3rd & 4th Project

After using my executive power to veto spending our \$25 float prize money for show tickets, the 3rd and 4th voted to place this money in a school second piano fund. To make this fund grow without financial burdens to anyone, we have received administrative go ahead on a Beer Can Salvage Project. As the children and I see it this project will be constructive in three ways:

1. We will be cleaning up our streets and byways
2. We will be ecologically wise by recycling needed material, and
3. We will be adding by our efforts money to the second piano fund.

To help in our drive, the M. Y. B has granted us permission to use the cleverly painted green and white barrels they decorated for the Cotton Festival which state "The Owls Give a Hoot, Don't Pollute." One of these barrels will be stationed near Stafford Grocery and one will be placed near the school tennis court. We ask your help in that if you meet up with any Schlitz, Budweiser or Coors beer cans, will you please deposit those in our barrels! These will be periodically emptied.

If these aren't available to you, please call me or any of the following students: Ferah Johnson, Twannah Woodard, Lisa Mullins, Tony Clendennen, Darrin Clendennen, Hollie Luna, Pokey Morquecho or Fabian Torres.

Thank you.

**It's
that time
again...**

... time to start getting your home ready for the winter months ahead. By starting now and checking your home for those energy leaks, you'll stay warmer this winter and conserve energy.

Take a few minutes and check the following items to make sure your home will be wintertized:

- 1 Insulation is most important... and can pay for itself in energy consumption savings. The usual recommendation is 6 inches of insulation for the attic and 4 inches for outside walls. Check FHA requirements for further information.
- 2 Weatherstrip doors and windows, and caulk cracks and crevices to prevent drafts and the loss of heated air.
- 3 Maintain heating equipment for maximum efficiency by having it checked by a competent serviceman.
- 4 Dirty filters cause heating equipment to work harder and use more fuel. Check your filters every 30 days. If they're the permanent type, clean them according to the manufacturer's directions. If they're the disposable type, replace them at least every 90 days.
- 5 Don't be a "thermostat jiggler". Turning the thermostat up or down doesn't cause the equipment to heat or cool faster. It simply works longer to satisfy the setting. The national conservation program calls for settings of no more than 68°F. in heating weather. If you are going to be away for several days, lower the temperature to 60°F.

- 6 Don't place curtains, furniture or other objects in front of heating registers or return air openings. This blocks the flow of warm air.
- 7 Open blinds and draperies on sunny days to help heat your home during the day but close them at night to help reduce heat loss.
- 8 Keep the fireplace damper closed when the fireplace is not in use.
- 9 Storm doors and windows are not customarily used in this part of the country, but they do reduce heat loss. As a temporary substitute, a sheet of clear plastic stapled or tacked over screen doors or windows works well.
- 10 Keep the opening and closing of doors to a minimum to reduce the loss of warm air.

Storm Warning

Since the tornado season is with us again, it is time to remind everyone of the signals sounded by the fire siren. One blast of the siren indicates a fire, two blasts are to call the department together, and three blasts indicate a storm.

Three blasts do not necessarily indicate that a tornado has been sighted, but they do mean that everyone should watch the clouds and take whatever action seems to be necessary.
