Mrs. Royce Hall

Edith Joyce Harris was born Jan. 26, 1912, at Elmer, Okla. She died Sept. 12, 1937, at Stratford, Texas, after a short illness. She was converted at the age of eight and joined the Baptist Church at the age of eleven years. She and her husband had lived near Hedley about six years.

She married J. Royce Hall Dec. 2, 1928. To this union was born one daughter, Wanda Joyce. She leaves a husband and daughter, her parents, Mr. and Mrs. J. H. Harris of Clarendon, a brother, Leonard Harris of Big Spring, other relatives and a host of friends.

The funeral service was held in the First Baptist Church at Clarendon and the body laid to rest in Clarendon Cemetery. The choir sang "What a Friend We Have in Jesus" and "Abide With Me." Bro. Greenhouse of Alanreed, friend of the family, led in prayer. Bro. King read the obituary and spoke some kindly words of comfort to the bereaved. At the request of the family Mrs. M. E. Wells and Ruth Wells sang a favorite of the departed, "Nearer the Old Olive Trees." Bro. Wells, her pastor, preached the sermon from the 14th chapter of John and other suitable scriptures. The beautiful offering of flowers showed how she was loved by relatives and friends. Pallbearers were John Naylor, Harrison Hall, Edwin Eanes, Eugene Estiack, Arthur Arnold and Charles Kains.

Edith Hall was one who was faithful to her Lord, her church and family. She taught in the Junior department of our Bible School. She was a talented musician and often played for church and Sunday School. She was helpful in community affairs and thoughtful and kind, especially to our old people. We shall remember her as one who tried to follow in the footsteps of the Master.

To the sorrowing loved ones I would say, look up and trust God and, as in the words of William Cullen Bryant: "So live, that when thy summons to join the innumerable caravan that moves to that mysterious realm, where each shall take his chamber in the silent halls of death, thou go not as a quaking slave at night, scourged to his dungeon, but sustained and soothed by an unfaltering trust, approach thy grave, like one who wraps the drapery of his couch about him, and lies down to pleasant dream."
A Friend

Mrs. R. L. Duckworth

Maggie Ellen Duckworth was born Jan. 4, 1887. Mrs. Duckworth moved to Texas in 1894, and was married to R. L. Duckworth Nov. 15, 1902. To this union were ten children, eight of whom survive: Gretta, Eva, Gene, Merwin, Billy, Doris, James Elden, and Mrs. Clay Cavender, all of Hedley.

Three days prior to her death she was taken ill, but all that her family physician and loved ones did was of no avail. God said her work is finished and called her home.

She was a devoted mother and companion, and numbered her friends by her acquaintances. Those who were privileged to know her well, spoke of her as one of the sweetest women they ever knew. She had lived a Christian life, since

Oscar S. Lyons

Oscar S. Lyons was born Nov. 10, 1869, in Joplin, Mo. In early life he came to Jack county, Texas. In 1909, he was married to Mrs. Hattie McCoy at Graham. To this union was born one child, Nettie, who married Otis Owens, and lives near Hedley.

There are four stepchildren, Ervin and Clint McCoy, Mrs. Ollie Warner and Mrs. Bettie Black. He has a brother, Mart in Lyons, Jacksboro, and a sister Mrs. A. B. Harrison, Perrin.

He moved from Graham to Foard county, in 1906, and lived on a farm near Crowell until 1922. He moved from Foard county to Donley county, settling in the Windy Valley community, where he lived until the first of this year, when he moved to the Darlington place 4 miles northwest of Hedley. He has been in poor health the past few years of his life. He died in his home on Sept. 9, and was buried in the cemetery at Hedley Sept. 10. The funeral services were conducted in the Methodist Church, by Rev. B. J. Osborn, assisted by the pastor of the Baptist Church, Rev. M. E. Wells.

Mr. Lyons was converted and joined the Methodist Church something like 35 years ago. He lived a Christian life up to the end of his life. The general expression of the entire family and friends who knew his life is: "He was a good man." This tells the entire story of a life: "He was Good." That means God like, in favor with God. That being true we may say to the grief-stricken family: You know where to find him. Keep your faith well founded, firmly fixed in Jesus Christ, and some day, possibly very soon, you will meet him again. Meet to live forever, in the Place where the Lord said he would go to prepare, and when it is prepared, He will "Come again to receive you, that where I am ye shall be also."

