PUT AN END TO HOT WATER SHORTAGE AT YOUR HOUSE!

No need to put off laundry...

Skip baths...

Leave dirty dishes...

with modern, convenient

Get hot water up to 3 times faster than with electricity... with Gulftane. Yes, all the hot water you need—when you need it—at very low cost! Automatic controls on modern gas water heaters do all the work.

Dependable and safe! Gulftane is conveniently stored outside your house—is always at your service—even in "lines down" weather. And safety controls shut off gas instantly if the pilot light goes out.

Phone or come in for full details!

Bridge Club With Mrs. Bell

Several local ladies played bridge in the home of Mrs. Durward Bell Thursday afternoon. Mrs. Bell served guests chips, dips, and relishes, home made ice cream and cookies. Those present included Mesdames: Mack Ragsdale, Johnnie Horn, Leon Grissom, A. M. Wilson, Jim Hemke, Bob Wilson, Jimmy Charles, Jimmy Ware, Dean McCallum, Bedford Caldwell, Don Sides and Vernon Willard.

Bridal Shower Honors Mrs. Sonny Gentry

A come-and-go shower feted Mrs. Sonny Gentry, the former Joy Redden, Thursday afternoon in parlor of Bovina Methodist Church. Mrs. Amos Shockley and Mrs. O. H. Jones presided at the guest register. Corsages of pink carnations were presented the bride's mother, Mrs. S. E. Redden; Mrs. Floyd D. Gentry, the groom's mother, and Mrs. Lee Sudderth, maternal grand-

mother of the bride, and the honoree. Mrs. Thomas Beauchamp, Mrs. H. J. Charles and Mrs. Rouel Barron presided at the serving table which was laid with a white lace cloth and adorned with a centerpiece of red roses and graced with a pink heart. Refreshments of pink lemonade, cake and nuts were served from silver and crystal appointments. The hostesses presented Mrs. Gentry with a set of stainless steel flatware.

Hosting the occasion were Mesdames; Earl Stevenson, Warren Embree, Lester Rhinehart, Rouel Barron, Thomas Beauchamp, Amos Shockley, O. H. Jones, Dean Hastings, Henry Minter, Earl Richards, Herman Estes and H. J. Charles.

STUDY CLUB MEETING

SEPTEMBER 29
Guest speaker at a special meeting of Bovina Woman's Study Club Thursday night, September 29, will be Bailey County Judge Glen Williams. Special guests will be school teachers and their wives or husbands, city commissioners and their wives, and preachers and their wives.

CONGRATULATIONS

Congratulations to Mr. and Mrs. Don Owens on the birth of a 6 pound, 1 ounce baby boy, born Saturday afternoon at Clovis Memorial Hospital. He was named Stephen Lee.

Lullaby Shower Honors Mrs. McLeroy

Mrs. James McLeroy was feted with a come-and-go lullaby shower Thursday afternoon at First Baptist Church parsonage. Mrs. Dale Harmon greeted and registered guests. Hostesses presented the honoree with a corsage made of infant socks. Refreshments of punch and cake were served from a table laid with a pink cloth and centered with an arrangement of sweet peas and dahlias flanked

with pink candles. Crystal appointments completed the table setting. Favours of storks made of safety pins and candy pacifiers were presented guests. Ladies hosting the shower were Mrs. Glenn Kelly, Mrs. Norman Taylor, Mrs. Mack Kennedy, Mrs. Roy Crawford, Mrs. Weldon Moody, Mrs. Keith Garner, Mrs. Dale Harmon, Mrs. Jerry Rogers, Mrs. J. T. Jones, Mrs. John Ferguson, and Mrs. Jim Heard.

Stork Shower Honors Mrs. Neil Smith

A pink and blue shower honored Mrs. Neil Smith recently in the home of Mrs. Wayne McCutchan.

