eral's war record-in Tunisia, on

the Normandy beachhead, among

the hedgerows, where he smashed

a gateway at St. Lo which made

Patton's lightning drive possible.

But we didn't know much about

the man. Most of us didn't know

he was from Missouri and later

some of us might have suspected

that that was the reason why he

was picked, although the Presi-

dent said it was because he wanted a World War II soldier to take

care of the wants of World War II

veterans. Now we have some other reasons for believing that

the choice was predicated on wise

advice and is going to prove itself

because Bradley has established a

record as an administrator. He proved that in the army and had

the acumen to see the chief fault

in the veterans' organization and

On the emotional side-well, Er-

The trouble with the Veterans'

Administration was that it grew so

rapidly that it didn't have time to

delegate authority. And there was another reason for this. It was

built on what seemed a very sound

theory. Let's take its services to

the veteran. For instance, small

hospitals were scattered all over

the country, many in little commu-

nities where the veteran could get

to them easily. But that didn't

work out. It was hard to get ex-

pert medical men, good service and

the latest equipment in the smaller

communities and because the re-

gional organization was spread so

thin, it was necessary to have a

strong hand in Washington. The

result was that the grip of that

hand was so tight that the whole

system was cramped.

has set out to remedy it.

On the horse-sense side, it is

a fortunate one.

a means to stop you." (Period.)

recalling, I imagine, some of the

WNU Service, 1616 Eye St., N. W., Washington, D. C.

I have just come back from a visit with the father of 15 million. That isn't such a far-fetched figure to use in describing the tall, rangy Missourian, who is in charge of "the biggest business in the world," which is how they describe the Veterans' Administration in Washington.

To call Omar Nelson Bradley "father" of the service men and women isn't stretching it. Ernie Pyle once said: "If I could pick any two men in the world for my father except my own Dad, I would pick General Omar Bradley or General Ike Eisenhower. If I had a son, I would like him to go to Bradley or Ike for advice." Ernie was a pretty keen judge of human nature on the hoof. I thought of that when one of Bradley's co-workers in the Veterans' Administration, who is almost a decade older than the general, said "fatherly" was the way to describe the manner in which he was treated the first time they had a problem to straighten out with the

And then I met the General. I found a weather-beaten, wiry, long-legged soldier, whose eyes twinkled brighter than the four a little later. But I found out something else. I found out why he ought to be able to run one of the hardest jobs in the government. And I'll admit, right off, it sounds almost too good to be true.

We had been talking about the details of the reorganization of the agency which is now going on and with which General Bradley is minutely familiar. Then I asked him what it was, if anything, in his military training and experience that he could use in his present position

He said that he thought it was the same with all jobs such as And here is the theory on which he works:

"First, build your organization on functional lines. Second, get the right man to head up each function. Third, give him full responsibility to act on his own authority."

How, I inquired, does this fit in with your military experTHE HEDLEY INFORMER

Things I Never Knew Till Now About Atoms:

This gives you an idea of the atom's size: If a drop of water were magnified to the size of the earth, the atoms in it would hardly be the size of oranges . . . Most of the atom is composed of empty space. It is made of an orbit of electrons revolving around the nucleus much as planets revolve about the sun. An electron is merely a particle of electricity . . . The atom's nucleus contains all its colossal energy. It took scientists more than 50 years of research to unlock the nucleus so it could give up that power . . . Uranium has made the atomic bomb the most devastating explosive. Yet the bomb uses only onetenth of one per cent of uranium's potential strength . . . Another reason why the United Nations should stick together: They possess three-quarters of the world's uranium supply.

Few motorists realize that their cars are driven by atomic power. Gasoline is rich in hydrogen atoms, and they provide most of the power that drives the car . . . Atomic power is one of the few great discoveries that was the goal of the longest and most difficult series of researches in history. Most momentous discoveries were accidents: The invention of fire, the discovery of America, the discov-ery of oxygen and the X-ray were all the result of accident.

