## Drive Safely!

We wish to pass this thought on to you, it might Save Your Life. The Texas Safety Association says that the greatest cause of accidents on the highways of our state today is Speed. Speed is the primary cause of one out of every three fatal motor vehicle accidents. Ask yourself this question: "Is it worth the few seconds of time which you gain by speeding, to risk your life and the lives of others in the car with you?" We say that it is not. Drive Carefully. The Life You Save May Be Your Own.

With 85 members paid up for 1951 the local Legion Post is still 6 members behind their quota of 91. This is the first time in years the post has been behind its quota at this time of the year. If you haven't paid your 1951 dues, do so at once, don't wait until somebody has to take time off from their work and hunt you up.

Some things to remember coming up soon are the American Legion's birthday March 15th and the District Legion Convention at Borger April 14 and 15. We need a strong local membership to give us a good voting strength at the convention.

## Boy Scout News

At this week's scout meeting the meeting time was changed to 7:30 p. m. Scouts who have not paid their dues are urged to have them in at this meeting or they will be delayed in getting their cards, badges and neckerchiefs.

In the receiving line at the door to greet the guests, were Mrs. M. L. Sims, the honoree Mrs. Caison and her mother Mrs. Miller. Near by was the register which was presided over by Mrs. Jessie Beach.

On entering the reception room the guests were invited to the tea table, which was most attractive with its outwork linen cloth and centered with red carnations arranged in a low silver bowl. The beautiful silver coffee service was presided over by Mrs. L. D. Messer and Mrs. John Nash served the cake. Music during the tea hour was piano numbers rendered by Miss Nancy Nash.

At the conclusion of the tea hour a short program was enjoyed consisting of appropriate poems by Mrs. W. C. Quisenberry, duet by Jane Mosley and Anabel Bailey accompanied by Mrs. Mike Thornberry. After these the honoree was invited to pluck cherries from a cleverly made cherry tree, and as she plucked cherries, young ladies from Mrs. Sims' Sunday school class entered with gifts which they gave her in exchange for cherries from the tree. After opening and displaying the gifts Mrs. Caison spoke well chosen words of thanks.

Around fifty guests were present and several who could not be present sent gifts, expressing their best wishes to the couple.

## POWER that's EASY TO MANAGE

...the new

# FERGUSON TRACTOR

**THE FUEL IT SAVES IS LIKE INCOME**  
Built for long, hard service at low cost. Aluminum alloy pistons; "wet" sleeves, fully water-lubricated; full pressure lubrication. Fuel savings at every turn.

Plenty of power, sure—but power that's properly controlled... so easily managed that no great physical strength or effort is ever required... and without any excess built-in tractor weight to make operation cumbersome, tedious, expensive.

The powerful New Ferguson Tractor's ease of control in all-around farm service is obtained as one of the many working advantages of the Ferguson System, the 3-point Implement Linkage and Hydraulic Control, both Finger Tip and Automatic, which so greatly simplifies the raising and lowering, or changing adjustment of implements, as well as maintaining soil depth in operation. Traction is increased as the pull requires. Steering control is positive, easy, under varying soil conditions with the different implements.

Power output, which the Ferguson System so fully utilizes for convenience and economy, is supplied by Continental Valve-in-Head Engine—the sturdy type "power plant" known for dependability in tough farm duty over the years.

Power properly managed is the power-principle of the New Ferguson. Whether you judge a tractor by how easy it makes your work, how time saved, or by how much it lowers your cost of production, ask for your demonstration now. See what the New Ferguson will do for you.

## MORE and BETTER COTTON

SEED TREATMENT helps turn thin stands... into thriving yields

As a cotton planter, you can expect four-way benefits from one simple operation you can perform on your own farm, or have done for you. It consists of planting seed that has been treated with an organic mercury dust. Its results include:

- Control of most of the seed rot or decay that reduces your stands before the seeds can sprout.
- Control of seedling blight caused by bacteria in your soil or seeds that attack the tender seedlings.
- Control of anthracnose or pink boll disease, another germ-caused ailment that results in smaller crops of poor-grade, spotty cotton.
- Control of bacterial blight or angular leaf spot that kills your cotton plants or stunts their growth.

Experiment Station figures show yield increases of 5% to 40% as a result of seed treatment. This means up to \$12 per acre added to your income. Cost of the chemical amounts to less than 10¢ per acre.

Those who recommend seed treatment stress the fact it should be correctly used—applied to the seed according to directions, and in the right amounts. The cotton planter has too much at stake, they say, to risk cutting corners on the use of less than recommended amounts, or skipping any steps of the fairly simple seed-treating process.

The treatment can be done by many ginners and delinters. Ask your County Agent about the value of seed treatment and where you can get this service in this vicinity.