Fresh flowers from the garden of Mrs. Lee Sudderth adorned the table. Rose buds in a yellow and blue arrangement centered the table laid with a white lace cloth over blue. Punch, coffee, and Spudnuts were served from crystal appointments.

Hostesses were Mrs. Joe Pinner, Mrs. James Boardman and Mrs. Wayne McCutchan.

CONTEST

You May Win Weekly Prizes Of
\$5 - \$3 - \$1

Plus Grand Prize Of Expense-Paid Trip
For Two To Cotton Bowl, January 2, -1961-

Join The Fun!
Win The
Prizes!

Contest Rules

1. There are 10 high school and/or college football games listed in ads on this page.
2. Pick the team you think will win in each game and place the WINNER'S NAME beside the same number in the contest entry blank at bottom right of this ad.
3. Pick the score of the tie breaker game and place your guess in the appropriate blanks on the entry. The tie breaker game will not count on your win-lost record. It will be used only in case of a tie.
4. Winners will be named by the Monday following the contest deadline each Friday and they will be named by Saturday, if possible. Cash prizes of \$5 for first, \$3 for second, and third prize of \$1 will be awarded.
5. Tabulations of individual entrants will be kept all season and at the end of the season a grand prize winner will be named. Grand prize winner will receive two free tickets to Cotton Bowl games plus hotel, food and traveling expenses to Dallas and the January 2, 1961 football classic.
6. There is nothing to buy. No requirements other than to bring the entry blank, filled out, to The Blade office by 5 p. m. Friday of each week.
7. Only one entry blank may be submitted per individual. If more than one blank is submitted by an individual, all will be disqualified.
8. Tabulations will be available for public inspection. Members of Blade staff will serve as judges for contest.
9. Everyone, except employees of this newspaper and their families, is eligible to enter.

Mr. And Mrs. J. P. Macon

BUMPER SORGHUM HARVEST NEARS

THE HIGH PLAINS FARM AND HOME

WITH THE COUNTY AGENT

JOE JONES

Mr. Mock with Santa Fe Railroad was by my office this week to report that they were well pleased with results they got using Benzabar on bindweed on the railroad. He feels 95% of the weeds are killed where they treated on 36 miles of road between Farwell and Summerfield. Two miles was under water and was not treated, but he plans to complete the job in 1961 by getting the two miles missed and going back over the other.

Don't forget you are to report any bindweed along the right-of-way to your station agent in Farwell, Bovina, Friona or Black. The station agent will in turn report the plot to the Division Engineers Office in Amarillo.

cants have been more effective in preparing cotton for stripping.

1. What is a desiccant?
A. A desiccant is a chemical material applied to cotton for the purpose of drying the leaves in preparation for stripper harvest of the open bolls.
2. How do desiccants differ from the action of true defoliants?
A. Desiccants do not cause all the leaves to fall to the ground. Because of faster action on the tissue of the leaf, it may dry and stick on the stalk.
3. What are the recommended desiccants?
A. Pentachlorophenol and Arsenic Acid, usually 75%, have been very effective.
4. When should the desiccant be applied?
A. Cotton should be fully mature, 60 to 80% open and preferably 90% open. "Penta" is applied with diesel oil after the dew dries. Arsenic Acid is applied with water and can be applied under conditions of higher humidity than "Penta."
5. What is the cheapest material for use as a desiccant?
A. Commercial preparations containing about 75% arsenic acid.
6. Is Arsenic Acid poisonous to man and animal?
A. Yes, it is very poisonous and the safety directions on the manufacturer's label should be followed. It is also corrosive to equipment. Sprayers should be flushed with water and baking soda solution after each spraying. Black pipe is less corrosive than galvanized. Copper, aluminum, etc. is still less corrosive.
7. Is there a safer material to desiccate cotton?
A. Penta (Pentachlorophenol) is safer and does a satisfactory job with favorable weather (hot and dry), but is more likely to require two applications. A shower before penta completes its action reduces its effectiveness.
8. Hoe do you tell if a second application is necessary?
A. At the McGregor Experiment Station, they recommend retreating if more than 4% of the old leaves are still green. The better grades will pay for second treatment.
9. Can the cotton field be grazed after desiccation?
A. The answer is no, especially if arsenic acid was used. Also, if the stalks are shredded, the insect situation will be improved.
10. Is there any danger from drift in spraying desiccants?
A. A wind will drift the desiccants if it is strong enough. Arsenic Acid may drift into grazing areas and endanger livestock. Home plantings, vegetable, flowers, shrubs and trees might be damaged by any desiccant.

