ARGENTINA:

Friendly Dispute

INVENTORIES: Hit Hoarding

Hitting at the withholding of merchandise from the market in anticipation of higher prices, Civilian Production administration drew up stringent inventory controls on manufacturers of electrical appliances

At the same time, CPA disclosed that exports may be limited if shippers move out a flood of goods at high prices to badly depleted foreign markets. Restoration of OPA price control would make such a

step unnecessary, it was said. Under CPA regulations, inventories of finished goods would be restricted to 30 days. Included are refrigerators, furniture, washing machines, electric ranges, sewing machines, vacuum cleaners, cam-eras, asphalt and tarred roofing, insect screen cloth and galvanized ware.

Production material and parts also must be held to minimum needs to prevent heavy buying against possible future price in-

PRICE CONTROL:

Union Pressure

While house and senate conferees were striving to work out a com-

promise OPA bill satisfactory to the President, both the AFL and CIO exerted strong pressure for reasonable pricing of consumer goods.

Addressing the Brotherhood of Maintenance Way Employees in

Detroit, Mich., William Green AFL President Wil-

liam Green pledged his organization's support in the battle to save CPA and backed up the union's threat to seek higher wages in the event adequate legislation is not Meanwhile, local leaders of the

CIO-United Automobile Workers rallied their membership for a buyer's strike throughout the country or-dered by UAW Chieftain Walter Reuther. As the drive was to get

underway, Dun & Bradstreet figures JUSTICE: showed that the weekly index of 31 food commodities had soared to \$5.20,

only 1.2 per cent below the \$5.30 peak of 1919. Since expiration of OPA controls, prices had rocketed 19 per cent, it was said.

MINE FOREMEN: Win Pact

Paving the way for recognition of unionization of foremen in coal mines, pending court approval, the 'ederal government signed a con-tract with John L. Lewis' Clerical, Technical and Superwisory Workers covering 146 employees at four biturninous pits of Jones & Laughlin

Steel company in Pennsylvania. In reaching an agreement with Lewis as operator of the mines under seizure orders, the government stipulated that the contract could be voided in the event that a federal court of appeals issued an injunc-tion against the action. Coal operators long have deferred recognition of a foremen's union, asserting that supervisory personnel were

GOOD NEIGHBORS: When Argentina issued a special stamp to honor Franklin D. Roosevelt on the anniversary of his death, she probably never realized the tremendous interest it would arouse or the demand that there would be for it. An active supporter of the philatelic division of the Pan American union, Argentina sent up a few thousand copies for distribution, in fact, she sent twice as many as is customary, but in a few days that amount was exhausted.

POLITICS:

Beat Wheeler

Political observers studied the campaign in the Democratic senatorial primary in Montana for a clue to the cause of defeat of the veteran Burton K. Wheeler, with a variety of reasons appearing to contribute to his downfall.

Since the rugged veteran led the non - interventionist cause before Pearl Harbor, the Japanese attack on the U.S. and the swing of American sentiment toward effective world co-operation were seen to have acted strongly against him. But because of the closeness of his defeat, the CIO-PAC fight against him, the opposition of the powerful railroad brotherhoods and the diversion of the main strength of the Democratic organization to his opponent, Leif Erickson, could have veaned enough votes away from him to spell defeat.

Winding up 24 years of senatorial service, Wheeler said: "... The people of Montana have been very good to me... Those who voted in the Democratic primary have relieved me of a great responsibility and a lot of work. . . . Probably I have lost many supporters because I did not go along blindly with a Democratic administration in the last few years, but I could not sacrifice my principles. . . .

Return Talmadge

Georgia's gubernatorial election shared the national spotlight with Montana's senatorial race, with fiery, red-suspendered Gene Tal-madge making his bid for a fourth term on a platform of "white su-

Despite the fact that his No. 1 opponent, James V. Carmichael, rolled up an impressive popular vote, Talmadge took an early lead in the decisive unit voting in which winners are determined by the number of counties they carry.

Against a background of a U. S. Supreme court decision opening Democratic primaries in the South to Negroes, and another court ruling forbidding segregation on interstate buses, Talmadge conducted a vigorous "white supremacy" campaign. With Georgia's state administration under retiring Gov. Ellis Arnall making no effort to curb the colored vote, more than 100,000 Negroes flocked to the polls, separate booths being set up in some election stations.