In 1905, a young patent office clerk in Switzerland developed a theory which involved the idea that under certain conditions matter could be changed into energy and energy into matter. According to that theory, a very small amount of matter could produce tremendous quantities of energy. This has become the basic principle for atomic power. Yet science ignored this theory for 15 years. The young patent office clerk's name: Albert Einstein.

You've probably read that the atomic power in a breath of air could operate a powerful plane for a year continuously; that the a.p. in a handful of snow could heat a large apartment house for a year, etc. However, Prof. Einstein believes "it will probat'y take many years" to channel u.anium's energy into peaceful pursuits. Einstein also points out that other substances might be found "and probably will be found" to accelerate its commercial use.

On Dec. 10, 1941 (a day before we declared war against Germany), Princeton University scientists issued a report which was buried in gazettes' inside pages. Today the significance of this report cannot be over-estimated: It revealed that the scientists made much headway in planning means to defend America against any type of atomic attack. Similar research is now continuing . . . Some day the result of this work might make the atomic bomb obsolete . . . The peacetime role of atomic energy will depend upon one consideration-relative cost. Until a method of producing the energy has been revolutionized and brought down to a low figure, it is likely to provide a source of energy in extremely concentrated form only for highly specialized industrial purposes . . . One sci-entist has observed: "Splitting the atom is like discovering the other half of the world-the biggest half.'

Tarragon Vinegar Tarragon vinegar is a favorite in

dressing summer salads. The dark green leaves of tarragon are used for seasoning the vinegar. They are used both fresh and dried. This herb needs a little covering of litter and leaves for winter protection.

Cage Crickets In the Orient the chirping noise of the house cricket is highly appreciated and many households keep them in cages, the cages often elaborately wrought and decorated.

Two-Headed Stream

The Rhine river rises as a twoheaded stream in southern Switzer-land, enters the Boden See (Lake Constance), and emerges to continue its winding 850-mile course to its multi-mouthed outlet in the North sea. In its oceanward journey it picks up several important tributaries, such as the Lahn, the Neckar, the Main, and the Ruhr from the east, and the Mosel from the west. In some stretches the river is an international boundary. It is a frontier between Switzerland and tiny Liechtenstein, between Switzerland and the old Austria, between Switzerland and Germany, and between France and Germany. Through Germany the river flows in a geperal northwesterly direction, turning sharply west at the Netherlands line to enter the North sea.

Freshen Grass With

Fertilizer in Fall Late August or September is the best season to give lawn grass a "lift." After the hard summer season. some refreshments in the way of fertilizer, and possibly lime, is called for. Thin stands of grass are particularly in need of help. If your lawn has not been limed in the last few years, it is suggested that you apply 50 to 75 pounds of ground limestone per 1,000 square feet. This will sweeten the soil and make it possible for the grasses to respond better to fertilizer treatment.

The addition of 10 to 20 pounds of fertilizer per 1,000 square feet of lawn will do wonders. Fertilizers such as 5-10-5, 4-12-8 or those of similar ratios are well adapted for thickening lawn grasses. Uniform distribution can be obtained by spreading the material in two directions. Measure out half of the fertilizer needed for the lawn and spread it in a north-south direction. Then spread the other half in an east-west direction, and there should be little difficulty in getting even coverage.

Lawns given a tonic in the manner described soon will assume a good healthy color and develop a dense stand of grass. Lawns composed of dense turf will resist invasion by undesirable weeds such as crabgrass, buckhorn and dandelion.

Combustionible Hay Experienced farmers know that

hay, if incompletely cured at time of storage-meaning that it has a moisture content of 25 to 30 per cent - is subject to spontaneous combustion.

Perk Up Potato Salad Potato salad will taste better if placed in the refrigerator to chill several hours before serving time. This gives the onions and seasonings a chance to permeate the salad, making it uniformly delicious.

