W. M. SOCIETY

Circles 1 and 2 of the missionary society met Monday with Mrs. Treatie in a social meeting. The afternoon was spent in Bible games and contests, which every one enjoyed so much. We regret that Mrs. Treatie will be going away soon.

Mrs. Masterson gave a report of the missionary conference, which was very interesting. Closing prayer Mrs. Duncan.

Lovely refreshments were served to the following: Mesdames Watkins, Reeves, Dudley, Kempson, Mobley Gelladay, McClain, Webb, Duncan, Trostle, Masterson, Misses Sarah Henderson, Theresa Webb, Edna Card and Mabel Maness. We meet next Monday with Mrs. Watkins.

NOTICE

Let us wash up those dirty quilts for the summer. Call 62 and ask about our prices.

Jack's Helpy Selfy Laundry

The Informer, \$1.00 per year.

WIFADABOS CLUB

The Wifadabos club met May 26 with the Card girls as announced. Had quite an interesting meeting though it was somewhat rainy. Nine members and two visitors present. The house was called to order by the vice president, Mrs. Koenlager. Had some very helpful suggestions and discussions on kitchen efficiency. The business of the afternoon was then taken up. Plans for the rally at the school house on June 5 were discussed, committees appointed to see after the different phases of the entertainment.

As announced, this is to be a candidate rally. Suppose they will all come. Let the public give them a full house. There will be cake and ice cream. We understand. Everybody come on June 5.

I am still demonstrator for Fashion Frocks. Call and see the lovely summer samples at my home Mrs. Roy G. Blanks

In Memory of Father

Jesse Newton Kendall was born Feb. 23 1846, in West Virginia. He died at Boise, Idaho, May 18 1936, aged 90 years, 2 months and 26 days.

This was read at the funeral of the above as the friends and loved ones gathered on Wednesday of last week, at the Wesley Methodist Church at Boise, Idaho. He was laid to rest in the beautiful Oak Lawn Cemetery by the side of his companion, who preceded him some two years ago.

He came to Texas when a young man before the railroads, and was married to Eliza Newel Gray 65 years ago at Lampasas. Returned to West Virginia and remained until 1888, when he joined the ministry, moved to Tennessee and remained until 1889, when he was sent to Denton and served the M. E. Church for 1 year. He was then sent to the M. E. Church at Clarendon, which he served for 1 year, which was afterward moved to Dalhart. He was also pastor of the Dalhart Church, and preached at Mobeetie, Canadian, Panhandle City and at many of the school houses all over the Panhandle.

Some 25 years ago he moved his family to Boulder, Colorado, and remained for 2 years, and then from there to Idaho. He served many churches in that state, until his retirement a few years ago, when he moved to the city of Boise.

A fearless preacher, a Bible student, a wonderful historian, a Christian gentleman of the old school, never compromised the truth, had a wonderful retentive memory, loved his friends and prayed for his enemies. Five sons and one daughter are left to carry on the work, and may they each be true to the Christian principles that father taught.

A son, Frank Kendall

City Golf Tournament

Members are requesting to shoot their qualifying rounds in the City Golf Tournament just as soon as the weather permits. Qualifying score is to be for 18 holes but in case of not being able to play the full 18 holes 9 holes can be played and the score doubled. The score shot qualifying will determine flight in which member belongs but the committee reserves the right to place member in flight they think he belongs in in case they feel he has not shot the score of which he is capable.

The best eight will be in the first flight, the remainder of the members in the second flight. A cup will be given to each flight winner but no prizes will be given to medalist, runner up or winner of consolation matches. The matches will be for 18 holes, match play, ground rules will govern, however all puts are to be sunk in the qualifying rounds.

All members are urged to qualify as soon as possible so that the matches may be arranged. Those anticipating joining the club should get in now and participate in the tournament. Thomas Hampton is Memphis city champion, M. P. Gentry won the Clarendon tournament, and who is going to be Hedley's city champ?

For rent or for sale—all of blk. 3 in Nat Smith addition in Hedley. Will rent this year for \$15.00 cash. See P. C. Johnson or J. A. Thompson at Wellington, Texas.

To Work on Cemetery

If the weather permits, members of the American Legion and Boy Scout Troop of Hedley will lead in cleaning and decorating the graves in the Rowe Hedley cemetery Saturday morning May 30th (Decoration Day). Then the soldiers graves will be marked and the graves decorated. All are invited to help. Come and bring your hoes and rakes.

Annie Marie Stallings

Annie Marie was born May 1, 1920, at Dalhart, Texas. She died May 15, 1936, at Northwest Hospital in Amarillo.

Marie started to school when she was six years old at Tierra Blanca. She went to school there until her father and mother moved to Lakeside. When she graduated from Lakeside grade school she held honors as an excellent student. In 1932 she won first prize as a bedroom demonstrator in Randall county, and won a trip to A. and M. College. She attended high school at Canyon Training School.

Marie has one sister, Mary Elizabeth, and four brothers, Raymond, Floyd, Junior and Billy Ray. Her parents, Mr. and Mrs. Charley Stallings, both are living. Her grandfather Stallings died in 1917, and his wife died in 1934. Her grandfather and grandmother Long are both living in California.

Marie's funeral services were held in Amarillo May 18.

On May 9 she and several friends were standing on the outside of an auto. Marie was caught between the front fender and a high curb. Her right foot was crushed and her leg broken. Her leg was amputated on May 12, but gangrene had set in and it was already too late.

Her friends from far and near visited her, and she received many beautiful flowers.

Her mother, her aunt and uncle, Mr. and Mrs. J. A. Long, and her friend, Juanita Jones, stayed with her throughout her illness.

A Friend

Informal Social

The Baptist ladies entertained the Senior class with an informal social in the church basement Thursday night. A program was given, as follows:

Welcome, Mrs. Wells
Response, Marvin Hickey, Senior class president
Piano solo, Mrs. Robert Watkins
Reading, Theresa Webb
Vocal solo, Mrs. Alva Simmons.

Mr. Payne then introduced the guest speaker for the evening, W. C. Davis, superintendent of the Memphis schools, who made an inspiring talk to the graduates. Refreshments of ice cream and cake were served to the Seniors and other guests.

Will sell, or trade for battery set, or anything of equal value. 1 Westinghouse 8 tube radio
Ray Deberry

Mr. and Mrs. Pearl Hunt went to Ranger Tuesday to attend the funeral of Mr. Hunt's niece there.

For Sale—tomato plants and pepper plants. Edna Card

Hooker's have bargains in rub boards and sine buckets.

