To 60-year-old Field Marshal Albert Kesselring went the hapless job of assuming su-

ring to try to hold Kesselring the sagging German

front in the west, Hitler chose an ardent Nazi, who gained notice through his development of strong defensive lines in Italy. Trusted by the Nazis to stand fast in the face of the overwhelming Allied onslaught, Kesselring succeeded Field Marshal Von Rundstedt, who was relieved of his command following reports that he had failed to negotiate an armistice with General Eisenhower. As Kesselring took over the Ger-

man command, his hard-pressed forces faced the Canadian 1st, Brit-ish 2nd and U. S. 9th armies on the western border of the Ruhr, while the U.S. 1st army built up strength for a drive to the south of the vital industrial valley from its Remagen bridgehead.

Following a tremendous concerted aerial bombardment aimed at softening up the enemy's rear areas, these four Allied armies stood ready to strike to the east of the Rhine and break into the open German plains on the high road to Berlin. Farther to the south, the U. S. 3rd

of the Rhine in this sector.

Double Trouble

Making no bones about their fear of an invasion of their homeland, the Japanese government moved feverishly to prepare the country for the eventuality, while at the same time pushing efforts to organize occupied preme command of German armies in China against a thrust from U. S. closed on the vital forces.

Her predicament underlined by the U. S.'s gradual advance toward the homeland, and the destructive Ruhr valley after having conquered the coal and iron rich Saar basin to aerial raids on her great urban centers, Japan's leaders called for the In picking Kesselestablishment of virtual martial law in the country, permitting expropri-ation of land and demolition of buildings for defense purposes.

Though high military authorities believe that Japan, like Germany, will not be bombed out of the war because of the decentralization of her industry, U. S. attacks have cut into some of the enemy's productive capacity, besides causing serious civilian dislocations. Al ready, almost half of Tokyo's civil-ian population has been evacuated, it was said

Besides impairing the home effort, such raids as the recent carrier plane attacks on the Japs' great inner naval base in the Inland sea bounded by the home islands of Honshu, Kyushu and Shikoku serve not only to cripple the enemy fleet but also damage important repair and anchorage facilities.

Although the Japs feel that any direct assault on the homeland would give them the advantage of short supply lines and land bases from which to develop counter-meas-7th armies, having cleaned out

FOOD:

THE HEDLEY INFORMER

Overseas Demands

The food situation continued to occupy the country's attention, with the conviction growing that Americans will have to give their belts a long pull inward to help feed dis-tressed civilians in liberated countries.

But if the food situation took the spotlight in the U.S., it also aroused interest in Britain, where Prime Minister Churchill told the house of commons that the country only had less than 6 million tons of food in reserve instead of the 700 million suggested by some quarters in America. Some of it was being used to feed needy Europeans, he said.

Following President Roosevelt's statement that it was only decent for Americans to share some of their food supplies with hungry Europeans, and reports that the army's share of meat would be increased 4 per cent during the next three months to help feed people in the war zones while U. S. civilians' would be slashed 12 per cent, it was announced that the United Nations Relief and Rehabilitation administration (UNRRA) would require about 800 million pounds of food from this country during April, May and June.

Food other than meat compose UNRRA's largest claim on U. S. stocks, with calls for meat amount ing to 1 out of every 350 pounds of the nation's civilian supply, it was said. Deliveries of grain, flour and other cereal products top the list, with meat and fat and then beans and peas, milk and sugar in order. Of UNRRA's total requirements of 1,876,000,000 pounds of food for the next three months, the U.S. is expected to furnish 42 per cent, with Canada supplying 38 per cent and other United Nations the rest.

May Cut Draft Calls

With the services expected to be built up to full strength by July, 1945, monthly draft calls thereafter may be cut from the present 135,000 to 93,000 to furnish replacements, President Roosevelt revealed.

At the same time, a congressional committee was told that although draft calls would be reduced after Germany's defeat, young men will continue to be inducted during the Japanese war to replace discharged vets. Previously, selective service announced that some 145,000 men from 18 to 29 years of age in the steel, transportation, mining and synthetic rubber indus-try would be deferred as essen-tial workers, breaking the former policy of exempting only about 30 per cent in any field. As a result, older men in the 30 to 37 age group will have to be inducted to make up the differ. ence, it was said, POLIO:

hands full trying to hold the Allied armies off from the open northern plains, German commanders in the east experienced equal difficulty meeting the Russian onslaught over 2 the other end of the level northern country in the east. From Stettin southward, the Reds menaced the serried defenses of Berlin while the Nazis still talked about a last ditch fight behind concrete pillboxes, bunkers, tank traps and irrigated flat land.

Though massed in the greatest strength before Berlin, the Reds also exerted considerable pressure to the south, seeking to batter their way through the mountain masses in Upper Silesia to enter Czechoslovakia, and smashing at German defenses in western Hungary in an effort to reach Austria.

