### MANY BEAUTIFUL FRENCH TOWNS NEVER BE REBUILT

(By Associated Press)  
PARIS, May 22.—Investigations by the commission which is examining the devastated regions of France are confirming the previous evidence that many of the beautiful towns and hamlets of the battle area are so totally ruined that they never can be rebuilt.

Vaux, of immortal fame, has taken its place in the long list and the mayors of two other historic villages, Douaumont and Fleury, have recently notified their people, who are refugees in various parts of France, that these places cannot be reclaimed. Not only is the soil in such shape that it cannot be cultivated for many years, but the ruined hamlets are filled with hidden explosives and other dangers.

### COUNCIL OF FOUR DISCUSSES THE SARR VALLEY SUBJECT

(By Associated Press.)  
PARIS, May 22.—The council of four of the peace conference this morning considered questions regarding the Saar valley, raised by a recent German note on this subject. The subject of reparations will be taken up in the afternoon.

### CLEMENCEAU RECEIVES LETTER FROM SINN FEINERS

(By Associated Press.)  
COBLENZ, May 22.—Premier Clemenceau received a letter from Edward Devalero, County Plunkett and Arthur Griffith, Sinn Fein leaders, in which they declared that Ireland will not be bound by the action of the British delegates on the question of peace. They ask recognition in behalf of Ireland.

### GERMANS PROPOSE JOINT COMMITTEE

(By Associated Press)  
LONDON, May 22.—It is apparent from forecasts in the German press that one of the principal points in the German reply to the peace terms will be a proposal to institute a joint committee of representatives of both sides with a neutral president to decide the economic questions. The Germans will also ask the appointment of a similar committee to determine the damage done Belgium and France. The German reply is understood to protest against the treaty. Not taking into consideration the damage done German it will be urged that Austria Hungary, having been an ally of Germany, be held to the same responsibility.

### CURE NERVE SHATTERED SOLDIERS THROUGH DREAMS

(By Associated Press)  
LONDON, May 22.—Curing nerve shattered soldiers through their dreams is the latest experiment of the British army medical corps, and according to Captain M. Culpin, it is succeeding beyond all expectations. "In the method I adopt," Dr. Culpin says "the patient relates the dream to me. I question him about it and if the underlying memory is not deeply blurred this questioning may recall it, and it is only necessary to insist upon the man talking about the incident."

"Next I make the patient close his eyes and visualize the dream, and I try to ascertain what particular feature causes emotion. By dwelling on this feature I induce an emotional state and assure him that he felt like that before and that memory is coming up. "When success is attained there is a sudden change of facial expression or even an access of terror. By this I know I have reached the true cause of the dream. The merest scrap of a dream is sufficient."

### STARVATION AND MISERY PREVAIL AMONG ARMENIANS

(By Associated Press.)  
CONSTANTINOPLE, May 22.—Starvation and misery prevail among the Armenian refugees in Caucasus, according to a telegram from the American food commissioner at Heinz. Heinz reports it is true that the refugees, frantic by hunger, have resorted to cannibalism.

### AMERICAN SOLDIER IS ALWAYS TO BE FOUND

(By Associated Press)  
ISLAND OF MYTILENE, Aegaeon Sea.—No matter where on travels in Greece or Italy these days the American soldier is to be found. Here on this far-off infrequented island one would scarcely expect to see a doughboy, but he is here. The Yank is becoming a familiar sight in the Near East.

In remote villages the traveler will find former west-front doughboys working for the Army Food Mission, the American Red Cross Balkan Commission, or on pleasure bent, visiting, with the permission of the army, the old folks and boyhood home. One is from Springfield, O., and wears the Italian insignia of the Lion of St. Mark on his left shoulder. He was born in Mytilene and fought with the 332nd infantry in Italy.

## Do You Buy Or Sell Hay At \$40.00 Per Ton?

When paying 2 cents per pound for hay do you stop and think about those "little patches" of grass that you could have saved but which you DIDN'T SAVE?

Be a seller. It is more pleasant and profitable to sell hay at \$40.00 than it is to buy at the same price.

We want to sell you a mower and rake. We'll make money when we sell and you'll make money when you buy.

Let's get together on this important matter. It's money to you, it's profit to us—but it's mighty hard on the fellow who has been selling you hay at 2 cents per pound.

Next spring will you be buying or selling hay?

It's up to you.

### NAVY DIRIGIBLE REPORTED LOST

(By Associated Press)  
TREPASSEY, May 16.—The Navy dirigible C-5 which was swept to sea yesterday now is believed to be lost. The Destroyer Edwards, which went in pursuit reported by wireless today that she had been unable to find the balloon and was returning.

FROM DR. TUCKER.

