COMMUNITY PROGRAM

The program for the community meeting Friday night Oct. 11, at the school auditorium has not been completed, but we are sure that we shall have plenty of special numbers as well as songs for the entire audience. We believe that it will do all of us good to get together for an evening of fun. Bring your neighbor. No admission.

Sandy and pop at Otho's Cafe

GEO. W. BROWN

Rev. M. E. Wells was called to Dumas last Wednesday on account of the death of his brother in law, George W. Brown, who died at his home there Wednesday morning. Funeral services were held Thursday at the First Baptist Church at Dumas, of which Mr. Brown was a member. Rev. Wells assisted the pastor in conducting the services.

SCHOOLS TURN OUT

Hedley schools will turn out to day (Friday) for cotton picking. Pupils will resume classes Monday, Oct. 28.

Born, Oct. 2, to Mr. and Mrs. L. A. Tucker of Estelline, a fine boy baby, Mrs. Tucker was formerly Miss Velma Newman.

Mrs. R. E. Newman is visiting in Estelline.

Good chills at Otho's Cafe.

KILL KARE CLUB

The Kill Kare Needle club of Clarendon met in an all day meeting in the home of Mrs. M. W. Mosley. The house was beautifully decorated in fall flowers. Crocheting and quilt piecing was the height of the day.

A bountiful luncheon was served buffet style. Members, Mesdames Henry Williams, W. A. Land, H. Mulkey, W. A. Masie, Buel Sanford, E. M. Oster, Cap Lane, H. C. Bramley, Joe Clinek, S. W. Lowe, J. E. Bartlett, W. O. Stewart, Misses Ida and Etta Horned. Guests, Mesdames Frank Whitlock, J. T. Warren, A. T. Cole, Will Johnson, Geo. E. McCleskey, E. F. Harkness, Jiggs Mosley, M. E. Wells.

HEDLEY SINGERS

Had a good singing and a good crowd out at our last meeting. Had several visitors which we are always glad to welcome. We meet again next Sunday, Oct. 13, at 2:30. Everyone cordially invited.

Good coffee at Otho's Cafe

NOTICE

I am opening up the Phillips 66 Station, and will appreciate a share of your trade. Courteous service.

Landon Duggins

Dressmaking and alteration at reasonable rates. Will also exchange sewing for quilting. Satisfaction guaranteed.

4781 Mrs. L. Z. Land

Carl Dickson of Goodnight spent Sunday in the home of his grandparents, Mr. and Mrs. O. B. Dickson.

Subscribe for the Informer.

HEDLEY P. T. A.

P. T. A. met in the high school auditorium Thursday evening, October 3. The house was called to order by the president. The assembly sang America. The topic for discussion was school problems and how to meet them. Mrs. Donald was leader. The program was:

Our School Plant, versus an Ideal Plant, Mrs. Mary Reast. School Finance, W. C. Payne. Changes in Curriculum, Sid Thomas.

Although it is impossible for our community to have an ideal plant with our present buildings and furniture, Mrs. Reast suggested that adequate convenience for children to wash their hands, screened shelves for school lunches, liquid soap and paper towels in the rest rooms were improvements that would aid to keep the local school accredited under the new plan of Texas School Supervision.

Had each patron heard Mr. Payne's explanation of the source of the school finances, and the problems of the administration to meet necessary expenditures, he would have a greater appreciation for the efforts being put forth to solve these problems.

Mr. Thomas explained that the new trend in curriculum revision is the project plan. The Industrial Laboratory course is pioneering in this new trend, he said.

In the business session, the association made plans for the annual Hallow's on Carnival.

After the business meeting all members were invited to the Home Economic department where the social committee served them coffee and cake.

The next meeting of P. T. A. will be October 17. The program will be a Texas birthday program.

The Publicity Committee

Mr. and Mrs. Paul Hunt have moved here from Ranger, and will operate a cafe in the old Hedley location next to the Huffman Barber Shop. They invite you to visit them.

Miss Mollie Carter, who has been living in Amarillo, has moved here to be with her parents, Mr. and Mrs. B. A. Carter.

Mr. and Mrs. Q. P. Shelton of Ft. Worth visited Mr. and Mrs. R. E. Jones and Grandma Shelton several days this week.

Outings, sheetings and muslins for all year needs. B. & B.

Frank Koger of N. Mexico is visiting his sister, Mrs. Harry Mendenhall and family.

Mrs. J. P. Alexander and Mrs. Lou Wood and little daughters of McLean visited in Hedley a short while last Wednesday.

Miss Geneva Whittington left last week for Wichita Falls, where she will attend Draughtons Business College.

Jim Clawson and family visited in Littlefield over the week end.

Miss Jewell Everett left Tuesday for Quitaque, where she has accepted a position with the West Texas Utilities Co.

Rex Kendall, who is attending S. M. U. at Dallas, visited his parents several days this week.

C. B. Dickson and wife and Miss Helen Hoggard visited in the Will Dickson home at Ring several days last week.

RAYMOND PITCAIRN

An Object Lesson From Europe

By RAYMOND PITCAIRN
National Chairman
Sentinels of the Republic

"They that can give up essential liberty
to obtain a little temporary safety deserve
neither liberty nor safety."

So spoke Benjamin Franklin, sage of
the Revolution and of our early Republic.
His words ring as true today as they
did a century and a half ago.

Turn to the news from modern Europe
if you would see the evidence. What do
we read?

Reports of government threatening to
plunge its people into a war of conquest
which statesmen fear may embroil all
Europe.

Reports of government elevating religious
and educational intolerance to the
status of a national policy.

Reports of government sacrificing the
freedom of its populace on the altars of
Communism and regimentation.

Under what types of governments are
these things happening? The answer is
clear.

Under those whose people, for the
sake of a promised—and unfulfilled—
economic safety, have delivered their
essential liberties into the hands of
highly centralized authority—whether a
dictatorship or a communized bureaucracy.