Our friend is not dead, but sleeping. Waiting for the resurrection morning, when all who sleep in Jesus will awake to meet the Lord, who will come to take them to the Home above. We say "Goodby" for only a little while.

early childhood, and with her busy life in the home she was ever thoughtful of others.

After a short impressive service conducted by Rev. Tillitt S. Teddie, assisted by Rev. B. J. Osborn, she was laid to rest in the Rowe Cemetery.

Relatives attending the funeral from out of town were Mrs. Rosa Dudgeon and two sons of Marietta, Okla., and John Osborne of Lubbock.

Gleaners Class

The Gleaners of the First Methodist Church School met Friday afternoon at 8:30 with Mrs. Lee Meeks hostess.

Order was called by president, Mrs. M. G. Whitfield, the roll call by secretary, Mrs. Meeks. The minutes of the last meeting were read and approved. Devotional led by Mrs. Koeninger. A short business session was held, after which a very interesting program was enjoyed.

The next meeting will be in the basement of the Methodist Church, all day, with a covered dish luncheon, and time will be spent quilting.

Our hostess served an ice course, after which good byes were spoken, and each left for home.
Mrs. Richmond Bowlin, reporter

Miss Lou McMillan of Alpine spent the past week end in the H. Mobley home.

Frank Spalding returned Friday from a two weeks visit at Sherman.

Miss Ruth McQueen of Amarillo visited home folks this week.

Mrs. J. H. Cooper, who underwent an operation in an Amarillo hospital last Thursday, is reported getting along nicely.

Mrs. R. R. Mebley and Mrs. Jewell McOskill and little son left Friday for Dawson, where Mrs. McOskill will teach school again this year.

Adventure Is Coming In The American Boy

Readers who like the lure of far places will find plenty to please them in coming issues of The American Boy Magazine. They'll read, for instance, of sea men and sabotage and San Francisco water front trouble; of daring adventure in the world of pseudo science, and of a feud aboard a plunging, rolling battle ship.

They'll read, too, of excitement aboard a transport plane blaring over jungled Mexican mountains, and of stranger planes that are not bound to earth but swing through the noiselessness of space. Readers can follow a young ex Mountie as he searches for elses in the wild northlands, and Tierney, the pie eating detective, on the trail of city criminals.

A new feature in The American Boy is picture pages that tell stories in pictures, for instance, that vividly show a day in the life of a coast guardsman, and how an Eskimo husky sled dog does his work. They transmit the thrill of battling a hundred pound, water churning tarpon. Tips on how it's done are also given pictorially—ranging from how to run a broken field to how to be correct in a ballroom.

Note: Subscription prices of The American Boy will be raised in the near future. Send your subscription order at once to take advantage of the bargain rates now in effect: one year at \$1.00 or three years at \$2.00. Foreign subscriptions 50c a year extra. Send your name, address and remittance to The American Boy, 7480 Second Blvd Detroit Mich. On newsstands the price is 15c a copy.

COLLECTING LIQUID RUBBER ON FIRESTONE PLANTATIONS IN LIBERIA

THAT'S WHY YOU GET MORE FOR YOUR MONEY IN FIRESTONE STANDARD TIRES

FIRESTONE builds a first-quality tire made of top grade materials and sells it for less money because Firestone passes savings along to you in the form of extra values. Firestone controls rubber and cotton supplies at their sources, manufactures with greater efficiency and distributes at lower cost. Because of these economies you get—

PROTECTION AGAINST BLOWOUTS—8 extra pounds of rubber are added to every 100 pounds of cord by the patented Gum-Dipping process.

PROTECTION AGAINST PUNCTURES—because under the tread are two extra layers of Gum-Dipped cords.

PROTECTION AGAINST SKIDDING—because the tread is scientifically designed.

LONGER NON-SKID MILEAGE—because of the extra tough, long-wearing-tread.

Make your car tire-safe now for fall and winter driving. Join the Firestone SAVE A LIFE Campaign today by equipping your car with a set of new Firestone Standard Tires—today's top tire value.

SEEN and HEARD around the NATIONAL CAPITAL By Carter Field FAMOUS WASHINGTON CORRESPONDENT

Washington. — Just one more change on the Supreme court bench and folks will begin wondering why President Roosevelt thought last January that any packing was necessary! Yet two or three more changes are almost certain within a year.

