# Are you going to live longer than your money?

Maybe you're having a pretty good life now. Your credit is good, you've got a few nice clothes and a good dependable car. And if you're lucky, maybe you own your own home. But that's because you're working. What happens when you retire? You can't live on memories. It's still going to take money. Lots of money. Money that you should be saving now.

And one of the easiest ways to start putting away a few dollars for those retirement years is by joining the Payroll Savings Plan where you work and buying U.S. Savings Bonds.

That way every time you earn a little money for today, you save a little for tomorrow.

Then when the time finally comes to retire, you'll have something put away to retire to.

Now U.S. Bonds pay 7 1/2% interest when held to maturity of 1 year, 10 months at the time you buy. Bonds are replaced if lost, stolen, or damaged. When needed they can be cashed at your bank. Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.

**Take stock in America.  
Buy U.S. Savings Bonds.**

**WHAT YOU SHOULD KNOW ABOUT YOUR PRESCRIPTION:**

What it is...and what it isn't

Your prescription is an order for a specific medication, for a specific individual, for a specific time. It is originated by your doctor and filled by your Registered Pharmacist. Today's prescription consists of eight specific and essential parts:

1. Date—included to verify the medicine is applicable to a current illness.
2. Name and address—so that none but the patient may use the prescription.
3. Superscription—"Rx"... the symbol generally believed derived from the Latin "recipe" meaning "take thou."
4. Inscription—the name and quantity of each ingredient prescribed.
5. Subscription—directions to the pharmacist explaining dosage, form and quantity of the pharmaceutical.
6. Signatura—directions to the patient on quantity, timing and method of taking the prescription.
7. Refill information—for use by the pharmacist to facilitate service to the patient.
8. Signature—of the prescribing physician to verify the order.

Your prescription obviously is more than phrases written on a piece of paper. It represents a life-giving force which enables us all to live longer, healthier, happier lives.

# Aunt Sarah, I love you.

Remember my 10th birthday, when you gave me that funny piece of green paper and everybody made such a fuss over it. (Except me.) Frankly, it was a pretty disappointing present for a kid. I couldn't eat it, couldn't play with it, couldn't wear it—and Mom took it away from me practically the minute I got it.

And every birthday after that (and Christmas, too), you gave me another one of those Bonds, you called them. I thought you were pretty gooney.

At least, I never had to guess what I was going to get from good old reliable Aunt Sarah.

And what I got was good old reliable U.S. Savings Bonds.

What I didn't realize then was that you gave me a gift of security for the future. Thanks to you and those Bonds, I had extra funds for college. And they helped when I bought my first new car.

Next week, I'm giving my nephew, Harry, his first U.S. Savings Bond. I know the kid is gonna think I'm some kind of nut. But, someday...

Bonds are safe. If lost, stolen, or destroyed, we replace them. When needed, they can be cashed at your bank. Tax may be deferred until redemption. And always remember, Bonds are a proud way to save.

**Take stock in America.**  
Now Bonds pay a bonus at maturity.
