Present Range Condition Said 'Tailor-Made' For Grass Fires

The continued hot, dry weather has created a situation that is "tailor made" for grass and range fires. Grass and other plants along the highways, in parks and pastures and ranges are all tinder dry and there are a lot of ways fires can get started. However, just plain carelessness or failure on the part of people to observe the rules of safety as they relate to fire account for a majority of the destructive grass fires.

The State Farm and Ranch Safety Committee of Texas, headed by J. Walter Hammond of the Texas Farm Bureau Federation and E. C. Martin of the Agricultural Extension Service are strong in their plea for every citizen of the state to join with them in conducting a campaign to hold down grass fires. They point out that the livestock industry of the state is basically dependent upon the grasslands of the state for its existence. A livestock producer without grass for his cattle is fighting a hard battle with a short stick. A blackened range caused from a fire that was started by a carelessly thrown cigarette, cigar or match can put a producer or producers out of business. Most would not be able to purchase feed to maintain their head over any considerable period of time.

The nation needs every pound of meat that can be produced, says the committee leaders, and grass is our cheapest source of livestock feed. It must be protected. They urge the organization of community and county groups for combating grass fires. The local neighborhood groups should be coordinated on a community and county basis so that if necessary, an effective fighting force could be gotten together in the shortest possible time in case of a major outbreak.

Ranges should be protected by fireguards. Hazards that might possibly cause fires should be eliminated. Glass bottles have started many fires. They act as a magnifying glass and when the sun's rays reach the proper angle, almost any bottle may concentrate the heat from the sun sufficiently to ignite dry grass.

Fires, for any reason, should not be started, says Hammond unless they can be controlled. Trash should be burned in a closed incinerator so as to eliminate the possibility of starting a grass fire.

Motorists are urged to snuff out the fire on cigarettes or cigars before tossing them onto the highway. Many fires are set by motor-

ists who never know what they have done for they are usually miles down the road before the fire is discovered. Those who drive in the country are urged to be on the lookout for fires and should report them when found. A small fire can usually be put out before it has a chance to spread, while on the other hand, if permitted to go unchecked, it may be out of control before it is discovered.

The leaders think the situation is critical enough in many sections of the state to warrant the beginning of a widespread campaign and warn that the next big fire may be right in your community unless steps are taken to prevent or put out a fire should one get started.

GLUTEN FEEDS GIVE GOOD RESULTS IN STEER FEEDING

Sorghum gluten meal and sorghum gluten feed gave good results in the 1950-51 steer fattening trials at the Beeville unit of the Texas Agricultural Experiment Station.

Sorghum gluten meal was equal in value to cottonseed meal as a protein supplement in this experiment, according to E. M. Neal, assistant animal husbandman for the Beeville substation.

It was profitable in this test to use sorghum gluten feed as a replacement for cottonseed meal, gluten meal, or sorghum grain. Neal pointed out that gluten feed can be used to better advantage in combination with cottonseed meal and sorghum grain. Steers fed gluten feed as the only concentrate were below average in gain and grade.

Feeding three pounds of protein supplement instead of two pounds of supplement and one pound of grain per day did not increase the gain of the steers. The feed cost, however, was increased, since grain was the cheaper feed.

The results of these feeding tests are given in Progress Report 1386, which is available from the Publications Office, Texas Agricultural Experiment Station, College Station, Texas.

Bobby Allen, son of Mr. and Mrs. Ford Allen, was home for a few days last week. He has been attending the University of Colorado this summer and plans to return to Rice Institute this fall.

Joe Morrison is ill at home this week.

Elliott School Opens Tuesday

The L. W. Elliott School will open Tuesday, according to Carl W. Jones, principal. Jones said opening ceremonies will be held Tuesday morning at 9 o'clock in the school auditorium.

Following this students will go to their classrooms for textbooks and assignments.

Park Association To Hold Race Meet In Sept.

The Sonora Park Association will hold its annual race meet here September 28, 29 and 30, according to A. B. Hightower, chairman of the publicity committee.