These are the dangers which the
Founders of our nation knew and fore-
saw when they wrote a Constitution
that denied despotic power to politicians
and vested all ultimate authority in the
people.

These are the tragic possibilities which
men and women who love America seek
to avert today when they fight efforts
to weaken those guaranties of personal
liberty and opportunity that are written
into our Fundamental Law.

They know — from the lessons now
apparent in Europe — that Franklin's
warning could be rewritten to read:

"They that can give up essential
liberty to obtain a little temporary
safety lose both liberty and safety."
Don't let that happen to America.

CITATION BY PUBLICATION

The State of Texas
To the Sheriff or any constable
of Donley County—

Greetings:

You are hereby commanded to
summon W. F. Jones, who is a
non resident of this State, to ap-
pear at the next regular term of
Justice Court, Precinct No. 2,
Donley County, Texas, to be held
at the courthouse thereof in the
town of Clarendon on the fourth
Monday in October, 1935, being the
28th day of October, 1935, then
and there to answer a petition
filed in the said court on the 28th
day of September, 1935, the file
number of which is 1675, in
which suit Warren Lott is plain-
tiff and W. F. Jones is defendant,
the cause of action being alleged
as follows: W. F. Jones did, on
the 19th day of June, 1933 file a
claim with the State Highway
Department, claiming that War-
ren Lott owed to W. F. Jones the
sum of \$126.05, which action by
W. F. Jones was wrongful; and
that Warren Lott did not owe to
W. F. Jones said sum of money
and that the Highway Depart-
ment will not pay Warren Lott
said sum until he has established
his right thereto by judgment.
You are commanded to summon
such defendant, and to serve this
citation, by making publication
of this citation, once each week
for four consecutive weeks pre-
vious to the return day hereof,
in some newspaper published in
your county.

Herein fail not, but have you
before said court on the first day
of the next term thereof, this
writ, with your return thereon,
showing how you have executed
the same.

Witness W. A. Davis, Justice
of the Peace, Precinct No. 2,
Donley County, Texas

Given under my hand in the
town of Clarendon, this the 28th
day of September, 1935.

W. A. Davis
Justice of the Peace, Precinct
No. 2, Donley County, Texas.

NOTICE TO PRODUCE HOUSES

It is a violation of the law to
sell chickens or hives or any
kind of fowls or animals without
the parties selling same having
a bill of sale or making affidavit
of ownership. This law is going
to be enforced in this county.
From now on a person buying
produce, knowing it to be stolen,
is just as guilty as the persons
stealing them. If you do not
know absolutely that the stuff is
O.K. that you are buying, make
the persons selling same produce
a bill of sale or an affidavit of
ownership. It is unlawful for a
person to transport any fowl or
animal without a bill of sale or
an affidavit of ownership, so stay
in the clear by observing the law.

If not it is going to cost some-
one plenty. I will get down on
my knees and thank the person
that uses a shotgun on the next
chicken thief he catches, and will
pay him a reward also. Please
call me just as soon as you miss
any chickens or anything else.

Let Our Motto Be GOOD HEALTH

BY DR. LLOYD ARNOLD
Professor of Bacteriology and Preventive Medicine, University of Illinois, College of Medicine.

UNDULANT FEVER

The newspapers in the winter of 1934 carried accounts of the drastic recommendation by a health officer in Salt Lake City that all the 100,000 goats in Utah be slaughtered to stop the spread of Malta fever among residents of the state. While the eastern, central, and north-western parts of the country have sporadic cases of Malta or undulant fever constantly, they have never been threatened with it in the epidemic form that the dry southwest has. The agricultural state of Illinois, for instance, reported 96 cases from the first of January, 1935, through the month of July.

Our knowledge of Malta fever came about in an interesting way. The island of Malta in the Mediterranean sea was an important military base for Great Britain after the Crimean wars in 1855. There many of the English soldiers became ill with fever of an unknown and puzzling origin. They were too sick for military duty and suffered from loss of weight, muscular weakness and fever over long periods of time. Then in 1887 Prof. David Bruce of England discovered the germ causing this disease and found that it was present in goat's milk, and that the female goat excreted the germ in her milk. Boiling the goat's milk prevented infections. It was further found that the germ caused abortion in goats.

In 1897 Professor Wright of England injected himself with a living culture of the germs and developed the disease. He studied the course of the ailment upon himself and found that he could use a blood test to diagnose the disease.

Scientists labeled the sickness "Malta fever" because it was investigated and worked out on the island of Malta. But the British government objected to the name as reflecting upon one of their island possessions. They said the disease had been found to be prevalent in the neighborhood of the Mediterranean basin and was not peculiar to the island of Malta. They suggested it be called Mediterranean fever, and, working through diplomatic channels, caused the name to be changed.

Professor Bang of Denmark in 1887 discovered a germ which causes contagious abortion in cows. Later it was learned that this germ can cause in man a long protracted illness characterized by fever, weakness and loss of weight, just as in the case of Malta fever. Because of the peculiar wave-like form of the fever curve this disease is called "undulant fever."

But undulant fever is not primarily a disease of man. It is in reality a disease of the unborn animal of the barnyard. Cows or hogs or goats will carry the germ in their bodies, but it does not cause disease until they become pregnant, and then the germ grows in the womb and causes abortion of the young. The aborting calf or pig or kid contains many millions of these germs. The mother animal does not seem to suffer as a result of harboring these germs. The cow passes the germs into the milk, and hence milk must be considered as a source of infection. Pasteurizing milk, however, kills the infection.

The veterinarian can help more in preventing undulant fever than can the physician. The elimination of infectious abortions in cattle and pigs and goats will prevent the disease in man. So long as we have herds infected with this abortion bacillus, the best way to prevent undulant fever in man is to avoid contact with aborting animals and to pasteurize milk before drinking. If one cannot avoid contact with aborting animals, care should be taken to prevent infection. This can best be done by carefully washing the hands after contact; if abrasions or sores are present on the hands, rubber gloves should be worn when handling infected abortion material. Care should be taken not to soil the clothes. The afterbirth should be burned or otherwise destroyed so that it cannot infect pigs and other barnyard animals.

