There's a future in it for someone.

Your son's education for instance.
But by the time he's ready for college his education may well cost a small fortune.
The kind you just don't have lying around under a bed.
That's just the reason why your government has a great thing going. A U.S. Savings Bond.
In themselves they're not a quick buck. They won't make you that fortune overnight. But in the long run they do pay off. Darn well at that. And at a guaranteed rate.
Starting a savings plan is easy.
You can join a Payroll Savings Plan where you work. Or get into a Bond-A-Month Plan where you bank.
Then watch someone's future grow. Like your son's.

Are you going to live longer than your money?

Maybe you're having a pretty good life now. Your credit is good, you've got a few nice clothes and a good dependable car. And if you're lucky, maybe you own your own home. But that's because you're working. What happens when you retire? You can't live on memories. It's still going to take money. Lots of money. Money that you should be saving now.

And one of the easiest ways to start putting away a few dollars for those retirement years is by joining the Payroll Savings Plan where you work and buying U.S. Savings Bonds.

That way every time you earn a little money for today, you save a little for tomorrow.

Then when the time finally comes to retire, you'll have something put away to retire to.

Now U.S. Bonds pay 9 1/2% interest when held to maturity of 5 years, 10 months 14% the first year. Bonds are replaced if lost, stolen, or destroyed. When needed they can be cashed at your bank. Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.

New higher interest rate on U.S. Savings Bonds.

Now U.S. Savings Bonds pay 6% interest when held to maturity.

Here's how it works: The higher interest rate applies to all new Bonds purchased since December 1, 1973, raising their rate from 5½% to 6% when held to maturity. And the maturity period on Series E Bonds is shorter, too. Now E Bonds mature in 5 years, with a first-year rate of 4½%.

Series H Bonds, with a 10-year maturity, will earn 5% the first year; 5.8% for the next four years; and 6½% for the last five years. This gives you an average 6% yield over the 10-year period.

It works for Bonds you now hold, too. There's no reason to redeem your older Bonds to buy new ones.

Their yield has improved, too.

All outstanding E Bonds will receive a ½% increase in yield for each semiannual interest period beginning on or after December 1, 1973, payable upon redemption. This also applies to any Freedom Shares you may still hold.

All outstanding H Bonds will receive a ½% yield increase for each semiannual interest period beginning on or after December 1, 1973. This is payable in the form of increased semiannual interest payments.

It all works to your advantage. Now, more than ever,

it makes sense to buy higher-paying U.S. Savings Bonds and hold them to maturity or beyond.

Sign up now to buy Bonds through the Payroll Savings Plan where you work, or buy them where you bank.