The court now stands as follows: Left: Brandeis, Cardozo, Stone, Black.

Middle: Hughes, Roberts. Right: Sutherland, Butler, McReynolds.

So that to obtain a favorable five to four decision, any question need only have a sufficient approach to being within the realm of federal powers to win the votes of one of the two middle of the roaders to be assured of victory.

Which is the more significant when it is realized that Black takes the place of Justice VanDevanter, who belonged in the extreme "right" division.

So that the difference is that the three remaining conservatives, Sutherland, Butler and McReynolds, must now win the support of both of the middle of the roaders, Hughes and Roberts, in order to win.

Both middle of the roaders will probably serve on the court for a long time, but all three of the conservatives are headed for retirement in the near future. As a matter of fact, if there were not the present bitter conflict all three would have retired at the end of the term in June. This is regarded as an undeniable fact by personal friends of the three justices. It has also been well known for some time that Justice Brandeis would like to retire.

Retirement of Brandeis, of course, would not be much of a change. True, Brandeis, with Cardozo and every other member of the court, voted the NRA out the window. Whereas Senator Black, not only publicly, but in his private conversations, denounced the court for that decision.

But even if President Roosevelt had been granted his six justice increase last January it would not have affected the NRA case, assuming that precisely the same question could have been presented to the enlarged court. For apparently nine justices would have voted as they did before, and the new six, presumably, would have voted as the man who appointed them wanted.

That would have left it nine to six against the new version of NRA.

In the picking of Black, of course, the President came pretty close—as close as it was humanly possible to come in calculating ahead—to avoiding a fight in the senate on confirmation. Obviously any lawyer who had expressed the views on economic questions that Black has would have encountered a tremendous fight.

So if Roosevelt wants to fill the vacancies sure to come in a few months by men holding Black's views, he will probably name other senators!

Cotton Plan Wrong

President Roosevelt is not explaining the real reasons why he consented to cotton loans after so positively telling the newspapermen that there would be no loans without crop control legislation. But the tremendously important thing about the whole business is that from the point of view of the economist invoking the law of supply and demand, both the President and the senators and representatives who forced government cotton loans over his protest, are wrong.

Either the President's plan or the plan of the congressmen will lead inevitably to disaster for the South, in the opinion of every disinterested expert who has studied the situation. Either plan would lead to holding the price of cotton up to 12 cents a pound or better. In fact, either plan aims at putting the price higher than that.

Under the so-called "parity price" theory, the price of cotton should be about 17 cents a pound. This "parity price" figure is determined by measuring the buying power of a pound of cotton over the years from 1909 to 1914—the period immediately preceding the outbreak of the World War.

The point is, how many cents a pound would cotton have to be now, or at any given time in order to buy the same amount of other commodities that the average sales price of cotton would have bought in this 1909-1914 period?

If prices go up, of course, the "parity price" moves up with them. Presumably the whole effort of the administration should be to maintain this "parity price."

Well, that is a very pleasant thing for a cotton farmer to contemplate, if he doesn't think of anything else. But there are a few other things which, if he does any reading or thinking in his off moments, might cause some dilution of his joy in thinking about the maintenance of this "parity price."

It is an uncontested fact that Brazil can produce cotton at 8 cents a pound—barely over one-third of

this "parity price." It is also an uncontested fact that Brazil has a tremendous acreage not yet diverted to cotton—an acreage big enough to supply the entire world with cotton, for that matter.

Brazil has already expanded her cotton production something like ten times as much as such optimists on the domestic cotton situation as Secretary of Commerce Daniel C. Roper thought she could three years ago. Like many others, Roper simply would not believe the reports that United States consuls in Brazil were sending him.

A national magazine sent a cotton expert from New Orleans down to Brazil to study the situation. He confirmed the consular reports, but still optimism about the domestic cotton situation radiated in Washington.

It further happens that Germany has been busy at work developing a substitute for cotton. So long as the world price is high, the Germans will work constantly at that problem. They can produce cotton substitute now, but the price is too high. But they are confident they can eventually get the cost of production down.

