NUMBER 42

# **Dameron Tells** of Recent Trip

W. H. Dameron, president of the Sonora Lions Club, who returned from Pittsburgh, and other points north, last week, made an exhausted report at the Tuesday luncheon of the Lions Club of the International convention, held at Pittsburgh last month.

Mr. Dameron said that 300 delegates from Texas took part in the convention proceedings, and the group, which sat together during the meeting, was hailed on all sides with "Hurrah for Texas"!

The only mitake the Texas boys made, in the opinion of Mr. Dameron, was in their dress. "While there were a few ten-gallon hats, the badge of the Texas cowman, in evidence, the rest of cowboy regalia was sadly lacking.

"I think the sight would have been more impressive if the boys had been decked out in the regular accepted cowboy style," Mr. Dameron said.

He told of the proceedings of the convention, of its political maneuvers in electing its officers for the ensuing year, and of the many encouraging addresses made by different officials and Lions.

Especially did he stress the importance and standing of the immediate past president, Dr. Walter F. Baxter, among the clubs of the world. "He is one of the brainiest, and the smoothest speaker I've had the privilege of hearing," Mr. Dameron stated.

Alexander T. Wells, New York attorney, was elevated from the first vice-presidency to the highest office offered by Lions International—its president.

George M. Jordan, one of Texas' own sons, became second vice-president, and Karl M. Sorrick, as first vice-president, is in line for the

presidency next year. The "Big Red Band" of Parkersburg, West Va., captured its third

## Doomed Man Is Honored Guest at Own 'Wake'

Death was an invisible guest at a gay party given in honor of Claude Joseph Bradley, pictured at piano, in a Brooklyn, N. Y., club. The affair given by some 200 of "Brad's" friends was an ante-mortem wake for the guest of honor. Doomed by a serious illness, he has only a few weeks of life left, according to his doctors. Undaunted, he jests about his fate and proved his courage by being the "life of the party" at the "wake." The arrow in the upper right points to the honored guest.

## BULLETIN County Surveyor

A telephone message this morning from a Menard hospital to his daughter, Mrs. H. C. Saunders states that her father rested well last night and slept some during the day.

The veteran surveyor is to be taken back to the ranch where he may superintend the surveying job he was doing at the time a tree fell on him, breaking three ribs and bruising a leg.

He has a fifteen-day assignment in surveying at the D. D. Moses Ranch 16 miles from Menard, and feels that his presence is needed.

Here From Ozona

owner of The Ozona Stockman.

## **Breaks Three Ribs**

County Surveyor E. C. Saunders uffered a severe hurt on Wednesday morning about 9:30 o'clock while surveying on the D. D. Moses Ranch, 16 miles from Menard, a large liveoak tree, which was being cut out of the line of survey falling on him, breaking three of his ribs and badly bruising one of his legs.

Mr. Saunders was taken to a hospital in Menard where he was resting well after treatment yesterday, and was expecting to check party as he rested in bed before returning home this week-end. His daughter, Mrs. H. C. Saunders, phoned by The Devil's River News at the home in Sonora, said this Mr. and Mrs. W. E. White of occurrence is the fourth time Mr. Ozona were in Sonora Monday on Saunders has suffered the breaking business. Mr. White is editor and of ribs—the other most recent

Three hundred fifteen thousand fifty pounds of choice spring lamb found its way into market channels last month, including 91 calves, weighing 19,550 pounds; 53 cattle, weighing 21,110 pounds, and 106 muttons, 7,940 pounds.

Three sales, shipment destination not known, were made in June, as

Lee Fawcett, Del Rio, to Joe Moss, Uvalde, 698 lambs, total weight 39,080 pounds; Lee Fawcett to B. W. Hutcherson, 459 lambs, the operations of the surveying Marion Wade, 644 lambs, weight

July weighings were as follows: Elmer Fawcett to Joe Moss, 358 lambs, 17,125 pounds; Elmer Fawcett to B. W. Hutcherson, 223 lambs, 10,865; Mrs. O. D. Finnegan, Del Rio, to C. T. Jones, 91 calves, 19,550; Mrs. Sarah Sessums to C T. Jones, 53 head of cattle weighing 21,110 pounds; J. D. Wallace to Fred Farrell, Fort Worth, 106 muttons, total weight 7,940 pounds.

## ions to Meet in decide the date. Havana in '40

A spirited contest at the Pittsburgh convention between Detroit, Windsor and Havana, Cuba, for the honor of entertaining the 1940 International Lions convention, was won by Havana.

The 1930 census gives Havana 584,893 population. It is the capital and chief city of Cuba. Other cities, probably included in an itinerary at the time of the convention, are:

Santiago, population 143,-446; Camaguey, 84,825; Cienfuegos, 76,951; Matanzas, 65,-

Sonorans Return From West Mr. and Mrs. John D. Lowrey who in company with Mr. and Mrs. Manns Hoggett of Mertzon, have been on an extended visit to western states, returned Wednesday. The party was met in Ozona by Mrs. R. C. Vicars.