The Thrifty Housewife

Will find many opportunities to save at our store. We have the same quality foods that we have always handled, and at a lower price than you would expect to pay.

Give your family a treat by buying your next order of groceries here.

Memorial Day

May 30th

Six times have the men of our country been called to arms. Six times have they unselfishly given of their time, their services and their lives.

To the soldiers of all ages, our nation on this day pays tribute and gratefully awards its highest honors to those whose deeds will ever remain enshrined in our memory.

May 30th (Memorial Day) and June 3rd (Jefferson Davis Birthday) legal holidays will be observed by this bank.

Some "Inside Stuff" Gathered From "Old Man Pyramid."

FED up on rumor, exaggeration and absolute inaccuracy set forth in recent books with reference to the widely known Pyramid family scattered along the Nile, I once called on Cheops, the most important member of the dynasty, and in the language of the late John L. Sullivan, "shot him a few personalities."

"Were you actually built under the supervision of astronomers," I asked, "for casting and measuring the shadows of the sun?"

"That statement is absolute nonsense," replied the pyramid, in no uncertain terms. "At the time I was planned there wasn't an astronomical authority in all Egypt. There wasn't an intelligence that had the slightest idea of what science terms the cardinal points. North, east, south and west meant nothing. It was a mere accident that the Nile at this point flowed north and that I was built on the right bank. East and west didn't exist. It was right and left. Up in Karema Tanganyika where the Nile channel takes a turn and runs southwest there is among the Dongola people a fixed idea that the sun rises in the West."

Astronomy the Bunk.

"Then astronomically you had no significance whatever?"

"Pure bunk, to use a popularized American word," said the pyramid, frowning down upon me from its pinnacle 461 feet aloft. "Now I'll make another important disclosure. When King Cheops, who reigned about 3,000 B. C. became convinced that he would eventually die, he cast about for a final resting place pending the resurrection of his spirit, which he believed would reign in another state. At that time it was customary to place the royal remains under ground and mark the place with a modest monument, in his case a mastaba of eight insets. He summoned his architect and drew up a design, which was about one-fourth the size of my present proportions. A few years later, having come to the belief that the plans weren't up to the caliber of the proposed occupant, he remodeled me over the site of the first design and provided for his interment at a considerable elevation above ground. Space for his imperial bones was provided and the blueprints O. K'd for a pyramidal construction. The longer Cheops lived the better he thought of himself. In the end he went up several stories and I was erected on the lines and of the dimensions I now enjoy."

Plenty of Building Material.

"But why select a spot in the perpetual sands where there wasn't a square foot of building material?" I asked.

"Who told you that?" asked the pyramid, rather bluntly, I thought. "Frequent reference is made as to the source of the heroic stones used in your construction," I retorted.

"Listen! Underneath the forty-foot blanket of sand drifted in through the centuries lies a rock dome several thousand acres in extent—enough building material from which to erect more and better pyramids than the demand warrants. All the rock except the black granite brought from Assuan, up the Nile, for the inner tomb, and the white limestone for my casing out of Tura, down the Nile, came from that hole now occupied by the Sphinx, 300 yards down the slope. Beyond that is Kephren Mycerinus and lesser pyramids, all built of indigenous stone. And, furthermore, your countryman, Dr. George Reisner, professor of Egyptology for Harvard university and director of the Harvard-Boston expedition, excavating all around me, is turning up whole cities built of local material. Practically all that you see here, the oldest construction in Egypt, is home product."

Lots of Man Power.

"Why so much speculation as to how you were piled up into such a perfect and enduring mass?" I asked.

"Easy," responded the pyramid. "We had man power by the million, all subject to the king's will. If one boy can pile small blocks of wood into a small pyramid, myriad men can pile large blocks of stone into a large one. We had ropes and timber and were experts in the use of the fulcrum, the square and the plummet. The stones weighed from four to seven or eight tons. A thousand or more slaves for each lift mattered little."

"How did you get your levels?" "I'll answer that question by informing you that today, 5,000 years after my 13-acre foundation was laid, a survey showed a variation of less than one-fifth of an inch minus and plus over the total acreage. Which proves that the builders must have known what they were about."

"How did you get along without the use of mortar or cement?" "Very simple indeed. Under each stone at the moment of its laying was spread a thin film of what is now known as plaster of paris, upon which the stone in a paste floated. While this medium was still wet and soft it was a simple matter to shift the stone to the exact position desired, after which the plaster exuded and the blocks, held down by the accumulating burden, stayed put."

Only That and Nothing More

The fat man was trying to find some tropical clothes in the Far South resort. He tried most every store in town, and patient clerks had politely made a pretense of looking over their stocks and advising him they were just out of his size. Finally he ran across a clerk more truthful than diplomat who—after looking him over—said: "Frankly, mister, we carry nothing in stock that would fit you, except collar buttons and handkerchiefs."—American Legion Monthly.

In a Nutshell

The theater was in an uproar. "They're calling for the author," said the manager. "But I can't make a speech!" replied the man responsible for the play. The manager grabbed the playwright and impelled him along the passage. As he shoved him toward the curtain he said curtly: "Well, just go in front and tell them you're sorry."—Hudson (N. Y.) Star.

Taxation's High Toll

By RAYMOND PITCAIRN

National Chairman
Sentinels of the Republic

That government is best which governs least.

This was one of the axioms of our sturdy Americans of earlier generations. It's being forgotten today. Americans are getting a lot more government than their fathers got. And they're paying a lot more for it, too.

How much more? A recently published long-range study of governmental costs offers some interesting answers. It shows, for example:

That in 1850 approximately one cent out of every dollar earned in the United States was spent on the upkeep of government—federal, state and local.

That by 1900 the proportion had risen to six cents out of every such dollar.

That by 1929 government was taking twelve cents out of the dollar.

And finally:

That by 1934 the toll had mounted to nineteen cents out of each income dollar.

Nor is that the entire story. Actually, government is spending more than it collects—and has been doing so for years. In 1934, the figures reveal, it spent approximately 35 cents out of every dollar earned by its citizens. The difference, of course, helped swell public debt.

What is the effect of this rising toll on the productive enterprise of our country? Let's consider it.

Money spent by government is, in general, unproductive. Seldom does it create new opportunities for lasting employment. But money spent in private enterprise—in building homes, in expanding stores, in operating farms or factories—creates new wealth, new opportunities, new jobs.