U. S. SAVINGS:

In Billions

With a wartime economy restricting the supply of civilian goods, and income at peak levels, Americans continued to pour billions of dollars into savings, the Securities and Ex-

change commission reported. With Americans putting away nearly 25 per cent of their incomes in cash, bank deposits and government securities within the last two and one-half years, total holdings of these assets reached 148 billion dollars at the end of 1944. In saving 40 billion dollars last

year, 10 times as much as in 1940, Americans amassed an additional 17 billions in cash and bank deposits; 15 billions in government bonds; 31/2 billions in insurance, and 900 millions in savings and loans associations.

CITY EMPLOYEES

The 852,000 employees of the nation's cities and towns draw a monthly payroll of \$122,000,000, the International City Managers association reported. Despite the decline in number of employees, however, the total payroll has shown a steady advance during the last two years.

Accompanying the general decline in number of municipal employees was a general increase in length of the regular, or normal work-week city hall personnel, though much occurred in the smaller cities.

the Saar, drew up against the forures, they are looking worriedly to ested mountain country to the east the Chinese coast, where they be-lieve the U. S. might drive ashore to set up invasion bases.

Thus, high military authorities pre-Thus, while Kesselring had his sume, the enemy will continue to play for time in such outlying battle zones as the Philippines and Burma to permit further develop-ment of Chinese resources and troops reportedly fighting for them so as to be better able to meet an invasion of that country.

> **CROP ACREAGE:** To Drop

Because of a decrease in hog numbers in their own lots, an expected drop in demand for feed grains and a switchover to crops with lower labor requirements, farmers will put fewer acres to important grain in 1945, the U.S. department of agriculture reported.

Basing its report on farmers' declarations of intentions, the USDA said that corn acreage would be down 3 per cent under 1944, barley 14 per cent, and soybeans 21/2 per cent. As exceptions, wheat acreage was expected to increase 41/2 per cent and oats 8 per cent.

In addition, the USDA's reports on acreages for other crops showed general decreases from last year, with increases forecast only for sugar beets, flaxseed, tobacco and rice.

With the weather generally favor able, finances ample and seed and feed plentiful, chief obstacles to 1945 production lie in manpower and machinery shortages, the USDA de-clared. Indicated acreages in declarations of intentions might be notably changed through the year, the USDA said, in accordance with influences in weather, price fluctuaons, manpower, finances and the effect of the report itself on farm-

Staples Output

Whol production declined along with cheep numbers in the United States in 1944 with production, both shorn and pulled, estimated at 418,094,000 pounds compared with 449,578,600 pounds produced in 1943. Average local market prices in 1944 were 42.4 cents per pound, however, com-pared with 41.6 cents per pound in 1943. Number of sheep shorn is estimated at 9 per cent less than 1943 or 44,324,000 head.

treatment of infantile paralysis Australia's Sister Elizabeth Kenny announced her decision to leave this country if congress failed to look into the difficulties that have beset her since her arrival here.

Although Sister Kenny's decision to leave the country came upon the heels of the National Foundation for Infantile Paralysis' refusal of a request for \$804,000 for the Kenny institute in Minneapolis, Minn., she said that money was no object, since the people of the latter city already had raised \$400,000 for her work and undoubtedly could double the figure

Rather, she said, her decision to leave was prompted by the medical profession's failure to provide assistance for further research into her theory of treatment. Without such research, she declared, her presence here was no longer necessary sincl others have been trained in her present methods.

MIDNIGHT CURFEW: New York in Line

Having enjoyed an extra hour of night frolicking for a few days, New York's milling merrymakers found themselves out on the streets at mid-night again, following the amuse ment owners' decision not to take advantage of Mayor La Guardia's one hour extension of the govern-ment's 12 a. m. curfew, imposed to conserve fuel and manpower.

First accepting La Guardia's one hour reprieve in the face of widespread criticism, the amusement owners' own hands were forced when both the army and navy or-dered their personnel to leave the nighteries at midnight in obedience to the government regulation. Before the New Yorkers decided to close their doors, War Mobilization

Director Byrnes said it was impossible for the government to enforce the midnight curfew, since it lacked the police necessary.

SHIP EGGS BY AIR

More than 5,000 hatching eggs have been shipped successfully by airplane from the United States to tropical American countries to de-velop poultry industries as part of an inter-American food-growing program.

The University of Maryland previously had demonstrated the prac-ticability of shipping eggs by plane within the United States and its aid and that of the U. S. department of agriculture was enlisted for the experiment.

few days on this forage, the extension people tell me. Also, feeding hay and grain in the barn before they go into the pasture will help reduce the danger of bloat.

Bloat can prove troublesome and nowadays no dairy farmer has time to give to special problems such as this. I hope you'll use extra care to prevent it.

Would you like to have some good, sound suggestions on how to save time and labor when you start making hay, together with some ideas on improving hay guality? The current issue of the Kraftsman features an excellent article on haying which will give you some mighty worthwhile tips. Write Uncle Bob at 500 Peshtigo Court, Chicago 90, Ill., for a free copy of the March-April issue.

