Are you going to live longer than your money?

Maybe you're having a pretty good life now. Your credit is good, you've got a few nice clothes and a good dependable car. And if you're lucky, maybe you own your own home. But that's because you're working. What happens when you retire? You can't live on memories. It's still going to take money. Lots of money. Money that you should be saving now.

And one of the easiest ways to start putting away a few dollars for those retirement years is by joining the Payroll Savings Plan where you work and buying U.S. Savings Bonds.

That way every time you earn a little money for today, you save a little for tomorrow.

Then when the time finally comes to retire, you'll have something put away to retire to.

Now it earns you 7 1/2% interest when held for maturity of 6 years. 10 months 14% the first year. Bonds are replaced if lost, stolen, or destroyed. When needed they can be cashed at your bank. Interest is not added to state or local income taxes, and federal tax may be deferred until redemption.

Take stock in America.

Storm Warning

Since the tornado season is with us again, it is time to remind everyone of the signals sounded by the fire siren. One blast of the siren indicates a fire, two blasts are to call the department together, and three blasts indicate a storm.

Three blasts do not necessarily indicate that a tornado has been sighted, but they do mean that everyone should watch the clouds and take whatever action seems to be necessary.