# Electric Service

ONE KILOWATT-HOUR

is equal to the muscle work of a man ...

- PUMPING THREE DAYS
- LIFTING WEIGHTS FOUR DAYS
- HAMMERING SIX DAYS
- CARRYING BRICKS FIVE DAYS
- PUSHING WHEELBARROW TEN DAYS
- SHOVELING DIRT ELEVEN DAYS

\*Lifting 65 tons up 4 feet in a

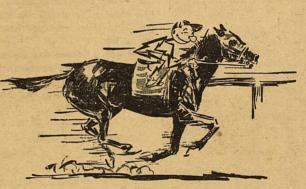

a man's work equals 45 watts, or enough to run small kitchen fan.

a man's work equals 33 watts, or enough for heating pad on "low."

## SPEAKING OF Horse Power

Reddy Kilowatt is one-third stronger

\*Hammering all day-

a man's work equals 23 watts, or enough to run food mixer on low speed.

NE kilowatt-hour equals 1,000 watts of electric This is one-th than one horsepower. There-fore, we say: "Reddy Kilowatt is one-third stronger than a horse." And many times stronger than a man!

A man, for example, hammering eight hours does 480,000 foot-pounds of work. It takes 2,655,200 foot-pounds to make one kilowatt-hour. Thus we learn that the man with the hammer does 18 per cent of a kilowatt-hour's work in an average day. This is equal to 180 watts, or, in turn, 22.5 watts per hour. So it takes a man approximately six days to do the same amount of work that Electric Service does in one hour!

### \*Carrying 16.7 tons of brick up 12 feet in a day-

man's work equals 25 watts,

or enough for small light

\*Wheeling 51 tons up 3 feet in

a man's work equals 12 watts, or enough to run large electric clock.

\*Shoveling 25 tons of dirt up 5 feet in a day-

a man's work equals 11 watts. or enough to operate small radio.

T therefore seems futileand unnecessary—for Men or Women to do work that Reddy Kilowatt can—and should—do. Electric cranes, pumps, hammers, etc., do hard jobs more cheaply and efficiently than men.

Why do Women continue to perform the hard tasks in the home? No one has taken time to figure the foot-pounds of energy she expends in washing clothes and dishes, cooking over flametype stoves, sweeping and other similar distasteful work. Whatever the amount, it's safe to suppose it might be reduced by twothirds if the home was ALL-ELECTRIC.

The average residential electric rate is LESS than 5 cents per kilowatt-hour

\*Based on average wattage generated.

West Texas Utilities Company

BOOK REVIEW: The Migration of American Birds by C. Lincoln. Doubleday Doran: \$4.00.

"The Migration of American birds is the most remarkable ex-Birds" by Frederick C. Lincoln ample of adaption in the animal gives in attractive book form all important information which has been uncovered to date about the movements of our birds. It is so complete and packed with informa- flow of bird life. tion that it will long be a reference work for the serious bird student. It is so readable that persons with find it a splendid addition to their libraries.

Occasionally one reads a book with the suspicion that the author wrote it too soon. But such is not the case with this one. The author has spent over thirty years studying the movements of birds. He is Senior Biologist with the Department of Agriculture, and is in charge of all Bird-Banding activi-

But it is the manner in which Given under my hand and the the information at his finger tips seal of said court, in the town of is correlated and interpreted which Sonora, Texas, this the 1st day of makes the book instructive. Possibly several persons associated with Bird-Banding could have assembled Clerk of the District Court, the facts contained here, but not everyone could have presented these fcats with the clear prespective that Dr. Lincoln does.

After a brief review of what was conjectured and actually known about migration, before Bird-Banding gave the study an impetus, the author discusses the mechanics of migration. This includes speeds of flight, altitude, and the still un- standing stars of the conference 42-4tc solved matter of orientation. At the last season. Invitations have been close of the chapter, in commenting on energy expended, he points out are such headline makers as Davey that long flights do not seem to Appropriation exhaust birds. After all, they normally spend much of their time on Austin, July 31.—Brady Gentry, the wing. "Under favorable condichairman of the Highway Com- tions birds can fly when, where Commission had appropriated tion, except as the result of unusual

> The influence of weather on migration, both day and night, and distances covered, all have chapters. vagrant migration.

The subject of Bird-Banding is thirty pages are devoted to actual banding recoveries from the files of the Biological Survey. These embrace over one hundred and thirty banded species, and each standing addition to the informa-Mr. Gentry stated that this tion we are amazing about migra-

Easily the most useful nad effective part of the book is the discussion of the four flyway systems, which banding has proved the migrating birds use. These are the Atlantic flyway, the Mississippi flyway, the Central flyway and the Pacific flyway. The maps throughout the book, twenty-two in all, are great aids in helping the reader to visualize the interlacing bird movements. There are also twelve pages of color paintings by Louis Agassiz Fuertes.