Nacogdoches, Texas, May 13, 1919.  
Editor Sentinel.

In reply to the inquiry of a committee of ladies as to whether I favor women's suffrage or not, will say I most assuredly do. Having been reared in a home where the mother was a real helpmate, as well as convenience in so far as legislation permitted her, and having been blessed with a wife who, after being tried in various capacities, demonstrated her ability over the supposedly stronger member of the family to such a marked degree, that I have forsaken all the shallow-pated arguments brought forward to convince that woman's sphere should be narrowed, and that her activity should be confined absolutely to the home, and have come to believe that the regeneration of the world is largely dependent upon the development for a broader sphere of activity for women; and that since they and their children are subject to the laws of the land in which they reside, they should surely have the same inalienable right to the exercise of franchise that any man has. They have as much at stake as we, and why should they not be allowed a voice in their own protection and a voice in the making of laws that should govern their own children.

Really, the chief reasons that might be urged against woman's suffrage are being urged by that element in society that would tear down schools, wreck churches and as tyrannically rule home as the Kaiser, and who fear women at the ballot box because they realize and understand that within a few years the moral uplift of every community would be so marked and so noticeable, and evil conduct so hedged by proper legislation that there would be little use for court houses, and little employment for liquor dealers, virtue destroyers, confidence men and pretenders of every kind, leeches upon good society, removing from it at every turn all that is pure and innocent, and substituting in its stead the blackness of deception and moral degeneracy.

In other words, with women at the ballot box, legislation would ever be constructive and elevating and not as now too often timid and uncertain in its force.

Very respectfully and obediently,  
F. R. TUCKER, M. D.

### NAVY DIRIGIBLE WAS UNINJURED

ST. JOHNS, May 16.—The United States naval dirigible C-5 is said to have been only slightly damaged when she broke from her moorings and drifted to sea yesterday, and was reported in tow of the destroyer Edwards on her way back to port today.

THOROUGHLY CONVINCED.

Editor Sentinel

As my power of reasoning has grown with years and my field of observation has also grown, I have wondered how, in past years, I entertained opinions or rather certainties toward certain principles or ideas which I now know and feel were wrongs and against every impulse of right and justice. For instance when I was a youth no principle or idea appeared more ridiculous to me than woman's suffrage. I know now that was not an OPINION based upon any sort of REASONING but a mere IMPULSE springing from environment and lifelong association. Just as I thought slavery was right and justifiable, an idea which no reasonable man on earth advocates today. And yet you can give as strong reasons for the old system of slavery as you can against the enfranchisement of woman. The world has progressed and in no respect has the development been greater in the last fifty years than in the economical and political advancement of woman.

And today no man can give a real reason why our mothers and wives and sisters are not entitled to a voice in the affairs of government where their rights, their lives and their property is involved along with those of the masculine sex. The national congress thinks so by more than two-thirds of the house and two-thirds, lacking one, of the senate. The Texas legislature thinks so by nearly a unanimous vote. And in my opinion every man who is able to shake off the impulse which springs from lifelong environment knows that his mother or wife or sister should have the same rights at the ballot box which he has.

We have an opportunity on the 24th to give them this right—so long and wrongfully withheld. Let's go to the polls and let the world know that the manhood of Nacogdoches believes in and trusts the womanhood of the country.

## PLANE ARRIVES OFF THE AZORES

THREE PLANES LEFT TREPASSEY YESTERDAY EVENING AT SIX O'CLOCK.

WASHINGTON, May 17.—The navy seaplane NC-4 has arrived at Horta island, off Fayal, Azores, it was officially announced this morning. The plane left Trepassey at six o'clock yesterday evening.

According to an official report the NC-4 made the flight from Trepassey Bay to the port of Horta in fifteen hours and thirteen minutes.

Although no word has come from the NC-1 and the NC-3 since early this morning, naval officials are confident early this afternoon that both these trans-Atlantic seaplanes had reached the Azores.

At last reports the planes were only a short distance away, and because the time which had elapsed since these reports were received, it was assumed that the ships had steered for Ponta DelGada instead of landing at Horta to join the NC-4.

PONTA DELGADO, May 17.—The seaplanes NC-4 arrived at the port of Horta in the Azores at 1:25 Greenwich time. Land was sighted at Flores at 11:35. The NC-1 was then close behind her. The NC-3 passed station 17 at 9:15. The first two planes were in wireless touch with the torpedo tender Melville shortly before noon.

Here the planes will re-fuel, make the necessary repairs and start as soon as possible for Lisbon. Departing from Lisbon in the early morning the fliers are ordered to head for Plymouth, the objective point of the long voyage.

With the seaplane NC-4 leading the three naval Transatlantic fliers have completed two-thirds of the course from Trepassey to the Azores at 8:30 this morning.

