Fire Danger

Austin—Because of the very dry conditions of rangeland in several parts of the state, Agriculture Commissioner Reagan V. Brown warns summer travelers and campers that carelessness could easily trigger costly and dangerous range fires.

Brown said that vast areas of valuable rangeland could be turned into wasteland "in a matter of minutes" by cigarettes or matches thoughtlessly thrown from vehicles or by unattended campfires.

Texas High In Cotton

The Texas cotton crop is off to a good start and prices look good, says a marketing specialist with the Texas Agricultural Extension Service. A crop of well over four million bales is expected, and prices should average near those received for the 1976 Texas crop. The price strength stems from a worldwide shortage of cotton, with current world stocks averaging 40 per cent of world consumption.

Home Fire Safety

A home burns every 45 seconds in the United States, resulting in 7,000 fire deaths annually. Since at least one-fourth of these victims are children under 14, parents should teach their children how to survive a home fire, emphasizes a safety engineer with the Texas Agricultural Extension Service. Home fire drills can save the lives of many children, and a publication by the Extension Service can help parents provide the needed safety training.

Cattle Prices Up But Producers' Share Less

Retail beef prices have increased about 5 per cent in recent weeks, and cattlemen may soon be getting a slightly bigger piece of the beef profit pie, says a livestock marketing specialist with the Texas Agricultural Extension Service. Of course, marketing costs have been partially responsible for the increase in retail beef prices, but these costs do not benefit producers. Following a substantial drop in the farm-to-retail price spread in April and early May, it is jumping up once again.

Public Warned

The Social Security Administration District Office in Amarillo has received reports from the public that they are being contacted by a man who is falsely representing himself as an employee of the Social Security Administration, reports Jim Talbot, District Manager. "He uses the guise of one of our employees and tells the people that if they are receiving Supplemental Security Income, they are now required to pay eight dollars a month just to receive SSI," says Talbot. "Those who are on SSI are in no way obligated to pay a fee for receiving their benefits."

Are you going to live longer than your money?

Maybe you're having a pretty good life now. Your credit is good, you've got a few nice clothes and a good dependable car. And if you're lucky, maybe you own your own home. But that's because you're working. What happens when you retire? You can't live on memories, it's still going to take money. Lots of money. Money that you should be saving now.

And one of the easiest ways to start putting away a few dollars for those retirement years is by joining the Payroll Savings Plan while you work and buying U.S. Savings Bonds.

That way every time you earn a little money for today, you save a little for tomorrow. Then when the time finally comes to retire, you'll have something put away to retire to.