To divert great sums from productive enterprises and individual pay envelopes into the hands of government spenders is, therefore, to limit every citizen's opportunity not only to work and earn, but to enjoy the full fruits of his toil. It is a barrier to re-employment.

America enjoyed its greatest expansion when government was economical and taxation small. It cannot recapture that swift progress so long as it is handicapped by a millstone of official extravagance and waste. Economy in government is, therefore, far more than a popular demand. It is an essential to both the progress of our nation and the prosperity of its people.

NEW FEED HELPS

MILK PRODUCTION

AND COW HEALTH

The cow to be a money-maker at her best must be fresh and refreshed within 52 weeks of the year, according to Van Pelt, dairy authority of the Purina Mills. When the cow is allowed longer than 12 months for the completed cycle of her yearly work, she automatically sinks to a lower level of profit-making, Van Pelt claims. To make a cow's year the most efficient with the greatest returns on the energy expended, the dairyman must take into account the natural characteristics of the cow herself and play them up to the fullest advantage.

Danger at Freshening Period
"There is no time that a cow is more susceptible to costly cow troubles," says Van Pelt, "than at the time immediately following freshening. This particular period easily can be termed a period of susceptibility. Susceptible because she hasn't the strength and the vitality to build up resistance. It is in this particular period when the cow finds herself an easy victim to the disease carrier in the herd whether it be tuberculosis, Bang's disease, mastitis, or any of those troubles that are so malignant in their influence in the dairy herd."

"A cow in calving shrinks herself 120 to 150 pounds. This includes the calf, the placenta, and the water expelled. Following this loss at calving time, finds a slight fill-up or return in weight for the next three days of 12 to 15 pounds. Then, unless the dairyman guards against it by proper methods, he finds a still further shrink of 70 to as high as 90 pounds through the next three months.

Special Feed Required
"In the past dairymen have been inclined to think of holding up on the feed immediately following freshening because they didn't feel that the cow's digestive tract should be overtaxed. But science now makes it possible to start feeding immediately after freshening. Years of experimenting at the Purina Research Farm have resulted in the development of a special feed that is light, easy to digest, cooling in its nature, laxative and building in tissue and bone. With this new feed for the cow two months before freshening and one month after freshening the dairyman need not be afraid of overtaxing the cow, because it has been developed especially to fit the cow's digestive and body condition during those periods."

In explaining the result, Van Pelt says, "Everything that the cow lost isn't gained but a refill takes place that guards against any drastic shrink that carries with it so much of the cow's vitality. The results show in a stronger herd, greater foundation, and over a year's time stepped-up milk production. There are fewer replacements to contend with, better quality of udders, greater percentage of conception at breeding time and greater return of net profit in dollars and cents."

WEST BAPTIST REVIVAL

The West Baptist revival meeting will begin the first Sunday in August. The preacher will be announced later.

BUY ON PROOF OF PERFORMANCE

AVOID accidents—take no chances—buy your tires on Proof of Performance. Make sure that you and your family will be safe! Skidding, blowouts and punctures caused more than 37,000 accidents last year. Many of these accidents could have been avoided with safe tires.

The new Firestone High Speed Tire for 1936 is the safest driving equipment you can buy. Here is your proof:

PROOF OF GREATEST NON-SKID SAFETY

A leading university made 2,350 tire tests and found that the new scientifically designed Firestone High Speed tread stops a car up to 25% quicker than other tires.

PROOF OF GREATEST BLOWOUT PROTECTION

Every year, since Firestone developed the Gum-Dipped Balloon tire, Firestone Tires have been on the winning cars in the gruelling blowout test of the Indianapolis 500-Mile Race.

PROOF OF GREATEST ECONOMY

Firestone engineers designed the new Firestone High Speed Tire for 1936 to give you up to 50% longer non-skid mileage. This is proved by our own test fleet records and the fact that the world's largest transportation companies, such as Greyhound, to whom safety and tire economy means business efficiency, use Firestone Tires. This is further proof that they are the safest, most economical tires ever built.

Why risk an accident when it costs so little to protect lives worth so much? Equip your car today with new Firestone High Speed Tires—the Masterpiece of Tire Construction.

Government Takes Over Boulder Dam

By WILLIAM C. UTLEY
 YOU are now part owner of Boulder Dam, the sentinel of the Colorado, and the biggest contract construction job ever completed and turned over to the United States government. It was turned over to the government—which is you—just five years, minus a few days, since construction began March 11, 1931.

The ceremony of presentation was indeed a simple one for the completion of a task so large and long. Its participants were two big, husky engineering fellows who met at the dam, near Boulder City, Nev.

"Take it, it's yours now," said Frank Cowe, construction superintendent of

Dam. The project will regulate flood water, control silt, irrigate the thirsty valleys, create cheap electric power and provide a supply of water for the cities in the southwestern area which it serves.

It will be about six weeks before the power generated at the plant will be used. The power plant, which will be operated by the city of Los Angeles and the Southern California Edison company, will eventually generate 6,000,000,000 kilowatt hours of energy every year. The installed capacity will be 1,835,000 horsepower, which may be compared with the 575,500 horsepower which the United States generates at Niagara Falls.

It is expected that the city of Los

done. There still remains the work of plugging up one of the diversion tunnels, but until the power plant is placed in operation this tunnel will be used to regulate irrigation water. When the time is right, the bureau of reclamation will have it plugged up by day laborers.

Uncle Sam Cleans Up

In ordinary cases the construction company would remain on the job to perform all the cleaning-up operations and to remove all equipment no longer needed, but in this instance the bureau of reclamation has agreed to take over the work. The bureau will occupy the administration buildings of the Six Companies, Inc., until October 1 to facilitate the installation of the equipment in the power house.

For nearly thirty years irrigation and flood control projects on the Colorado river have been talked about in the circles of government. In 1857 an army officer sent out to find the head of navigation of the Colorado wrote: "It seems intended by nature that the Colorado river along the greater portion of its lone and majestic way shall be forever unvisited and unmolested." And not until 1907 was the first note of defiance to this attitude sounded—by President Theodore Roosevelt.

Then in 1918 Arthur P. Davis, a civil engineer, conceived the idea of building the world's largest dam to stem the Colorado. Herbert Hoover, as secretary of commerce, in 1921 created the Colorado river commission. On November 24, 1922, the states of California, Nevada, Colorado, New Mexico, Wyoming and Utah signed a compact. A survey authorized by congress selected Black Canyon as the site. Two years later the bureau of reclamation recommended Boulder Canyon as a better site, and this site was accepted in the Boulder Canyon act passed by both houses and signed by President Coolidge in 1928. President Hoover's proclamation in 1929 declared the act in effect.