WASHINGTON, May 17.—Coincident with the start from Trepassey Bay N. F., last night, of the American navy seaplanes in an effort to make the first trans-Atlantic air passage, the Navy Department made public an order, issued April 15, which governs the action of every aircraft and naval vessel connected with the long flight and provides against almost every possible emergency which may arise during the aerial voyage. The order contains more than two thousand words and is one of the most comprehensive ever issued by the department.

Complete in every detail, the order provides for the stationing and subsequent movements of sixty destroyers, four battleships and a number of auxiliary naval vessels in connection with the flight.

The route which the seaplanes are to take to the Azores is marked by a ribbon of destroyers stationed about fifty miles apart. These vessels have been on their stations for several days and have kept the department here and the naval officials at Trepassey Bay constantly informed as to meteorological conditions along the course.

In addition to the destroyers, four battleships, the Florida, Utah, Texas and Wyoming have been stationed on the outskirts of the course to furnish meteorological data throughout the flight.

The seaplanes are in constant communication with the naval vessels at all times. In addition to the radio communication the destroyers along the route are provided with special illuminating torches, star shells and flares for use at night to mark the course and are in constant readiness to answer S. O. S. calls or other distress signals should accident befall one of the big planes.

Twenty-one destroyers are stationed on the Trepassey Bay-Azores leg with four additional vessels in reserve to replace any craft which may be called upon to answer an S. O. S. signal or itself become disabled. As the seaplanes pass above a destroyer the latter obtains radio communication, ascertains the condition of the planes and indicates the true course to the next vessel.

During the night the destroyers on station one to sixteen will keep brilliantly illuminated to provide against the seaplanes missing a ship and thus losing the way. To guard further against this contingency the destroyers are ordered in the event the seaplanes have not been sighted at the approximate time they should arrive, to make smoke clouds, show searchlights, fire star shells and notify the next ship to the westward. The next vessel in the line will make the same signals for three quarters of an hour before the planes are due to arrive.

We are proud of the confidence doctors, druggists and the public have in 666 Chills and Fever Tonic.

### ATTEMPT DEPRECIATE BONDS MEETS REBUKE DEPARTMENT

DALLAS, May 17.—Any attempt to depreciate the value of government securities meets with rebuke and swift action by the treasury department. A Dallas banker advertised that he wanted to buy notes of the Victory Loan for \$98.76 per \$100.00 face value. R. C. Leffingwell, acting secretary of the treasury, immediately wired from Washington requesting that the advertisement be withdrawn and pointed out that the bankers' action in depreciating the value of the notes was injurious to the credit of the government, and unfair to the holders, because the bonds were 100 cents on the dollar. The banker replied that in New York these notes were being dealt in and purchased at an even lower price than he was offering.

Mr. Carter Glass, the secretary of the treasury replied immediately, "As you very well know, the New York stock exchange is not trading in Victory notes. You are depreciating the value of the notes and impairing the credit of the government in endeavoring to induce the holders of the notes to part with them for less than their value."

Frank M. Smith, federal district director of war loans, today issued the following warning and word of advice to holders of Victory Liberty Loan notes: "It is my personal belief that these notes will never go below par. I am supported in this opinion by the New York Times, which said recently: 'There is much debate as to what will be the opening price. Many are inclined to the belief that the notes will move to above par.' Again I would draw attention to the fact that 3 1-2 bonds of the first issue which have the same tax exemption feature as the 3 3-4 percent Victory notes are selling at \$98.94, which is on the basis of about 3-85 for par. Therefore the Victory loan notes bearing 3 3-4 interest should command par or better as soon as they are listed on the exchange. All offers to part with these bonds at less than par should be absolutely ignored. I am making this statement after reading the advices from the treasury department referred to above and a consultation with Governor Van Zandt of the federal reserve bank, Dallas, who agrees with my conclusions in every way."

### COUNTY CONVENTION OF THE ARMY AND NAVY MEN

All the army and navy men of Nacogdoches county will be formed into a social organization affiliating with the National organization called the "World War Veterans Association." The object is purely social. No service or military obligation in with it whatever. It will be to the present war what the United Confederate Association was to the wars of the "60's".

Any man who has served in the government service is entitled to a membership in this organization. That not only applies to the drafted men but to any man who has worn the uniform of his country either in army, navy or marine corps. The cavalry boys who were accepted by the government are as eligible to membership in this organization as the men who went overseas. This is a ruling from Washington.

The convention for forming this organization will be held in Nacogdoches on Memorial Day, May 30th. Let's make the roster of our organization contain one hundred per cent of the white boys of our country that did service.