The terrible part of the whole business is that once Brazil has increased her production sufficiently, or been joined by enough other cheap producers, there is very little the United States government can do. The world will be supplied with cotton from sources other than the United States, and at a price below the cost of production in every state east of the Mississippi river. In fact, there are only two states, Texas and Oklahoma, which can then continue cotton growing at a profit.

Soft Pedal Sugar Fight

One reason the big controversy over sugar is so confusing to the average reader that he just skips over it is that nobody is really saying what he means. Every one involved has motives, but they are not talking about them. They talk about something else.

President Roosevelt and Secretary of the Interior Harold I. Ickes are working in the interest of the island producers—Hawaii, Puerto Rico and the Virgin islands. Senator Pat Harrison, of Mississippi, chairman of the senate finance committee, and those following him are working in the interests of the sugar refiners in continental United States.

Roosevelt and Ickes want to put no limit on the amount of sugar that may be refined in the islands. They claim that to do so would be to discriminate against American citizens, as these islands are all part of the United States.

But the simple fact is that labor is cheaper on the islands. So that if their production were not restricted—and as there is of course no tariff on the sugar they send to the United States—the ultimate result would be that every refinery now working in continental United States would be closed down.

In fact, this is perfectly known to Ickes, who professes a desire to see work provided in new refineries, particularly in the Virgin islands, his special charge. Roosevelt has developed a keen interest in the welfare of the poor people of Puerto Rico, etc.

Underlying this, however, is something else. Roosevelt and Ickes just happen to dislike intensely the "economic royalists" who own the sugar refineries in this country, particularly in Massachusetts, New York, New Jersey, Pennsylvania and Louisiana. This feeling probably started off against a few of them, but as the fight grew hot it spread to them all. Roosevelt has used plenty of adjectives in describing the "lobby" which was trying to get congress not to strangle the domestic refining industry. In fact, he permitted newspaper men to quote him to the broad general effect that it was one of the most pernicious and wicked outfits working against the cause of the people.

Pat Harrison, however, has certainly proved a thorn in the administration's side on this issue. Down in his heart Pat has not forgiven the President for defeating him for Democratic leader of the senate. There is no doubt, whatever, of course, that it was Roosevelt's influence which elected Alben W. Barkley, of Kentucky, over Pat by one vote.

In this case, however, Pat had a local reason to fight. Many of his Mississippi constituents work in the refineries at New Orleans. Pat did not want them to lose their jobs through the government literally closing these refineries down.

So he offered a "compromise" which would get around the idea of discriminating against American citizens. This compromise would simply provide that all existing refineries could refine sugar up to their previous maximums. This would keep the domestic refineries going and permit the offshore refineries to do just what they had been doing, but would close the door to new offshore refineries.

National Resources Committee Recommends Careful Planning to Take Full Advantage of Scientific Innovations.

By WILLIAM C. UTLEY

OUR country might have presented a vastly different scene if, at the turn of the present century, the government had been able to foresee the development of the telephone, the automobile, the airplane, the motion picture, rayon and radio.

Likewise, if we today can foresee the future development of some inventions we already have and some we probably will have, then we will be equipped to build for

One of the most important inventions which will be developed in the next few years is the mechanical cotton picker, shown at left. Another is television; a broadcast is shown above.

ourselves and our posterity a fuller existence.

This, according to the federal national resources committee, is the reason for its recent 450,000-word report on the "social implications of new inventions." The report, says President Roosevelt, "holds out hope that we can anticipate some of the effects of major inventions and make plans to meet new situations that will arise as these new inventions come into widespread use."

With this White House benediction, it is expected that the recommendations of the laborious document will become a guidepost for the co-ordinated, long-term planning to prevent or reduce future depressions with their economic maladjustments and social upheavals, that characterizes the New Deal.

Cites Thirteen Inventions.

To apply its theories, the committee recommends that another committee, to be known as the national resources board, be created. This would be a sort of "technological telescope," which would constantly peer into the future and predict what scientific advances would be made. Its qualified observers would be commissioned to co-ordinate the work of the many special planning boards which exist in 47 states, 400 counties and 1,100 cities.

This board and the many other planning boards throughout the nation ought immediately to concern themselves with the study of 13 inventions, the report declares. These are the mechanical cotton picker, air-conditioning equipment, plastics, the photo-electric cell, artificial cotton and woolen-like fibers made from cellulose, synthetic rubber, prefabricated houses, television, facsimile transmission, the automobile trailer, gasoline produced from coal, steep-flight aircraft planes and tray agriculture.