Cotton is late this year and very little is likely to mature early enough for defoliation to be of wide spread use. For those considering defoliation here are some points you will be interested in.

These questions and answers have been prepared in an attempt to assist cotton growers who are considering harvesting cotton with a mechanical cotton stripper.

The true defoliants have not given uniform results. Desiccants

The purchase of a Behlen Utility Building assures the finest protection available for your machinery and equipment.
Spra-Gro Steel Building Co.
2220 N. Prince Clovis, N. M.

SOME FARMERS are as religious about keeping weeds out of their grain sorghum fields as they are their cotton. Actually, it all depends on the situation. The weed infestation, the crop prospects, and the going rate for hoe hands are some factors to consider.

There are more than 250,000 acres of grain sorghum in the county this year and most of the fields are covered with large, heavy heads, which are rapidly reaching maturity. A few sample loads of grain have already been harvested and combining is expected to begin in earnest within the next two or three weeks.

Last year saw an all-time high production of better than 20 million bushels, and this year's harvest should at least be as good and it will probably exceed that total, according to the pre-harvest estimates.

Increased grain sorghum production has been a trend for a good many years, especially during the last decade, which has seen huge increase in the number of bushels harvested. This has come about not so much from increased acreage as it has been from improved farming methods.

In 1950, on irrigated fields the average yield was 2,500 pounds per acre, while in 1960 the sorghum fields are expected to yield an average of 4,500 pounds. That's an 80 percent increase of per acre yields.

According to Farmer County Agent Joe Jones, increased yields have come about mainly because of: 1) fertilizer, 2) better land preparation, 3) improved watering methods, 4) improved varieties and 5) generally better farming methods practiced by everybody.

The average yields on irrigated fields during the past few years would hardly have been considered possible a decade ago.

However, this phenomenal grain output has not been a real bright spot of the county's economy, in spite of the fact that, of more than 400,000 acres of irrigated farmland in Farmer County, the biggest percentage is planted into maize.

Since 1955, the government price support has been declining regularly and last year it dropped to an all-time low of \$1.32 per hundred pounds. That's less than half of what the price support was a few years ago, so the harvesting each year of bumper crops has not made for more money in the sorghum-producers pocket.

In fact, the net profit has been somewhat less.

Improved farming methods naturally cost the farmer more

WEST TEXANS SAY OF P-A-G MAN... that's sorghum!
The way P. A. G. Sorghums look in the field makes everybody who sees them exclaim "Man, That's Sorghum!"
P. A. G. has earned the confidence which farmers have in this sorghum. Each exclusive variety is researched, tested, and proved before it is offered for sale. Then when you plant P. A. G. you can be confident that not only will it look good in the field, but it will provide top yields. Careful quality control through triple isolation on seed production pays off in your field when you plant P. A. G. Sorghums. Hundreds of tests have proved it.
Now is the time to book your P. A. G. seed.

Annual Soil Conservation Tour, Banquet Planned

Plans have been completed for the annual soil conservation tour and banquet. These two events are looked forward to with a great deal of enthusiasm by farmers and businessmen in this area. Those making the tour will have an opportunity to see many of the latest innovations in farming.