Browder Book Salesman

Once head of the Communist party in the U.S. before his deposition because of his advocacy of working relations between the classes instead of rivalry, Earl Browder returned from a six-week visit to Rus-

Earl Browder

sia as official representative of Soviet publishers in this country. Setting himself up in an office in

New York, Browder told reporters he would seek to develop better understanding between the American and Russian people through the exchange of literature. In addition to handling Soviet publications, he will sell U. S. books to the Reds.

shipments to 120 million dollars by POLAND: Protests Election

Vice Premier Stanislaw Mikolajczyk, who returned to Poland after the war to represent the moderates in the Soviet-sponsored provisional government, had his first open tiff with the new regime over the con-

duct of the recent elections. Because of the stringent censorship of the Polish press, Mikolajczyk aired his grievances to foreign correspondents. Exhibiting a thou-sand partially burned and destroyed ballots, which he said had been salvaged from sewers, he charged that numerous such ballots marked against the government-backed proposal for a single legislature had been counted out. Reports from local committees in 12 cities, including Warsaw, showed 85.54 per cent of the people against the proposition, which the government declared carried.

While the election commissioner denied the charges, he admitted that in some places ballots were removed from polling places to other stations for counting, and some provinces had barred members from Mikolajczyk's moderate Peasant party from voting commissions.

CONSTRUCTION:

Expenditures for new private construction during the first half of 1946 reached over 31/4 billion dollars -the highest half-year mark for more than a decade, the depart-

ment of labor reports. Thus in the first half of 1946 private construction was about 31/2 times as large as in the same period last year, and 50 per cent great-er than in 1940, even after allowance is made for the higher level of construction costs it 4946 than in

How to Outbluff a VICIOUS DOG at night!

28

eac

W

Sun

Comdr. Willy Necker, Wheeling, Ill. - noted dog trainer and judge at dog shows...and wartime head of U.S. Coast Guard War Dog Training.

The fact that 999 dogs out of a thousand are friendly, safe and lovable doesn't alter the fact that treatment, neglect or disease - a dog may men

2 Such animals are dangerous. Especially at might! If cornered outdoors, at night, turn on your "Eveready" flashlight! Shine it directly at the dog's eyes, to blind and perhaps bewilder him. He may leap in the light, however, so at the light, however; so don't hold it in front of you. Hold it at arm's length to the side. Most important ...

3 Keep still. It's instinctive with most animals to attack anything that runs away or moves aggressively. If the dog refrains from attacking for a few seconds, you have probably won -but, if not, protect your throat. Use flashlight as a doctor as soon as possible.

EXTRA COST

For bright light, white light, effective light—insist on "Eveready" batteries. Your dealer now has them. Ask for them by name. For "Eveready" batteries have no equals that's why they're the largest-selling flashlight batteries in the world. Yet their extra light, extra life, cost you mothing even! nothing extra!

NATIONAL CARBON COMPANY, INC. 30 East 42nd Street, New York 17, N.Y. सिवन

tor EXTRA POWER, **EXTRA LIFE** -AT NO

More Power

The cutting of land by the plow, the drilling of an oil well in the ground, the use of an axe against an oak—These are the symbols of man's power. That is how the pioneers of this country fought for survival. We have come a long way since then, but we still retain the initiative that built this country-freedom of enterprise.

Now the battle with nature has changed. Business-managed, tax-paying electric companies have turned the surging tide of nature's power into work beneficial to you. Giant turbines convert power to electricity to bring greater convenience, more pleasure and better living to homes everywhere.

CONTROL IS PROBLEM

Congress Battle Rages In Face of Atom Test

'TASK BAKER'-Radio impulses sent out from the USS Cumberland Sound, indicated in top drawing (1) were to detonate the underwater "A" bomb for the "Task Baker," second of the Bikini experiments. The bomb was suspended from a special barge (2). As indicated by the arrows (3) a number of "drone" ships were directed into the lagoon to test the effects of radio-activated water.

By WALTER A. SHEAD

WNU Washington Correspondent. HONOLULU. OPERATIONS! CROSSROAD. - While army and officials in charge of Joint Task Force 1 at the Bikini atomic bomb tests are interested in the squabble now going on in the congress as between civilian and military control of atomic energy, their single interest here is to complete successfully the important experiments on the possible damage which an atom bomb can do to a fleet at sea.

In the meantime, Adm. W. H. P. Blandy, commander of Operations Crossroads, has intimated that weather conditions may force a week's delay in the underwater test in Bikini lagoon scheduled for July 25, which would make "Baker-day" Aug. 1 or thereabouts. As has been pointed out, the weather for this second test need not be as perfect as for the first test when the bomb was dropped from a B-29, but it must be clear enough for aerial observation and photography.