Dr. William F. Ogburn, director of research for the report, tells a few of the ways in which governments, individuals and industries suffered because they failed to foresee the development of certain industries.

"Highways are too narrow," he contends. "The metropolitan area could have been planned better; much crime could have been prevented. Industries could have been located to better advantage."

Here he injected a little of the political philosophy of the present administration. "The growing inadequacies of small local governments could have been foreseen," he said, "and the transfer of some of their functions to a more capable centralized government would have been facilitated."

Century's Most Important Invention.

"The question that naturally arises is: Will the second third of the Twentieth century see the rise of such great industries based on new inventions as was seen in the first third? There may very well be equally significant inventions during the next phase of our national growth as in the one just concluded."

"For instance, all are agreed that one such invention is the electron tube, said to be the greatest invention of the Twentieth century. Its most brilliant form is the photo-electric cell, popularly known as the electric eye.

"This eye sees everything that the human eye can see and more. It is even said to be able to detect certain types of counterfeit money. It will distinguish colors better than human beings can do.

"When it is joined with another form of the electron tube, the vacuum tube, it becomes able to act on what it sees. Thus it sees a waitress approaching a door with trays in both hands and at once swings the door open for her to pass.

"Unlike a human being, it does not suffer from fatigue. For instance, in a factory it can watch the tin cans go by on a belt, pick out the defective ones, letting only the good ones go by. This monotonous work can be done without strain for as long hours as the manager wishes.

Find New Uses Constantly.

"That it will cause unemployment is obvious, but it will also lighten the tasks of the workmen. Indeed, it brings the automatic factory and the automatic man one step closer. It may be used to regulate automobile traffic, to measure the density of smoke, to time horse racing, to read, to perform mathematical calculations.

"Hardly a month passes without some new use of the photoelectric cell being reported. Indeed it will require decades to learn the many things this versatile instrument can do.

"There are other such new inventions—inventions which will carry the nation on to even greater achievement during the years to come.

"The full effects of artificial fibers have not yet been felt. The influence of the airplane has just begun.

"Even the familiar telephone will have many new and profound effects, when long distance telephoning becomes more widespread, upon the distribution of population between metropolis and smaller city, upon the physical separation of management control from production, upon remote controls in general.

Trailer May Alter Living.

"The telephone wire may be used to record messages, bulletins, even newspapers, in the home and office.

"Nor are the influences of the very common automobile matters of past history either. The new social and economic unit of population called the metropolitan area, so encouraged by the automobile, is in its infancy, while the trailer may be destined to change the habits of living and working of vast numbers of the people."

Dr. Ogburn points out that there is little advantage in planning the use or distribution of our natural resources unless we know what uses technologists will find for them. We must be able to foresee whether oil will be made from coal, whether plastics will take the place of wood, whether alcohol will be used as a motor fuel, whether more foodstuffs will be produced chemically.

"The nation now faces the second third of the Twentieth century," he says. "What may be expected of technological development?"

"How far-reaching will be the effects of the mechanical cotton picker? Will the surplus labor of the South find the northern and western cities? Will the governments

plan and act in time, once the spread of this invention is certain?

"The influence on negroes may be catastrophic. Farm tenancy will be affected. The political system of the southern states may be greatly altered.

"In another field, science has gone far on the road to producing artificial climate in all its aspects, which may have effects on the distribution of population, upon health, upon production and upon the transformation of the night into day.

Talking Books for Blind.

"Then again television may become widely distributed, placing theaters into millions of homes and increasing even more the already astounding possibilities of propaganda to be imposed on a none too critical human race.

"Talking books may come as a boon to the blind, but with revolutionary effects upon libraries and which, together with the talking picture and television, may affect radically schools and the educational process.

"The variety of alloys gives to metals amazing adaptabilities to the purposes of man.

"The use of chemistry in the production of new objects in contrast to the use of mechanical fabrication on the basis of power continues to develop with remarkable rapidity, in the production of oil, of woolen-like fibers, of substitutes for wood, and of agencies of destruction.

"So the immediate future will see the application of new scientific discoveries that will bring not only exciting prospects but uncertainties and difficulties as well."