Seating capacity at the track is being doubled by the addition of new stands and a permanent top is being constructed. The bill, estimated at \$5,000, is being paid by the Sonora Lions Club and the Park Association on a fifty-fifty basis. Permanent pens are being built under the stands and next year's Lions Club auction sale will be held at the track. The stands and pens will be available at no cost for any show or project considered beneficial to the community. Members of the building committee are R. M. McCarver, S. M. Kerbow and H. M. Smith.

Student Council To Hold Opening Day Program

The opening day program for the high school will be under the direction of the Student Council this year. A general assembly for all students in the Sonora schools will not be held.

Billy Scott will make the welcoming address and discuss the remodeling program completed at the school this summer. Inez Chalk will explain new student council rules passed by last year council. Jack Ratliff, president of the council, will report on National Association of Student Councils convention in Boston this summer.

The introduction of the faculty will complete the program.

F. B. I. Looking For Commie Gus Hall

The FBI has requested the assistance of alert citizens and law enforcement agencies in locating Gus Hall, National Secretary of the Communist Party, U. S. A. He is one of the Communist Party leaders who have been convicted of the Smith Act and are presently fugitives from justice. A description of Hall is as follows:

Age, 40, born October 8, 1910, at Virginia, Minnesota; height, 5' 11"; weight, 220 pounds; eyes, blue-gray; hair, light brown; complexion, fair; build, heavy; race, white; nationality, American; scars

GUS HALL and marks, small scar on left thumb, two pockmarks on left cheek, mole on right side of neck.

Hall sometimes wears a mustache. He leans forward at the shoulders when he walks, drinks large amounts of coffee and usually rests his elbows on the table holding the cup at lip level. He laughs easily and is described as being rather boisterous. He speaks in a husky tone but as a high pitched level. He seldom wears a hat. His eyes have a staring appearance. He likes to hunt, fish and play golf.

Any person having information which would assist in locating Gus Hall is requested to immediately notify the nearest FBI office. The phone number will appear on the first page of the phone directory.

Mrs. Jim Cauthorn was in Del Rio this week visiting her mother Mrs. G. C. Earwood.

TEXAS CATTLE SHIPMENTS DROP DURING JUNE

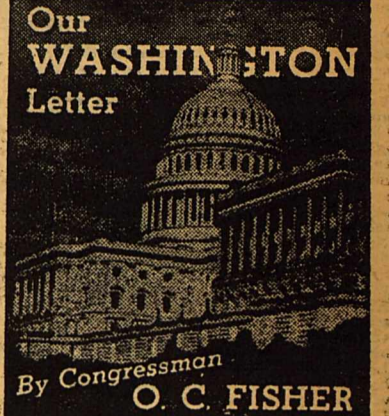

Texas cattle shipments decreased 46 per cent in June, the Texas Bureau of Business Research reports. The cumulative total for the first six months of 1951 was 3 per cent below that for the like 1950 period.

CORRECTION

The correct name of the son of Mr. and Mrs. Van Hardesty is Randle Van. The name was misspelled in last week's edition.

Funeral services for Miguel Gonzales were held last week from St. Ann's Catholic Church, the Rev. Cyril Hermann, O. F. M., officiating.

Attend SOME Church Sunday.

Last week I got away from the grind of Capitol Hill for a few days and kept some engagements I had previously made in the district. It is always inspiring to be able to get home and visit and talk with the people. There has been little chance to do that this year.

While in the district, I attended an annual meeting of the members and families of the Runnels County Farm Bureau Federation, held at the park in Ballinger. A big crowd turned out and there was an abundance of hospitality, old-fashioned barbecue, and oratory. County Judge Grindstaff and Rep. Henry Rumpy were among the speakers and both gave interesting reports on the County and State governments, taxes, finances, rural road and other problems. Mr. Rumpy is Chairman of the House Appropriations Committee in Austin and is considered one of the most important Members of the State Legislature.

