## Grazing Associations Help Farmers Develop Income

Farmers and cattlemen are acquiring needed land resources by forming grazing associations and obtaining financial assistance from the Farmers Home Administration, the agency's Donley County Supervisor, Claude Moore, said this week.

A grazing association is composed of a group of family farmers and ranchers who join together to acquire and develop land to provide seasonal grazing for livestock belonging to its members. The nonprofit association is owned, operated and managed by its members.

Small farmers, Mr. Moore said, can increase their incomes, make better use of land and water resources and develop larger equity in land through use of a grazing association.

Other advantages include providing opportunities to improve livestock quality, gain bargaining power in the marketplace, build more stable operations and strengthen the rural community.

Eligible to form associations are neighboring farmers and ranchers who operate family size units.

Loans are available to qualified borrowers for periods up to 40 years at an interest rate of 5 percent. Information and applications may be obtained from the Donley County Farmers Home Administration office at the Agriculture Building in Clarendon. The telephone number is 874-3431.

## Greenbelt Dam

Clifford Johnson, local director attended the board meeting of the Authority at Memphis last Thursday night. The towns of Clarendon, Hedley, Memphis, Childress, Quanah, Acme and Crowell are now using water from Greenbelt Lake.

The date set for the opening of the lake for fishing was set for May 29, 1968. There were 240,000 large mouth black bass fry put in the lake last spring. This will give them plenty of time to spawn. During April and May of last year 150,000 northern pike fry were put into the lake. These fish are nearing two feet in length now. All indications now are that they

## What this man started...

### ... Benefits all mankind today

Thomas Alva Edison in his lifetime — even after 1097 inventions — never could have imagined the many jobs flameless electricity does today.

In your home alone, 166 electrical appliances are available to save time, reduce work, and do a better job faster and more economically.

The average American family has nearly doubled its use of electricity in the past 10 years. And at such a low cost, it is today's biggest bargain in your budget.

Here at WTU we keep pace with the increasing use of electricity in industry, in business and in the home. It's a way of life with us, for we know that electricity powers progress.