The only unsatisfactory chapter is the one on Pelagic Migration. As the author states in the opening sentence, "Of all bird migrations, those of the oceanic species are least understood." But even with this in mind, the discussion of birds which live on the sea seems abbreviated and less clear than the other chapters. A world map would make some of the information here more easily digested, if the reader has not a globe at hand. Perhaps another reason the reviewer was slow in grasping this chapter, was because of his own unfamiliarity with the subject.

In the book, a number of fairy tales bird migration, popular with the public, are culled from the facts.

Briefly a few are as follows: There is nothing remarkable about the much publicized migration of the Swallows to and from the California Mission of San Juan Capistrano. The birds are there on the dates of the press mentions, but they do not all arrive and depart on those exact dates.

Hummingbirds do not hitch-hike rides on geese.

Migration does not take place at great heights, but in general below an altitude of 3000 feet.

In migration birds do not travel at high speeds usually accredited to them, but go at a leisurely, normal pace.

Most readers will gain a new re-

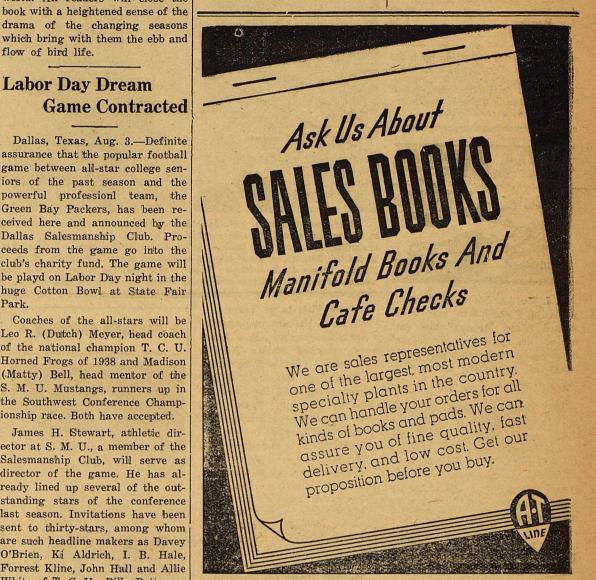

Rhodes of Texas; Dick Todd and Bruno Schroeder of the Texas Aggies; Jake Schuehle of the Rice Owls; Elmer Tarbox of Texas Tech; Darrell Tully and Gene Hodges of East Texas State and others. The Green Bay Packers has the

most colorful team in professional and a better perspective of the football. They were Western champions in 1938 and had the swered. Man will realize for the most powerful passing team ever first time that the migration of congregated.

Largest and fastest passenger ship afloat, 1,018 feet long, weighing 73,000 tons, built at a cost of over \$100,000,000 and capable of furnishing all the energy requirements for a city of 150,000 people, Britain's 'Queen Mary" is justly entitled to be called "Empress of the High Seas." Its twelve spacious decks are served by 21 elevators, include lounges, verandas, play decks, swimming pools, tennis courts, gymnasiums; every facility for comfort. So huge is it that an engineer who witnessed its launching said, "That's not a ship, but a floating continent!"

## No other beer duplicates the Flavor, Body and Quality that make PEARL Famous!

No words can express the awesome majesty which an engineering achievement of this scope commands, except to say it's unsurpassed, peerless, literally impossible of duplication.

That's what taste-wise Texans say about the matchless flavor of pure, sparkling PEARL Beer. Yes! ... PEARL is so delicious, so pure, so downright good, it's truly impossible to duplicate.

For perfection in taste you can't resist, for refreshment that's a revelation, just say, "Bottle of PEARL, please"! You'll like its matchless tang. The reason is in the bottle!

### LOSS OF LIFE IS ONLY A PART OF AUTO TOLL

THE serious effects of motor 1 accidents cannot be gauged by casualties alone, horrifying as these are, J. C. Furnas reports in an article entitled, "Daily Occurrence," in the August issue of rence," in the August issue of Good Housekeeping Magazine. Furnas traces the disastrous aftereffects of a collision between two automobiles in the lives of participating persons who escaped with their lives. These include mental disorder, shock, poverty, increased tax burdens due to the dependency of victims' families, broken careers, curtailed love affairs, wrecked homes, fatherless families and all the depression and mental anguish the depression and mental anguish on the part of relatives, which accompany the maiming of normal, healthy individuals.

"The cold statistics of motoring

death rates have shown marked im-provement in the last eighteen months. But it isn't statistics which get masked and battered," Furnas get mashed and battered, Furnas states. "Human individuals, each with his personal relationship to dozens of other individuals, are the victims."