Most of the cases in Illinois are among people living on farms who are in contact with aborting animals. More men than women contract the disease, and the twenty to fifty year age seems to be the period of greatest susceptibility. There are a few cases reported in Illinois among children but not nearly so many as among adult men.

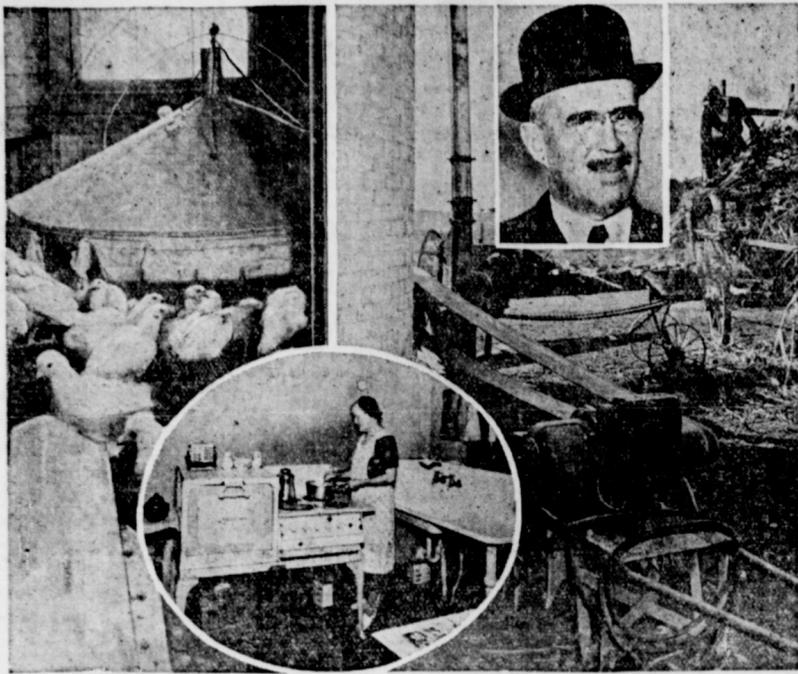

Undulant fever is difficult to distinguish from several other diseases, but it can easily be identified by laboratory tests, which can be made in twenty-four hours.

A patient with undulant fever has general muscular weakness, profuse sweating, fever at irregular intervals and a progressive loss in weight. But these symptoms are by no means typical of undulant fever alone. The laboratory test is essential.

Treatment of undulant fever has remained unsatisfactory, although many workers have been devoting much time to it. Now comes a report from several doctors at the University of Cincinnati college of medicine that they have produced a serum that has proved satisfactory in a number of test cases. The cure has not developed far enough for general use, however.

© Western Newspaper Union

Electricity for a Million Farms

Shown in the inset is Morris L. Cooke, director of the new Rural Electrification authority, and around him are illustrated some of the tasks REA hopes electricity will soon be doing on a million more farms—"mothering" chicks, lighting household work and filling silos.

By WILLIAM C. UTLEY
ELECTRIC light for a million farm homes. A whole new set of hired hands who never get tired and who work for very little wages for each of these farms.

Emancipation from backbreaking tasks for a million farmers' wives. These are the ambitions of the newly formed rural electrification authority which has been created by the federal government to extend to farms throughout the nation the benefits which are being enjoyed by only 734,000 out of 6,000,000 of them today.

But the ambitions, if they are realized, will have consequences reaching far beyond their own limits. For bringing electric power to a million farms will create thousands of jobs in city factories. Manufacturers of light bulbs, washing machines, refrigerators, irons, radios and other appliances will have to keep their factories humming to keep pace with the demands of Mrs. Farmer. And Mr. Farmer will want motors, milking machines, cream separators and other electrical "hired hands." Before either of these demands can be satisfied lines will have to be built and wiring completed.

Farmers will be able to buy these appliances, for the government has extended the Electric Home and Farm authority to a national scope. The EHFA has enabled farmers in the Tennessee valley to buy appliances on easy payments financed by the Reconstruction Finance corporation.

The government, under this scheme, arranges for manufacturers to sell standard quality equipment to consumers at low prices. The purchaser has to make a cash down payment, but the EMFA remits the remainder of the cost to the dealer in cash. Appliances may be purchased from recognized dealers in any communities where the power company co-operates by reducing prices for current. What charges remain after the down payment are spread out over three or four years and are added each month to the customer's bills for electricity. The payments are turned over to the EHFA as they are made.

\$100,000,000 for Jobs.
The Rural Electrification authority, under the direction of Morris L. Cooke has been assigned \$100,000,000 to use in the next year or two. Even a vast sum like that would not go very far if it were used in constructing lines to farms which are now comparatively long way from the lines of any power company or municipal plant.

But there are some 5,000,000 farms in America today which are without electricity. In its campaign to electrify 1,000,000 farms, the REA, according to director Cooke, will attempt to bring service only to those in areas where no new generating plants will be necessary, where lines can be built economically from a source of power which already is working.

The REA, however, will not even investigate the applications of farms where there is service in the immediate neighborhood. It will be interested in projects where new sectional lines can be built to electrify whole farm areas, but not where a mere extension of an already existing line is asked by a farmer who lives close to it. Such cases as these it will leave for the local power company to develop.

As an example of a case that is eligible to get REA help, take that of a group of neighboring farmers who want electric service. There is a plant in a city a few miles away, but the power company has refused to build lines out to them for the very good reason that the potential business does not seem to warrant it. Power companies, despite the feelings of cranks and unreasonable people, are not in business "for their health."
Feeling that this is a fair attitude

of the company, the farmers, who want electricity and are willing to pay for it, band themselves together in a little co-operative group, go to the company officials and offer to buy power to be delivered at the nearest point on the company lines.

