Reddy's consumer tips on lighting

Edison's light bulb has come a long way since it first lit up the night in 1879; today, lighting is such a natural part of our lives we hardly give it a thought. But the fact is, the more choice we have in how we can use light, the more attention we should pay to how we buy and use light bulbs and lighting fixtures. Put a little more light in your life by following Reddy's money-saving, energy-conserving lighting tips:

CARE FOR LIGHTING EQUIPMENT

Dust and dirt alone cause substantial losses in the amount of light produced. Systematic cleaning is important. Clean lamp bulbs (when they are cool) with a damp cloth.

Check frequently for defective cords or plugs. Replace or repair them immediately if they are faulty.

LESS IS MORE

Generally, you'll get more light for your money if you use the least amount of bulbs that give the light you need. For instance, one 100-watt bulb gives more light than three 40-watt bulbs—and costs about one-third less to buy and replace.

READ THE LABEL

Speaking of "lumens," you'll find that all light bulbs have three ratings on their packaging. Lumens tell you what the light output or performance of the bulb is. "Watts" tell you how much electricity is needed to produce that light, and "bulb life" is the estimated length of time it will take the filament inside the bulb to burn out. When brightness is more important than bulb life—for reading, studying or working—choose the "standard" life bulb that gives you the most lumens for its wattage.

Remember, Reddy supplies the energy, but only you can use it wisely!

New higher interest rate on U.S. Savings Bonds.

Now U.S. Savings Bonds pay 6% interest when held to maturity.

Here's how it works: The higher interest rate applies to all new Bonds purchased since December 1, 1973, raising their rate from 5½% to 6% when held to maturity. And the maturity period on Series E Bonds is shorter, too. Now E Bonds mature in 5 years, with a first-year rate of 4½%.

Series H Bonds, with a 10-year maturity, will earn 5% the first year; 5.8% for the next four years; and 6½% for the last five years. This gives you an average 6% yield over the 10-year period.

It works for Bonds you now hold, too. There's no reason to redeem your older Bonds to buy new ones.

Their yield has improved, too.

All outstanding E Bonds will receive a ½% increase in yield for each semiannual interest period beginning on or after December 1, 1973, payable upon redemption. This also applies to any Freedom Shares you may still hold.

All outstanding H Bonds will receive a ½% yield increase for each semiannual interest period beginning on or after December 1, 1973. This is payable in the form of increased semiannual interest payments.

It all works to your advantage. Now, more than ever,

it makes sense to buy higher-paying U.S. Savings Bonds and hold them to maturity or beyond.

18 Year Olds Must Still Register

John Rankin, Chairman of Local Board No. 52, advises all young men that, although inductions into the Armed Forces have ended, they still must register with Selective Service at the age of 18.

A young man may register 30 days before or 30 days after his 18th birthday—but he must register. Failure to do so makes the young man liable to an extreme penalty of five years in prison and \$10,000 fine.

Mr. Rankin urges young men to keep their records clean by timely registration with Selective Service, and added, "If a young man has reached the age of 18 and has not yet registered he should do so as soon as possible."

Local Board No 52 serves Gray, Wheeler, Roberts and Donley counties and is located in the Post Office Building, 120 E. Foster, Pampa, Texas. Registrars are located in the Courthouse in Wheeler, Roberts and Donley counties and in the Post Office buildings for convenience.