One of the most unfortunate things about accidents, Furnas goes on to say, is that they occur where everything has been done to pre-vent them. Intersections are marked. Stop signs are plainly set up at crossroads. Roadways are divided by glaring white lines. But drivers continue to approach intersections too fast and drivers on crossroads, in-stead of coming to a full stop at an intersection, merely drop into second gear. People will cross the glaring white line, swing out from behind other cars on hills and make the curve too wide when they turn. Drivers themselves must make the safety effort before it can be really accomplished.

## Statistics Help **Cut Accidents**

### Point the Way for Traffic Law Enforcement and Educational Work.

CHICAGO.—The statistician's decimal point is the traffic safety expert's stethescope and is the master key to prevention of all motor vehi-

Pages of figures, fractions, ratios and summaries on how, when, where, why and to whom motor vehicle accidents occur are vital factors in showing the traffic engineer how to reduce the hazards at a highway curve or a street intersection.

Statistics on types of traffic conditions and drivers involved in traffic accidents point the way for traffic law enforcement activity and edu-

The importance of statistics in the modern traffic safety program was thus described by R. L. Forney, chief statistician for the National Safety council, whose staff toils the year round, collecting and interpreting accident statistics to put a finger on every type of hazard and its relative importance.

"The need for better traffic accident statistics becomes more and more acute as state and local safety programs eliminate the more obvious hazards and types of careless drivers," Mr. Forney said.

### Careless Pedestrians.

"Driver's license laws are removing the grossly incompetent drivers from the highways. Improved street lighting is reducing night accidents. Statistics which show that 40 per cent of all traffic fatalities are suffered by pedestrians has resulted in recent official action by the National Safety council to reduce and eliminate the contribution of pedestrian carelessness to traffic accident

"But even after these more obvious causes are brought under control, accidents will continue to occur and it will be necessary to probe deeper for the causes. I believe accurate, complete statistics and records are the only means that will provide a clue to the less obvious but equally dangerous accident causes."

Mr. Forney illustrated his point with reference to many studies and experiments going on in psychological, medical and psychiatric laboratories to determine personal traits. and physical defects of drivers and pedestrians that may provide the answer to otherwise unexplainable accidents. This experimental work, he said, will be relatively useless unless it is reduced to statistics and records and made available to accident prevention organizations.

"There is, however," Mr. Forney said, "no national pattern of a typical traffic accident. Each accident has a pattern of its own, peculiar because of the persons and vehicles involved and because of the location. A dangerous intersection may require entirely different engineering treatment than an intersection in another city that produces approximately the same number of acci-

## Statistics Necessary.

"Local police and street engineer are handicapped severely if they do not have the statistical record and pattern of every accident that occurs at a given location."

As an indication of how little is known about traffic accident experience in some localities, Mr. Forney pointed out that several states and many cities do not even have laws or ordinances that require a traffic accident to be reported to local police, coroners, or anyone else.

"Records in every city and state should reveal to local authorities the answers to such questions as: How many were pedestrians? How many of the accident-drivers had been drinking? What is the ratio of accidents in business districts to those in residence areas? How many occurred at night, during the fog or rain? How many came at intersections in comparison with the total on straightaways? What was the degree of traffic congestion? Was either car turning right or left?

"Armed with this and other statistical information the police, engineers and educators can proceed directly to correct the trouble at its source."

### Kerchief on Display at Harvard as True Crimson

CAMBRIDGE.-The official Harvard crimson kerchief, adopted in 1910 as the standard of the college color and since kept on deposit in university archives, is on public exhibit at the Widener library.

The silk kerchief first was worn by a member of Harvard's 1858 crew. Because of the distinguishing "arterial blood" shade, similarly dyed kerchiefs were worn in ensuing races. In 1910 a duplicate of the 1858 kerchief was made and adopted to "standardize the crim-

Also on display is the football uniform worn in the seasons of 1875, 1876 and 1877 by W. P. Lombard, class of 1878. It consists of a woolen skull cap, flannel trousers and knitted jersey sweater.

## Party Will Explore Long Sunken City

St. James Plunged 300 Feet in 1680 Earthquake.

TAMPA.-A party of adventurous Americans, headed by Capt. Robert Hall of Detroit, is bound for the West Indies, where they hope to explore the submerged city of St. James, sunk 300 feet beneath the sea during an earthquake in 1680.

"When the earthquake struck suddenly virtually every inhabitant of the town was lost under the sea, and a vast wealth is said to have gone down in the city," Hall ex-

Hall said the party, composed of Jack Browne of Milwaukee; Rupert Conrad, Detroit artist; George Lawson magazine illustrator; and James Murdock and Jack Callouette, students at the University of Michigan, would collaborate in preparing a book describing their explorations.

Browne manufactures helium selfcontaining diving suits, which will be used to reach the submerged city. He said divers had descended successfully to a depth of 420 feet in the suits, which have no air tubes attached and are lowered to the ocean floor by a cable containing a telephone wire for communication.