The press ship USS Appalachian has completed her trip to Fearl Harbor for minor repairs and now is anchored with the rest of the maintenance fleet in Bikini lagoon, ready to pull out and cruise outside to the seaward side of the island when the time is ripe for the second

Few Remain. Only approximately 23 correspondents are left aboard the ship, since most of them returned to the States immediately after the first

The pattern for the underwater test has been completed with the battleship Arkansas, which was barely blistered by the first test, and the carrier Saratoga, also undamaged as a result of the first bomb, almost equidistant and nearest to the proposed bomb burst.

A little to the east are the battleship New York and the cruiser Salt Lake City. Both suffered negligible damage in the first blast. Then to the west of the two center ships are the cruiser Pensacola and the carrier Independence. The old Independence is merely a hulk in the water with her insides torn out and her topsides blasted away as result of the bomb and her own internal explosions. The Pensacola is undamaged below decks, but her superstructure is pretty well battered up as a result of the first tests, with both stacks blown away.

Farther out in the circle are the battleships Pennsylvania and Nevada, the Jap ship Nagato and the German pocket battleship Prinz Eugen. Just forward of the Arkansas and the Saratoga are several submarines which are submerged at various depths with the doublehulled Pilotfish almost as close to the center of the burst as the Arkansas. Lighter ships make up the balance of the target array.

Opinions Vary.
The effect of the bomb on these submarines is awaited with interest and in the meantime the discussion goes on as between those who predict this underwater blast will sink several capital ships including the the damage will be negligible.

Oceanographers, who have made such elaborate plans to measure effects of the bomb, will come into their own on this second test. There was little for them to measure as result of the first test since the bomb made no appreciable waves and did no damage to the ocean bed, beaches or the island.

However, this second test is ex-pected to create high waves in the agoon, anywhere from 10 feet up. There are 81 officers and men in this section of the task force, most of whom have been in the vicinity of Bikini since last March recording data on the physical oceanography, biology, geology and fisheries of the atoll and surrounding waters.

Measurements of wave motion in terms of time, height and distance, their effect on the sea bottom and on the beaches fall into three classes—supersonic echo sounding devices, and aerial and surface photography, plus maximum water height recorders on Bikini island and water level meters on several other islands of the atoll.

There are supersonic echo sound ers or fathometers on 16 ships in the target array which will record large waves through the rise and fall of the ships, while 11 supersonic echo sounders on buoys will record passage of shorter waves. Mechanical pressure recorders laid 500 yards apart on the bottom of the lagoon are capable of recording wave height in range from 4 to 200 feet.

Animals Still Dying.

The after-effects of this radio activity is impressive as seen from the effects on the live animals placed aboard the ships, some of which still are dying despite treat-ment, three weeks after they were exposed to the first bomb

As the first task force awaits on the eve of this second test one cannot help but conjecture upon the possible effects of this unpredictable and still unknown terrific nuclear force which can decimate entire cities and depopulate nations as has been amply demonstrated at Hiroshima and Nagasaki.

The first test proved beyond any doubt that the bomb was not as effective in the open space at sea as it is when detonated over heavily-populated areas on land . . that used against naval bases on land it could render a fleet at sea impotent, but that it would put out of commission a good many ships if they were in close formation and that loss of life aboard these ships would be terrific.

What effect this atomic energy will have on the future of the American navy as to ship construction and operation now, however, lies in the laps of the military evaluation board and the President's atomic energy commission, both of which are making a study for future guidance.

We can only hope that medical scientists and other scientists here for observation will glean from peace-time application which can bring benefits, and not destruction, submarines, and those who declare from this new war-born source of energy.

'Eccentric' Bomb Explains Wide Miss

Over on Kwajalein where the army air force section of the task force is holding forth, Maj. Gen. William E. Kepner, deputy commander for air, still is seeking to find an answer to the questions of reporters as to why Major Swan-court and his crew missed the New home was an "eccentric" and that fice boy at night. He was a combat pilot-captain, much decorated for more than 150 missions. He goes to school during the day. . . Boobyhatch inmates no longer think they are Napoleon. According to N. Y. state medicos, they think they are J. E. Hoover or MacArthur,

William E. Kepner, deputy commander for air, still is seeking to find an answer to the questions of reporters as to why Major Swan-cutt and his crew missed the Nevada or bulls-eye of the first test by something like 2,500 feet. This state medicos, they think they are J. E. Hoover or MacArthur, was that far, since my calculations a fall true.