In my talk there I called attention to false and misleading reports to the effect that the farmers are responsible for the high cost of living. The fact is that according to government figures, the farm income has dropped a total of 27 per cent each year since 1948, while the national income has increased by 16 per cent during the same period.

As example of this, I reminded that wheat has dropped from a post-war peak of \$2.81 a bushel to a recent figure of around \$2.00. Corn dropped from the \$2.46 to about \$1.50 during the same period and hog prices slumped from a peak of \$27.40 per hundred pounds in 1948 to a recent quotation of \$20.00. Milk was another example given.

Yet, despite the reduced prices to producers, retail bread prices went up, milk is costing consumers more, and many other examples of this were given. Certainly, farmers-who, in general are getting less-are not responsible for these increases in consumer prices.

Actually, only about a half-dozen farm products out of more than a hundred were above parity this year. These have included beef, cattle, wool, cottonseed, lambs, soybeans, rice and cotton, and some of these other commodities have recently dropped however.

It appears that increased costs of marketing and distribution account for most of the higher prices paid by consumers. Secretary Brannan recently disclosed that in January of 1951 a typical market basket of food for a family of three was costing at the rate of \$709.00 a year. Of this amount, marketing costs accounted for \$352.00, while the warmer received only \$357.00.

The annual community get-together and picnic of the Winters Volunteer Fire Department was held on Thursday night of last week also drew a large crowd, as is always the case. My visit there was my first since the big oil development which puts Winters in the midst of a high oil field. Following the program I drove west through Willmuth to the farm home of my friends, the Tod Richards, who were celebrating their 50th Wedding Anniversary. These pioneers have been pillars of strength and inspiration in the community where they have lived. They fed and entertained nearly a thousand of their friends and neighbors on the occasion of their anniversary. Many Happy Returns to them.

It was my privilege to address the ladies of the First Presbyterian Church in San Angelo while there, and on Friday evening I drove to Kerrville where I spoke to a large audience of Kerr citizens who assembled at the Schreiner Institute auditorium. The meeting was sponsored by the "We The Citizens" organization there. The program being in charge of Johnnie Hill of Ingram and Col. Parmalee (Ret.) Commandant at Schreiner. The "We The Citizens" group is composed of leading citizens of Kerr County with the lofty objective of fighting communism and promoting good government and good citizenship. They are doing a good job.

North Concho Dam Dedication Set For Sept. 16

San Angelo, Texas, August 1951 (Special).

Formal dedication ceremonies will be held for the North Concho Dam and Reservoir at San Angelo September 16 on the eve of the 15th anniversary of the San Angelo Flood.

Ceremonies will mark the completion of a 16-million-dollar flood control dam for the Upper Colorado River Authority at the north-western edge of the City.

State and federal dignitaries are expected to attend the dedication which will be held on the down stream side of the dam at 2:30 p.m. Tour of the seven-mile dam is planned to climax the ceremonies.

The dam will create a permanent lake covering 5,440 surface acres. It will hold 114 thousand acre feet of water, of which 80,400 acre feet will be subject to gravity flow diversion through conduits placed in the outlet works.

Construction of the dam began in May 1947, when a construction company started on the earth embankment. A project of the U. S. Corps of Engineers, the dam was constructed for flood control and water conservation.

Attend SOME Church Sunday.

IT'S A FIREBALL ENGINE

You never tried a fine car like This One

YOU've a right to set your sights higher when you buy a fine car.

You can rightly expect more room—more comfort—more performance—and a lordly smoothness in the way it carries you.

So we present these facts:

You'll find, in a ROADMASTER, more usable room than you'll find in any other six-passenger car in America.

You'll find the extra comfort of double-depth Foamtex cushions in ROADMASTER only.

You'll find that the ROADMASTER has a high-compression, valve-in-head power plant that is also exclusively Buick's—a mighty Fireball Engine

endowed with more performance than most owners will ever need.

And you'll find that a ROADMASTER rolls with unsurpassed levelness and poise, thanks to coil springs on all four wheels—which is still another feature found on no other car in the fine-car field.