The city of St. James formerly was the capital of St. Kitts island in the Lesser Antiles:

According to Hall, the coral-encrusted walls of the town are visible from the surface during a calm sea. Equipment placed aboard the motorship Albee when the party left Tampa included five undersea cameras, undersea compression gun, all deep-sea diving equipment and div-

Hall said that they planned to examine several submerged wrecks during the voyage to the West Indies, arriving in the vicinity of St. James late in June.

## Beautiful Greek Head Is

Unearthed by Expedition TEHERAN, IRAN.-A beautiful Greek head in white marble was recently found during excavations at the Shushan of the Bible, which was one of the greatest cities of the ancient world. This season's excavations have now been com-

The capital of the vast Persian empire under Darius the Great, Susa was captured by Alexander the Great and its fortifications were destroyed centuries later by Arab invaders. It was long famous for its wealth.

The area on which the excavations are being carried out includes the palace described in the book of Esther and covers some three square

In addition to the Greek head, a large number of vases, arms and household implements dating back to many epochs in the history of Susa have been found. All these objects have been sent to Teheran.

### Young Swedes Plan to Probe Baltic's Depths

STOCKHOLM, SWEDEN. - Two young Swedes are preparing to make a descent to the bottom one of the deepest parts of the Baltic sea some time this month.

They are an engineer named Syen Otto Plazer and an architect named Walter Nathanson. They have a steel globe practically ready for their venture.

The place they have selected for their descent is off Landsort-considered to be the deepest spot in the Baltic with a depth of about 230 fathoms

The globe is provided with windows from which observations can be made and photographs taken. The exact details of the interior have not been made public, but it is stated that the two men will be comfortably accommodated. The intention is that the globe shall not be attached to any line, but will be free to roll on the bottom.

## Dinner's Always Ready,

Thanks to Pigeon Post LONDON.—"Fed-up" with not getting his dinner on time when he arrived home from work, William Ramsay, a Tilbury, Essex, bus conductor, has found a way out.

Now every day he takes a pigeon to work with him, and shortly before leaving at night he writes a note to his wife, saying when he expects to reach the house.

Then he ties it to the pigeon's leg and releases the bird.

When it arrives, Mrs. Ramsay knows exactly when to have dinner ready.

### Native Goes to Jail To Spite Government

SINGAPORE. - A Dyak, descendant of the former much-feared head-nunters of Borneo, went to jail to spite the govern-

The Dyak was accused of possessing illicit contraband opium and pleaded guilty. To the court he explained that he had been so annoyed with the government for giving him notice to quit his land for nonpayment of taxes that he decided to sell contraband opium in order to get caught and sentenced to prison, where he would live free for a few months.

## Mining Town Is Defends Ghost at Last

### Only Shacks Are Reminder Of Old Boom Days in Wyoming City.

SOUTH PASS CITY, WYO.-Wyoming's newest ghost town, South Pass City, has only a few weatherbeaten frame shacks to remind visitors of the days when it boasted of a population of 5,000 gold-hunters, pioneers and gamblers.

Abandoned more than 30 years after the rest of the state's famous early-time mining camps were deserted by their nomadic settlers, South Pass City is surrounded by several booming modern mining camps. It lies near the crest of the Continental Divide on the old Oregon Trail, 60 miles northeast of Rock

In 1860 when the gold rush began, Easterners and Mid - Westerners flocked to the almost-virgin wilderness of Wyoming. Ore was found in large quantities, and the rapid influx of gold-seekers continued.

### Wind All That Remains.

Gamblers, bartenders and dance hall girls followed so that by 1865 South Pass City was one of a score of rip-roaring mining towns, echoing to the clink of picks and shovels on rock, the blaring music of honkeytonk dance halls, the bark of sixshooters and the whine of the wind. The wind is all that remains to disturb the quiet of the hastily-constructed boom town.

In 1878, with the decline of metal markets, the rest of the roaring frontier communities became ghost towns. The miners, gamblers and entertainers moved on to more lucrative fields.

South Pass City, however, survived, although most of its residents departed. When modern methods were introduced in the 1920s, several large mining firms established themselves near the once-famous town to extract an estimated \$500,000 in gold ore from the surrounding hillsides.

### Hung On for Time.

The little town retained its post office and place on the map while other communities of its kind were remembered only in name.

Other ghost towns of the state some marked by a few staggering frame shacks, still others torn down by the elements and settlers, include Cambria, in northeastern Wyoming near Newcastle; Battle, south of South Pass City in the Medicine Bow National forest; Rambler, two miles south of Battle; Eadsville, atop scenic Casper mountain, and Lavoye, in the Salt Creek field in Natrona county.

## National Parks to Offer

More Camping Facilities SAN FRANCISCO. - Americans are rapidly becoming camping conscious, according to Julian H. Salomon, national park service camping specialist of Washington

On a tour of the California camping sites, Salomon explained this phase of the national park service's work as follows:

"It was assumed," he said, "that there were numerous agencies in the country interested in camp operations if they could be assisted in obtaining suitable sites and facili-

"It was also thought that smaller agencies operating camps would be able to pool their efforts if offered improved facilities to encourage better service.