Some of the farms to be worked out for the tour which will begin at the Soil Conservation Office in the American Legion Building in Friona. The entourage will leave this office at 1:15 p. m. Monday, September 26. Joint sponsors are the Soil Conservation District, the Extension Service and the Soil Conservation Service.

visited are those of Arthur Drake, Elmer Euler, Bruce Parr and George Warner. Projects that will be viewed and discussed include lake pumps, concrete pipeline repair, sugar beets growing and several varieties of grain sorghum and grasses being grown for seed and growing.

of the annual essay contest. Tickets for the banquet may be secured from Steve Messenger, secretary, or any of the following Soil Conservation District supervisors: A. L. Black, Bruce Parr, T. O. Lesly, Dean McCallum and Robert Calaway.

August Accidents Claim Two Lives

The Highway Patrol investigated seven rural accidents in Farmer County during the month of August, according to Sergeant Roger W. Sosebee, Patrol Supervisor of this area. These wrecks have accounted for two persons killed, seven injured, and a property damage of \$3,330.

The safety of such children." The Sergeant stated, "The driver of the passing vehicle is responsible for taking the due caution. He is responsible for knowing that his proceeding past the bus will not result in endangering any lives."

Anyone in the area who is interested in learning more about farming practices will be welcomed on this tour.

Guest speaker at the annual banquet in the Friona High School Cafeteria at 8 p. m. Tuesday will be Max Carriker, state representative from Roby. A musical program will be directed by Mrs. Roy V. Miller Sr.

Awards will be presented to those who have done outstanding work in soil and water conservation and to the winner

This brings the total for the year in this county to five persons killed, 30 injured, and a property damage of \$65,135.

Recharge Continues To Pay

Prior to the first of this month there had been a total of 1,088 fatal accidents in Texas. These tragedies resulted in 1,342 persons losing their lives.

Seventy-nine acre feet of water was drained by gravity flow into the underground water sand from the playa lake on the High Plains Research Foundation at Halfway between July 4 and August 4, 1960. Since June 19, 1959 one hundred and eight-five acre feet of lake water has been stored in the underground sand from the lake. The value of one acre foot of water applied to cotton has been estimated at \$65.00 an acre foot. If this 185 acre feet of water had been used to irrigate cotton the value of the water thus applied would be \$12,025.00