Here's One Difficulty.
The farmers themselves will build lines to their farms. To finance the construction they will borrow the money from the REA, who, theoretically, investigates the group from every angle to make sure that the loan is a sound one.

"There is nothing very complicated about this," says Mr. Cooke. "It is not like launching a great new power project involving millions. This whole operation will not exceed \$20,000."

Ah, but only part of the story has been told. The REA plans for these co-operative groups suggest that the farmers shall buy power from the company at wholesale rates, to be fixed by negotiation or by the state's public service commission. This does not "set" very well with many of the utility companies who have farm customers.

Why not? Is the natural question, glancing at the case only superficially. These farmers who are co-operating have paid for the installation of the line; are they not entitled to some sort of extra consideration for what they have done?

It so happens that the other farmers who are already receiving current from the same power company at retail rates will, in effect, have paid for their lines, too. Why shouldn't they get wholesale rates? Actually, they have not, or have paid only in part.

Here is the way it works, although this must be taken as a hypothetical case, for all power companies do not have the same agreements with their farm customers.

Who Pays for the Line?
Let us say that the cost of a line built out to a farm is \$500. The farmer, supplied for the sake of example by a middle western utility company which has been outstanding for its rural electrification work, is given 80 months in which to pay for the cost of the line. He "pays" for it by guaranteeing to use a monthly minimum of electricity equal in cost to one-eighth of the cost of the line, which in this case would be \$10, until the 80 months are up.

If he actually uses less than \$10 worth of "juice" during a month, his bill is \$10 just the same. But he is entitled to all of the benefits every month that \$10 worth of electricity will bring to him, so he might just as well use it. It's like going to a metropolitan theater restaurant where there is a minimum charge of \$2.50 a head; you can eat just a sandwich if you want to, but your bill is \$2.50 just the same; if you're hungry, you might as well eat a full dinner, for it isn't going to cost you any more. And farmers today are really hungry for the benefits of electric power to ease their daily tasks.

"If you take away my electricity, you can just take the farm, too," is the way Farmer Gus Swanson, of Fountain county, Indiana, puts it.

Actually, a farmer buying power from a utility company on such an agreement is paying for the cost of his line only if he fails to use \$10 worth of electricity each month. If his bill is \$10, he gets back dollar for dollar in electric power.

But if such a customer has a cousin or a friend over in the next county who is a member of one of the REA co-operative groups and is getting power at a lower rate, power company officials would have about as much chance explaining the reason for that to him as they would have of making him understand the Einstein theory. He would insist that he was paying for

his line as surely as his cousin, only in a different way.

The Women Want It.
This, then, is one of the obstacles that confront the REA ambitions. They are ambitions, however, that are worth struggling to attain. Ask any farmer's wife.

The worker in the city puts in 40 hours of labor every week; she works 64 hours. If she has a large family she probably works longer than that. If she has a small baby, she works even longer. He gets paid; she doesn't.

If she hasn't electricity to assist her she has to do everything the hard way—the tiring way that puts lines in her face long before she should have them. Yet housework isn't all she has to do. About 20 per cent of her time is taken up with actual farm work. Eighty-nine out of a hundred farm wives manage the hen houses. Sixty-six out of a hundred make butter. Do you think their lives wouldn't be "heaven" if they only had vacuum cleaners, washing machines, electric irons, and—the possession usually dearest to the heart of an "electrified" farm housewife—electric refrigerators!

In the state of Wisconsin it has been found that the farmer spends an average of \$250 a year on his passenger automobile. In a census of more than half the farms of the country five years ago it was found that, on the farms counted, there were 113 passenger automobiles per farm. That would indicate that the farmer is able to pay for modern comforts if he wants them badly enough. It must be remembered that these were passenger cars, not farm trucks.

The REA wonders why, if there are cars on 3,650,000 farms, it can't put electricity on a large share of them. It has been said that the average farm income is \$300 a year. But the REA will of necessity not be looking to electrify the average farm, but the one that is above average, for it is the above-average farm, as a rule, that is located near power service.

Bathrooms Are Luxuries.
One survey made by the government showed that 85 per cent of all the farms of the land have neither bathroom nor shower. Yet more than half the farms have an automobile! The reason for this antiquated bathroom equipment is the difficulty in pumping enough water to provide for modern equipment. Seventy per cent of farm women today have to carry water from a well or spring. If this could be done with electricity the situation would be much different.

To supply all the American farms with modern bathroom equipment, the manufacturers of the country would have to work without stopping for seven years, it has been estimated.

This is perhaps the most elemental of all needs for electricity on the farm. There are others. Four out of ten farms are still lighting with kerosene lamps; there are perhaps 6 or 7 per cent which either use candles or go without any artificial light at all. Shades of Lincoln studying by the light of the fireplace! We'd hardly think that was necessary at all today.

Of course the REA is not going to correct these conditions on all farms, or even on half of them. "There are farms in neighborhoods too sparsely settled to afford power," says Mr. Cooke. "There are farmers too poor to pay for it. After all, there are plenty of people in the cities who do not use electric power yet. If we can bring wires into the homes and barns of 1,000,000 farms within the next year or two, we think that is not too much to hope for and we think that will be a useful job."

With \$100,000,000 of government funds to spend, maybe REA can do it. If so—and if you'll forgive the pun—more power to REA.

Uncommon Sense By John Blake

© Well Syndicate—WNU Service.

Up to the age of five or six, the small boy's hero is his father.

When he is ten, he begins to suspect Who Are Your Heroes? that the captain of the baseball team has an "edge" on papa.

By and by, when he has read a little history, he picks out George Washington—if he isn't in the meantime influenced by the career of Captain Kidd.

Who are your heroes? Napoleon? Wellington? Lindbergh? Hero worship, if not overindulged in, is an excellent thing.

To be a hero—or to be known as a hero—means that one has done something worth doing and done it extremely well.