"As a result, through consultation with local agencies, camp develop-ment was studied thoroughly from the viewpoint of the committee's needs. Out of these consultations came organized camping for family boys, girls, educational and other groups utilizing facilities carefully planned to provide the greatest use at a minimum cost."

Salomon said that in 1936 there were only nine camps in operation in the United States with a total of 37,310 camper days.

For 1938 these figures were increased to 49 camps with a total of 376,173 camper days.

The service expects to have at least 60 camps in operation with a probable total of 60,000 camper days

## Matrimonial Agency Is

Operated From Prison COLUMBUS, OHIO .- The operation of a matrimonial agency known as the "Idealist club," from Ohio penitentiary, was disclosed today with suspension of S. M. Current, a Bertillon officer.

Current, whose job it was to take photograph, fingerprints and measurements of prisoners, had been engaging in the matrimonial enterprise on his employers' time, Acting Warden William F. Amrine said. He was suspended 30 days.

One of Current's matrimonial circulars read:

"Our sole aim is to help you find your ideal and we do not cease in our efforts until the desired goal is reached. Send in the enclosed membership application today and let us start working for your happiness at once."

Mayor by Night ERITH, ENGLAND. — Rev. J.

W. Wilkinson, mayor of this town, has so many evening engagements to fulfill that he describes himself as a "night-mayor."

(Continued from page 1)

accidents. The percentage: 51/2 per

A simple subtraction shows the ladies well ahead in safety honors. Men say a woman driver signals

by sticking out her hand and crossing her fingers. They say she is unpredictable in her actions and inclined toward "wheel temperament"-that is, she is liable to become confused in a tight place and "blow up" instead of working the problem out. They say she window shops when she ought to be watchng the traffic.

One man, the husband of a woman driver, is the life of the party when he remarks, "I can look at every parked car in a given area and tell whether it was driven by a man or a woman." There is always someone who plays rear view mirror is trained on the mirror slants toward the wheel, the driver was a woman."

Perhaps a woman does dab a oit of powder on her nose now and then as she drives; there is no need to assume she does so at 60 miles

An what about the reported case of a traveling salesman in Texas who shaves as he drives by plugging in a six-volt electric razor at the dashboard?

Admitting that generalities are reason for the argument that women as a rule are better drivers than men-a reason deeply rooted in their nature: Women haven't a man's gambling instinct and hence they don't take the chances that a man will. The spirit of self-preservation still dominates her actions as much as it did in an earlier day when she stayed at home with the cook stove and the kiddies and sent a great, big, strong man out to fight her battle for her.

## WITH THE BOY SCOUTS

## Big Bend Trip

Frank Barney announces the Big Bend Trip will start tomorrow at 7:30 a. m. The route includes points of interest as Texon, Fort Stockton, Balmorhea, Mount Locke, Marfa, Alpine, Chisos Mountains, St. Helena Canyon, Terlingua Mines, exploration trips to Boquillas and the primative Indian cave expedition into the mountains of interior Mexico some 1200 feet above sea level. (Weather and fording of the Rio Grande permitting.) The base camp is in the Chisos Mountains.

Explorer Conference-Regatta

event at Lake Nasworthy, San Angelo, for September 1, 2, 3. The event is scheduled just before school starts so that many of the Senior Scouts holding jobs will have an opportunity to Trails Council and Regional Sea Scout Commodore. Harold Broome, Commodore of the Concho Valley Council, is making local arrangements Joe Lindle will arrange the Exolorer Scout events. All Sea Scout Ships and Explorer units are invited. The program will be announced to leaders as soon as com-

### Special for Scout Leaders

Only five vacation weeks remain for summer activities. Most programs for August have already been planned. Prepare for an early September round-up of all Scouts and start a recruiting campaign, the stooge, giving this man an as many boys have been gone for opportunity to explain: "If the the summer and many have become 12 years of age this summer. road, the driver was a man. If the Do you know that five new boys in each Troop and Pack in the Council would enable us to overshoot our objectives for this year? Vacation time will be over and the Scouts will all come back if we get started with an interesting program before other interests take their time. We all want to be winners, so let's get off to an excellent

### Red Cross Training Session

dangerous, there is still a basic Southwest for a 15-hour training supper with parents.

Preliminary arrangements are session in life saving and water being made for a Senior Scout safety August 15-19. This is an unusual opportunity for your Troop to have some leaders become skilled in this most important branch of Scouting. The Municipal swimming pool will be used, and no charge will be made. Roger Plaisted, representative of the National Red Cross, will conduct the instruction, assisted by local

### Trails To Citizenship

The Activities Committee has announced the major activity of the fall and winter will be "Traffic to Citizenship." This is a display of all phases of Scout activity, usually held in a vacant building, church, hotel or in windows of the business district. Included will be demonstrations of advancement from Tenderfoot to Eagle ranks and local projects. The demonstrations will be made by Patrols and will progress from communities to districts, with the Council-wide Trail being held in April or May in San Angelo. This will replace the Circus, the outstanding Council-wide event for the last three yeras. The Winter Garden District outdoor Circus for the southern division of the Council will be held in early December at Carrizo Springs.