### HEALTH TALK

#### SPANISH INFLUENZA OR GRIP BY DR. H. LEE SMITH.

An old enemy is with us again, and whether we fight a German or a germ, we must put up a good fight, and not be afraid. The influenza runs a very brief course when the patient is careful, and if we keep the system in good condition and throw off the poisons which tend to accumulate within our bodies, we can escape the disease. Remember these three C's—a clean mouth, a clean skin and clean bowels. To carry off poisons from the system and keep the bowels loose daily doses of a pleasant laxative should be taken. Such a one is made of May-apple, leaves of aloe, root of jalap, and called Dr. Pierce's Pleasant Pellets. Hot lemonade should be used freely if attacked by a cold, and the patient should be put to bed after a hot mustard foot-bath.

To prevent the attack of bronchitis or pneumonia and to control the pain, Anuric tablets should be obtained at the drug store, and one given every two hours with lemonade. The anuric tablets were first discovered by Dr. Pierce, and, as they flush the bladder and cleanse the kidneys, they carry away much of the poisons and the uric acid.

It is important that broths, milk, buttermilk, ice-cream and simple diet be given regularly to strengthen the system and increase the vital resistance. The fever is diminished by the use of the Anuric tablets, but in addition, the forehead, arms and hands may be bathed with water (tepid) in which a tablespoonful of salaratus has been dissolved in a quart. After an attack of grip or pneumonia to build up and strengthen the system, obtain at the drug store a good iron tonic, called "Iron-Tic" Tablets, or that well known herbal tonic, Dr. Pierce's Golden Medical Discovery.

Quite a number of the friends of the young couple were present at the ceremony. Both parties are among the best people of that section of the country, and are well known. The Sentinel joins their many friends in extending congratulations and good wishes to the happy couple in their new relationship.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. THE FRIENDLY TOBACCO

**Horse Sense About Tobacco**  
Good tobacco ought to be like a well-bred hoss—all th' kick taken out but all th' sperit left in.

You see, half the secret of makin' a good hoss is in the breedin' an' half in the breakin'. Selectin' tobacco that's grown right is only half of makin' Velvet. The agein' is the other half.

Thar's only one kind of agein' that gets th' right results — Nature's own. Nature's no clock watcher. She does a job right whether it takes two years or two thousand.

So when she gets through with the fine Kentucky Burley that we put away in wooden hogsheads for two years, it's just right.

It ain't been hurried none, or short-cutted. It's a Nature-done job.

All kinds of things are packed in tobacco tins, but your good neighbor will tell you "Velvet is the real pipe tobacco." Prove it for yourself.

## HOME OWNING AMENDMENT DETAILS LEFT LAWMAKERS

(By Associated Press.)  
 AUSTIN, May 20.—While the "home owning" amendment submitted to a direct vote May 24 does not carry any of the details and leaves to the legislature the entire matter of working out the plan, it was developed during the debate in the house and senate that the most popular plan is to adopt for Texas something similar to the Federal land bank proposition. The legislative intent in submitting the amendment is to provide such a statutory means as will enable the hundred thousand tenant farmers of Texas to acquire homes on payment under the amortization plan extending over forty years; and small farmers and wage earners now owning their homes may provide permanent improvements under the same plan of long time payments.

## AMERICAN DOUGHBOYS WANT EATS VERSAILLES

PARIS, April 20.—By Mail—Standing amid the glories of the royal past of France, in the park at Versailles, an American doughboy burst into this apostrophe:

"Say, pal, where do you get cats around these digg'ns?"  
 American fighting men in leave parties led by trained guides from the Paris headquarters of the Young Mens Christian Association War Work Council may be seen everywhere in Paris and its environs, enjoying the monuments of the old regime and of the empire in a truly American fashion, which does not prevent the association of the great palace of Louis XIV and "chow."

"Looks like a decayed church," was the deliberate estimate of another boy in khaki as he stood before the Hotel des Invalides. Then he went inside and became enthusiastic over the marble railing about the tomb of Napoleon—because it was so "white" and hadn't a flaw.

One of them emerged from the Invalides and grew almost poetic about the yellow light coming through the stained glass windows above Napoleon's casket. Then he caught himself and almost blushed.

In the next breath he called the Court des Invalides the "souvenir parlor of the armies of France."

When he saw Guynemer's airplane and learned what it was, he maintained a reverential silence of more than a minute before he began to determine its "make."

Best of all, apparently, the soldiers like to go and sit on the banks of the Seine and watch the river traffic.

The one-fourth size Statue of Liberty presented to Paris by the Amer-

ican colonies watching over them here. But even it is the subject of frank criticism.

"Hub," said one of the critics. "It don't look as good as the old girl will when we steam into New York harbor."

