrs closely knit and worked into figure-clinging "lines" are the new order of the day.

SUEDE SUITS
By **CHERIE NICHOLAS**

Here's a newcomer—the suede suit. They are stepping out this fall in the most fascinating colors fancy can picture. To attract the more, they are made of suede as soft and supple as fabric and as delightfully wearable, being comfortably and pleasingly lightweight. In the model pictured the skirt has interesting panel inlays and three buttons which unfasten to allow freedom of action. Roomy pockets, wide revers and a fine fineness in tailored detail give to this handsome jacket suit an air of unusual distinction. As to the colors for the new suede jackets and blouses, suits and accessories, they are simply fascinating.

MILLINERS SHOW NEW USE OF VEILS

Milliners have taken liberties with the classic lines of hats this season with the result that some interesting and amusing new features have appeared. An entirely new use of veils has been shown and, by the way, veils have been getting coarser and coarser until they somewhat resemble fish nets.

A little sailor is shown in white grosgrain which has been stiffened to give shape to the brim which stands out at the sides and tilts slightly over the forehead. A coarse veil of black silk is attached at the center of the crown and falls in back somewhat in the manner of bride's veil. Another in coarse straw is shaped like a Mexican sombrero with an upturned brim all the way around. A fish net veil extends over the crown to the edge of the brim where it is dotted with small pompons.

Dramatic Berets Show Up on Autumn Fashion Scene

Those big berets of velvet or pliant felt, made in thrilling rich dark colors, came onto the fall style scene early, but they will be still in good order when we get into our first warmish tweeds and flannels.

They set off a cotton sports dress with a refreshing dash for the present, but they will be the handiest kind of ensemble when we begin to wear all the strange new colors which autumn models are promising.

For a peek at coming tweeds shows muddy violets and sulphurous greens on the way, and plaids made of most unusual combinations—schemes that demand just the right accent in hat and blouse to show them off. These berets have the color, and they are becoming to almost any type of color-fure, besides.

Hoods, Pantalettes

Many hooded dresses and coats are shown in Paris; also some trousered sports and street skirts. Some designers even show satin evening pantalettes instead of petticoats.

Old Fashioned Patchwork Quilts

Grandmother Clark's Patchwork Quilt Designs

By **GRANDMOTHER CLARK**
From all indications quilt makers will be busy this winter making more quilts. Quilts are still very attractive for needle workers, and any suggestion on this work will be welcomed.

Patchwork Quilt making is much easier today than during Colonial days. Patches are more easily obtained. Diagrams and cutouts for patches and books of instruction are printed. All of these make the work easier and more quilts are being made.

Grandmother Clark's Book No. 20 on Patchwork Quilts contains 30 quilts with cutting diagram for patches, also several ways to assemble 12 and 18-inch quilt blocks.

This book contains information and diagrams for the quilts shown above and many other old designs. Send us 15 cents for this book No. 20 and receive it by mail.

Cares for Her Young

Oliver Deiter's mother came running to take his part when he quarreled with two young men in Wilkes-Barre, Pa. The two young men were taken to the hospital, bruised and battered.

Oliver, seventy-one, and his mother, one hundred, were held for a police court hearing.

Privacy of Spanish

It was the Spanish who cleverly preserved the privacy of their "back yards" by putting them inside their dwellings.

PARENTS SHOULD WATCH CHILD'S REPORT CARDS

"Parents should spend more time in analyzing the scholastic report cards their sons and daughters bring home," writes Don Chalmers Lyons in Hygeia in "An Analysis of the Significance of School Report Cards."

Good or bad grades are not so important as is an evaluation of what these grades actually represent as indicators of social adjustment. The grades which appear on the report card are more than mere indicators of scholastic ability; they are key letters to character and, for the parent who is willing to take the time and trouble to analyze them or to have them analyzed by the child's instructors, they may reveal hitherto unguessed phases in the child's mental, physical and emotional make-up.

Harder work and more study are not panaceas in every case of scholastic failure. Some students have only a limited mental capacity; beyond a certain point, increased study is of no value because of actual inability to assimilate and correlate knowledge. While such students can obtain fair or even good grades if they are carrying a light load of work they are almost certain to fail if they are forced to carry a heavy schedule. It is better to lighten the scholastic load and allow a pupil of this type to take an extra half year or several summer school sessions, if necessary, to complete his high school work than to make him struggle on to failure and the development of a sense of inferiority under an intolerable load.

New Type of Education

Many universities and private institutions now offer for adult students certain courses in which the real professors are children, two, three and four years of age. This

new type of school may be called a nursery school, a child institute, a child research center or a preschool laboratory. It makes little difference what it is called. All such schools exist for the purpose of giving the elders an education.