The report continued: "The air-conditioning developments which lower inside temperatures during hot weather may or may not within the next generation affect Southern cities and stimulate the growth of factories in warmer regions.

"Or again, tray agriculture, which produces a high yield per plant when the roots are suspended in a tray of liquid chemicals instead of in the soil, may or may not be used sufficiently to be of much social significance within the reader's lifetime."

Technological Unemployment.

The report said that while new inventions often save labor and therefore cut down the number of jobs, their developments often require new industries, creating new jobs.

"The question whether there will be a large amount of unemployment during the next period of business prosperity rests only in part on the introduction of new inventions and more efficient industrial techniques," says the report.

"For instance, even if industrial techniques remained the same, the volume of production would have to be greater in the future than in 1929 in order to absorb the increase in the working population and keep unemployment to the level of that date."

One of the greatest necessities for planning in anticipation of the development of inventions arises in the time lag between the birth of an invention and its full application, the report declares. It points out that for the 19 inventions voted most useful and introduced between 1888 and 1913 the following intervals were an average: Between the time the invention was conceived (which may have been centuries before) and the first working model or patent, 176 years; from that point to the first practical use, 24 years; thence to commercial success, 14 years; and to important use, 12 years, making it roughly 50 years from the first real work on the invention.

"The time lag between the first development and the full use of an invention is often a period of great social and economic maladjustment, as, for example, the delay in the adoption of workmen's compensation and the institution of 'safety first' campaigns after the introduction of rapidly moving steel machines," the report said. "This lag emphasized the need for planning in regard to inventions."

STAR DUST Movie • Radio

By VIRGINIA VALE

ONCE more Rudy Vallee has shown that he is the greatest talent scout in the radio business. Tommy Riggs, the two-voiced personality who has been appearing on his program the last few weeks has made an outstanding success and will soon have a program of his own.

The brash little girl that Mr. Riggs plays with such devastating humor promises to be as popular one of these days as is Charlie McCarthy, the famous ventriloquist's dummy. Incidentally, the people whom Vallee started on the road to radio success ought to get together and put on a gala program as a tribute to him. It would include such headliners as Walter O'Keefe, Bob Burns, Edgar Bergen and Charlie McCarthy, and Tommy Riggs. And what a program that would be!

Mona Barrie is the latest screen belle to seek a change from Hollywood on the New York stage.

James Cagney

James Cagney "About," in which Mona plays her first real comedy role. She plays a foreign actress with a heavy accent and has a glorious time swooping through scenes in the grand manner. She says that Jimmy is just tops to work with, which makes the verdict practically unanimous.

The greatest picture of the year, perhaps of many years, has received a chorus of critical acclaim such as has never been heard before. It is "The Life of Emile Zola" with Paul Muni. As crusader for the oppressed, as the most eloquent and forceful man of his time, Paul Muni gives an inspired performance. Don't let the praise of this picture drive you away from it with a faint suspicion that it may be educational, but dull. It offers the most exciting and thrilling evening you could spend in a theater.

With radio's summer lull over soon dozens of big programs will be angling for your attention. Irene Wicker, the greatly-beloved singing lady, moves to the Mutual network early in October offering a series of original sketches with music. Jack Benny returns to the air at the same time.

Margaret Tallichet, who abandoned a newspaper job in Texas to break into the movies, has found that even after a career is well started, it still has as many downs as ups. You may recall that she appealed to Carole Lombard for help and through her got a small contract with Selznick-International. Well, Miss Tallichet played small roles in "A Star Is Born" and then the studio decided to gamble on her to the extent of sending her east to dramatic school for further training. She appeared at the Mt. Kisco theater opposite no less a personage than Henry Fonda and proved conclusively that she needs a lot more training before she can play big roles.

Up in Dennis, Massachusetts

Gertrude Michael appeared on the stage in a play of early Colonial days and made a big hit. A regular parade of automobiles made the long trip from New York to see her, and when she came out on the stage the rafters rung with applause from her Broadway friends.

They were saluting her courage in winning a two-year battle with serious illness as well as her fine skill as an actress.