Trail-Makers The first trail-makers in America

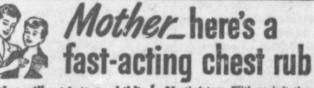

To Get Better Cough Syrup, Mix It at Home

SoEasy! No Ceoking. Real Saving. To get quick relief from coughs due to colds, you should make sure by

to colds, you should make sure by mixing your own cough syrup at home. It's no trouble at all, and you know it's pure and good. It needs no cooking, and it's so easy to make that a child could do it. From your druggist, get 2½ ounces of Pinex. Four this into a pint bot-tle, and add enough plain syrup to fill up the pint. To make syrup, stir two cups of granulated sugar and one cup of water a few moments, until dis-solved. Or you can use corr syrup or solved. Or you can use corn syrup or liquid honey, if desired. The full pint thus made should last a family a long time, and gives you about four times as much cough medicine for your money. It never spoils, and children love its pleasant taste.

And for quick results, you've never seen its superior. It seems to take hold instantly, loosening the phlegm, soothing the irritated membranes, soothing the irritated membranes, and helping to clear the air passages. Pinex is a special compound of proven ingredients, in concentrated form, well known for quick action on throat and bronchial irritations. Just try it, and if not pleased, your money will be refunded.

having had some of that branch of adventure myself-although running a platoon isn't running an army.

"It's a good deal like the army," he answered. "You have your staff. You have say 20 sections, each with a special function, work-ing under your chief of staff. Sometimes, of course, you group some of the functions, but the organization is along functional lines."

And how, I asked, do you choose the men to head up these various activities? His answer came back without the slightest hesitation. "I choose a man, first for his

ability, second for his loyalty-and I count heavily on the loyalty. Get loyal men of ability and you've gone a long way toward solving your problems in any organization

That sounded pretty good to me, but what about the present situation where, after all, there is always a Congress on Capitol Hill, a Congress with constituents who have votes and some of whom want jobs. I asked the General, what about politics? He didn't seem worried. He said that he hadn't had any trouble. "I'm not a politician," he said.

"I never intend to run for office." That was all he would say, but here is a story I picked up later at the other end of Pennsylvania Avenue

A certain Congressman got a hot letter from a constituent who had been fired from the Veterans' Administration. No doubt with due cause. He hot-footed it up to the General and spoke, as legislators often do to officials, with considerable vigor.

"I want the man re-hired at once," the Congressman demanded. The General was polite but sorry.

Bradley put his finger on the situation (with the help of well-chosen counsel) and reversed the former policy. Now it's "bring the veteran to the hospital." Bring him by rail or plane in an emer-gency, but bring him to a well-manned, well-equipped center whose size and importance will attract the best there is in medical skill, when he needs specialized care.

Hand in hand with this regional centralization of the medical facilities, the new organization has decentralized the authority. As soon as Bradley looked over the set-up he said:

"This is like having a 150 regiments under one man. In the army that would be unthinkable. We'd break it down into corps and divisions at least."

And so that is what was done.

But first he made a sharp cleavage between the medical organization and the rest of the activities. He created a new office, "Acting Surgeon General of the Veterans' Administration." And he ap-pointed the best man he knew, Major General Paul Ramsey Hawley, who had been chief surgeon for the European theater and did an outstanding job.

And here I wonder if there wasn't one of those important unconscious childhood impressions which helped. Bradley's middle name, Nelson, is for a well-loved family physician. And Bradley's fatherliness is attested to in his interest in the physical welfare of his men. Again and again war correspondents mentioned the fact that he planned engagements so that his troops would suffer the fewest casualties possible. He has an instinctive understanding of the afflicted.

Uranium is used for atomic bombs because it has the largest atom of any of the known elements and would be easier to split . . . When the atom is cracked, the fragments of its nucleus are hurled off with an energy of 100,000,000 electron volts... The machinery which produced the atomic bomb has given the world its greatest destructive force. Very little attention has been given to the fact that such machinery is being used to save life, not only destroy it. The atom-splitting cyclotron is a potent medical tool and is an invaluable aid in the fight to lick cancer . . . We have pointed out that the nucleus is the source of the atom's power. It staggers the imagination to realize the nucleus is only one-millionth of a billionth of the size of the atom!