He may be a war hero or a peace hero.

But whether he is a writer or a fighter or a painter or an actor, his example is highly useful to people, who, if they had no heroes at all, would be the worse for it.

Every human being needs examples that are worth following.

Every human being ought to feel the influence of men and women who through hardship and trouble have held fast to their purpose of doing something worth while—of being somebody—of being a little more than average useful in this world.

You are not limited to one alone.

You can, if you choose, have a dozen or a hundred or a thousand of them.

Look the list over. It is a long one.

"As a man thinks, so is he."

And the influence of those around him, or of men who have lived and done splendid things in the past are sure to control his thoughts.

I think Longfellow exaggerated when he wrote:

Lives of great men all remind us
We can make our lives sublime
And departing leave behind us
Footprints on the sands of time.

The sands of time will not be trodden by very many people of your acquaintance, and it will not always be possible for you to follow great examples.

But you will do wisely to be guided to a great extent by the careers of real heroes, and even if you fall wholly to be as useful and as unselfish as they were, you will be better and happier because you did try to be as much like them as you were able to be.

So pick your heroes, and stand by them. You cannot lose thereby, and you may greatly gain.

Not all life savers "bend to the oars" when an SOS comes from a ship stormbound on a lee shore.

The great majority of them sit beside sick beds, or toll day and night in laboratories seeking ways and means to conquer disease and to alleviate the sufferings of the sick.

As a rule little is known of these men and their activities. They toil, sometimes for years, in finding cures for diseases that not so long ago swept across the country and brought death or deformity with them.

Today they are working to find a means of combatting infantile paralysis which has killed, or left maimed and helpless, thousands of children.

I remember when I was a child an epidemic of this malady spread over the country, and hundreds of children were slain by it, or left maimed and almost helpless for the rest of their lives.

Scarlet fever, diphtheria, dozens of scourges which once were a menace to young or old, have been done away with entirely.

And all because quiet, determined men worked hard and long, often at the risk of their lives, to cope with them.

It was not so very long ago that once smallpox began to spread, it had "to wear itself out," as the saying went.

Nothing could be done about it. Today it is almost extinct.

Who has accomplished this beneficent miracle?

Chiefly men who have little to gain but fame, and who care nothing for that.

The zest for helping the unfortunate is what inspires them.

As long as they have brains to think with they will apply themselves to the work of driving out and keeping out the scourges that in all the ages before ours made life precarious.

All nations have their lists of heroes—most of them heroes of war.

But the real heroes, the men who are rapidly making the world safer as a place to live in, are little known or unknown altogether. Their reward is the joy of the working of the glory of achievement. Any one of them is worth a hundred war heroes.

Yet we are so constituted that more praise will be given to the great soldier than to all the scientists who have, by indefatigable labor, made the world really safe for humanity.

Hobo, Tramp, Bum—They Are Different

Very Distinct Class Lines Drawn Among These Groups.

To the average man the words hobo, tramp and bum are synonymous terms, used to designate a type of foot-loose, homeless specimen of the genus hobo. They are terms of derogation and approbrium.

Not so! Before calling a hobo a tramp, or either man a bum be sure you say it with a smile. For there are very distinct class lines drawn among these groups of unskilled and itinerant workers.

A hobo is a hard worker of the migratory type. He is possessed of a keen sense of his own importance and value to the world that would suffer without his services. The wheat fields of the Southwest, the timberlands in the Northwest, the fruit lands in various parts of the country could not show a profit without the presence of the hobo at strategic moments. To displace him in the economic scheme of things would be to keep on hand well fed and employed the whole year around, thousands of men whose services are only required a few weeks or months a year. Another distinction: The hobo travels on wheels although the ticket office is not always a part of his traveling experience.

The tramp, on the other hand, migrates according to whim or chance. And he walks, always. Having nowhere in mind to get, he gets there at his leisure if he works, as he does now and then, it is because of necessity and not through any sense of personal responsibility to society at large. In the mind of the self-respecting hobo, the tramp is distinctly an inferior.

The bum is looked down upon and despised, both by the hobo and tramp. The bum travels nowhere, does nothing and is nobody. He is a parasite of the city, begging, borrowing, stealing, loafing.

Clip this out and paste it in your book of etiquette. You may need it sometimes to save yourself from one of those embarrassing moments, warns the Knickerbocker Press.

Indian Summer

Indian summer usually begins some time in October, but it may not begin until November. According to the United States weather bureau it is not a definite period occurring regularly each autumn, and is not based on accurate meteorological data. Indian summer varies greatly in duration. It may occur once or several times during the fall and early winter, or it may not occur at all, and if it does it may last a day or two or several weeks. And in some years there are more than one of these periods of hazy, tranquil days.

Mineral Water Plentiful

In some countries miners' water costs more than wine, but at Altshelde in Germany it is so plentiful that the streets are sprinkled with mineral water.

Glacier Advances

The glacier at Jacobshaven Greenland, is advancing 62 feet a day.

Find Out

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with Genuine Bayer Aspirin.

We say this because, before the discovery of Bayer Aspirin, most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of Bayer Aspirin largely changed medical practice.

Countless thousands of people who have taken Bayer Aspirin year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: Genuine Bayer Aspirin is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

You can get real Bayer Aspirin at any drug store—simply by never asking for it by the name "aspirin" alone, but always saying BAYER ASPIRIN when you buy.

Bayer Aspirin

WHALE YIELDS NEW PRODUCT

What may prove to be as valuable to Norway as whale oil itself, is a new kind of meat extract made from whales. Experiments described as highly successful have been carried on in the Antarctic aboard Norwegian whalers. The greater part of the world's supply of whale oil is delivered in Norway. Although the value of whale meat as food has long been recognized only the oil of the whale has been utilized, owing to the difficulty of transporting the meat from the Antarctic. Now, however, the meat is being made into a sort of meat flour aboard the whalers. The flour is taken back to Norway, where a meat extract of a very satisfactory character is being produced.