In 1930 contracts to deliver water and provide electric power were signed. On September 17 of that year, Ray Lyman Wilbur, secretary of the interior, drove the first spike in the construction of a railroad to the dam site, then and there giving the project the name "Hoover Dam." This name it bore, in honor of the man who had had more to do with its realization

Boulder City, Nev.—Here's the latest air picture of the Boulder dam since the completion of pouring at the top. Photograph taken from upstream angle.

the Six Companies, Inc., the contractors on the job. "It's a great dam, Ralph."

"Well, you ought to know, Frank," replied Ralph Lowry, engineer of the United States reclamation service. And that brief remark was Uncle Sam's speech of acceptance.

Boulder Dam was completed two and one-half years ahead of schedule. It cost the government \$165,000,000, including both the dam itself and the power stations. Of this amount \$54,700,000 will represent the gross earnings of the Six Companies, Inc. After reductions have been made for services like the supplying of power to the contractor, and rentals at Boulder City, the actual amount of money paid for the construction job will be about \$52,000,000. Other projects associated with Boulder Dam will cost approximately \$230,000,000 when completed.

Is 727 Feet High.

The great mass of concrete towers 727 feet from the bottom of the canyon, making it about the same height as the Eiffel tower in Paris. Into the gigantic molds which shaped the great gate that will hold nature prisoner in her own wildest and most fearful lair have been poured 4,500,000 cubic yards of concrete, made from 5,500,000 barrels of cement. This vast quantity of material could have built a standard highway across the entire continent. Instead, it has built a great wall 1,180 feet long, 653 feet thick at the base and 45 feet thick at the top.

The finish of construction was hailed by Secretary of the Interior Harold L. Ickes in Washington, D. C., as "another milestone" in the history of the West.

"Man has asserted his mastery over a great and dangerous river, one which endangered tens of thousands while it was unregulated, but which will be an active benefit to millions, now that it has been harnessed," said Ickes.

"The people of southern California, Arizona and Nevada are to be congratulated for the security of their futures has been vastly increased. Water supplies have been guaranteed for their farms and cities. A source of a tremendous amount of cheap power has been provided for use in increasing their comforts and developing their industries."

Worth Found Already.

In more than one instance, the importance of Ickes' statements has been demonstrated already. It was only a few months after the diversion tunnels were first closed that Boulder Dam asserted its supremacy over the most dangerous river in America; that was in February of 1935, when it caught and stored the waters of what would have been a devastating flood. During the summer of 1935, the dam worked the other way, and used some of the stored-up flood waters to prevent a disastrous drought in the irrigated valleys along the lower Colorado. With the water stored above the dam in Mead lake, which is already the world's largest artificial lake, despite the fact that it is only one-sixth full, it was possible to release more water than the river carried last summer and fall. In 1934, a drought like that which was averted cost the valley \$10,000,000.

There are five purposes, in reality, behind the construction of Boulder

Anges will take over operation of the generating plant May 1, but it will probably be more than a year before all the power required by the city will be generated there. About May 1 the Southern Nevada Power company will begin serving cheap Boulder Dam power to Las Vegas and the adjoining territory in Nevada. The company has contracted with the state of Nevada for 4,000,000 kilowatt hours per year, at rates which will begin at 2.6 mills per kilowatt hour. It is expected that these rates will be decreased as time goes on.

Cost of Making Power.

The primary cost of generating power at the dam is estimated at 1.63 mills per kilowatt hour, and secondary power at .5 mill per kilowatt hour. Capacity is 750,000 horsepower primary and 750,000 horsepower secondary. Towers 109 feet high carry the electricity 275 miles from the dam into California, Nevada and Arizona.

The most expensive of the additional projects in connection with the dam is the aqueduct which will carry drinking water to the city of Los Angeles. The great duct, when completed, will be more than 200 miles long and will cost \$220,000,000. An ambitious undertaking. It is intended to care for the needs of water of the greatly in-

Former President Herbert Hoover, for whom the dam was originally named.

creased populations which are expected in Los Angeles and other southern California cities in the future.

It is through the sale of power that the government expects to get back all of the taxpayers' money which will have been spent on Boulder Dam. According to Secretary Ickes, it will be repaid to the federal government with 4 per cent interest in 50 years. Estimates have it that the sale of electricity will bring an average of \$7,000,000 a year. This would be a total of \$361,000,000 in fifty years, with an operating surplus of \$196,000,000.

Having accepted the dam, the government now operates and maintains it, as well as the reservoir, the pressure tunnels, the outlet works and penstocks to the valves at the inlets to the turbine cases in the power plant.

The dam has really not all been completed, but it is nearly so. At least the work of the construction company is

Harold L. Ickes, secretary of the Interior, changed the name of the dam from "Hoover" to "Boulder."

than any other, until the present secretary of the Interior re-named it "Boulder Dam" on May 4, 1935.

President Dedicates Dam.

Construction contracts were awarded to the Six Companies, Inc., in 1931, and the actual work began on March 11 of that year. Diversion of the river was completed the following year, and the first concrete placed in the dam in 1933. PWA funds were allotted to the project in 1934, to make possible its completion two years ahead of scheduled time. The dam was completed and the storage of water begun last year, and on September 30 President Roosevelt dedicated it.

A pleasant result incidental to the construction of the dam will be the opening up of a vast recreational and scenic wonderland along the waters of the artificial lake and the river above it. The lake is excellent for fishing, boating and swimming, and added to the attraction of the dam for curiosity seekers are the presence nearby of the Grand, Zion and Bryce canyons. Already visitors are arriving in considerable number. The average is about 1,000 a day. Last year's total was approximately 400,000, and dam officials estimate that it will not be long before they increase to half a million a year.

The dam, although in a far-removed spot, is actually pretty easy of access to the tourist. The highway from Kingman, Ariz., to Las Vegas, Nev., which crosses it, is now open several hours every day, and will soon be open all the time. This fine road may be reached easily from principal transcontinental and southern highways.

Vast Playground Opened.

Until the great artificial lake at Boulder Dam was built, the waters of the Colorado, lined by rugged, colorful mountains, had been navigated only a few times, by bold explorers. No one had even so much as tried an upstream passage. Now the lake has smoothed out the cataracts for 80 miles, and when completed will make it easy sailing for another 25 miles. There will be countless canyons and sub-canyons accessible as the water fills them.