In her article "Pupil—or Professor?" in Hygeia, Elizabeth M. Stalaker explains how a group of nursery school children showed by their natural responses the right and wrong ways of training children and how they worked out in truly stimulating and enlightening manner various problems of community life.

Under OUR Constitution

By RAYMOND PITCAIRN

National Chairman
Sentinels of the Republic

This is Constitution Week.

Throughout our nation thousands of
men and women who love America are
paying grateful tribute to the Charter
which is at once the soul and the sub-
stance of our freedom. In many com-
munities great meetings are being held
to observe with impressive exercises
the anniversary of its signing.

This observance is more than a
formal ceremony. It is a nation-wide
tribute to the tremendous contribution
which our Constitution has made to the
rights and the happiness of humanity.
And it is a tribute well earned. For—

Under Our Constitution:

The persecuted have found Refuge
... the despairing, Faith ... the opp-
ressed, Liberty ... the courageous,
Opportunity.

Under Our Constitution:

All men have attained the highest
human aspiration—the right to be free,
in body and in spirit. All children
are assured the richest heritage possible
—the right to be educated. All citizens
are guaranteed the greatest power
known—the right to govern themselves.

Under Our Constitution:

The People rule. No man is King;
no man a subject. Despotism is out-
lawed. The Will of the People is the
Law of the Land.

Under Our Constitution:

The United States has achieved a
growth in territory, in population, in
resources and in influence unrivaled
among nations.

The Constitution of the United States
was made for us, the people. All pow-
er to change it or to weaken its safeguards
rests finally in our hands. Today cer-
tain forces, greedy for power, threaten
to wrest that control away. Don't let
them succeed. Don't let Bureaucracy
usurp the authority which, under the
Constitution, is ours alone. Don't let
the politicians destroy those rights
which our fathers won and we must
preserve.

Again— The People Speak

By RAYMOND PITCAIRN

National Chairman
Sentinels of the Republic

An event of unusual import to those
who would think with the United
States Constitution has occurred re-
cently in Pennsylvania—the state
wherein our National Charter of Liber-
ties was conceived and written.

There, for the first time since recent
efforts to remould our Federal Con-
stitution along the lines of the newer
political philosophy gained national
prominence, the people themselves were
given opportunity to say what they
thought of that sort of thing.

Emphatically they rejected the idea.
Dominated by the vote from rural
districts and the smaller cities, they
decided that this was no time to risk
the possible writing into fundamental
law of various unproven theories now
being urged throughout America as a
substitute for crystallized experience.

The people of Pennsylvania, of course,
voted only on the question of revising
their own state constitution. But funda-
mentally—and despite whatever politi-
cal spokesmen on either side may claim
—some of the principles involved were
comparable to those brought into prom-
inence by the nation-wide efforts of
certain groups to remould our Federal
Constitution into a form more readily
influenced by passing fears and passions.

In the response may be read a
heartening message of encouragement
to all who oppose efforts to scrap cer-
tain essential elements of our American
system of government in favor of new
and untried theories. It is:
That the great body of the people—
the men and women who constitute the
backbone of America—are not at this
time in sympathy with a policy of
sudden changes. They realize that
while it was the Declaration of Inde-
pendence that proclaimed personal Lib-
erty, it is the Federal Constitution that
assures it. They do not intend to sur-
render that guarantee.

Again—the People speak.

ADAMSON-LANE POST 287
AMERICAN LEGION

meets on the first Friday in each
month

RAYMOND PITCAIRN

How America Answers Her Critics

By RAYMOND PITCAIRN

National Chairman
Sentinels of the Republic

We have been hearing a lot of criti-
cism lately concerning our American
methods and principles.

For a while the detractors were con-
tent to sneer at our art, our literature,
our simple recreations and pleasures.
More recently, however, they have
broadened their scope. Today their
hardest attacks are directed—often
from within—at our democratic form
of government, with its effective guar-
anties of freedom and opportunity for
all. They favor, instead, certain Euro-
pean patterns which vest all power in a
highly centralized government rather
than in the people.

Such criticism has not gone unheeded.
It is bearing greater fruit than
many of us realize. Its arguments re-
sound from the stump. Its influence
appears in much of our recent legis-
lation.

How can we combat it?
One method is to apply the acid test
of realism. Why not turn to such critics
and ask:

"Under what other form of govern-
ment have a free people developed the
wilderness into a nation as great, as
wealthy, as productive as our United
States?"

"Under what other form of govern-
ment have citizens attained as high a
standard of income, of living, and of
general well-being as has been enjoyed
by successive generations of Americans?"

"What other government has offered
to its poorest boys such opportunities
to rise to the height of their capacity
as are illustrated by the careers of Lin-
coln and Edison?"

"What other government has accorded
to all its citizens—to the least as
well as to the greatest—the political
power guaranteed under our American
Constitution?"

