COTTON YIELDS DECLINING — Cotton yields have been declining just when cotton is showing a resurgence in the market. This has prompted a Beltwide campaign, spearheaded by the U. S. Department of Agriculture, National Cotton Council, and state Extension services, to obtain "Better Yields of Quality Cotton for Profit and Market Growth." Crops have been below normal for four out of the past five seasons. Across the Cotton Belt, yield per acre averaged 438 pounds in 1961. It rose to a record 527 pounds in 1965 but by 1971 was back down to 438 pounds, the same as 1961.

Aunt Sarah, I love you.

Remember my 10th birthday, when you gave me that funny piece of green paper and everybody made such a fuss over it. (Except me.) Frankly, it was a pretty disappointing present for a kid. I couldn't eat it, couldn't play with it, couldn't wear it—and Mom took it away from me practically the minute I got it.

And every birthday after that (and Christmas, too), you gave me another one of those *Bonds*, you called them. I thought you were pretty gooney.

At least, I never had to guess what I was going to get from good old reliable Aunt Sarah.

And what I got was good old reliable U.S. Savings Bonds.

What I didn't realize then was that you gave me a gift of security for the future. Thanks to you and those Bonds, I had extra funds for college. And they helped when I bought my first new car.

Next week, I'm giving my nephew, Harry, his first U.S. Savings Bond. I know the kid is gonna think I'm some kind of nut. But, someday...

Bonds are safe. If lost, stolen, or destroyed, we replace them. When needed, they can be cashed at your bank. Tax may be deferred until redemption. And always remember, Bonds are a proud way to save.

Take stock in America.
Now Bonds pay a bonus at maturity.