Here comes that "green Sudan' again. About this time last year I discussed the value of Sudan grass as an emergency pasture, to provide high grade forage in mid-summer, when your permanent pasture needs a rest.

Sudan grass has proved its value in many areas and the crop is worth consideration for 1945. A half-acre per cow will raise milk volume at a time when normally production declines because of hot, dry weather. I had the privilege of working with

the extension service in western Illinois last year on a soy-Sudan demonstration plot.

The dairy farmer who planted the combination got a sharp increase in milk production over the quantity produced when the cows were on bluegrass. He figured that in the first week alone he made a gain of \$50, by increased volume and through a

rate depends somewhat on your type of land and the locality in which you live, so I suggest you get recommen dations from your county agent and from the following booklets: Circular 276, Extension Service, 0

asked if I could help design a stall or something to fasten around each child's desk, to keep the youngsters from doing so much squirming. For some reason or other that reminded me that stanchions have proved a considerable aid in the milk barn.

quiet while they are being milked. One college made a test and proved that use of stanchions actually helped increase milk production.

Ready-made metal stanchions are best, of course. But if you're having trouble getting them, Missouri offers two simple designs for stanchions which you can make yourself. Detailed instructions will be found in Circular 491, Extension Service, University of Missouri, Columbia, Mo.*

If you "plant" more War Bonds now, you'll reap a harvest of new equipment sometime in the futurel

NOTIL: There usually is a Sc charge for pamphlets malled to non-residents of a states but possibly your own state has a free pamphlet on the same subject. Ask you agent. uncle

Finkham's Testable Compound to relieve such symptoms. Pinkham's Compound mars warves. It's one of the best known medicines for this purpose. Follow inbei directions.

Comfortable Quarters Enjoyed by Crew

it. .

All the pilots and ship's officers live in "officers' country" in the for-ward part of the ship. They live in comfortable cabins, housing from one to four men.

The crew lives in compartments. They are of all shapes and sizes. Some hold as little as half a dozen men. Others are big and house a hundred men.

The navy doesn't use hammocks anymore. Every man has a bed. It is called a "rack." It's merely a newcomer like myself, is about three tubular framework, with wire things: springs stretched across it. It is at-tached to the wall by hinges, and is folded up against the wall in the daytime.

The "racks" aren't let down till about seven in the evening (except for men standing regular watch who must sleep in the daytime).

A light carrier, such as mine, has only about a third as many planes as the big carriers, and less than as the big carriers, and less than where they smacked the water when half the crew, but it does exactly the she rolled that far over. A lot of same kind of work.

Of the three types of carriers in the navy, ours has the narrowest flight deck of all. It's so narrow flight deck of all. It's so narrow oped any real love for the sea-the that when planes take off they use kind that will draw them back to it the left side of the deck, in order | for a lifetime. Some of course will that their right wingtip won't come come back if things get tough after too close to the "island" as they the war. But mostly they are

temporary sailors, and the sea is pass. Our pilots and crew are quite not in their blood.

Carriers Belie Their Clumsy Appearance

It doesn't cut through the water like a cruiser, knifing romantically along. It doesn't dance and cavort

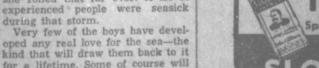

An aircraft carrier is a nople thing. It lacks almost everything that seems to denote nobility, yet deep nobility is there. A carrier has no poise. It has no grace. It is top-heavy and lop-sided. It has the lines of a well-fed cow.

right," he says. "The point with us is that we've got a pretty good chance of living through this. Think of the marines who have to take the beaches, and the infantry in Germany. I can stand a lot of monotony if I know my chances are pretty good for coming out of it alive." But others yell their heads off about their lot, and feel they're being persecuted by being kept out of America a year. I've heard some boys say "I'd trade this for a foxhole any day." You just have to keep your mouth shut to a remark like that.

The terrible typhoon they went

through off the Philippines; the times they were hit by Jap bombs; and their desire to get back to America. The typhoon was awful. Many

thought they would go the same way as the three destroyers that cap-sized. This ship is inclined to roll badly anyhow. Today she still has immense dents in her smokestacks

only fresh yeast with more EXTRA vitamins. RAISED CORN MUTTINS 4 tahlespoons melted butter or margarine. 1 cake Fizischmann's Xeast yn sugar ¼ cup lukewarm water 2 eggs, well beaten 3 cups sifted flour 1% cups corn meal 1% cups milk, scalded 2 teaspoons salt 3 tablespoons brown sugar

HINTS FOR HOME BAKERS

3 cups sifted flour Stir the corn meal very slowly into the scalded mffk. Mix in saft, brown sugar and melted butter or margarine. Cool to hakewarm, Dissolve Fleischmann's Yeast in lukewarm water and add to lukewarm corn-meal mixture. Add eggs and flour; beat well. Fill well-greased muffin pans half full. Cover and let rise in warm place, free from draft, until light, about I hour. Bake in mod-erate oven at 375°F. about 30 minutes. Makes 20.