Quick, Complete Pleasant ELIMINATION

Let's be frank. There's only one way for your body to rid itself of the waste matters that cause acidity, gas, headaches, bloated feelings and a dozen other discomforts—your intestines must function. To make them move quickly, pleasantly, completely, without griping. Thousands of physicians recommend Milnesia Wafers. (Dentists recommend Milnesia wafers as an efficient remedy for mouth acidity).

These mint flavored candy-like wafers are pure milk of magnesia. Each wafer is approximately equal to a full adult dose of liquid milk of magnesia. Chewed thoroughly in accordance with the directions on the bottle or tin, then swallowed, they correct acidity, bad breath, flatulence, at their source and at the same time enable quick, complete, pleasant elimination.

Milnesia Wafers come in bottles of 20 and 48 wafers, at 35c and 60c respectively, or in convenient tins containing 12 at 20c. Each wafer is approximately an adult dose of milk of magnesia. All good drug stores carry them. Start using these delicious, effective wafers today.

Professional samples sent free to registered physicians or dentists if request is made on professional letter head.

Accent Is on Costume Suit for Fall

By **CHERIE NICHOLAS**

SO MANY women do not think they can wear suits, because, unless one be slim and svelte, a blouse and skirt are apt to prove a problem at the waistline. To such "cheerio" is the message for designers of vision and inventive genius have taken the matter to heart and have come to the rescue of despairing ones. They have surmounted the difficulty via that which they are pleased to title in fashion's vocabulary as the "costume suit."

Needless to say the new costume suits carry the promise of a foremost vogue, autumn and winter through, seeing that they are proving as effective as a strict reducing diet in slenderizing the figure.

The idea is to top a slim frock of some one or other of the incomparably handsome wools or wools-and-silk, such as are glorifying the current fabric showings, with a varied intriguing fur trimmings are playing such an important role in present-day styling adds to the glamor and prestige of these voguish costumes.

In tuning the theme of these slenderizing suit effects to the individuality of the wearer, much depends upon the coat to "turn the trick." The accompanying illustration of a trio of models recently shown by style creators of the Chicago wholesale market district demonstrate the point better than words can tell.

If your ambition is to arrive at slimmest and height, the costume to the left in the picture will help you make dreams come true. The slightly full-below-the-elbow sleeves, with just the right length to the coat, combined with fitted bodice lines and slender hipline trend to accentuate a slenderized silhouette. The simple gored lines of the skirt also trends to the straight slim look.

The bright metal touch which is so dramatically enhancing the new fash-

ions is present in the double collar and pointed vestee front. The collar is of black lynx as is the banding at the bottom of the coat.

For the tall stately woman or the slim older woman who aspires to added slimmest, an answer to her longings is given in the smart restaurant costume as pictured in the center of the group. It reflects influence of the Italian renaissance especially in the grandiose royal purple velvet which fashions it. The rich and beautiful reds, purples and greens of early Italian painters are the featured kind this season. Fitted basque with snug little waistline, trimly fitting hips and flaring-below-the-knees skirt are all flattering. The glaringly new details, however, are a youthful peplum flare of the jacket together with full sleeves that are fitted in at the wrist to be very flattering to the hands. The pillow muff which she carries is also significant, for it has been quite some time since this type of muff was in fashion. The fur is a shaded krummer and its manner of bordering the edges emphasizes a high-style trimming note.

From Russia comes the suggestion for the fitted town suit shown to the right. It registers as very "young" for its staid tunic line a la Russe makes it youthful. It is flattering to either the tall or short slim figure, depending upon the length of the coat. Mahogany rusy a new rich tone not too reddish, is the color of the cloth. Tailored bandings of beige krummer make this costume suit look all the more Russian. The frock underneath, however, is quite American with its simple tailored lines and amusing pockets and novel wooden buttons.

WITH A HOOD
By **CHERIE NICHOLAS**

Here's a youthful and ultra chic evening wrap. Hoods and head coverings are still going strong in the mode. This one is a red-riding hood type, one that Gladys Swarthout, of opera fame, has selected as part of her wardrobe of evening wraps. It is of brown velveteen and is worn over a powder blue silk sheer gown which has skirt fullness and the new tailored top. It would be handsome in black velvet—why not for your party wrap this winter?

PLEATS DOMINATE STYLES FOR FALL

They've taken a plect in fashion this fall, and the results are both numerous and startling.

Pleats turn up at the most unexpected places in the new fall frocks, cropping out anywhere from skirt to neckline.

Pleated sleeves are among the newest wrinkles of the mode, these being large and loose in the new manner, drawn in to a cuff at the wrist. They're effective in black chiffon, combined with a black crepe dinner gown.

Pleated blouses, in soft, sheer fabrics, are drawing ecstatic "ah's" and "oh's" from shoppers, who are buying them for wear with the new velvet cocktail suits.

Some of the newest evening gowns are all pleats, from neck to hem, done in soft, silky fabrics that manage to outline the figure in a most seductive manner, keeping their classic lines as well.

Intriguing Styles in New Handbags for Fall Season

Bags are shown this season in new and intriguing leathers and combinations, such as frogback antelope (a pebbled suede), puffed and quilted calf, saddle leather, alligator, pigskin and ostrich, all often combined with patent leather.

Top handles are new and important. Bags are roomy and soft, with fewer rigid frames; square and oblong shapes are the most popular, and there are many new tricks in fasteners and monograms.

The Schiaparelli handbag, fastened with gilt padlock and key, is the tops for the miser girl, guaranteed pick-pocket proof. Metal rimmed keyholes also are used, as are metal buttonholes.

The "mad-money" bag, of suede, has an outside change purse trimmed with a small gold coin on a gilt chain.

Find Shortage in World Wheat

Production Less by 240,000,000 Bushels Than in 1934-35 Period.

World wheat supplies outside Russia and China this season are likely to be about 240,000,000 bushels less than in 1934-35, says the bureau of agricultural economics, in its current report on world wheat prospects.

