## REDDY'S REFRIGERATOR SAVINGS TIPS

- Return fresh foods to the refrigerator and frozen foods, such as ice cream, to the freezer as soon as possible. Measure and remove the quantity needed for cooking or for the table, and refrigerate the remainder at once.
- Use cold controls efficiently by selecting the settings that provide about 36° F. in the refrigerator and 0° F. in the freezer.
- Fill the refrigerator with food, but be careful not to overfill. Make sure that food packages don't block air vents in the freezer or refrigerator section.
- Clean the condenser surfaces of the refrigerator; dirt restricts air flow and acts to insulate the condenser, forcing the refrigerator to work harder and longer to maintain proper temperatures.

**Storm Warning**

Since the tornado season is with us again, it is time to remind everyone of the signals sounded by the fire siren. One blast of the siren indicates a fire, two blasts are to call the department together, and three blasts indicate a storm.

Three blasts do not necessarily indicate that a tornado has been sighted, but they do mean that everyone should watch the clouds and take whatever action seems to be necessary.
