There's  
 a future in it  
 for   
 someone.

Your son's education for instance.  
 But by the time he's ready for college his education may well cost a small fortune.  
 The kind you just don't have lying around under a bed.  
 That's just the reason why your government has a great thing going. A U.S. Savings Bond.  
 In themselves they're not a quick buck. They won't make you that fortune overnight. But in the long run they do pay off. Darn well at that. Half of government's tax. Starting a savings plan is easy. You can join a Payroll Savings Plan when you work. Or get into a Bond-A-Month Plan where you bank.  
 Then watch someone's future grow. Like your son's.

## Warm Hearts Code Hands OR WHY **MORSE** *was all* **KEYED UP.**

In 1832, Sam Morse knew he had a great idea at his fingertips. Sending messages by wire.

But he had to invest twelve years of hard work before he could tap success.

When he did, the results were positively electrifying. The future of the telegraph (and Sam Morse) was assured.

Your future could be assured, too, if you get this message: Invest in United States Savings Bonds.

Sign up for the Payroll Savings Plan where you work and your earnings will automatically buy Bonds.

And your Bonds will earn interest.

And in twelve years, your results could be even more electrifying than Sam's.

Buy U.S. Savings Bonds. They're something to get keyed up about.

Series E Bonds pay 6% interest when held to maturity of 5 years (4 1/2% the first year). Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.
