**ON ELECTRIC COOKING**

- ☆ Don't be an oven-peeper. Every time you open the door, you lose 20% of the heat.
- ☆ Plan oven meals to accommodate more than one dish at a time, or time your baking for multiple dishes. Most recipes can stand a 25° F. temperature variation.
- ☆ Get foods for baking into the oven the moment it reaches the right temperature. Remember, you don't have to pre-heat the oven for broiling or roasting.
- ☆ Use the high setting to bring foods to steaming then switch to the lowest heat needed to complete cooking. Turn off surface units before cooking is complete and let the retained heat finish the job.

# There's a future in it for someone.

But by the time he's ready for college,

education may well cost a small fortune.

That's just the reason why your government

has a great thing going. A U.S. Savings

In themselves they're not a quick buck.

They won't make you that fortune overnight.

But in the long run they do pay off.

Darn well at that. And at a guaranteed rate.

You can join a Payroll Savings Plan