Slip and Pantie Set Made in Quick Time

PATTERN 9662

Sleek comfort's written between the very seams of this slip and pantie set that's dedicated to smooth fitting and easy making. They're within everyone's reach, and their low cost makes them an out-and-out economy. The slip does a nice job of molding the figure, with its fitted bodice and all-in-one straps, that can't slip. The neckline's cut low enough in back to allow it to be worn with your lowest cut frocks. And could anything be smoother than waistband panties which lie flat? A non-shrinkable rayon or crepe is nice.

Pattern 9662 may be ordered only in sizes 12, 14, 16, 18, 20, 30, 32, 34.

36, 38, 40 and 42. Size 16 requires 3 1/2 yards 39 inch fabric. Complete diagrammed sew chart included.

Send fifteen cents in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your name, address, style number and size.

Send your order to The Sewing Circle Pattern Dept., 367 W. Adams St., Chicago, Ill.

Banked Fire

Four years ago the city hall at Montgomery, Ala., burned to the ground. The fire department rolled up its hose and went home and in time people forgot about it except when they looked at the heap of debris. Recently a steam shovel bit into the remains and uncovered timbers still hot and smoldering.

Beware Coughs from common colds That Hang On

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

Here's Very Fast Way to "Alkalize" Acid-Indigestion Away

Amazingly Fast Relief Now from "Acid Indigestion" Over-Indulgence, Nausea, and Upsets

If you want really quick relief from an upset or painful stomach condition—arising from acidity following over-eating, smoking, mixtures of foods or stimulants—just try this:

Take—2 teaspoonfuls of Phillips' Milk of Magnesia in a full glass of water. OR—2 Phillips' Milk of Magnesia Tablets, the exact equivalent of the liquid form.

This acts almost immediately to alkalize the excess acid in the stomach. Neutralizes the acids that cause headaches, nausea, and indigestion pains. You feel results at once.

Try it. AND—if you are a

frequent sufferer from "acid stomach," use Phillips' Milk of Magnesia 30 minutes after meals. You'll forget you have a stomach!

When you buy, see that any box or bottle you accept is clearly marked "Genuine Phillips' Milk of Magnesia."

SIGNS WHICH OFTEN INDICATE "ACID STOMACH"

PAIN AFTER EATING	SLEEPLESSNESS
FEELING OF WEAKNESS	INDIGESTION
NAUSEA	HEAVY ACIDITY
LOSS OF APPETITE	SOFT STOMACH
FREQUENT HEADACHES	

PHILLIPS' MILK OF MAGNESIA

SYNOPSIS

The Duke, Barry Gilbert, likable youth of twenty-three, jobless and broke, enters an unoccupied summer home in Southampton, seeking shelter from a storm. He makes himself at home. Doodling at the fireplace, he is startled by the arrival of a butler, Willetts; and a chauffeur, Evans. He learns that the son of the owner of the house, Jack Ridder, whom the servants had never seen, is expected. He decides to bluff it out. His supposed parents have left for Germany. Next morning he is given a letter for his "mother." He opens it and finds a message from the real Jack, saying he could not come, and returning a hundred-dollar bill. The boy's father had pensioned him into obscurity. Barry pockets the money, intending to return it later. He orders Evans to take him to Montauk, intending to disappear there. On the way he meets Judge Hambridge and his daughter, Patricia. Believing he is Jack Ridder, she invites him to dinner the following Thursday. Barry returns to Southampton, deciding to stay a bit longer. Mr. Ridder, Sr., through his newspaper, the Globe, accuses Judge Hambridge of taking orders from Tammany Hall in a condemnation proceeding. Barry meets Peter Winslow, prominent attorney. Winslow tells Barry that Judge Hambridge had seen an accident in which a woman was killed by a taxicab. At home Barry finds the wife of the real Jack Ridder awaiting him. Her husband is in jail in New York, charged with the murder of Mike Kelly, Tammany boss. The girl, Peggy, tells Barry how she had met Jack in Florida and married him, as Jay Rogers. Jack lost his job, and they went to New York, where she got work at the Cocoanut Bar. There she was accused of trying to pick the pocket of Mike Kelly, and was arrested. Her husband went to Kelly's to induce him to drop the charges. Later Kelly was found dead, his skull crushed by a decanter. Barry suggests he can help as Jack Ridder, and Mrs. Rogers agrees. Judge Hambridge delivers a decision in the condemnation suit in which Kelly had been interested. Barry cables Mrs. Ridder for \$2,000. Winslow takes Rogers' case. Barry gets a job on the Globe under his true name. The editor, Ernie Harwood, assigns him to cover the Kelly murder.

CHAPTER IV—Continued

He had turned into a cheap restaurant, near The Globe, where the slim young man had promised to meet him. Lurching, he mapped out his immediate future. Work-days, Barry Gilbert would live in the little rooms he'd taken Saturday. Week-ends, of course, he'd have to spend at Southampton, as John Clarke Ridder, Jr. That was essential to his contact with Ead Naulheim. And to another, even more essential contact. He was to dine at the Hambridges again next Friday, he recalled—with the lady from Boston to whom Pat must have written flattering things about him. A grand girl, Pat, and suddenly, as we have seen, not altogether unattainable. "If I make good," Barry thought, "I can tell her the truth about myself, and ask her to marry me. Why not? All this John Clarke Ridder, Jr., business'll just seem funny then."

The slim young man arrived in due time, and duly presented his charge at the homicide bureau. First, there was Tim Laugherty, as Irish as Barry, and with almost as ready a grin. They took to each other immediately. "Barry Gilbert," Tim repeated. "Well, the name's all right, anyway."

Tim regarded the Kelly murder as a closed case. So did MacDevitt, and everyone else Barry met at headquarters. "The Rogers kid done it, that's sure," Tim declared. "This Filipino says he didn't let nobody else in that night."

"Maybe somebody else let himself in."

Tim smiled scornfully.

"How?" There was a new lock on that door. Show him the keys, Mac? Mac obliged.

"Here you are," he said. "It was chained to Kelly's pants button."

"Show him the decanter. Maybe he can get something out of that."

"Why not?" Mac laughed. "There's about half a pint in it."

It was a gruesome exhibit—that bottle which had killed a man. Real cut glass, and nearly a quarter full of reddish liquor. "Wonder why that didn't spill out," Barry ventured.

"Maybe the cork stopped it," Tim replied.

"They didn't find any finger prints?"

"No. The guy must have worn gloves."