And finally:
"How many of these advantages are
offered to the average man by the mod-
ern European forms of government—
with all their planned economy, their
regimentation and their strong central
authorities dictating to every citizen
how he shall labor, how he shall live,
how he shall think?"

When—and only when—the critics
can answer these questions to our satis-
faction should we take their proposals
seriously.

When—and only when—they can
prove that the men who work and earn
are better off in other lands than in
our own, should we consider scrapping
our constitutional guarantees for their
un-American theories and projects.

Our heritage of freedom and oppor-
tunity is far too precious to swap for a
mess of foreign pottage.

We have a full supply of school
supplies. B & B Variety

GOLDSTON BROS.
Jewelers and Optometrist
Clarendon, Texas

CITATION BY PUBLICATION

The State of Texas.
To the Sheriff or any constable
of Donley County—

Greetings:
You are hereby commanded to
summon W. F. Jones, who is a
non resident of this State, to ap-
pear at the next regular term of
Justice Court, Precinct No. 2,
Donley County, Texas, to be held
at the courthouse thereof in the
town of Clarendon on the fourth
Monday in October, being the
28th day of October, 1935, then
and there to answer a petition
filed in the said court on the 28th
day of September, 1935, the file
number of which is 1673, in
which suit Warren Lett is plain-
tiff and W. F. Jones is defendant,
the cause of action being alleged
as follows: W. F. Jones did, on
the 19th day of June, 1933, file a
claim with the State Highway
Department, claiming that War-
ren Lett owed to W. F. Jones the
sum of \$126.05, which action by
W. F. Jones was wrongful; and
that Warren Lett did not owe to
W. F. Jones said sum of money
and that the Highway Depart-
ment will not pay Warren Lett
said sum until he has established
his right thereto by judgment.
You are commanded to summon
such defendant, and to serve tol-

citation, by making publication
of this citation, once each week
for four consecutive weeks pre-
vious to the return day hereof,
in some newspaper published in
your county.

Herein fall not, but have you
before said court on the first day
of the next term thereof, this
writ, with your return thereon,
showing how you have executed
the same.

Witness W. A. Davis, Justice
of the Peace, Precinct No. 2,
Donley County, Texas

Given under my hand in the
town of Clarendon, this 28th
day of September, 1935

DONLEY COUNTY EXHIBIT AT TRI-STATE FAIR

Above is the Donley county
exhibit at the Tri State Fair. It
shows a good variety of agricul-
tural products, including the
only tobacco grown in the Pan-
handle. This tobacco was grown
by P. A. Buntin of Clarendon.
The exhibit won fourteen rib-
bons, and is regarded as valuable
advertising for the agricultural
possibilities of the county, and
for the farmers who donated the
products and made the exhibit
possible.
The Informer, \$1.00 per year.

Signs of hard winter?

SKIP COLD-WEATHER RISK...MAKE SURE YOUR ENGINE

stays oiled

Conoco is not the only oil refined by modern
methods. But notice what all the usual processes
are said to take out. Then notice what the ex-
clusive Germ Process—fully patented—PUTS IN.

Nothing vague about this process.

It tops off everything else known to Refinery
Science, by putting in the Hidden Quart which
makes your engine stay oiled.

You can park your car for hours in blizzards;
stand for days in a cold garage. But you cannot
make a dragging, expensive, engine-eating start.

Unlike other oil, no matter how free-flowing,
Conoco Germ Processed Oil needn't wait for
your starter or oil pump. The Hidden Quart is
up on guard in advance. It hasn't drained down
because it can't. The Germ Process has let it
"marry" into the inner surfaces of your engine
for good... a strange though natural "affinity"
well known to scientists.

Even the new copper-lead, high-lead and
cadmium-alloy bearings, as well as conventional
babbit bearings, are far better protected by
Conoco Germ Processed Oil than by plain
mineral oils. Scientific tests have proved this.

But millions whose
only laboratory is under
the hood, can tell you a
lot about the Hidden
Quart and Germ Pro-
cessing. They'll tell you
the battery stays up, the
oil level stays up, the old
winter worry and ex-
pense stay away.

All you need to tell
your nearest Conocoman
is "Change mine right
now!" Continental Oil
Co., Established 1875.

