In the Gas Business, too

### IT TAKES MANY SOURCES OF SUPPLY

More than two hundred fields in Texas, Louisiana, Mississippi and Oklahoma supply the gas that moves through United's pipe lines. These many sources of supply not only assure dependable service for household and industrial uses today, but will provide a continuing supply for years to come in the more than 400 communities served by United Gas.

But our job doesn't stop there. We are looking to the future—to furnish natural

gas wherever it is economically feasible to an ever-growing population, to additional cities and towns and to new industries locating in the Gulf South.

That's why we are continually seeking out and developing new sources of supply—to be sure there's natural gas available for new homes and industries built along the United Gas system this year—and in the years to come.

THERE'S PLENTY FOR YOU AND INDUSTRY, TOO