The energy in just one gram of uranium is strong enough to lift the Empire State Building 20 miles in the air . . . More than five years ago, Dr. R. M. Langer (physics research associate at the California Institute of Technology) wrote in a mag that uranium could create a civilization in which man would dwell underground for better living; where national boun-daries would be obsolete because of swift travel; and in which mean-ing of the gold standard would be lost because of decreased living snets.

Mahomet went to the mountain The Mikado went to MacArthur. This, it seems only fair to say, merely demonstrates the excellent judgment of all parties concerned.

As I look back over a few decades I have enjoyed on this mundang sphere, the only things regret seem to be the things I missed.

HEDLEY, D NLEY COUNTY, TEXAS

THE HEDLEY INFORMER, FRIDAY, NOV. 2, 1945

Cloudless Skies

When Australia starts developing its infant film industry and decides to build a counterpart of Hollywood, it won't be able to set it up in central Australia. The weather's too dry there for film-making. Clouds needed for essential pictorial effects in the cattle-droving epic, "The Overlanders" were so rare that on one occasion they had to race 60 miles across a tableland to catch up with a herd of cattle and photograph them while the thin, fleeting clouds were still around.

Youngsters' Party Delight-Ice Cream Clowns (See Recipe Below)

Children's Party

poise er because refreshments must necessarily be simple. A little imagi-

do the rest. Good wholesome food prepared attractively will go a long way toward satisfying the little guests. Add a few gay tablecloths and napkins, some easy but exciting games and you have all the ingredients for a

successful party. If you are serving sandwiches, cut them into shapes with animal cutters. A cool glass of milk, or hot chocolate with a frothy blob of whipped cream-now returned to the grocery shelves-will bring forth cheers from Jimmy's op Joan's

friends. The favorite dessert is cake or cookies with ice cream of course! Anything you can do to make this latter partyfied will all be on the credit side of the party.

Now that cheese and meat are easier to obtain, you can again have fun with sandwiches. Not too much seasoning, though, because youngChildren's Party Menu. *Assorted Sandwiches Hot Chocolate *Ice Cream Clowns Hard Candies

Grind the cheese, onion and pimiento. Add the seasoning and mayonnaise. Mix thoroughly. Fruit salads, which contain

are a nice contrast to sandwiches at children's parties. This one will be high

in favor Orange, Pineapple and Apple Salad. (Serves 6 to 8) 3 oranges, peeled and diced

3 slices canned pineapple or 1 cup tidbits 1 unpeeled red apple, diced 1 cup seeded grapes, slivered

1/2 cup pitted dates, cut in small pieces 1/3 cup mayonnaise

Mix fruit with mayonnaise and chill very thoroughly. Serve on shredded lettuce.

During the cooler weather, it is often advisable to have a hot dish for the youngsters to start things off right. Now that cheese is again available, it might be a good idea to serve the following spaghetti dish: Creamy Spaghetti.

For You To Feel Well

<text><text><text><text><text>

That Hang On The Common course The Common course The Common course trouble to help loosen and expet permination phlegm, and aid nature to soothe and heal raw, tender, in-hamed bronchial mucous mem-branes. Tell your druggist to sell you a bottle of Creomulaion with the un-derstanding you must like the way it guickly allays the cough or you are to have your money back. CREOMULSION for Coughs, Chest Colds, Bronchitia

edients mixed into Faultless Starch make this wonderful difference.

Save Starch-Cooking Time

One big difference in Faultless Starch is that you don't have to cook it to make it turn clear. Just cream Faultless Starch with a little cool water. Then add boiling water while stirring. That's all. This advantage alone can save five to fifteen minutes of hot, tiresome work each busy washday.

MAKES IRONING EASY

Another big difference in Fault-less Starch is that it makes ironing smooth, easy, beautiful. Here again special ironing-aid ingredients do the "work" for you-saving you the pulling and pushing that comes with a "sticky" iron. Your iron goes smoothly alongmakes ironing a joy, not a job.