"I not only gained thirty pounds on a few bottles of Tanlac but can do more work than I have been able to do at any time in the last ten years," said C. B. Gwin, a well-known produce merchant of Amory, Miss.

"For a long time my system was debilitated," he continued and my digestion out of order so I could hardly eat a thing. I suffered from awful headaches, my nerves were on a strain and my muscles felt like they were tied into knots with rheumatism; I lost weight and got weaker every day.

"I was induced to try Tanlac by a friend and it making a new man of me. I now eat and sleep better than I have in years, my rheumatism is gone and I feel stronger and better than I have in a long time.

## "OLD OREGON" WILL SOON BE OUT OF COMMISSION

(By Associated Press.)

SAN FRANCISCO, May 19.—"Good bye dear old Oregon," was the sentiment voiced by hundreds of men, women and children during the last week of the Victory Liberty Loan campaign when they visited the famous old battleship for the last time as she lay at anchor in San Francisco bay. Within a few weeks the grim fighter of nearly a quarter of a century ago will take her place with the "Constitution" in the hearts of the American people; the Oregon will go out of commission and become a memory.

A few weeks after the sinking of the battleship Maine at Havana the Oregon was in San Francisco harbor when there flashed across the continent on March 12, 1898, from the Navy Department to the Oregon's commander an order to proceed to Callao, Peru as soon as practicable. On March 17, Captain Charles E. Clark assumed command, and two days later began the celebrated trip around the "Horn." Captain Clark was not advised that war had been declared against Spain until his arrival at Rio Janeiro, April 30. Great concern was felt in the United States for the lonely Oregon, as the whereabouts of the Spanish fleet, under Admiral Cervera, which had just left the Cape Verde Islands, was unknown.

The nation breathed a sigh of relief when word was received that the Oregon had arrived safely at Jupiter Inlet, Fla., May 24, after a trip of 14,000 miles made in 68 days. A few days later she joined Admiral Sampson's fleet off Santiago, Cuba, and she participated in the great battle of Sunday, July 3, 1898, when Cervera's

fleet was annihilated. The Oregon forced the Colon, the last of the Spanish ships ashore to her destruction.

Subsequently the Oregon steamed from New York to Manila, where she was on duty during the American operations in the Philippines. Of late years she has been used for a training school for young sailors and has been the feature of many celebrations and other events.

She was built at the Union Iron Works at San Francisco in 1896 and carried a complement of 34 officers and 671 men. Her displacement was 10,288 tons.

**RECORD MADE IN CONSTRUCTION**

(By Associated Press)

WASHINGTON, May 15.—Even in America "the greatest builder of the past" no feat of construction has ever approached that involved in the completion of 90 days of 16 cantonments for the national army and 16 tent cities for the national guard, says the official war "material" history made public today by the War Department. The task involved the erection of an equipment of 32 cities capable of accommodating 40,000 persons each, with all the requisite water, lightning, sewerage, hospital and heating utilities, and in addition the preparation of the strictly military features, such as parade grounds and rifle and artillery ranges.

The creature comforts enjoyed by the American soldier of 1917 is contrasted with those afforded the man of '61-'65. Substantial barracks, heated by steam or stoves took the place of tents; chemically pure water replaced that secured from the casual spring or stream; scientific laundries cared for the national army recruit's clothing, and field bakeries gave him the modern successor to the ashy hoe-cake.

The race between the contractors to complete the cantonments in the time for the initial draft is eloquently described, the builder of Camp Taylor, Louisville, Ky., winning by a narrow margin. The cantonments occupied 167,741 acres of land, which cost an average of \$3.93 per acre, and the contractors' profits were given as less than 2 1-2 percent of the gross cost of construction.

"On November 11, 1918," the report says, "the construction division was conducting 535 operations in 442 localities involving an expenditure of \$1,000,000,000. These touched every state but one.

As the construction crews developed teamwork, remarkable instances of speed were reported. Precautions taken to assist the contractors included the detail of a disbursing officer on the spot "with the check book ready" so that material could be paid on delivery, and so that special equipment could be obtained a fair rental and a steady flow of building materials be insured. The last feature finally necessitated the sending of soldiers into the forest to cut logs and piles and to load them on railroad cars which were guarded by soldiers to their destination.

Fire prevention at the various army projects was so efficient that the per capita loss was only 46 cents compared with the civilian rate of \$2.42

It is declared five thousand Asiatics arrived during March and unless restricted measures are taken the number of immigrants for the current year will total a hundred thousand.

**HERE IS TO THE SOLDIER BOYS**

We women who are in favor of woman suffrage are proud to note the sentiment of some of the returned soldier boys, and also of some who have not returned.