Gertrude Michael

ODDS AND ENDS—After trying to borrow Kenny Baker, or John Payne, or Jimmy Stewart, or Cary Grant, or Rick Arlen, the producer of Lily Pons' next picture has finally given up the search for a new leading man and given the role to Gene Raymond who played in her last picture. . . . Jack Benny's friends are saving all the reviews of "Aristi and Models" which rave about his performance to show him when he returns from Europe. All through the making of the picture he quarreled with the director and objected to his lines and felt utterly dismayed over what he expected would be the flop of the year. . . . Joan Crawford likes to run her pictures at home for her young niece to see. The child hovers every time she sees Auntie Joan on the screen. . . . John Barrymore is working up a hilarious imitation of Edgar Bergen and Charlie McCarthy to amuse his friends between scenes at the studio.

There's Only One

By Sophie Kerr

CHAPTER X—Continued

"Was Mrs. Cayne at home?" "Yes, sir, she was; I recall that because Mr. Holbrook asked me...

ham, and then, "But there's something more." "What more?" "Mr. Terriss, maybe I'm crazy, maybe I oughtn't even to think of this, but Holbrook tried to borrow money from me a few days ago and Lega tells me he's borrowed money from both her and Towers until they wouldn't lend him anything more."

"I'm sorry, madame," she excused herself, "I had a stain on my uniform and was changing." She thought grimly, "I'll never believe a servant again on oath after hearing myself tell such sick lies."

This was not easy, she found herself pulled in too many directions. To follow Terriss' instructions and search Holbrook's room, and then, if the boy were guilty, to reveal it—she didn't want to do it, she had too profound a conviction that Holbrook was guilty."

Colds Due to Allergy By DR. JAMES W. BARTON

SOMETIMES you find yourself sneezing and coughing, with a "running" nose and naturally you believe you have caught a cold and are in for a few days' misery. However, in a very short time, hours at most, the sneezing, coughing, and stuffiness of the nose disappear, much to your surprise.

"It's What You Hired Out for, My Dear Girl."

CHAPTER XI They lingered over dinner together in the quiet restaurant where they had lunched the first time and he had brought Rachel a quaint round bouquet of red and yellow carnations set in circles, spicy sweet.

"I couldn't afford orchids, and anyway these look like you," he had said. "I like these better than orchids," Rachel replied. "They're fascinating."

THIS administration helped many Harvard men "rise and shine." Unhappily, two others come to grief at about the same time. Francis O. French, father-in-law of John Jacob Astor...

old man, then you and I both would have been in a spot. Don't tell me you haven't seen how unreasonable Cayne is about his family!" "Yes—I've seen. Mr. Terriss, what am I to do? I can't tell him that it might be Holbrook, I can't do it."

Adding Minerals to Soil Is Found to Improve Food, Research Worker Asserts

The average person's life can be lengthened about a dozen years through the scientific addition of minerals to the soil, believes Dr. Charles Northern, who is an Alabama physician and a research worker in the field of mineral colloids.

content of vegetables grown on adjoining soil. A dairy used the process on grazing land for cows with the result that a glass of milk contained all the minerals needed for an adult during a day.

THE HEDLEY INFORMER

PUBLISHED EVERY FRIDAY
Mrs. Ed C. Boliver, Owner
Edward Boliver, Editor and
Publisher

Entered as second class matter
October 28, 1910, at the postoffice
at Hedley, Texas, under the Act of
March 3, 1879.

NOTICE—Any erroneous reflec-
tion upon the character, standing or
reputation of any person, firm or
corporation which may appear in the
columns of The Informer will be
gladly corrected upon its being
brought to the attention of the pub-
lisher.

All obituaries, resolutions of res-
pect, cards of thanks, advertising of
church or society doings, when ad-
mission is charged, will be treated
as advertising and charged for ac-
cordingly.

CHURCH OF CHRIST

Brother Frank E. Ghism will
preach in Hedley, at the Church
of Christ, the second Sunday of
each month.

Everybody is invited to come
out and hear him.

Bible Classes every Sunday
morning from 10 to 11 o'clock.

Card of Thanks

We wish to thank the many
friends and neighbors who were
so kind and thoughtful during
the recent illness and death of
our loving husband and father.
May God's richest blessings
rest upon you.

Parent-Teacher Assn.