SYNOPSIS

To the little town of Heron River comes "Silver" Grenoble, daughter of "Gentleman Jim" formerly of the community, known as a gambler, news of whose murder in Chicago has reached the town. Sophronia Willard, Jim Grenoble's sister, is at the depot to meet Silver. Her household consists of her husband, and stepsons, Roderick and Jason. The Willards own only half of the farm, the other half being owned by Corinne. On Silver's arrival Duke Methank, shiftless youth, makes himself obnoxious. Roderick is on the eve of marriage to Corinne Meader. Silver declares her eagerness to live on the farm, and will not sell her portion. She meets Roddy, Silver tells Sophronia ("Thronie," by request) something—but by no means all—of her relations with Gerald Lucas, gambler friend of her father. Roddy marries Corinne. She has a maid, Paula, who seems to attract Jason. Silver again meets Gerald Lucas, who has established a gambling resort. She is compelled to introduce him to Corinne Willard much against her will. Silver confides to Roddy the fact of her illicit relations with Lucas. Friendship between Lucas and Corinne develops. At a dance Duke Methank insults Silver. Roddy's solicitude brings Silver to the realization that she loves him. Roddy is offered a position at the University farm, but, to Corinne's dismay, he declines it.

CHAPTER VII—Continued

In the end, Roddy found himself battling alone against all three members of his family. Silver had taken no part in the discussion. As she listened, however, a conviction grew with her. Roddy Willard must accept the position that had been offered him. There was, as he had said, always another year for the farmer, but that had nothing to do with the problem. She knew—as the others knew, indeed—what was in his heart when he had said that. But she knew what none of them knew. Had she not heard Freda Michener talk that afternoon in the post office? Had she not seen enough herself?

At last Jason got up and left. Sophronia banked the fire, and old Rodrick went off to bed.

"Well, I'll see you all tomorrow," Roddy said heavily and started for the door.

"Wait a minute, Roddy," Silver called out.

He turned and looked at her curiously.

"What's on your mind?" Roddy asked Silver, as soon as Sophronia had gone.

Silver laughed up at him with disarming naivete as she stood before him.

"I thought I'd just wait until everybody else got through talking," she said. Her glance fell for an instant from his, then, summoning all her fortitude, she spoke.

"You've got to take this position, Roddy. You are a fool to stay on here—starvation staring you in the face—with a respectable living offered you."

"My dear child!" Roddy exclaimed. "You look almost motherly just now. You want me to take the job—for my own good, eh?"

"That's part of it," she admitted lightly. "But I agree with Phronie Corinne hates the farm."

"Corinne will be all right when she gets to understand it a little better."

Suddenly, Silver's body stiffened. "There's something more, too," she said, her chin rising coolly, indifferently. "When your lease is up next summer, I'm going to sell my section."

She saw him blink for a moment as though he had not heard aright. Then he took a step toward her. "I don't believe you," he said. "What has changed your mind about this piece all of a sudden? There's something else back of this."

"There isn't!" she burst out passionately. "For God's sake, get out before—before you're ruined!"

Her words seemed to be scurrying over each other now, she thought in panic. But he should not wring the truth from her—he should not!

Roddy's voice came in a hoarse whisper from his clenched teeth. "You too! My G—d, I thought you had more fight in you than that." He turned away from her and moved toward the door, then looked back quickly. "All right—go ahead! I might have known what to expect when I began dealing with a woman. Well—sell it tomorrow if you want to. But I'm going to stay until I'm kicked off."

"You are being a fool!" she told him, starting to keep back the hot tears. "What will that bring you?"

"It won't bring me the kind of treachery you've handed me, by G—d!" he barked, and plunged out into the darkness, slamming the door behind him.

CHAPTER VIII

On Thanksgiving day the first snow fell in Heron River. Jason and Paula and Steve had come down to the old house for turkey dinner in the early afternoon. After the feast, Silver dressed warmly and set out alone for a walk across the fields to the Flathe place.

The brooding melancholy of the day filled her with a sweet, aching nostalgia, a yearning too profound to name. To run away from Roddy Willard would mean that she would run away from these fields—from her very birthright. And she would never be any

real escape in such a flight, as there had been in her flight from Gerald Lucas. Gerald had not been real, any way; the hard ground beneath her foot seemed to tell her that now.

She had been too selfishly absorbed during the past few days to give any thought to what Sophronia might feel about her going away. Poor old Phronie—how little she knew of what was going on about her. The more she thought of it, the more convinced Silver became that Roddy Willard would remain on this land until he was forced to leave it. Her threat to sell the land had done nothing except to make him more stubborn in his determination to remain. She was made desolate by the knowledge that he was as passionately devoted to this land as she was herself.

She thought vehemently, tears dimming her eyes now, not for any unhappy, outrageous love of Roddy Willard would she give up her life here!

The Flathe children greeted her with their usual uproarious good humor. These Norwegian youngsters lived in a merry cosmos of their own where even poverty was something to laugh at. Six of them there were, ranging from seven years of age to nineteen, with enough boisterous enthusiasm to turn the little farmhouse into a babel. Silver played the decrepit little organ, and sang with the children until the gathering darkness warned her that it was time to leave.

On the way home, she came upon Jason and Paula beside a thicket of hazelnut bushes. Paula looked at Silver without surprise or embarrassment, and Jason's dark eyes smiled at her.