### Cub Day Camps

The San Angelo Cub Day Camps scheduled for July were cancelled for various reasons. They will be held th month of August, probably on alternate Thursdays. These day San Angelo will be host to Scout camps include demonstrations of and Red-Cross leaders from the games, stunts, swims, and a picnic

## THE RECORD ... Facts That Concern You

# \$2,132,891.90 TO THE RESCUE

AND that's just the beer tax revenue this state itself collects... to lift the burden of direct taxation from your shoulders. Nationwide, beer contributes over a million dollars a day to the cost of government. Think what that means in paying for relief, in public works, in old age assistance right in your own community.

Then think of the million new jobs that beer made. And then add to that a 100 million dollar market for farmers' crops!

How can we keep these benefits . . . for you and for us? Brewers of America realize this depends on keeping beer retailing as wholesome as beer itself. They want to help public officials in every possible way. They cannot enforce laws. But they can—and will—cooperate!

May we send you a booklet telling of their unusual self-regulation program? Address: United Brewers Industrial Foundation, 19 East 40th Street, New York, N. Y.

\*Data from Liquor Control Board, includes beer license fees and estimate I not official) of mixed license fees.

BEER ... a beverage of moderation

### BAY STATE FARM IS AUTHOR'S HOBBY

Martha Cheavens and her children

MARTHA CHEAVENS whose first novelette, "All Ye Martha Cheavens lived in many for-

Faithful," appears in the August issue of Good Housekeeping Magazine, is a farmer by preference. She and her husband, Hugh J. Schuck, and their children, Nancy and Hugh, live on a farm in Massachusetts, replete with a brook and deer tracks in the garden.

Martha Cheavens lived in many foreign places. At the age of four months she was taken to Mexico by her parents. Her father served as a missionary in Mexico for fourteen years. Her husband's first assignment after their wedding took them to Japan. Mrs. Schuck likes writing, children, growing things and the American scene.

The advertisements will own actions on the streets and progress in the field of traffic safety will be made in Texas.

> "There are none of us who would willingly or viciously kill or maim a little child. Yet through thoughtlessness and carelessness on the part of some motor vehicle operators, hundred of children are killed or injured annually. Many of our finest and most valuable citizens are brought to an untimely death in needless traffic mishaps.

> "The press of Texas has played a prominent part in the past few years in making Texas safety conscious and newspaper editors and publishers have given generously of their time and space in the safety movement. It was with the thought of making the efforts of the newspapers along this line more effective that the two official state agencies and the Good Roads Association joined in this movement. The plan was unanimously endorsed at the recent convention of the Texas Press Association and we have been assured of hearty co-operation from the newspaper publishers."

### CAREER INVESTMENT URGED BY EDITOR

ASH savings in the United States are set at \$69,000,000,000," says W. F. Bigelow, editor of Good Housekeeping, in the August issue of the magazine. "Billions upon billions of this cash "Billions upon billions of this cash are idle, earning from nothing up to 2%. Millions of those who have saved it could easily spare enough to make the dream of a college education for some boy or girl come true. There is no better investment than buying a future for an ambitious young life."

Bigelow quotes statistics from the Berry Schools, Mount Berry, Ga, regarding the small amount of money necessary to see an ambi-

money necessary to see an ambi-tious boy through a year of college.

Buy it the economical way: by the ream (500) sheets. At the

## Baseball Now Is Big Business

Staggering Figures Appear On Economic Side of National Game.

WASHINGTON.-While historians and pseudo historians are quarreling over the origin of baseball, statisticians reveal staggering figures on the economic side of the game. or spectators. So strongly has the game caught the fancy of the counbleachers, or sipped "pop" in the cool of the grandstand.

says the National Geographic soci-

pare, for instance, the open fields and the later board fence enclosures where the early game was played, with the egigantic base-ball stadia of steel and cement now in every large city.

Runs Into Millions.

franchises, are valued at \$20,000,000, and that figure does not include the \$4,000,000 municipally owned stadiium used by the Cleveland American in New York was the most costly, topping the Cleveland plant by \$1,000,000.

'Like any other business enterprise, baseball has its ups and downs. Attendance figures do not assemble this year or last year, but in 1932 when 73,592 attended a game in Cleveland. Last year, however, was a banner year for spectators at a double-header when 85,421 people dium. This attendance was in striking contrast to the 'gate' at the first commercial game which was witnessed by 1,500 spectators.