We feel sure that a majority of them are in sympathy with the cause, for they above all others have been in a situation to discern the loyalty patriotism and self-sacrificing spirit of womanhood in the late great struggle and we rely upon their manhood and the progressive spirit of the younger generation to help us stem the tide of opposition to the new order of things for the "old order passeth" away an any change or movement that is uplifting and "for the greatest number," that is brought about by the new conditions, of things, should have our favorable, unbiased consideration.

There is no more reason why we should stick to the old traditions and landmarks than there is that men should still wear their hair long, in a queue tied with a ribbon, and lace ruffles on their shirt fronts and sleeves, as George Washington, La Fayette and our other forebears did in the 18th century.

MRS. V. E. SIMPSON.

**IMPORTANT LEGISLATION COME BEFORE CONGRESS**

**Life Was a Misery**  
Mrs. F. M. Jones, of Palmer, Okla., writes:  
"From the time I entered into womanhood . . . I looked with dread from one month to the next. I suffered with my back and bearing-down pain, until life to me was a misery. I would think I could not endure the pain any longer, and I gradually got worse. . . Nothing seemed to help me until, one day, . . . I decided to

"I took four bottles," Mrs. Jones goes on to say, "and was not only greatly relieved, but can truthfully say that I have not a pain. . . . It has now been two years since I took Cardui, and I am still in good health. . . . I would advise any woman or girl to use Cardui who is a sufferer from any female trouble."  
If you suffer pain caused from womanly trouble, or if you feel the need of a good strengthening tonic to build up your run-down system, take the advice of Mrs. Jones. Try Cardui. It helped her. We believe it will help you.

"That's just what I've always wished a cigarette would do — satisfy"

The feature of Chesterfields is that they begin where other cigarettes leave off.

In other words, besides pleasing the taste, Chesterfields go 'em all one better—they satisfy! Just like a long drink of cold water satisfies when you're downright thirsty.

No other cigarette can give you this new thing in cigarette enjoyment because none can copy Chesterfield's blend.

It's a blend of the finest TURKISH tobaccos from Xanthi, Cavalla, Smyrna and Samsoun and several varieties of the choicest DOMESTIC. And the blend itself—the skill with which these tobaccos have been proportioned — is a real discovery in cigarette making.

The 2nd regular division was second, and the 42 Rainbow division third. The New Yorkers advanced 7 1/2 and 1-2 kilometers.

**NACOGDOCHES TRADITIONS.**

To call names in reciting events long past might, in some instances, be embarrassing. For example, reflections upon the careers of leading citizens who came up the stage in the long ago, and were actors in the traditions of old Nacogdoches and then vanished, would include the name of Frost Thorn, who was one of the earliest settlers in the town, the wealthiest and also most popular and successful in a financial respect. And his name and hospitality were widely known. Today there is not a descendant or relative here bearing the name of Thorn, and his career and his very memory is almost forgotten.

### IN MEMORY.

We pay this tribute of respect to the memory of our beloved friend and neighbor G. W. Nettles. He was born August 12th, 1844 in Monroe county, Ala. He was married to Miss Elizabeth Anders May 12, 1862, and moved to Texas Jan. 5, 1881, settled in Nacogdoches county, lived on the place he settled until his death, April 21, 1915. Brother Nettles was a member of the Baptist church. He served his church as clerk for a long time until he got too feeble to attend much. He was a faithful clerk, and will be missed as a neighbor and in the church. He leaves a companion and six sons to mourn his death. Two daughters preceded him to the glory world. He was laid to rest in the Union Springs cemetery in the presence of a large host of friends and loved ones. May his boys become christians and live to meet him in Heaven where there will be no more sad partings. A place in the home is vacant that never can be filled. A voice we loved to hear is forever still.

The note says that the economic terms of the treaty, with their restrictions on trade and other factors involved means that many millions of people in Germany will perish all the more quickly because of the blockade.

### BEVERAGE CONTAINING 2 PERCENT ALCOHOL UNINTOXICATE

(By Associated Press.)  
DALLAS, May 15.—A beverage containing not over two percent alcohol is not intoxicating, but beverages with three and three-quarters percent alcoholic content "might produce intoxication of the individual is diligent in its introduction" says Landon C. Moore, of this city, one of the most prominent chemists in Texas. A life-long prohibitionist, Mr. Moore says he has made a minute chemical and physiological study of intoxicants and has found that unless taken in considerable "concentration" alcohol loses its power of attack and is thrown off by the human system. He suggests congress should appoint a commission of scientists, composed of both prohibition and anti-prohibition adherent, to experiment and determine what constitutes intoxicating liquor.