The three began their walk home together. When they came before the big house, Jason gasped. "Come along in, Silver," he invited. "I have something to show you. I wouldn't have the nerve to ask you—but we have the house all to ourselves. I've been making a picture of Paula," he confessed. "And I thought maybe you'd like to look at it."

"It's much prettier than me," Paula said modestly.

"Oh—why, Jase—I'd love to see it!" Silver replied eagerly, going toward the door.

They entered the house and Jason led the way to the attic and lighted the lamp. In the "studio," on a birchwood easel reclined a portrait far from unrecognizable portrait of Paula Gobel. The powerful and intimidating Valkyrie limned there might easily have been a Teutonic ancestress of Paula's.

For some time Silver had suspected that there was more between Jason and Paula than they were willing to reveal to their little world. Whatever ultimate expression it achieved mattered not at all. It was there and they shared it.

"Jason—I'm amazed!" she burst forth at last. "Why—it's really—really great!"

"Gosh!" Jason sighed with relief. "I was scared to show it to you. I thought maybe I'd worked it over too much. But do you think it's good enough to give to Phronie for a Christmas present? That was my idea. She likes pictures, you know."

"She'll love it, Jase!" Silver assured him. "I know she will. But why don't you ask me to sit for you some time?"

Jason smiled a bit sheepishly. "I'm not so good as all that. You've got—I don't know what it is." He shrugged.

With Silver, it soon became an acute misery. She had come here seeking peace and had gradually become the center of a situation that was growing more intolerable every day. She tried to talk about it with Sophronia, but it was impossible to reveal to her all that had prompted her to act as she had done. She decided to go to Gerald Lucas, though she knew Gerald would only laugh at her.

It was a black, blustery night, and Silver put on her old leather jacket and her close-fitting tweed hat. She went out into the inky darkness and started toward the summit of the hill, when a sudden flare of light, like the striking of a match, arrested her attention through the small window of Roddy's workshop in the shelter of the slope.

Roddy must be in there, she thought, getting ready for another night's work. The thought of his self-imposed loneliness smote drearily across Silver's heart. Why should she not go to him now and talk to him—beg him not to remain away from his father's house because of her?

She stepped to the threshold and paused.

"Roddy!" she called softly.

He scooped up handfuls of corn.

"Well?"

"I came over to beg you not to—not to stay away from our house because of me," Silver said. "If that's the reason—"

He stood up and looked at her. At the painful flush that sprang into her cheeks, he stepped toward her with contrite haste. His feelings were in such confusion now that he could scarcely speak.

"I'm sorry, Silver," he said heavily. "It's certainly no time for me to hold out against you—after this. We don't seem to understand each other, that's all."

Silver turned her eyes from him. "I can't go on like this," she said. "It has been utter misery."

"I can't say I've been enjoying it myself," He looked down at her and saw that she shivering. "But listen—you'd better get back into the house," he remarked gruffly. "I'll try to clean this place up a little." He reached down and drew her to her feet, then took her hand in the most acute ex-

apologetically. "Well—you're not as pretty as Corinne, for instance. But there's something about your face—I don't know—but it would take a real artist to catch it. I'd like to give you one of my new pictures, though, if you want one."

"I'd love to have one, Jase," she said slowly. "I'd be very proud of it."

because I like farming that I got a kick out of doing this once in a while. Which one do you want, Sil ver?"

After a moment's thought, Silver selected a light autumn sketch in greys and browns.

"Has Roddy never seen this?" she asked.

"No—he hasn't seen any of them. I used to show him some of my things—and he liked them. But after he met Corinne—well, it's none of my business. I never could quite figure it out, myself. D—n it—I feel sorry for Roddy!"

Silver tucked the drawing under her arm. "I'll hang this one in my room," she said, then started toward the door. "And don't worry about Roddy. When a man falls in love, it does funny things to him sometimes."

Jason laughed. "Gosh, doesn't it?" he exclaimed, and looked at Paula. "Shall I tell Silver?" he asked suddenly.

"Sure!" Paula said at once.

Jason looked at Silver and smiled. "Paula and I are going to be married in the summer," Jason confessed. "—maybe in the spring. We're thinking of a little dairy farm up north—maybe we're not sure yet."

Silver exclaimed with delight. "Am I the first to hear about it?"

"We didn't know ourselves—not up till this afternoon," Jason grinned.

Tears came into Silver's eyes as she looked at them. Jason and Paula—beginning life together on a dairy farm . . .

"Don't say anything," Jason said, putting his arm about Paula. "But don't tell the others just yet."

"Well, I suppose I ought to wish you luck," Silver said, "but when two people are in love, there's nothing much anyone can say. Isn't that so, Paula?"

"It sure is so," Paula agreed lapsing into an accent she had almost conquered since her advent from the Rhineland ten years ago.