"Listen," Barry ventured again. "Why weren't the Filipino's finger prints on the bottle—if he served it?"

"Guess he wore gloves, too. My butler always does."

"Well, if he wore 'em—"

"I get you," Tim interrupted. "If the guy that done this wore gloves, and the Filipino wore gloves, why then maybe the Filipino's the guy that done this."

"Exactly."

"Say, you got a bean on you," the detective conceded, almost admiringly. "Of course, I still think we got the right party, but he's a cagey guy, that Oriental, and he didn't say nothing about gloves to me. Why don't we go over and see if he wears 'em? He didn't."

At least, not when he opened the front door.

"Say, Charlie," Tim began; "let us in. We want to ask you sumpin'. Do you wear gloves when you're serving stuff?"

"Sometimes."

"Did you wear 'em that night?"

"Maybe. I don't remember."

He was a thin, sallow youth, with the usual glossy black hair brushed back from his forehead. Nothing remarkable about him—not even his shiftiness. The three men stood in the broad hall of the Kelly house, and Charlie repeated the tale of admitting Rogers, and hearing a quarrel, and returning to his room until the visitor left.

"You were in your room when the row started, then?" Barry asked.

"Yes, sir."

"And you could hear the voices pretty plainly?"

"Yes, sir."

"You came upstairs, and then went back to your room, and stayed there until just as Rogers was leaving?"

"Yes, sir."

"Kelly must have been dead then, if Rogers killed him?"

"Yes, sir."

"But you didn't hear the sound of a blow in your room, nor the thud of a body falling?"

No answer.

"If you could hear voices downstairs, don't you think you'd've heard that, if it had happened?"

The Filipino looked down from one inquisitor to the other.

"Maybe I didn't stay in my room," he said at last, very slowly. "I don't remember."

Tim was about to press the point when there was the rasp of a latch-key being thrust into the lock of the front door.

Then the knob turned, and Mrs. Kelly entered.

She stopped short at sight of the intruders.

The door remained opened.

"Well, Mr. Laugherty!" she exclaimed. "So you've come back

It Was a Gruesome Exhibit—That Bottle Which Had Killed a Man.

again? With a friend, too? Why don't you step in the parlor?"

Tim thanked her, and presented Barry.

"Glad to meet you," Mrs. Kelly declared. "Run along, you"—to the Filipino. "Come on in, boys!"

"You're forgetting your key," Barry said.

"He took it out of the lock."

"It's a brand new key, isn't it?" he asked, casually.

"Sure," Mrs. Kelly answered. "It's a new lock. Mike had it put on only a few days ago."

"How many keys were there?"

"Two. That one, and Mike's."

Barry was scribbling on the back of an envelope.

Mrs. Kelly was a large woman, in her fifties. Her hair was dyed red—a brilliant, aggressive red unknown to Nature. But she was affable, and extremely good-humored. Evidently, not grieving herself to death about Mike.

"Just dropped around to see Charlie," Tim said. "Anything you want to know, Mr. Gilbert?"

"Just one thing. Where were you the night of the murder?"

Mrs. Kelly laughed.

"You don't read the papers much, do you?"

"Why?"

"Because all about that was in The Herald Tribune the morning after the body was found."

"All about what?"

"All about my being up in Harlem at a dance."

"And what time did you get home?"

"Around daylight."

"Did you let yourself in?"

"Sure."

"And you didn't wonder where Mike was?"

"I thought he was asleep. We didn't room together. The lights was all out."

"No light in the front room?"

"No."

"Sure?"

"Dead sure. Anything else?"

"No, thanks. I didn't mean to keep you so long. But one thing led to another."

"That's all right," Mrs. Kelly assured him. "I got nothing to hide. Drop around any time you feel like it."

"No holes in that all," Tim said, as they reached the sidewalk.

"Straight shooter, she is. Ran a snail-oon when Mike married her. You certainly got wound up. What was all that about the latch key?"

"Bright and shiny, wasn't it?"

"Brand new. She told you that. So did I, when we were looking at Kelly's key-wallet."

"Yes," Barry admitted. "But there wasn't any new key in that wallet."

Tim Laugherty stopped short in Fifth avenue.

"You're right," he said.

"I've got the number," Barry went on, producing his envelope. "A 66152. Write that down. A plain, round head. Two of 'em. Where's the other? It never was in that wallet, because every hook's filled."

"Maybe he carried it loose in his pocket."

"Wherever he carried the key, where is it?"

"I don't know," Tim answered. "It wasn't on the body—that's sure."

By now, it was time for his dinner appointment with Peggy.

Still in high spirits, he walked around to her boarding house. Barry remembered Southampton with shame when he saw the Ridders' two shabby rooms. The boy lay in one of them; a bright youngster, five years old; "The doctor doesn't seem to know what the matter is," Peggy declared.

"I know," Barry said. "I'd be sick in this dump. Why don't you bring him out to the country?"

Peggy shook her head.

"I want to be near Jack," she repeated.

"Winslow says he's likely to be free in a week."

Dining comfortably in a nearby cafe, he told her everything that had happened since their parting; all the astonishing events of that day. And, with the recital, Peggy's spirits rose, too. When Barry mentioned his new job, she actually laughed.

"That's funny," she said. "You're doing what the old man's real son wouldn't do."

"I've two reasons," Barry explained. "In the first place it puts me in a splendid position to help Jack. In the second—well, the fact is that I'm nuts about a girl, and I want to make good on her account."

"What's her name?"

"Patricia Hambridge. She lives at Southampton, and she and her father both knew the Ridders. They think I'm young Ridder, of course."

The next morning, Barry dropped in again on Pete Winslow. The lawyer had talked with Peggy's husband, and was persuaded of his innocence. They've got a prima facie case, though," he admitted. "The grand jury'll indict the boy, I'm afraid. We'll get him tried as quickly as possible, and there isn't the slightest chance of his conviction."

Peter leaned forward, his fingers intertwined between his knees.

"That was a shrewd question you asked that Filipino. Only I wish you'd asked it of me. He's prepared now. Never mind. When it comes to cross-examination—"

He rose, with the joy of battle in his eyes.

"But be careful about tipping our hand," he said. "Bring in Mrs. Rogers. I'd like to check up on her statement."

"Tomorrow?"

"Make it next week."

