Cherry Radio & TV

Beginning Nov 1, 1962 most of the acreage diverted under the 1962 Feed Grain and Wheat Stabil. program will be released from program restrictions on grazing.

Diverted acreage on which grain or oilseed crops have matured in 1962, must not be grazed.

1963 Cotton Acreage Allotment Reduction

I am sure that you have already heard on the newscast where there will be a sizeable reduction in the cotton acreage allotment for 1963. We have not received an official notice to this effect but are of the opinion that the 1963 cotton allotments will be somewhat smaller than in the past year.

Soil Bank Program

Farms that have CR land that will expire at the end of 1962, may sign an agreement to extend this acreage for one year if they desire

to do so. All the land on the farm with respect to which the conservation reserve contract expires on Dec. 31, 1962 is eligible except:

1 Land determined by the County Committee to be in such physical condition that it will not return to crop production in the absence of this program

2. Land for which the ownership has changed since Dec. 31, 1960. We urge you to contact this office as soon as you can so that we can explain the payment and answer any questions and complete an agreement.

1963 Marketing Quota Referenda

The referenda on the 1963 cotton crop will be held Dec. 11, 1962. In recent years the number of cotton producers voting in referenda has been trending downward. Wives of eligible voters are also eligible to vote in the referenda. You will be receiving information in the near future explaining the importance of the cotton referendum. Mark your calendar now, so you and your wife will not forget to vote.

3 A.M. in a pharmacy...

It is 3 A.M. in a community pharmacy. The street is in darkness, yet lights are on in the pharmacy. Why? Because the pharmacist is faced with an emergency.

He received an urgent telephone call at 2:50 A.M. Mrs. Saxon, a sufferer from asthma, was having severe difficulty in breathing. Her husband told the pharmacist that she had run out of the medicine prescribed by her physician.

The pharmacist dressed quickly, rushed to his store, located the original prescription in his files, telephoned to Mrs. Saxon's physician, prepared and delivered the medication. Soon, Mrs. Saxon was breathing normally again, and a possible tragedy had been averted.

Such crises are frequent, yet your pharmacist meets them with speed and confidence as part of his complex professional duties. Today, a pharmacist goes to college for five years, spends many hundreds of hours in apprenticeship, and must pass a rigorous

state examination before he is licensed. He must stock thousands of dollars worth of health products you need every day—as well as those you may need only once in a lifetime.

It was not by chance that the pharmacist had the proper drug ready for Mrs. Saxon when she needed it. We call the complex process by which a drug moves from manufacturer to patient "the miracle of drug distribution."

The teamwork of manufacturer, drug wholesaler and pharmacist assures that you—as well as Mrs. Saxon—will always receive the medicine you need. This miracle of drug distribution—the fact that the medicine you need is ready when you need it—is just one reason why prescriptions are today's best bargains.