"In the early days of baseball clubs, members were required to be in good standing for a month before and may then play on a new team immediately after he is acquired. The record price paid for a player in all the history of baseball is

"The cost of running even an average big league team would amaze those under whom they claim have the throng passing through the turnstiles at any ball yard. The salaries alone of players and employees, numbering about 300 when same, using and enjoying the same, a team is at home, amount to about for a period of more than ten years season. Then there are additional expenses of about another quarter million. This latter figure includes such items as six dozen baseballs and two dozen for an equal number

of games away. Make 7,000,000 Baseballs.

"In 1937 nearly 3,000,000 bats, were manufactured to keep up with the demands of baseball. And manufacturers made more than 7,000,000 baseballs. Covers for the balls are ern developments in the manufacture of baseball equipment. Horsehide covers largely come from

"The first amateur association of dren of Mrs. Lillian Rudicil, are baseball clubs was organized in 1857 and the first series of games was seventh interest, except the said played the next year between teams from New York and Brooklyn at Flushing, N. Y., near the present World's fair grounds.

"The first intercollegiate game was played July 1, 1859, when Amherst college defeated Williams college at Pittsfield, Mass. The score was 73 to 32-large figures compared with scores of today, but in those days scores of more than 100 were not uncommon.

"Every large city in the United States has a dozen or more baseball clubs. Nearly every college has a varsity team. In rural communities baseball is a favored pastime. Six million spectators have witnessed American league games alone in one year. Add to that the turnstile figures of the National league and scores of lesser leagues, college game spectators, and the fan line at thousands of free amateur 'sandlot' games and you will arrive at a figure that may almost equal the population of the United States."

Killed by Electricity

IONIA, MICH.—Stephen Ludwick, 68 years old, was killed when a pipe he was pulling from a well touched an electric wire. William Baker, at whose home the accident occurred, was hurled several feet by the shock.

# Sonora All Stars Wins Twin Bill

By JIMMY MORGAN Last Sunday afternoon at 4 o'clock the Sonora All Stars rallied to defeat the Sons of the Legion, San Angelo, in both ends of a doubleheader here. The score of

second 7 to 6. This writer was not present at the first game to write about it but just in time to witnessed the

the first game was 6 to 5 and the

beginning of the nightcap. Hubert Fields was the local batting star when he hit a long home run into the deep right center field scoring G. W. Archer who had singled ahead of him in the fourth inning. This homer enabled the locals to take the lead until the seventh when the Legionnaires rallied to score five runs to tie up the ball game.

When the locals take turn at the plate in that half of the seventh, Eddie Archer, ace of the pitching staff, did the damaging. He swatted a lucky double down to the right an opportunity to take part in the field foul line, went to third on a wild pitch and beat the throw to the plate on an infield tab which broke up the ball game.

Cubs	4 1	.800
Yankees	5 2	.714
Athletics	3 6	.333
Giants	1 4	.200

### Dameron Tells—

(Continued from page 1)

Lions International annual band festival championship. Second place went to the high school unit from Gladewater, Texas. This musical organization was the official band for the Lone Star State delegation.

The "Tucker Twins" of Winters, Texas, although not officially entered in the musical contest, carried off eighth prize. Through the influence of Ross S. Covey of Sweetwater, the young ladies were given musical festival.

Mr. Dameron explained the robbery of the Texas girls. He stated that it was through a "wolf in Lions clothes" that the misfortune befell. The marauder was caught, however, and the jewelry and money taken from the twins' room in their absence was returned to them. This masquerading "Lion" robbed a number of the hotel rooms, Mr. Dameron said.

He also mentioned the parade, three mile long, which was witnessed by two hundred thousand people.

A program prepared for Tuesday's luncheon, composed of three speakers upon one of the "burning" questions of the year, was called off. One of the speakers was absent. At a later date the same entertainment will be presented, according to one member of the program committee.

Ben L. Wheat, ranchman, was the only guest present.

### PARTY RETURNS MONDAY FROM CINCINNATI TRIP

Mrs. W. E. Caldwell, Mr. and Mrs. W. B. Dunn, of Forsan, and Miss Thelma Rees returned Monday from Cincinnati, where they had been attending commencement exercises of the Cincinnati Conservatory of Music.

Miss Elizabeth Caldwell, who received her Masters degree there, and her brother, W. E. Caldwell, Jr., stopped in Kansas City for a visit, and are expected to return here the last of the week.

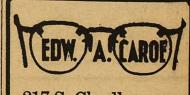

Mrs. Caldwell visited for a time with a cousin in Oklahoma City and also in Wichita Falls with a friend, before returning here.

The group reports a wonderful trip, and Mrs. Caldwell remarked about the big trees, and said how beautiful she thought they were.

### W. J. FIELDS, JR. IN LAMPASAS HOSPITAL

Saturday in a Lampasas hospital by W. J. Fields, Jr. He was accomplain. He expected to find much of the tonography similar to that of Fields went there and remained until Monday; Mr. and Mrs. Alvis Johnson spent Sunday in Lampasas visiting with him.

Mr Fields condition is reported pected to be brought home the middle of next week.