But the thrill that is yours, when you get this willing beauty out on the open road, is something that can't be summed up in any listing of features, one by one.

It's a "feel" which, we honestly believe, no other car can approach.

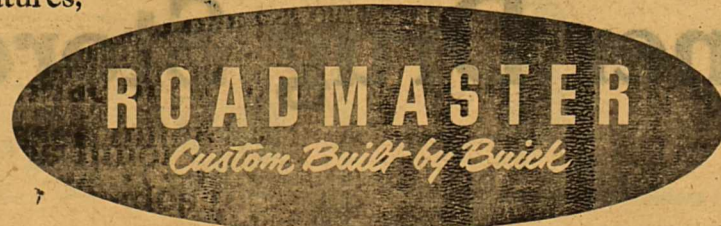

It's the sure way this dazzling

performer holds the road—the way it responds to your slightest wish—the quick answer you get when you nudge the throttle—the extra security you feel in the velvet grip of the brakes—the complete freedom from tension you find in Dynaflo Drive—the sense of mastery that makes every mile a joy.

And, confidentially, there's one more important way in which ROADMASTER stands alone, and that is in the modest cost of its pounds and performance.

Better come in soon and check for yourself what a great car and a great buy this one really is.

Equipment, accessories, trim and models are subject to change without notice.

The wisest truckers in town rarely come to us for major repairs.

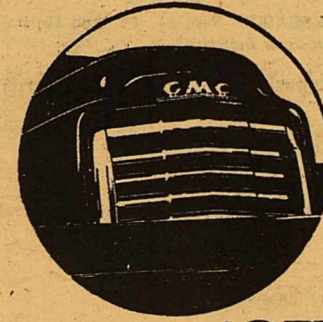

That's because they make a practice of turning their equipment over to us at regular intervals—let us catch the "little things" that go wrong before they can eat away performance and run up operating expenses.

We specialize in giving truckers more "run" for their maintenance money. Our repair department is staffed by veteran mechanics who know how to arrest truck

troubles before they mushroom into full-grown breakdowns!

The service is fast, the work done right—and the savings? 3-Way Thrift for truckers! You (1) cut down the possibility of costly repairs, (2) get better performance with less "down time" and (3) get more years of service from the trucks you now run.

Isn't that mighty important to you today?

Get more "run" for your money!

YOUR HEALTH

The Texas State Department of Health cannot maintain daily inspection of all eating places and the public is urged by Dr. Geo. W. Cox, State Health Office to insist on the proper sanitation of the establishment where they eat. It

the public is careless in this respect the incentive to maintain clean food service will be lessened and operators will only maintain the level the public is willing to accept. He urged that the public patronize "eating establishments which measure up to a high standard of cleanliness."

The State Health Department is making every effort to improve sanitation of eating places, Dr. Cox said, and there is "no excuse for cafe owners not taking advantage of the food handlers schools which are being offered all over the state." He added that there are laws, rules and regulations which require the use of approved equipment and methods in such establishments.

"The public should be aware of these sanitary rules and regulations and insist that restaurants observe them. Patrons should realize that tables and counters will be many time cleaner than the kitchen and other places out of sight," he warned.

He urged milk appraisal by the patrons also. Texas law requires that a milk bottle cap state the grade of milk, and whether it is raw or pasteurized. "Insist on having the milk served in its original container, with a covered cap and legal label," Dr Cox advised.

"Obviously," he said "the best in sanitation can be had only by close co-operation between the public and the investigators of the

WOOL, MOHAIR REVENUES INCREASE 75, 95 % LAST 6 MONTHS

Texas farms' total cash income for the first half of 1951 was 39 per cent greater than in the same 1950 period, the Texas Bureau of Business Research reports.

Revenue from Texas poultry was up from \$5,951,000 (million) to \$27,651,000 in the most impressive gain. Egg profits were up, too, from \$18,595,000 to \$52,481,000. Incomes from grain sorghums and calves both increased more than 100 per cent.