The local Parent and Teacher's
Association entertained the mem-
bers of the Hedley School Facul-
ty with a delightful miscellaneous
program in the high school audi-
torium Thursday evening at 8
o'clock. The program was
opened by the welcome of the
incoming president, Mrs. J. W.
Webb, in which she solicited the
cooperation of the teachers with
the parents, and the parents with
the teachers. Then followed
these numbers, which had been
arranged by Mrs. W. E. Burden
chairman of the program com-
mittee:

Selo, Smiling Through, Rob
ert Watkins

Dance, Jean Ray Moreman
Acordian Solo, Mrs. Ebb
Hooker.

Military Dance, Dorothy
Dishman

Saxophone Solo, Betty Hooker
Tap Dance, Colleen Abernathy

At the request of the president
Mr. Payne introduced the new
teachers, Miss Cleek and Messrs
Sweat and Gregg.

During the social hour the
group held a sing song for plea-
sure. At the close of this hour
the social committee, of which
Mrs. Bill Seales is chairman
served punch and cookies to 50
guests and members.

A good broom for 20 cents at
Hooker's.

Shower

Mesdames Charles Rains, W.
O. Bridges, E. W. Alewine, T. E.
Caldwell, W. H. Moffitt, W. C.
Payne and A. T. Simmons, and
Mrs. L. E. Thompson of Claren-
don were hostesses at a lovely
dual shower at the Baptist
Church Tuesday afternoon, hon-
oring Mrs. Fred Rusk, a recent
bride who was formerly Miss
Hope Wells, and Miss Ruth
Wells, bride elect of Roscoe
Pinnett of Pampa.

The guests were greeted by
Mesdames L. E. Thompson and
W. O. Bridges. Mesdames W. C.
Payne E. W. Alewine presided
over the brides' registers. Mes-
dames Chas. Rains and T. E.
Caldwell served punch. The ta-
ble was covered with a beautiful
lace cloth and centered by a bowl
of sweet peas. Candles were
placed at each end of the table.
Mrs. L. E. Thompson gave two
plane selections and Mrs. W. C.
Bridges read two poems from
"Life's Highways," by Edgar A.
Guest, dedicating one to the
bride and bride to be, and the
other to their mother. Mrs. W.
E. Burden sang "Believe Me If
All These Endearing Young
Charms," accompanied by Mrs.
Caldwell.

At the conclusion of the pro-
gram, Mrs. Simmons announced
that there would be a treasure
hunt after following various
clues, the honorees found their
treasure, an assortment of lovely
gifts, which were opened and
displayed.
About 50 guests called during
the afternoon.

Wanted—a few more pelley hel-
ders in the Buntin Burial Asso-
ciation. See Ralph Moreman at
once.

Horace H. Mann

Fort Blackmore, Va.
Sept 5—Funeral rites for Horace
H. Mann, about 40, will be conduc-
ted from the home of his mother,
Mrs. Harvey Mann here at 8:00
o'clock Monday afternoon, with
Rev. W. V. Pierce of Gate City
Va. and Rev. M. S. Compton of-
ficiating. Interment will be at the
family cemetery near the home.

Mr. Mann was instantly killed
Sunday morning at 2:00 o'clock,
when a car in which he was rid-
ing left the road 3 miles north
of Clintport, Va., and in ever
turning pinned him beneath it.
It was stated his uncle Oscar Biek-
ley of Big Stone Gap, Va., was
driving at the time of the acci-
dent. He had been attending the
Wise County Fair and was return-
ing to his home.

He was a native of Scott county
and a son of Harvey and Otella
Biekley Mann, both parents be-
ing members of prominent fami-
lies of this section. He affiliated
with the Southern Methodist
Church.

He engaged in farming and
stock growing, and was active in
community, civic and political
affairs.

He is survived by his mother,
three brothers, E. E. Mann of
Hedley, Texas, John and G. W.
Mann of Ft. Blackmore, Va., two
sisters, Mrs. A. J. Strickland of
Dayton, Ohio, and Mrs. Garnet
Markham of Ft. Blackmore, Va.

His father died a number of
years ago and another sister,
Mrs. Conley Carter died in 1936.

He was never married.—The
Bristol Herald Courier.

The Informer extends sympa-
thy to the bereaved.

Card of Thanks

We wish to express our sin-
cere appreciation to all those
who were so sympathetic in the
death of our loved one. May
God's blessings rest on every
one of you.
