Storm Warning

Since the tornado season is with us again, it is time to remind everyone of the signals sounded by the fire siren. One blast of the siren indicates a fire, two blasts are to call the department together, and three blasts indicate a storm.

Three blasts do not necessarily indicate that a tornado has been sighted, but they do mean that everyone should watch the clouds and take whatever action seems to be necessary.

WHAT YOU SHOULD KNOW ABOUT YOUR PRESCRIPTION:

What it is...and what it isn't

Your prescription is an order for a specific medication, for a specific individual, for a specific time. It is originated by your doctor and filled by your Registered Pharmacist. Today's prescription consists of eight specific and essential parts:

1. Date—included to verify the medicine is applicable to a current illness.
2. Name and address—so that none but the patient may use the prescription.
3. Superscription—"Rx"...the symbol generally believed derived from the Latin "recipe" meaning "take thou."
4. Inscription—the name and quantity of each ingredient prescribed.
5. Subscription—directions to the pharmacist explaining dosage, form and quantity of the pharmaceutical.
6. Signatura—directions to the patient on quantity, timing and method of taking the prescription.
7. Refill information—for use by the pharmacist to facilitate service to the patient.
8. Signature—of the prescribing physician to verify the order.

Your prescription obviously is more than phrases written on a piece of paper. It represents a life-giving force which enables us all to live longer, healthier, happier lives.

For the highest pharmaceutical standards, low prices consistent with quality and the personal attention you can always depend upon, bring your prescriptions to

They laughed when I bought my first Bond.

In my neighborhood everyone was poor. Most of us were lucky if we had enough food to eat or clothes to wear. So like most kids we spent a lot of time talking about the things we wanted out of life. Things like owning a big car, wearing fine clothes and going to all of the best places. Boy, we could hardly wait to grow up.

Like the other kids I had little odd jobs in grammar school but I got my first real job when I started high school. I was a junior clerk in a big department store. That's where I first heard about U.S. Savings Bonds. My boss asked me if I wanted to join the Payroll Savings Plan and I said yes. A month later I got my first bond.

When my friends found out they really had a good laugh. Imagine buying U.S. Savings Bonds when there were so many other great things to buy. Well, they kept laughing and I kept saving all through high school.

After graduation some of us wanted to go to college. And that's when my Bonds really came in handy. They not only helped pay my tuition, but also helped buy some books.

Well, I'm a senior now and looking forward to graduation. Unfortunately, a lot of my friends never even got started. And to think, they laughed when I bought my first Bond.

Now E Bonds pay 5 1/4% interest when held to maturity of 5 years, 10 months (4% the first year). Bonds are replaced if lost, stolen, or destroyed. When needed they can be cashed at your bank. Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.

Your son's education for instance.
But by the time he's ready for college his education may well cost a small fortune.
The kind you just don't have lying around under a bed.
That's just the reason why your government has a great thing going. A U.S. Savings Bond.
In themselves they're not a quick buck. They won't make you that fortune overnight. But in the long run they do pay off. Darn well at that. And at a guaranteed rate. Starting a savings plan is easy. You can join a Payroll Savings Plan where you work. Or get into a Bond-A-Month Plan where you bank.
Then watch someone's future grow. Like your son's.