The days passed, and Silver Grenoble came presently to know what it meant to live on a farm in winter. But the weekly round of hard work fell into a rhythm which somehow eased the discomfort, and in the old stone house there was always an overtone of contentment.

In Roddy alone, it seemed, was there any discontent. He had explained that Mrs. Meader had not been well and that Corinne was staying with her for a few days. But when the middle of December approached and Corinne was still with her mother, Sophronia became rather voluble on the subject of Roddy's living alone in the big house. For Roddy had withdrawn more and more to himself. His days he spent in work about the place. And at night he would shut himself in his "shop" sorting and grading and completing his records, so as to be ready for another season of experimenting with his beloved corn.

Roddy's mood was rarely discussed by the others, but Silver knew that beneath their silence lay an intensity of feeling that one day must break the bonds of reticence that held it. She knew, too, that while Corinne's absence had something to do with the way Roddy felt, behind it all was the growing resentment toward herself that had begun that night when she had told him of her intention to sell her land as soon as his lease had expired. That had rankled until he could think of nothing else. She knew, too, that the family was aware of it. That, undoubtedly, accounted for much of their restraint.

With Silver, it soon became an acute misery. She had come here seeking peace and had gradually become the center of a situation that was growing more intolerable every day. She tried to talk about it with Sophronia, but it was impossible to reveal to her all that had prompted her to act as she had done. She decided to go to Gerald Lucas, though she knew Gerald would only laugh at her.

It was a black, blustery night, and Silver put on her old leather jacket and her close-fitting tweed hat. She went out into the inky darkness and started toward the summit of the hill, when a sudden flare of light, like the striking of a match, arrested her attention through the small window of Roddy's workshop in the shelter of the slope.

Roddy must be in there, she thought, getting ready for another night's work. The thought of his self-imposed loneliness smote drearily across Silver's heart. Why should she not go to him now and talk to him—beg him not to remain away from his father's house because of her?

She stepped to the threshold and paused.

"Roddy!" she called softly.

He scooped up handfuls of corn.

"Well?"

"I came over to beg you not to—not to stay away from our house because of me," Silver said. "If that's the reason—"

He stood up and looked at her. At the painful flush that sprang into her cheeks, he stepped toward her with contrite haste. His feelings were in such confusion now that he could scarcely speak.

"I'm sorry, Silver," he said heavily. "It's certainly no time for me to hold out against you—after this. We don't seem to understand each other, that's all."

Silver turned her eyes from him. "I can't go on like this," she said. "It has been utter misery."

"I can't say I've been enjoying it myself," He looked down at her and saw that she shivering. "But listen—you'd better get back into the house," he remarked gruffly. "I'll try to clean this place up a little." He reached down and drew her to her feet, then took her hand in the most acute ex-

haustion he had ever known. "I've forgot it, Silver."

For a moment she permitted her hand to rest in his, then withdrew it hurriedly. Without a word she ran to the door and vanished in the darkness toward the stone house.

Later, when Roddy thoughtfully returned home, the strong wind beating up the slope against him seemed fantastically like that sudden impact of Silver's cold, slender body.

"Good Lord!" he muttered, and ran his hand across his eyes. "I must be crazy."

But as he lay in bed thinking over the events of the night, it was the memory of Silver Grenoble's clinging to him that gnawed and worried at the core of his being until at last as he stared up toward the invisible ceiling, his whole life seemed to be tangled in a hopeless maze.

He vowed savagely that tomorrow he would do two things—he would write a letter to Neal Anthony definite-

She Sank Down on the Couch in the Living Room and Gazed Blankly Before Her.

ly rejecting his offer, and in the evening he would drive to Ballantyne and fetch Corinne home.

Beneath the cobalt glitter of the sky Roddy found himself driving along at a snail's pace, although he had forty miles yet to go—and fifty miles back home again, with Corinne beside him.

Corinne had deliberately prolonged her visit with her mother, as Roddy knew, in the hope that he might finally accept Neal Anthony's offer. If only to please her. She had been affectionate, indeed, and always spoke regretfully of her prolonged absence. But Roddy had had time to do a little thinking about Corinne. She was young and spoiled and wholly untrained in responsibility. But she would grow up in time, Roddy reflected, and the passing months would bring to her a sense of her place in the scheme of things.

But there would have to be a change. For one thing, Corinne must be brought to realize that they would have to economize at every turn during the coming year.

It was two o'clock in the morning when Roddy returned to the farm with Corinne. She had broached the subject of Neal Anthony. When he told her of the letter he had written that day, Corinne had lapsed into a silence more deadly than any vitriolic denunciation he might have anticipated.

In the house she sank down on the couch in the living room and gazed blankly before her.

Roddy came over to her. He drew a chair, seated himself, and took her hands into his own.