You want your wash to look clean, fresh and beautifully ironed. So let Faultless Starch help you. You deserve the advantages of Faultless Starch. Start using Fault-less Starch new and you will less Starch now — and you will probably say, as Mrs. Tracy says, "I will use no other starch as long as I can get Faultless Starch." So ask your grocer today for Faultless Starch.—Adv

sters' stomachs are sensitive. Here are some good suggestions: Bologna Filling.

(Makes 15 to 20 sandwiches) 1 pound bologna 1/2 cup chopped pickles or relish 1 cup mayonnaise 1 tablespoon minced onion Dash of tabasco sauce 3 hard-cooked eggs 1/2 teaspoon salt

1 cup ground raw carrots 1/2 cup chopped celery

Grind bologna and mix thorough-

ly with relish, mayonnaise, onion and sauce. Divide in half and to one part add 3 hard-cooked eggs, chopped, and ½ teaspoon salt. To the other hall add the carrots and

celery. Deviled Egg Filling.

4 hard-cooked eggs 1/2 teaspoon salt teaspoon pepper

1/4 teaspoon dry mustard 4 teaspoons vinegar

1 tablespoon chopped parsley 4 tablespoons mayonnaise

Chop the eggs fine. Add other ingredients and mix well. Deviled Cheese Filling.

1/2 pound mild cream cheese 1 small onion 3 canned pimientoes or chopped green or red peppers

3 bard-cooked eggs, chopped 1/4 teaspoon salt 1/2 teaspoon paprika 4 tablespoons mayonnaise

Lynn Says:

Don't Ration Eye Appeal: Foods that look their best usually taste the best, too, because they've been cooked and served properly.

When garnishing daily dinner and luncheon platters, simplicity is the theme. A few freshened carrot tops, lettuce leaves, strips of green pepper or tomato wedges make the difference between the family's liking the food and merey eating it quietly.

Candles, simple flowers or a bowl of fruit add to the table imnensely. They even seem to nake the food more palatable. Serve meat balls and chops on bed of watercress and watch he difference.

Or, cut grapefruit rind into ancy shapes with a cutter and et them against a background f green.

4 tablespoons flour 1 teaspoon salt 1/a teaspoon pepper 2 cups milk

1/2 cup grated American cheese 4 cup chopped green pepper
4 cup chopped pimiento
3 chopped hard-cooked eggs 2 cups cooked spaghetti (1/3 pound

uncooked) Make a white sauce of the butter, flour, salt and pepper. Blend in milk, cheese, pepper and pimiento. Add eggs and spaghetti. Pour into a greased baking dish and bake 35 minutes in a moderate (325-de-gree) oven. Turn onto a hot serving platter and garnish with chopped

stuffed olives or pickles. Simple foods made to look pretty are a big hit at any party and doubly so if the foods are ice

cream and cookies. In this dessert to top off the festivities, a plain cookie forms the ruff of the clown's suit, a ball of ice Quinto cream makes the head with raisin eyes and cherry nose and mouth. An inverted ice

cream cone makes the clown's hat. Ice Cream Clowns. (Serves 6)

6 large cookies 1 quart vanilla ice cream 6 cones

Seedless raisins

Candied or maraschino cherries Arrange cookies on a large plate. In center of each place a ball of ice cream. Top each ice cream ball with an inverted ice cream cone. Decorate each bail with raisin eyes and cherry nose and mouth.

Vegetable Dinner. Remove the leaves from the cault flower and cut off any bruised or dirty spots. Place it, top downward, in a deep bowl of cold salted water and allow it to stay there about half an hour to draw out dust and other impurities. Cook it whole in boiling water, uncovered. Cook 15-25 minutes until tender. Add about 1/2 cup milk to the water in which it is boiled-it will keep the cauliflower white. Lift out the cauliflower carefully and allow it to drain in a warm place. Scrape the two small bunches of

carrots, dice them and add them to briskly boiling water. Salt them and boil them until tender-about 10 12 minutes. Drain and butter.