World production, excluding Russia and China, is estimated at about 3,520,000,000 bushels, or about 60,000,000 bushels more than last year; but world carry-over at the beginning of this crop year was about 800,000,000 bushels, or 300,000,000 bushels less than a year ago.

Russia is reported to be harvesting a good wheat crop with fairly good yields in regions which commonly supply wheat for export. Russia may export as much as 30,000,000 bushels, but this may be offset to some extent by increased imports into China where the wheat crop is reported smaller than in 1934.

The bureau says the short supplies of wheat in the United States may result in prices being maintained close to an import basis for all classes of wheat at markets east of the Rockies. The United States carry-over into the current season is estimated at 152,000,000 bushels, and production on the basis of August 1 conditions at 608,000,000 bushels. The total, 760,000,000 bushels, is only 125,000,000 bushels more than normal utilization of 635,000,000 bushels.

These figures suggest, it is stated, that unless there should be a considerable volume of imports during the year, the carry-over into the 1935-36 season will be smaller than that in the current season. The volume of imports will be influenced largely by the quantity of the domestic crop which proves unfit for milling.

The bureau says that durum wheat in the 1935-36 season probably will not command a premium over hard red spring, as was the case last season; but that supplies of good quality hard red spring appear so short there will be substantial premiums for hard red spring over hard red winter.

Economical—Use one LEVEL teaspoonful to a cup of flour for most recipes.

Dependable—Scientifically made by baking powder SPECIALISTS to produce best results.

We list a schedule of our assemblies and invite the patrons to attend as often as they can.
General assembly at 9 o'clock each fourth Monday.
Grade school assembly at 10:45 Wednesday (except 4th week)
High school assembly at 12:45 Monday (except 4th week)

RAYMOND PITCAIRN

An Object Lesson From Europe

By RAYMOND PITCAIRN
National Chairman
Sentinels of the Republic

"They that can give up essential liberty to obtain a little temporary safety deserve neither liberty nor safety."

So spoke Benjamin Franklin, sage of the Revolution and of our early Republic. His words ring as true today as they did a century and a half ago.

Turn to the news from modern Europe if you would see the evidence. What do we read?

Reports of government threatening to plunge its people into a war of conquest which statesmen fear may embroil all Europe.

Reports of government elevating religious and educational intolerance to the status of a national policy.

Reports of government sacrificing the freedom of its populace on the altars of Communism and regimentation.

Under what types of governments are these things happening? The answer is clear.

Under those whose people, for the sake of a promised—and unfulfilled—economic safety, have delivered their essential liberties into the hands of highly centralized authority—whether a dictatorship or a communized bureaucracy.

These are the dangers which the founders of our nation knew and foresaw when they wrote a Constitution that denied despotic power to politicians and vested all ultimate authority in the people.

These are the tragic possibilities which men and women who love America seek to avert today when they fight efforts to weaken those guarantees of personal liberty and opportunity that are written into our Fundamental Law.

They know — from the lessons now apparent in Europe — that Franklin's warning could be rewritten to read:

"They that can give up essential liberty to obtain a little temporary safety lose both liberty and safety."

Don't let that happen to America.

Crippled Owls Lose to Lakeview Eagles 38-0

Though the Owl offense showed promise at times they failed to put over a single marker in Friday's game and the score ended 38 to 0 in favor of the Eagles. The Owls were clearly outclassed for the afternoon. Out weighed nineteen pounds to the man and with four regulars out with injuries the Hedley squad was never able to stop the Lakeview drives. Injuries during the game further reduced the power of the home team and made them helpless against the Lakeview offense. A few bright spots in a drab afternoon was furnished by some nice runs by Jones and by the powerful defensive work of Wood.

PHYSICAL ED HIKE

One day, the girls of the physical education class decided that we would go for a long hike. take our lunch, and have a regular picnic. After deciding where we would hike, we decided upon how much "beans and 'taters" to take.

On Oct 23 at 8:00 p m all the girls and the instructors met, and we started to reach our goal. The afternoon sun was shining down on us with all the strength he could muster, but we were well prepared. Of all the hats, coats and sunbonnets you never saw the like. Perhaps onlookers thought we were cold, but we didn't feel very cold or even cool.

Not knowing any better way to reach the park, for that was where we were going, we hiked down the highway. We don't have to tell you how dusty it was on the road. By the time we had been walking about 30 minutes we were covered with dust. We even looked as if we were turning to dirt. After hiking about two miles, Mrs Owen gave a reading "How to Drive a Pig." We were dirty, dirty and tired, but this reading gave us a little encouragement.

Miss Hixson brought her camera, and we made some pictures of the group and especially of Mrs Owen and Miss Hixson in their big floppy sunbonnets.

Again we started on. During several other stops, we made some more pictures of the "good-looking" group and told stories.

We were about to reach our destination when one of the girls found an old Model T Ford crank. She calmly asked Mrs Owen if she were about run down. On receiving her answer she replied: "Well I just thought if you were I would crank you up a little."

Many other ridiculous incidents happened, but the thing we enjoyed most was Mr Hart's coming along in the bus with our picnic lunch. We had been walking slowly, but now did we get in a hurry! All of us could just taste those sandwiches and that soda pop. While speaking of soda pop, let's describe the improvised bottle opener we had. All in all it consisted of a bent nail driven into a tree. The soda pop was so eager to get out of the bottle that when one of the girls opened hers she got an excellent bath. We all ate so much that we looked like "gobs of sandwiches, cake, chicken and soda pop" with a human on the outside of them.

One Who Went

Various Classes Enjoy Parties, Hikes Etc.

SENIOR HAY RIDE

Friday night Sept. 16, the Senior class jolted to the Lone Star camp ground for a watermelon feast. After we reached the ground a few minutes of mannerly feasting took place and at least a dozen ice cold watermelons had vanished. If you could have seen a Senior, you would have known where.