"Look at me, Corrie," he begged softly. "Let's not begin like this. You don't know what it means to have you home again. And you can't guess how lonely it has been here without you."

She sighed and heaved back against the couch. Then she looked at him. "I wonder," she said slowly. "It's so easy to sentimentalize."

"Listen, Corrie, I know there's more to it than sentiment. It's a tough job, however you look at it. But we can make it easier if we tackle it together. I'm sorry about that job Neal Anthony threw my way. I wish I could have taken it—for your sake, Corrie. But I couldn't. And some day you're going to be glad I didn't."

Corinne sighed again. "I'd rather not discuss it any more," she said coldly. "You've made your decision."

She drew her hands away from him and Roddy sat back in his chair. For a moment he regarded her thoughtfully. During the past few days a hope had formed in his mind that he must express to her—a profound and solemn hope on which, he believed, depended the scrutiny of their life together.

"All right, Corrie," he said at last. "We'll drop it—and start in again. But let us start in right this time. Let us face our problems together and work them out together. I want a home—a home with you, Corrie, where we can bring up our children and be happy together." He blundered on, hearing himself as though he, somehow, were groping in that cold fog of Corinne's eyes. "I've been thinking about that very thing while you've been away. If we had a baby, you'd find something to live for here. We'd be closer to each other, Corrie."

Human Heart Very Busy
The human heart contracts about 86,000 times a day.

Little Lights on LIVING

By MARIA LEONARD
Dean of Women, University of Illinois
© Western Newspaper Union.

POWER AND LIGHT

EMBLAZONED across the sky at night, sometimes far distant, one can see when approaching a town, the great bright letters of an electric sign, bearing the words, POWER AND LIGHT SERVICE.

What an eternal truth and spiritual message our public utilities are writing across our skies—that power and light brings service! Dean Inge of London has said that as man's love for light progressively increases his need for government progressively decreases. Light is truth, and education is the process of determining truth. Knowledge is power but wisdom is light. Education must include both, that is why true education builds character. Power with light is character and character manifests itself through service, that great vital force of the human heart. Light is truth where there is no light there is no truth. The Master said, "I am the way, the truth, and the light."

Power without light is a blind unguided force, while power with light builds the human race. As the human family receives more light through education and culture, it will also receive more spiritual guidance to manipulate those powerful forces which science has discovered in our mechanical age and it will learn to use them for the benefit, and not for the destruction of mankind. Light comes through education and acts of the human heart which as brakes check speed on a high powered car.

War for instance, is power without light, for its goal is selfishness, not service. High powered explosives are made to kill. Chemistry in the hands of a physician, cures. What is the difference? One is power without light—selfishness, the other is power with light—service.

A European scientist was once working in his laboratory on a God-like experiment, hoping to eradicate much of the disease of the world through his discoveries. Suddenly one day without warning he was commanded by his government to come into its laboratories, to discover gases for the next war. His laboratory was power with light, the other power without light; his was for human service, the other for human slaughter.

What would become of our modern methods of living if this public utility power and light—service were to be removed? And what would become of the human race if this spiritual truth—service from power and light were removed? Perhaps we should better ask, what could not the potentiality of the human race really be if this truth were put into practice in men's hearts?

SYMMETRY IN LIVING

THERE are two symmetries in life which each individual must master, if he would adapt himself to the fine art of life living. The first one lies within himself, which gives him perfect equilibrium of spirit. This comes from a deep assurance and certainty that his life is built securely on the fundamentals of right living.

I regret for our youth today, that our older generation has failed to pass on to them this sense of security and beauty of symmetry in our modern expressions of living, such as our unexplainable modern art, some of our dissonant music, and our silver screen distortions of sex, love, and home life. Our barren current literature, too, has had its part in taking away what little security might be left to youth by featuring such phrases as "Time of Great Moral Uncertainty," "Morals in a Day of Relativity," "The Changing Moral Trend," and "An Unmoored Age and the New Morality." Mathew Arnold said—"Culture is contact with the best that has been thought and said."

The love of beauty in the ancient Greeks caused their time to be called the "Classic age, because it has endured throughout the ages. Standing on the Acropolis one full moon night, I say the silvered Parthenon, I should rather say I felt it in my heart. That was only symmetry in cold stone, how far greater when found in human life. Plato's matchless words bespeak it thus: "Culture is that thing that brings to body and soul all the beauty, all the perfection of which they are capable."

