**There's
a future in it
for 
someone.**

Your son's education for instance.
But by the time he's ready for college his education may well cost a small fortune.
The kind you just don't have lying around under a bed.
That's just the reason why your government has a great thing going. A U.S. Savings Bond.
In themselves they're not a quick buck. They won't make you that fortune overnight. But in the long run they do pay off. Darn well at that. And at a guaranteed rate. Starting a savings plan is easy.
You can join a Payroll Savings Plan where you work. Or get into a Bond-A-Month Plan where you bank.
Then watch someone's future grow. Like your son's.

They laughed when I bought my first Bond.

In my neighborhood everyone was poor. Most of us were lucky if we had enough food to eat or clothes to wear. So like most kids we spent a lot of time talking about the things we wanted out of life. Things like owning a big car, wearing fine clothes and going to all of the best places. Boy, we could hardly wait to grow up.

Like the other kids I had little odd jobs in grammar school but I got my first real job when I started high school. I was a junior clerk in a big department store. That's where I first heard about U.S. Savings Bonds. My boss asked me if I wanted to join the Payroll Savings Plan and I said yes. A month later I got my first bond.

When my friends found out they really had a good laugh. Imagine buying U.S. Savings Bonds when there were so many other great things to buy. Well, they kept laughing and I kept saving all through high school.

After graduation some of us wanted to go to college. And that's when my Bonds really came in handy. They not only helped pay my tuition, but also helped buy some books.

Well, I'm a senior now and looking forward to graduation. Unfortunately, a lot of my friends never even got started. And to think, they laughed when I bought my first Bond.

Now E Bonds pay 5 1/2% interest when held to maturity of 5 years, 10 months (4% the first year). Bonds are replaced if lost, stolen, or destroyed. When needed they can be cashed at your bank. Interest is not subject to state local income taxes, and federal tax may be deferred until redemption.

Are you going to live longer than your money?

Maybe you're having a pretty good life now. Your credit is good, you've got a few nice clothes and a good dependable car. And if you're lucky, maybe you own your own home. But that's because you're working. What happens when you retire? You can't live on memories. It's still going to take money. Lots of money. Money that you should be saving now.

And one of the easiest ways to start putting away a few dollars for those retirement years is by joining the Payroll Savings Plan where you work and buying U.S. Savings Bonds.

That way every time you earn a little money for today, you save a little for tomorrow.

Then when the time finally comes to retire, you'll have something put away to retire to.

How it works: pay 0% interest when held to maturity of 5 years, 10 months if 1% the first year's. Bonds are replaced if lost, stolen, or destroyed. When needed they can be cashed at your bank. Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.
