Defensive Driving

The following is suggested by the Dept. of Public Safety:

Defensive driving is the ability to recognize an accident producing situation far enough in advance to compensate for it by your own driving. In other words, drive ahead of yourself and be prepared for the other man's actions

One of the greatest faults of the American driver today is hiding

behind the false security of having the right of way. Give the right of way, don't take it, and you will greatly assist in the reduction of traffic accidents.

Epitaph:

Here lies the remains of John O. Day

Who died defending his right of way,

Now John was right as he sped along

But he's just as dead as if he'd been wrong.

News From Our County Agent

Now is the time for all cotton farmers to begin to watch their young cotton for thrips, fleahoppers and the possibility of boll weevils just beginning to move in from pastures into the young cotton. County agent Flip Breedlove says that regular checking of cotton fields can prevent a great deal of damage by insects before they get started. Cotton spraying guides for all types of insecticides are available at the county agents office. Anyone needing any information on insect control can drop by the agent's office. All types of insecticides are available at your local dealers in Clarendon and Hedley.

TWICE AS MUCH COOLING

With the patented features of Paramount Coolers

Yes! This famous Paramount 5000 c.f.m. evaporative cooler gives you up to twice as much cooling because of these patented features:

— Many coolers lose as much as 70% of cooling efficiency because dust, dirt and salts clog the filters. Patented No-Clog Sta-Fresh Filters are guaranteed clog-proof, assuring 100% cooling efficiency all summer long.

— Filters saturated with water become heavy and often sag and settle from the top, drawing hot, unfiltered, uncooled air into the cooler which may create as much as a 70% cooling loss. Patented Grip-Lock Filter Holders are guaranteed to prevent sagging and settling of filters assuring 100% cool, clean, filtered air.

— Without correct water trough adjustment, sections of the filters remain dry, resulting in substantial cooling loss and costly service expense. Patented Free-Flo Visible Water Troughs with external adjustment assure 100% saturation, and 100% cooling for the entire life of the cooler.

— Added feature — Patented Window Closing Attachment lets you close and lock your window. Eliminates entry of dust, rain and drafts into your home.
