Move To Save Prairie Chicken
 Contributions are being requested to help make a down payment on about 3,600 acres of land near Eagle Lake in Colorado County as a refuge for the Attwater prairie chicken. There are about 1,335 of these prairie chickens left, about 400 of them on the proposed refuge. The birds once numbered a million or more.

The Texas Prairie Chicken Committee has an option on the land for the proposed refuge, but the option expires Feb. 18. About \$20,000 has been raised for the project, but \$50,000 more is needed by Feb. 18 to complete the down payment.
 Donations from one dollar up will be accepted. They should be mailed to the Texas Prairie Chicken Committee, P. O. Box 52341, Houston, Texas 77052.

Farm Facts

A Texas farmer, Lyndol C. Barker of Dell City, not only has produced eight bales of cotton per acre but has averaged 6.92 bales per acre over a five-year period on 10.4 acres.

Time was when a cotton farmer thought he was going great if he could grow a bale to the acre. Standard weight of a bale of lint cotton, not counting its wrappings, is 478 pounds. The average yield across the Cotton Belt rose from 254 pounds in 1945 to 448 pounds in 1960.

Dell City is 90 miles east of El Paso in the center of an irrigated cotton-growing area where the average yield is more than two bales per acre.

Barker says there's no secret to making high yields. He just gives the cotton maximum water, fertilizer, and care.

Of Barker's 250 acres, about 130 are in cultivation. He grows cotton, cantaloupes, tomatoes, carrots, and other crops, and believes in diversification and soil care.

His land is flat, mostly sandy loam, and he rotates so that cotton is grown on the

same plot only one year out of four.

Barker's achievement points up the efficiency of the U. S. farmer. The record of U. S. farms is unmatched anywhere and is a key to our high living standards.
