A BIBLE THOUGHT FOR TODAY STRENGTH AND WISDOM: With God is strength and wisdom: the deceived and the deceiver are his.—Job 12: 16.

COTTON MILLS ARE RUNNING AT THE HIGHEST SPEED This American world was dragged out of the ditch. It began to happen after the inauguration of Roosevelt. This was in the month of March. Now we are facing the Ides of July. Operating at the highest rate of speed American cotton mills during June used 696,472 bales of raw cotton.

Secretary Henry A. Wallace has proclaimed the drive to reduce the 1933 cotton acreage a sweeping success. He also announced a processing tax of 4.2 per cent per pound should be paid by all manufacturers of cotton goods.

Moreover, he said sufficient offers had been received from growers to reduce this year's potential crop 3,500,000 bales. In other words more than 9,000,000 acres will be taken out of production. He estimated the revenue from the processing tax, proceeds of which will be used to compensate farmers for plowing up acreage, will produce about \$120,000,000.

Cotton and wool and mohair and meat-stuffs are the high money staples of Texas. A year ago the lowest levels for years told the story. It is different today. There are high levels everywhere with the petroleum industry pushing its head far above the low level of last winter and early springtime.

Radical measures were deemed necessary to drag the agricultural ox out of the ditch. All in all, it is the greatest gamble in history for the rehabilitation of agriculture and the restoration of the purchasing power of an industry which began with the early civilization of mankind.

BANK ROBBERS FORCE THE USE OF TIME LOCKS

Bank robbers in small towns of the South, the Southwest, the Middle West and the Northwest have led New York bankers and casualty writers to adopt a new basic insurance ruling of keeping at least 85 per cent of bank cash in time vaults.

Just now the Barrow brothers, noted Texas outlaws, are in the picture. Missouri officers of the law surrounded a cottage where the Barrows were behind barricaded doors. It was this old story of recent years. Using their machine guns they blasted their way through the cordon of guardians of the peace and made their escape "to parts unknown."

There is no surer way of influencing visitors to come back to your city again than to show that you are honestly glad to welcome them and then make their stay while there as enjoyable as possible.

As an advertisement for a city, a lifeless appearance has the undertaker beat a city block.

DID YOU EVER STOP TO THINK By EDSON R. WAITE, Shawnee, Oklahoma

Good advertising makes friends for any business, as well as acting as a sale-speeder. These are competitive times. Competition exists in all lines of business. It is the sale-creating thoughts of good advertising, backed by the right kind of goods and service, which enable a merchant to outsell his competitor.

Agreement Sent

(Continued from page 1)

the classes mentioned in paragraph (3) less than 40 cents per hour unless the hourly rate for the same class of work on July 15, 1929, was less than 40 cents per hour, in which latter case not to pay less than the hourly rate on July 15, 1929, and in no event less than 30 cents per hour. It is agreed that this paragraph establishes a guaranteed minimum rate of pay regardless of whether the employee is compensated on the basis of a time rate or on a piece-work performance.

(7) Not to reduce the compensation for employment now in excess of the minimum wages hereby agreed to (notwithstanding that the hours worked in such employment may be hereby reduced) and to increase the pay for such employment by an equitable readjustment of all pay schedules.

(8) Not to use any subterfuge to frustrate the spirit and intent of this agreement which is, among other things, to increase employment by a universal covenant, to remove obstructions to commerce, and to shorten hours and to raise wages for the shorter week to a living basis.

(9) Not to increase the price of any merchandise sold after the date hereof over the price on July 1, 1933, by more than is made necessary by actual increases in production, replacement, or invoice costs of merchandise, or by taxes or other costs resulting from action taken pursuant to the Agricultural Adjustment Act.

(10) To support and patronize establishments which also have signed this agreement and are listed as members of N. R. A. (National Recovery Administration).

(11) To cooperate to the fullest extent in having a Code of Fair Competition submitted by his industry at the earliest possible date, and in any event before September 1, 1933.

(12) Where, before June 16, 1933, the undersigned had contracted to purchase goods at a fixed price for delivery during the period of this agreement, the undersigned will make an appropriate adjustment of said fixed price to meet any increase in cost caused by the seller having signed this President's Reemployment or having become bound by any Code of Fair Competition approved by the President.

(13) This agreement shall cease upon approval by the President of a code to which the undersigned is subject; or, if the N. R. A. so elects, upon submission of a code to which the undersigned is subject and substitution of any of its provisions for any of the terms of this agreement.

for a stay of such provision pending a summary investigation by N. R. A., if he agrees in such application to abide by the decision of such investigation. This agreement is entered into pursuant to section 4 (a) of the National Industrial Recovery Act and subject to all the terms and conditions required by sections 7 (a) and 10 (b) of that act.

Then there is a little slip, to be taken to the postmaster on August 1st or thereafter, we certify that we have adjusted the hours of labor and the wages of our employees to accord with the President's Reemployment Agreement which we have signed. For this

slip you will be given the insignia of the N. R. A.

T & P Adds Four Air Cooled Diners

DALLAS, July 29.—With the addition of four new air conditioned dining cars to equipment of the Texas & Pacific Railway, this Southwestern line becomes one of the first in the United States to provide cool comfort for its passengers in both dining and lounge cars.

"The new dining cars were made in The Texas & Pacific shops at Marshall and are air conditioned with the same type of equipment that has proven so satisfactory on the T. & P. lounge cars put in service earlier in the summer," Mr. Jensen said.

temperature while the conditioning mechanism also filters, purifies and adjust the air to the proper humidity before introducing it into the car. Air in the cars is completely changed every two minutes. The same system will be used for heating and conditioning air for the Texas & Pacific diners and lounge cars in the winter."

LEGIIONNAIRES TO AID LAW By United Press SPRINGFIELD, Mo. — About 130 American Legion members have formed a new semi-secret vigilance organization to aid in law enforcement here. The group eventually will number 200 men, all to serve without pay.

Ford Motor Company Dearborn, Mich. We do not sell "Talking Points." Henry Ford Dearborn, Mich. When customers write in, as many are doing these days, stating that they have found the Ford V-8 better than we said it was, that is how we prefer it to be. I say this for the benefit of a Ford dealer who chides me for not claiming all that might be claimed in favor of our car. If the people who use our cars every day are not praising them, it matters little what we may say. The last word must be spoken by the car itself, and the owner who tells his next door neighbor how his car behaves in actual service is the only effective advertiser. That is why we do not stress "talking points" in our car. The Ford V-8 is built on principles, not on "points." Most of the "talking points" in motor cars are of little or no importance to the performance or value of the car. Take weight, for example. It is not just a "talking point" with us; it is a basic principle which we keep constantly in mind when we design a car. Weight has much to do with the cost of the car. It costs us money to remove excess weight. It costs you money if we leave it in. When people talk about the cost of running a car—or, to put it in advertising language, "economy of operation"—why do they not give more thought to weight? The more dead weight a car drags around, the more it costs to run. To carry passengers costs very little. It is car weight that runs up the gas bills. If we design an economical engine, and then waste the economy in moving a mass of unnecessary car weight, what has been gained? By keeping weight where it belongs—as trainers do with a race-horse or an athlete—the horse-power per pound of car remains high. To get the most miles and most power out of a gallon of gas, a car should not be over-heavy for its purpose. A quick, responsive pick-up and reserve speed—which means reserve power—requires careful attention to car-weight and strength. The Ford V-8 is not a light car—it is as heavy as its design requires, and much stronger than it need be for safety. But it has no useless weight. Strength has been obtained without dead heavy bulk. What we offer is a car, built to do certain things, and sure to do them. July 28, 1933 Henry Ford