"He's a great lawyer," Ernie Harwood said, when Barry repeated as much of this conversation as it seemed wise to repeat. "And a wizard at cross-examination. I've seen him discredit one witness after another with mere monosyllables. Tell Winslow I may have a tip for him some day. It's nothing new. Just a phone call. But, if I ever find who it was—"

Barry devoted that evening to drafting a letter for the real Jack Ridder to copy and send to his mother. Some thing told him that whatever the boy wrote himself would be cold and resentful. That would make the old lady unhappy, and Barry didn't want her to be.

"I've got a job on father's paper," he wrote, with genuine pride. I've respected father's wish as to using his name—except at Southampton, of course. They had to know there. At The Globe, I'm on my own, and getting ahead. I'll be a credit to you yet, darling."

From that, he went into some detail as to his interest in the friend "locked up for murder he didn't commit," and the need of funds for his defense. Even to Jack Ridder, it was obvious that the letter had to be sent, so sent it was—in Jack Ridder's hand-writing—from the railway station post box at Southampton the following Friday. Barry arrived on an early afternoon train.

He had wired Evans to meet him, and found Willetts waiting in the front hall. There was no doubt now that the butler suspected something, and Barry, sure of what he suspected, faced him with a broad grin. "What's the matter with you, Willetts?"

"Matter, sir?"

"You've been acting queer ever since the night Mrs. Rogers spent here. I don't know what you heard that night?"

"Do you mean eavesdropping, sir?"

There was a pained surprise in the man's voice.

"Not me, sir. I've got my position to remember. I've been a butler with some of the best families."

"All right," Barry soothed him. "You think I'm back at the kind of behavior that alienated me from my father. Well, I'm not. That 'glittery lady' is the wife of a man I met in Florida. . . ."

And, for the third time that week, Barry related his story.

"She's a brave little kid," he concluded, "and she's in trouble up to her neck. I'm going to stand by her. I've got a job on my father's newspaper—under an assumed name, because I want to win out on my own. I've cabled my mother for money, and everything I can get goes to that lady until her husband can win on his own. I'm going to be in town most of the time now, working my head off."

(TO BE CONTINUED)

More Gay Prints! More Gay Flowers!

By CHERIE NICHOLAS

MORE, more, more! And still fashion keeps calling for more gay prints in the spring and summer wardrobe, for more gay flowers on your hat, on your lapel, at your throat and at your waistline, for gloves that are going in strong for high color, for footwear, too, that is most daintily gay. As flamboyantly colorful a season is this, as wildest flights of imagination e'er might venture to picture.

When the salesperson shows you the newer prints that fairly scream with color, do not be timid, but throw discretion to the winds and indulge to your heart's content in all the Dubonnet reds and the gorgeous tulip shades that are so fashionable and the lovely violet and purple tones and the radiant mimosa hues and the glamorous blues and the stunning greens plus dozens of equally captivating hues such as the color-card of fashion records.

Typical of the present trend is the costume to the right in the illustration. A galaxy of flowers in multi-color—the theme of the lovely triple sheer of bemberg print which fashions it. The colorings are as riotous and entrancing in this triple sheer as ever glorified a midsummer garden scene. You cannot but look your pretty-prettiest self in a flower print like this. Then, too, this costume is eminently practical. It is the sort that has a way of fitting into the picture anywhere and everywhere. With such a dress-plus-jacket ensemble in your wardrobe you will never be haunted with the ever-recurring question of

"what to wear." You will know. The white pique bow and gilet treatment sound a winsome note of freshness. The short pleated sleeves are distinctively chic. The little jacket is double-breasted and belted at the back. These brief perky youthful-type jackets, some of which look like basques, others flaunting animated peplum, are quite the rage. You may, however, if you wish, go to just the extreme opposite and have the coat made of print that tops your print dress, full-length buttoned down the front from neck to hem. Long or short, be sure your print dress has its matching coat, jacket, or cape.

If you are looking for something distinctively new and out of the ordinary in prints, here it is, pictured to the left. White shadow flowers on a dark background such as this is the very latest print news. Fancy, if you will, white shadow-outlined flowers against a rich Dubonnet red, or contrasting a vivid green ground, or gray or black or the color you like best. No happier choice could be made than this cool frock made of triple sheer print of bemberg. It is dark enough to be practical and it is light enough to look and to feel summery and sheer. Marquise sleeves cut full and shirred at the wrist with appliques of the flower motif cut from the print itself and a very feminine jabot of the marquisette, contribute to the charm of this gown.

We couldn't resist including the cunning flower-trimmed hat in this group. It fits so perfectly into the scheme of things colorful and entrancingly spring-like. It is just such a headpiece as will crown any flower-print dress with glory. The shiny black of its basket-weave straw is contrasted by a spray of gay posies—yellow bachelor's buttons and blue cornflowers. The bow is of silk taffeta in matching cornflower blue.

© Western Newspaper Union.

OF NOVELTY COTTON

By CHERIE NICHOLAS

Cottons for swank is the message from fashion headquarters. This gay topcoat is of checkerboard patterned cotton, woven in navy and white. The novelty cotton suitings and coatings shown this season are thrilling. A one-piece frock in white twill is worn under this coat. A printed silk scarf at neck and waist adds tone and gaiety. The hat is white felt embroidered in white angora.

The White Ensemble

One of the loveliest ensembles seen recently was white in every detail—the gown, the ermine wrap, long white gloves, two strands of pearls, diamond bracelets, a diamond hair clip and three pure-white orchids pinned to a narrow shoulder strap.

NAVY BLUE POPULAR COLOR FOR SPRING

Blue—especially navy—is the predominating color in the fashion parade. It is shown in formal and informal costumes from morning to night—in suits, coats, frocks and even pajamas. There's particular emphasis on blue as an important evening fashion. Blue is present in numerous copies of Schiaparelli, Vinnet, Mainbocher, Lanvin, and Molynoux, featuring peplums, yokes, pleats, tunics, and petticoats and squared shoulders. Great stress is laid on jacket dresses, and also bright and contrasting accessories.

Black costumes are next after the navy blues in importance.

New Frocks Are Inspired by Fashions From Orient

The stately robes of the Manchus and the distinctive apparel of the peasants have inspired extremely smart occidental frocks. Printed jacket dresses copy the brilliant coloring and designs of Chinese embroideries and porcelains, and feature graceful mandarin sleeves. The coolie jacket becomes a tunic with the typical standing collar and slit sides, posed over a slim straight skirt. Black paper taffeta makes a delightful dinner dress with a high neckline piped with jade green, short kimono sleeves and a jade green sash. It is worn with black kidkin sandals and a flat beret of black felt faced with green.