Then to our surprise we heard the clattering of hoofs and the laughter of gay youngsters, which we knew from their tone must be the Juniors. On their reaching the ground we showed the hospitality of well bred Seniors and gave them access to the tables. After a good time of playing and singing we mounted our hay filled wagon and started home.

Those enjoying the glorious evening were: Verlin McPherson, Imogene Bell, Laura Bell Birefield, Omer Woods, Spot Laurence, Fuzz Richardson, Marvin Hickey, Oren Plunk, J. G. Gull, A. V. Hendricks, Ivan Jones, Buster Gulwell and our sponsor, Mrs. Owen. Three cheers for Mrs. Owen. Say folks you ought to be a Senior.

FROSH ELECT OFFICERS

The Freshman class had their organization the second week of school. The officers are: President, W. L. Stewart. Vice pres., Hazel Tollett. Secretary, Ruby Stanford. Reporter, Goldie Dickson. Sponsor, S. J. Lovell.

SCREECHES

As an outcome of an activity unit, Playing Circus, the Second grade entertained their mothers on Thursday, October 8, at 8 p m., with a circus program. 12 mothers and seven tiny tots were present. The teacher and pupils thank these for their encouraging presence and invite parents and friends to visit often.

BOOK COVERS

Merchants, we, the students of Hedley school, wish to say, thank you, for our book covers.

JUNIOR HAY RIDE

The Junior class went on a hay ride Sept. 14, to the Luttrell park. Winfred McPherson and Cleon Allee took the wagons and teams, but we could not find any hay in the country, so we went on a quilt ride. All the class was present except three. Misses Hixson and Sewell were our chaperones.

We met at the school house about eight o'clock and left for our hay ride at eight thirty. Having a young team that was very easy scared we had an exciting time. When we got to the park we served watermelon in an old fashioned way. Every fellow got his spoon and dug in.

After playing games such as Maggie and Jiggs, going out west, coffee pot, two late for breakfast, two deep and many others. The class departed from the park about ten o'clock. We crawled over the fence to the wagon for a bumpy ride home.

SOPH WEINER ROAST

The Sophomore class went on a weiner roast Sept. They were accompanied by Mr. and Mrs. Sidney Thomas and went to the State park.

Those present were: Hazel Stout, Ione Wall, Craig Johnson, Ward Grimsley, Red DeBord, Mayme Hunnicutt, Alline Abernathy, T. J. Hansard, Calvin Reed, James Smith, Cleon Allee and Clay Plunk.

FRESHMAN PARTY

The sponsor of the Freshman class entertained the Freshmen with a party Friday night, Sept. 28. Refreshments of sandwiches, cookies and hot chocolate were served to the following: Bruce Edwards, Russel Gull, Lamar Adamson, Warren Crawford, Jonimerle Plekett, Mary Rains Bridges, Nollie Mae Reed, Eddie Mae Land, Juanita Crawford, Seretha Gunn, Jennie Bell Aldridge, Freda Wall, Amalene Tollett. Everyone reported a nice time.

INDUSTRIAL LAB

The Industrial Lab class of Hedley High school is showing great progress. We are now at work on the rock garden being constructed on the high school campus.

The class has formed itself into the form of a corporation or construction company. Officers for the corporation were elected as follows:

Sponsor, Mr. Thomas.
President, Marvina Hickey.
Secretary, Lyman Davenport.
Treasurer, Ivan Jones.
Sales manager, Clyde Laurence.
Foremen, C. C. Horschler, Omer Wood and Frank Spalding.

We, the Industrial Lab class, wish to express our sincere thanks for the cooperation of the patrons in response to the questionnaire sent out by the class.

Watch for the advertisement of our negro minstrel to be given in the near future. We assure you a very enjoyable evening of old time colored entertainment.

ford, Seretha Gunn, Jennie Bell Aldridge, Freda Wall, Amalene Tollett. Everyone reported a nice time.

Sunlight at Night

With This New INSTANT LIGHT

Lasts a Lifetime

Aladdin
KEROSENE MANTLE LAMP

BURNS 94% Air

No longer must people using oil for lighting in their homes be condemned to live in semi-darkness. This new Aladdin burns kerosene and will fill every crook and cranny of any home with a radiance beautiful to behold—as cheery as the sunlight of June, and the nearest of all others in quality to it. Economical too—saves its cost over the old way in a few months—and continues to save for a lifetime.

Aladdin light is white, brilliant, yet soft and restful—just the right intensity for ease and comfort in sewing, reading, studying or home work of any sort. Burns without a trace of noise, smoke or smell. Absolutely safe—a mere child can run it. Priced within the range of every purse. A home lighted by Aladdin is indeed a pleasant place in which to live and to visit.

BEAUTIFUL SHADES
In either Glass or Parchment for every style, exquisitely Hand-Decorated in five colors, and various designs.

JUST ARRIVED!

A Carload of Lamps

Beautiful, Newly Designed I. E. S. Sight-Saving Floor and Table Lamps at Low Prices

A foremost manufacturer of floor and table lamps quoted us an unusually low price on a carload of I. E. S. Better Light - Better Sight lamps.

We acted as your purchasing agent and bought a full carload in order to effect this saving. This enabled us to obtain these high quality lamps at the lowest price possible on such comparative merchandise.

The lamps are the latest in design and are really appealing to the eye. We are offering them for a limited time at an extremely low cash price, or if you prefer, you may make a small down payment and pay the remainder along with your monthly electric service statement.

Visit our showroom and see for yourself the opportunity that is yours to purchase an unusually high quality lamp at a very low price.

I.E.S. BETTER SIGHT LAMPS PROTECT EYES

These new scientific lamps give several times as much useful light as ordinary lamps. There is no glare—just plenty of soft diffused light exactly where you want it on your book or work. There are floor and table models in many attractive finishes and at modest prices. Be sure to look for the certification tag of the Illuminating Engineering Society.
