New Vaccination Laws

Senate Bill 27, amending section 2.09 of the Texas Education Code, was signed into law by Governor Preston Smith on April 26. This law is now in effect and requires that all children entering Texas elementary or secondary schools or institutions of higher education must have been immunized against six diseases: diphtheria, tetanus, poliomyelitis, measles, rubella, and smallpox. The law states that "the State Department of Health shall provide the required immunizations to children in areas where no local provision exists to provide these services."

Senate Bill 971, an amendment to Senate Bill 27, has become law. It enables the State Board of Health to modify or delete any of the six required immunizations, and allows the provisional admittance of students if the required immunizations have been begun and are continued to be received "as rapidly as is medically feasible," and requires the State Department of Health to promulgate rules and regulations relating to the provisional admission of per-

sons to an elementary or secondary school or institution of higher education."

All students will be allowed to enter their respective school systems during the Summer and Fall 1971 terms, with the provision that their immunizations against at least one of the aforementioned diseases will have been started by January 1, 1972, and all completed as soon as medically feasible.

If you want to get a little bit out of your country... put a little bit into it.

Join the Peace Corps. Get into community service. Run for public office. But maybe you're too

busy to do any of the above.

Then why not buy U.S. Savings Bonds, just as a starter?

It's the easiest way to do a little something for your country while your country's doing a little something for you.

Somebody cared.

Be somebody.

Hunger hurts children most, in body and mind; kills from diseases a well-nourished child can withstand. When you join CARE's Food Crusade, your help goes to children first, in countries beset by hunger.

Every dollar sends a food package to do a multitude of good. You help feed millions of boys and girls every day at preschool centers and schools, so they can grow into healthy, educated, self-supporting adults. You provide meals at home in food-for-work projects to help parents build community resources. You rescue families in war and disaster areas, and help them rebuild their lives.

With your money, CARE delivers U.S. donations of farm abundance or buys other needed foods. Local governments share operating costs. \$1 can help feed a child for 3 months... \$10 serves lunch to 900 children... \$100 sends over a ton of food. Mail your check.

There's a future in it for someone.

Your son's education for instance. But by the time he's ready for college his education may well cost a small fortune. The kind you just don't have lying around under a bed. That's just the reason why your government has a great thing going. A U.S. Savings Bond. In themselves they're not a quick buck. They won't make you that fortune overnight. But in the long run they do pay off. Darn well at that. And at a guaranteed rate. Starting a savings plan is easy. You can join a Payroll Savings Plan where you work. Or get into a Bond-A-Month Plan where you bank. Then watch someone's future grow. Like your son's.