"Will four quarts of two-percent beer produce the same intoxicating effect as two-quarts of four-percent beer," asks Mr. Moore. "No," he says, because it is not ultimate quantity drunk but the "degree of concentration." This conclusion the chemist says, is not based on the imbibor's discretion but upon his capacity. "A man simply cannot hold enough," says Mr. Moore. "Absurd. Well, here again, science has exploded a popular but erroneous theory."

"The average man says: 'If it takes four quarts of four percent beer to make me drunk, it will take eight quarts of two-percent beer, or just twice as much.' But he is wrong. Science has brought out that it will take not eight, but sixteen quarts, or four times as much. Four-percent alcohol is as to two-percent alcohol as four quarts of beer is to sixteen quarts of beer."

"Would the American army attacking one man at a time, have caused the Germans equal embarrassment as did the massed assault of the marines at Chateau-Thierry?"

## TREATY CONTAINED UNPUBLIC CLAUSE

(By Associated Press)  
PARIS, May 16.—The German peace treaty it developed today contains a clause which has not as yet been made public, providing that the ratification by Germany and three principal associated powers will bring the treaty into force between the ratifying parties, enabling an immediate resumption of trade.

A preemptory answer to the German note registering objections to the treaty arrangements for the left bank of the Rhine and the Saar valley has been drafted by a special commission on territorial affairs, presided over by Andre Tardieu, it was reported today.

The council of foreign ministers continued to work today on the subsidiary details of the Austrian treaty having to do with the new Austrian frontiers. It is considered unlikely the terms will be presented the Austrians before Wednesday, and probably later.

### POLICE AND GENDARMES SEARCH HOUSES MISSIONARIES

PYEONG YANG, Korea.—On the occasion of the arrest of Reverend E. M. Mowry, an American missionary, on the charge of sheltering Korean agitators, the houses of seven other American missionary workers were subjected to domiciliary searches by the police and gendarmes at the instance of the public procurator.

The missionaries whose houses were visited were the following: E. M. Mowry, Mansfield, Ohio; A. W. Gillis, Mt. Pleasant, Ohio; R. O. Reiner, Berkeley, Cal.; W. M. Baird, Topeka, Kansas; S. A. Moffet, Madison, Indiana; R. McMurtree, Rock Island, Ill.; Miss V. G. Snook, Fairfield, Ohio and Miss A. Gittens, Williamsburg, Ohio.

As a result of this search the police arrested Kim Tai Sul, a well-known leader, and ten other Koreans as being implicated in the independence movement. The police seized, as evidence, a copying machine, copies of the Independence News, a declaration not to attend school, and a report of the disturbances.

The Reverend Mr. Mowry was the only American detained by the police. Mr. Sheppey of the Seattle Post-Intelligencer was in Pyeong Yang when the arrest occurred. He immediately applied through the Japanese officials accompanying and obtained permission to see the prisoner. He immediately applied through the Japanese officials accompanying him and obtained permission to see the prisoner. He was extremely nervous, said he had not been badly treated, and asked permission for his wife to visit him. Mr. Sheppey spoke to the officials and they promised this should be allowed and the interview ended.

Later the Reverend Mr. Mowry was found guilty of having permitted the Koreans to use his premises at Pyeong Yang for disseminating propaganda for Korean independence. He was sentenced to six months' imprisonment at hard labor, but on his appeal, was admitted to bail.

In a good roads bond election for \$350,000 for Timpson justice precinct held Saturday, the issue carried by a Strippling, Haselwood & Co., Special 4 to 1 majority.

## OVERESTIMATED THE AIRSHIP PRODUCTION

ADMITS THAT EXPERTS SET OUT TO ACCOMPLISH AN IMPOSSIBLE TASK.

(By Associated Press.)

WASHINGTON, May 15.—Admission that both military and civilian experts overestimated the country's capabilities in getting out in 1917 to accomplish the impossible task of producing 22,000 airplanes in 12 months is made public today by the war department. Realization of this error resulted almost immediately in the placing of contracts in France for 5,875 of the Spad, Nieuport and Breguet types.

The report shows that by May 23, 1918, American factories had delivered 5,270 planes, or 24 percent of the ambitious program while the French had delivered 32 percent of the number promised on that date. Up to November 11, a total of 11,364 airplanes had been produced in America, but these were largely training machines, fighting planes completed during the war period totalling only 3,328.

"Broadly stated," the history says, "The United States produced for her army alone in her second year of manufacture, as many airplanes as England produced for her army and navy in her third year."

### WILSONS MESSAGE TO CONGRESS READ

RECOMMENDS REPEAL OF WAR-TIME PROHIBITION AND OTHER MEASURES.

(By Associated Press)  
WASHINGTON, May 20.—President Wilson in his message to congress today, recommended the repeal of war-time prohibition regarding wine and beer. He announced definitely that the railroads and telegraph lines will be returned to private ownership. He urged the revision of war taxes and outlined the program respecting labor.