Four avenues we have for self-realization, which must precede our self-expression, if we would have symmetry in living. They are, "work, play, emotional control and spiritual nutrition." Our inner symmetry must balance all of these. If we be weak in any one, we are only as strong as our weakest point. It is not what we do but what we are, that brings us to our highest level. "We are so busy doing, that we haven't time to be," and yet the symmetry of life is found in Personality. The second of the two necessary symmetries of fine living lies with the world outside. Enrichment of life is useful only when shared, then others catch its radiance. This must be passed on to youth if our race is to continue to improve, for it isn't "What life is made of, but what life is made for," that counts. Eternal love of beauty that comes from the depth of a human heart to the world outside, brings symmetry in living.

DOG GONE

Skippy, the wire-haired terrier of Mr. and Mrs. B. M. Curtis of Kansas City, mysteriously disappeared, but they could still hear his whining about the house. After 25 hours of searching and growing belief in spooks, they found him. He had gone into the attic and fallen down an air chute behind the bathroom wall. They lifted him out by catching his foot in a noose.

BOYS! GIRLS!

Protein Needed
Vegetarians may have psychological reasons for cutting out meat, but average healthy individuals need protein, and it takes skill to provide this if you limit your sources to eggs, cheese, and vegetables.—Bureau of Home Economics, United States Department of Agriculture.

FAMOUS TONIC CREAM QUICKLY TRANSFORMS DEAD SKIN

3 minutes a day ends freckles, blackheads, too!
Famous NADINOLA Cream actually smooths away the dull, dead cuticle that hides your natural beauty. All you do is this: (1) At bedtime spread a thin film of Nadinola Cream over your face—no massaging, no rubbing. (2) Leave on while you sleep. (3) Watch daily improvement—usually in 5 to 10 days you will see a marvelous transformation. Freckles, blackheads disappear; dull, coarsened skin becomes creamy-white, satin-smooth, lovely! Fine results positively guaranteed with NADINOLA—tested and trusted for nearly two generations. At all toilet counters only, Paris, or write NADINOLA, Box 40, Erie, Penn.

Power of Faith
Even a plan full of faults can be made to work if everybody has faith in it.

Women Who Have Pains Try CARDUI Next Time!

On account of poor nourishment, many women suffer functional pains at certain times, and it is for these that Cardui is offered on the record of the safe relief it has brought and the good it has done in helping to overcome the cause of woefully discomfort. Mrs. Cole Young, of Louisville, La., writes: "I was suffering with irregular . . . I had quite a lot of pain which made me nervous. I took Cardui and found it helped me in every way, making me regular and stopping the pain. This quieted my nerves, making my health much better." If Cardui does not benefit YOU, consult a physician.

YOUNG DEMOCRATS

The Donley County Young Democrats Club met Monday night of last week at the court house in Clarendon. Soil erosion was discussed in a very interesting manner by R. E. Drennan, G. G. Reeves, Nolle Simmons, H. M. Breedlove, J. R. Forter, J. H. Morris, Neal Bogard and Van Knox. A general discussion was then held on the subject, and a committee of three members was appointed to work with the president, C. H. Baird, and the executive committee chairman, J. H. Morris, in studying the soil erosion problem.

The next meeting will be Oct. 28. The subject will be "What is Constitutional?"

CARD OF THANKS

We wish to thank each and every one that made a gift to our needs. We appreciate every thing, and can only repay you by saying God bless each of you.

Mrs. H. P. Hillman
Mrs. Fannie Hefner

The Informer, \$1.00 per year.

WIFADABOS CLUB

The Wifadabos club met Sept. 24 at the Methodist Church. Although it was showery weather, a few (8) were present, and spent a pleasant hour chatting and singing our favorite songs, which made it seem we were at church instead of the meeting. After singing we were treated to watermelon by Mrs. Adamson.

The program for next meeting, Oct. 8, follows:

Leader, Mrs. Richerson.
Roll call, memories of my grandparents.

Housekeeping in olden times, Mrs. Newman.

Clothing worn and how made, Mrs. Reese.

Social customs of those days, Mrs. Harrison Hall.

"Old Spinning Wheel," Mesdames Adamson and Crawford.

Mrs. John Dickson will be hostess. All meet at the church at 2 p. m. for conveyance.

The article on the Young Democrats, the picture of the Donley County exhibit at the Amarillo fair and a number of other items had to be omitted last week, due to lack of space.

NEW DEAL BRIDGE CLUB

Mrs. Hobart Moffitt entertained members of the New Deal Bridge club at her home Thursday afternoon Sept. 26.

Auction bridge was the diversion of the afternoon, after which prizes were awarded to Mrs. H. H. Hall for high score, Mrs. Roy Kutch second high, Miss Otey Watkins received low and Mrs. Spalding guest prize.

Delicious refreshments were served to Mesdames Spalding, Ross Adamson, H. H. Hall, Geo. Thompson, Ray Moreman, Alva Simmons, Homer Simmons, W. G. Payne, Sid Thomas, Roy Kutch and Miss Otey Watkins.

Just received, fresh Braeb's candies. B. & B. Variety
