HEDLEY LUMBER COMPANY

This 4-H Operator Uses:

- SAFETY RULES
- DRIVING SKILLS
- MECHANICAL KNOW-HOW

The 4-H Tractor program has trained well over a million youths to drive safely, handle the big machines and keep them in working order year around. The project is planned and supervised by the Cooperative Extension Service. In this state and five others, educational aids and awards are provided by the Humble Oil & Refining Company.

With today's big investments in farm equipment, it is vital that tractors are adequately maintained and put to maximum use, points out 4-H Club leaders. A breakdown could mean financial loss on crops.

There is always plenty to do in this project, even for the beginner. The program is divided into four sections. The first year participation acquaints the member with the tractor and safe rules for operation.

Second year members learn to operate the tractor and what it takes to keep it going. Care of battery, spark plugs, cooling system and tires is taught. Operating costs, including fuel and lubrication also are studied.

"Improving Your Skills" is the title of the third unit. This emphasizes highway safety, power take-off, brakes, power transmission, winter care and ownership costs.

The fourth year and advanced unit goes into detail on machinery care such as servicing and maintaining tillage tools, planters, harvesters and sprayers. By the time 4-H'ers have completed the fourth year, they usually have assumed responsibility for not only the farm tractors, but other machinery as well.

Over the years thousands of young 4-H farmers have been recognized in various ways for doing a superior job. The program sponsor this year again will provide an expense-paid trip to the National 4-H Club Congress in Chicago for the state winner. College scholarships worth \$500 each will be awarded to the top 12 members across the nation. They will be designated by the Extension Service.