Revenue from mohair and wool in the first half of 1951 increased 95 to 75 per cent, respectively over the same period last year. The total value of both crops during January-June 1951, was \$43,172,000 approximately \$18,000,000 more

than the same 1950 period. Milk and milk products (up 84 per cent), corn (up 54 per cent), hogs (up 46 per cent) and cattle (up 36 per cent) brought significantly larger sums to raisers. Cattle and milk and milk-products, the two most important commodity classes during the first half of 1951, brought Texas cattlemen \$183,179,000 and dairymen \$103,957,000.

RECRUITER TO BE HERE TODAY AND SATURDAY

United States Marine Corps Staff Sergeant Wesley Ward, of San Angelo Recruiting Office will be in Sonora two days this week to interview applicants for the Marines. The leatherneck Recruiter will be at the Sonora Post Office all day Friday, 31 August and

Saturday 1 September. Men between the ages of 17 and 29 are eligible for enlistment. Men with dependents are also eligible for a tour with the Marines. The current deadline for men who have received their pre-induction physical is 31 August, but the Sergeant said that enlistments have been so strong from this group that he is hoping for an extension of this period but so far there has been no word on any extension.

Men may enlist for three years, or for an indefinite period, which means for the duration of the present National emergency. All recruits are sent to San Diego, California where they go through basic training. Upon graduation from Basic, the sergeant said that almost everyone is promoted and that everyone is given a leave to return home on.

All men who are interested in any information about the Marine Corps are urged to contact Sergeant Ward during these two days at the Post Office. The Sergeant has served with both the Marine Infantry and the Marine Air Corps and welcomes any questions concerning the Marine Corps.

Mr. and Mrs. Sam Logan of Deheran were the guests of Mr. and Mrs. Edward Tipton in Damascus last weekend.

Mr. and Mrs. Clint Langfort were in San Antonio on business last week.

MEDALS OF HONOR FOR WAR HEROES—In a ceremony at the White House, President Truman (right) congratulates Capt. Raymond Harvey, of Pasadena, Calif., after presenting the infantry captain with the Medal of Honor. Three other infantrymen standing alongside also received Medals of Honor for distinguished gallantry in action in Korea. They are, left to right, Capt. Lewis L. Millett, of Haverhill, Mass.; M/Sgt. Stanley T. Adams, of Olathe, Kans., and Sgt. Einar H. Ingman, of Tomahawk, Wis. Behind them stand distinguished officers of the Armed Forces who witnessed the ceremony. In the center is the late Admiral Forrest P. Sherman, Chief of Naval Operations, who died suddenly in Italy, July 22.

Defense is your job, too!

Just one minute before this picture was taken you would have seen nothing here but waving grass, pine trees, and blue sky. For in only 60 seconds this alert Marine gun crew has landed by helicopter, set up its 75mm howitzer, and is ready to fire!

Precision training and maneuvering like this means that these men stand ready at a moment's notice to protect you and America. That they're doing their job for defense.

But, defense is your job, too! And one of the best ways to do your job is by buying Defense* Bonds regularly. For by buying bonds you help build the great American economic strength that backs up our armed forces. And at the same time you put your money in the world's safest place. For Defense Bonds are as safe as America!

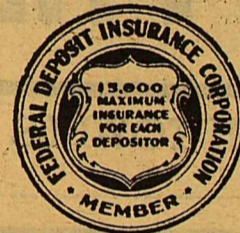

The U. S. Defense Bonds you buy give you personal financial independence

Remember that when you're buying Defense Bonds you're building a personal reserve of cash savings. Money that will some day buy you a house or educate your children, or support you when you retire. Remember, too, that if you don't save regularly, you generally don't save at all. So go to your company's pay office—now—and sign up to buy Defense Bonds through the Payroll Savings Plan.

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own automatically goes on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not \$25—but as much as \$33.33—if you just hold it the extra ten years! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's, too, buy U. S. Defense Bonds now!

*U. S. Savings Bonds are Defense Bonds Buy them regularly!