The President also urged the enactment of the woman suffrage amendment, and recommended tariff laws to protect American industry.

He said it would be premature to discuss either the league of nations or the peace conference at this time.

The president called attention to what he termed one of immediate and practical questions that labor should be met in a most liberal spirit. We must see to it that returning soldiers are assisted in every practicable way to find places for which they are fitted in the daily work of the country. This should be done by developing and maintaining upon an adequate scale the admirable organization created by the department of labor for placing men seeking work.

The question which stands at the front of all others in every country amidst the present great awakening is the question of labor. By the question of labor I do not mean the question of efficient industrial production, the question of how labor is to be obtained and made effective in the great process of sustaining populations and winning success amongst commercial and industrial rivalries, I mean the more vital question of how are men and who who do the daily labor of the world to obtain progressive improvement in conditions of their labors, to be made happier and be served better by communities and industries which their labor sustains and advances.

Representative Mondell, of Wyoming republican leader announced in the house today that a resolution proposing the submission of equal suffrage as a constitutional amendment would be called up tomorrow for passage.

The announcement followed a favorable report on the resolution of Representative Mann of Illinois by the House suffrage committee.

### SAYS FRANCISCO VILLA HAS BEEN MISREPRESENTED

(By Associated Press)  
DALLAS, May 19.—Francisco Villa is not a bandit and has been grossly misrepresented to the people of the United States, according to Dario W. Silva, former military secretary and a colonel in the Villa forces. Villa who is a staunch friend and admirer of the American people had no part in the Columbus raid and was very bitter when he was told what had been done, says Silva, who is now a resident of Dallas, having engaged in business here.

"Unquestionably Villa will come into power again," says Silva. "He has through propaganda circulated by opposing factions Villa has been represented as a ruthless bandit seeking only power which he would misuse once he gained it. This is not true, for Villa realizes he has no claim on the presidency and would refuse to take it. He is merely fighting to oust a corrupt political regime. Carranza has never fulfilled the program of the revolution. No man has ever had the opportunity to pacify the country as has Carranza; but he has not done so. Lack of ammunition has largely been responsible for the inactivity of the revolutionary element.

"Villa had no part in the raid on Columbus, N. M. and deeply regretted the occurrence. At the time it happened he was seriously ill with malarial fever about twenty miles south of the border. The raid was organized by Candelario Cervantes without the knowledge or consent of Villa.

Men were collected in Carralitos where the plan was made, and they advanced to La Ascencion, where Villa was ill, and prevailed upon some of Villa's men to join them.

Final plans for the attack were made at Fusiles, five miles south of Columbus. The party left for Columbus shortly after midnight and carried out the plan.

"Villa was very bitter when he learned what had been done for he knew it would bring about intervention and hostility from the outside. Another phase which did great harm to Villa was the fact that Pablo Lopez, who was second in command in the raid was confused with Martin Lopez in charge of Villa's personal guard, and it was erroneously reported that he was in the raid. This fact more than ever made it appear that Villa was responsible.

"Villa dashed for the mountains soon after the trouble with the United States had started. During his battle Villa was wounded at Guerrero, Chihuahua, while still retreating from General Pershing's forces, who traveled faster than we and almost overtook us.

"Villa concealed himself in a isolated cave where we thousands of bats and stayed there entirely alone for five days without food or water.

During that time American troops marched by a number of times. Gangrene set in Villa's wound, which he treated only by application of cactus pulp.

### CIRCUMSTANTIAL EVIDENCE

"Are you sure this is the man?" asked the commanding officer, when a farmer accused a soldier of shooting a chicken.

"I won't swear to him," said the witness, "but I'll say he's the man I suspect of doing it."

"That's not enough to convict a man returned the C. O., considerably nettled. "What raised your suspicions?"

"Well, sir," replied the sturdy farmer, as he slowly mopped his forehead with his kerchief, "it was this way: I see 'im on my property with a gun then I heard the gun go off; then I see 'im putting the chicken into his knapsack, and it didn't seem sense now to think the bird committed suicide."

### VESSEL LEAVES WITH LARGEST CARGO IN HOLDS EVER CARRIED

(By Associated Press)  
GALVESTON, May 22.—The distinction of carrying the largest cargo ever contained in the holds of a vessel is claimed by shipping men for the British steamship Indore, which left here for Liverpool with 28,386 square bales of cotton. This was accomplished by a method of scientifically compressing the bales until they occupied minimum space. The closest approach to the record was made by the Russian Steamship Omsk which in December, 1917 carried 27,130 square bales from Galveston to Liverpool. A strict news censorship would not permit mention of that record.