For Tailored Suit

The hat of the season for tailored wear is a soft felt, much like a man's fedora, that you can wear day in and day out. Another very popular hat is a small felt beret in black, in pale misty blue, or a queer bright shade.

Color Combination

Perfume green with wine red is a combination featured in a heavy linen beach costume. The green is used for the blouse and the red for skirt and tailored shorts.

Oldest Mason in America

Dies in West at Age of 106
Cyrus E. Hull, aged one hundred and five, and known as the oldest Mason, died in Los Angeles following injuries he suffered in a fall. Elaborate Masonic rites marked his burial. Mr. Hull was born in Lebanon, N. Y., October 28, 1830. He owned the first railroad in Massachusetts.

Week's Supply of Postum Free

Read the offer made by the Postum Company in another part of this paper. They will send a full week's supply of health giving Postum free to anyone who writes for it.—Ad.

New Island

A new island, formed of seaweed-covered rocks, appeared recently as the result of an upheaval of the Dardanelles sea floor.

CUTICURA OINTMENT AND SOAP

Why Suffer from Stomach Trouble
WHEN THIS NEW SCIENTIFIC MEDICAL DISCOVERY M-S-T is guaranteed to relieve you. M-S-T is sold for \$1.00 per box or \$1.00 for six boxes. But I do not want your money until you are thoroughly convinced. Send 10 cents in coin for a ten-day treatment, just five cents a day (Then You Are the Judge).

M-S-T, DEPT. 116, PLAINVIEW, TEXAS.

Calotabs BILIOUSNESS

No Need to Suffer "Morning Sickness"

"Morning sickness"—is caused by an acid condition. To avoid it, acid must be offset by alkalis—such as magnesia.

Why Physicians Recommend Milnesia Wafers

These mint-flavored, candy-like wafers are pure milk of magnesia in solid form—the most pleasant way to take it. Each wafer is approximately equal to a full adult dose of liquid milk of magnesia. Chewed thoroughly, then swallowed, they correct acidity in the mouth and throughout the digestive system and insure quick, complete elimination of the waste matters that cause gas, headaches, bloated feelings and a dozen other discomforts.

Milnesia Wafers come in bottles of 20 and 48, at 35c and 60c respectively, and in convenient tins for your handbag containing 12 at 20c. Each wafer is approximately one adult dose of milk of magnesia. All good drug stores sell and recommend them.

Start using these delicious, effective anti-acid, gently laxative wafers today

Professional samples sent free to registered physicians or dentists if request is made on professional letterhead. Sales Products, Inc., 4402 23rd St., Long Island City, N. Y.

W. M. SOCIETY

The W. M. S met Monday with Mrs Webb. The lesson was on "That Other America." Mrs. Masterson gave a report on the district conference which met in Clarendon last Wednesday.

After we were dismissed, we went in a body to Mrs Trestle's to enjoy the social hour with Circle No. 2. Delicious refreshments were served to 15 members and visitors.

We will meet Monday, June 1, with Mrs. Masterson, and have the lesson in the study book, then go to Aunt Georgia Bishman's for a Bible study. We invite all the ladies to come.

R. F. C. Loans in Donley Co.

San Antonio.—Loans for re-financing authorized by the Reconstruction Finance Corporation for Donley County through February 29 have amounted to \$186,265. It has been announced by H P Drought, state director of the National Emergency Council for Texas.

Disbursements for this county have aggregated \$185,294. Drought added.

Total authorizations for RFC loans in Texas through Feb 29 amounted to \$118,176,321.29 and total disbursements were \$94,755,019. These loans were distributed through more than two hundred Texas counties.

Grand total of RFC loans thru out the nation amounted to authorizations of \$7,652,938,392.89 and disbursements of \$5,918,482,390.77, according to a recapitulation taken as of February 29, Drought was informed by Washington officials.

Former Hedleyan Wins Prize

Anson, May 22—J. E. Archer, 18 year old son of Mr. and Mrs. Jim Archer of Anson, was notified Friday that he was winner of \$100 in the Walter H. Wedal essay contest. Young Archer placed second.

The boy, who will graduate this week from the Anson grammar school, is a Star scout and senior patrol leader. He wrote on "Fort Phantom Hill."

J. E. is a former Hedleyan and is a nephew of S. C. Bell.

A new shipment of dresses, organdies, voiles, batistes and prints, at very low prices at Hooker's.

Joe Everett made a business trip to Pampa Saturday.

According to reports, Hedley has received about 4 1/2 inches of rain in the last ten days.

Charlie Mendenhall of Wichita Falls was in Hedley Tuesday.

The Senior class enjoyed an all day outing at Canyon last Saturday.

Miss Ruth Wells has returned from Hopkins, where she taught school the past winter.

'M' SYSTEM

Bring Beauty and Convenience to Your Kitchen with a MODERN PERFECTION OIL RANGE

What a delightful improvement these beautiful new Perfections will make in the appearance of thousands of kitchens!

Cooking will be easier, too,

Range R-879, one of 25 High-Power Perfection Stoves

with High-Power burner speed, cleanliness and precise regulation for every needed heat, from simmering to broiling.

Whatever your ideas on kitchen decoration, the dainty cream-white porcelain finish of this new Perfection will fit in; and the simple lines of its modern design look well anywhere.

Corners are rounded, surfaces are smooth, and there's a removable tray beneath the burners. The "Live-Heat" oven, air-insulated, is built at convenient height. The two-gallon concealed fuel reservoir is easily tilted and removed for filling.

Come in and find out all about it. You'll be pleased with the reasonable price.

Thompson Bros.

THE PATHFINDER

is the one and ONLY publication with the knowledge, experience and courage to give you every week the first-hand, inside information which is positively necessary for you to have. It is the ONE publication which is under no obligations to the big moneyed interests or Czars of trade—none of those fatal tie-ups with the selfish cliques who gamble in the very life blood of the people. That's why the Pathfinder is in a position to tell you the unvarnished facts in the plainest possible English. You can depend on every word it says—and there is no substitute for reliability.

EVERY WEEK FROM WASHINGTON, D. C.

Washington is now the news center of the entire world. It is the one place in the country where a strictly unbiased and reliable publication can be issued. That is why the Pathfinder is located there. The same clear sighted vision which led to the selection of the National Capital as the home of the Pathfinder over 40 years ago is the backbone of every single issue of the Pathfinder today.

It is our privilege for a limited time to offer you at a greatly reduced bargain price the greatest and most popular national weekly—The PATHFINDER—together with THIS PAPER, both a full year—52 weeks—for