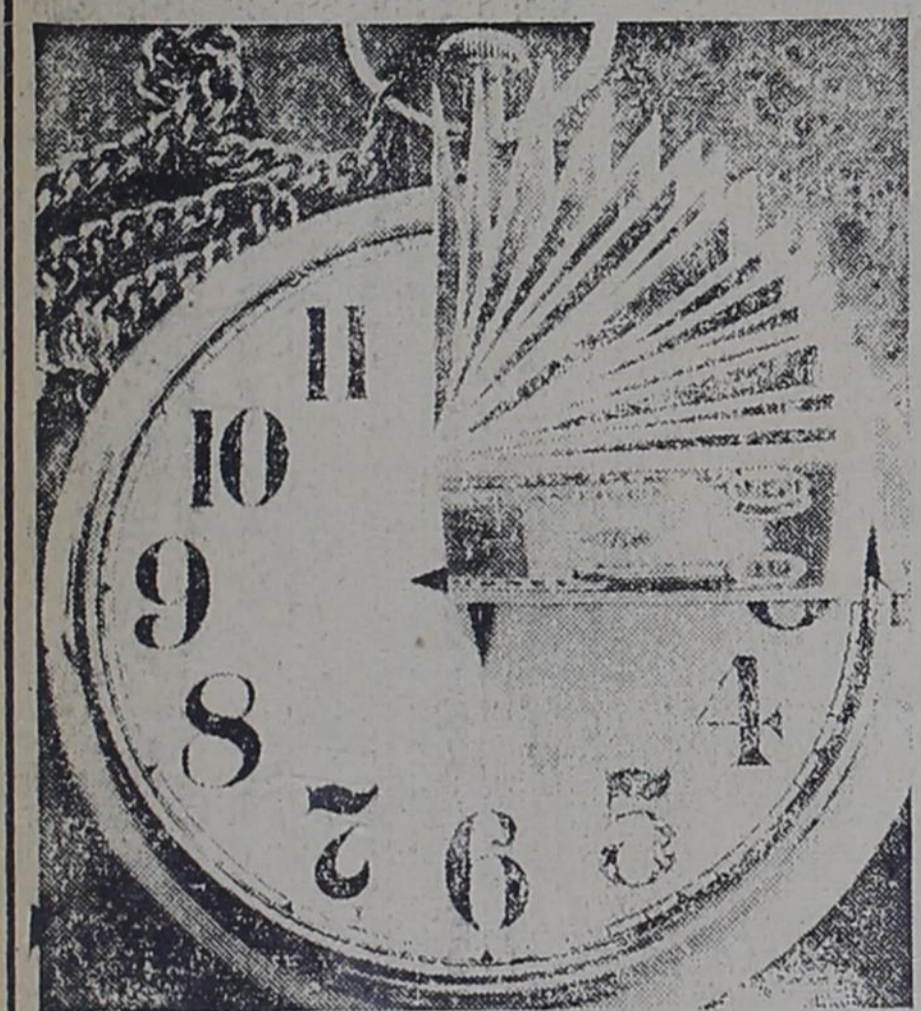

The back to school bell has already sounded for Texas school children. They will be using our highways and streets to and from school. Motorists should drive with more caution and care than ever before.

Sergeant Sosebee pointed out that at the present rate of traffic fatalities, half of the elementary school children in Texas will be involved in a motor vehicle accident before they reach the age of 21.

Fifteen persons were killed and 240 injured in rural traffic accidents involving school buses in Texas during 1959.

State laws regulating traffic in regard to school buses read as follows: "The driver of a vehicle upon a highway outside of the limits of any incorporated city or town upon meeting or overtaking from either direction any school bus which has stopped on the highway for the purpose of receiving or discharging any school children shall stop the vehicle immediately before passing the school bus, but may then proceed past such school bus at a speed which is prudent, not exceeding (10) miles per hour, and with due caution for

The HAPPY HOMEMAKER

BY JUNE FLOYD

Many homemakers are busy at this time of year putting the finishing touches on canning and freezing vegetables and fruits for winter use. It would probably be surprising to know the amount of food that has been preserved and stored during the past few months in this area.

Possibly the most popular by-product of homegrown tomatoes is tomato juice. Green tomatoes are used in various kinds of relish. For a green tomato relish that is very tasty, try the following recipe:

RELISH SPREAD
 1/2 gallon green tomatoes, ground
 1 pint green peppers (sweet), ground
 1 pint red peppers (sweet), ground
 1/2 pint ground onions
 5 teaspoons salt
 1/4 teaspoon celery seed
 1 pint vinegar
 1 pint sugar
 1 quart mayonaisse
 1 pint prepared mustard
 Mix tomatoes, peppers, onions and salt. Allow to drain overnight in a cloth bag. Add celery seed, vinegar and sugar. Cook 25 minutes, stirring occa-

sionally. Let cool and stir in mayonaisse and mustard. Pour in jars.

Another tasty relish is VEGETABLE CHOP RELISH

12 medium onions (4 cups ground)
 12 medium potatoes (4 cups ground)
 1 medium head cabbage (4 cups ground)
 12 green peppers (5 1/2 cups ground)
 6 red peppers (2 3/4 cups ground)
 1/2 cup salt
 6 cups sugar
 2 tablespoons mustard seed
 1 tablespoon turmeric
 4 cups cider vinegar
 2 cups water
 Mix all vegetables and sprinkle with salt. Let stand overnight. Drain. Combine remaining ingredients and pour over vegetables. Heat to boiling point and simmer three minutes. Seal in hot jars immediately. Makes 3 pints.

 If you are wondering how to use old powderpuffs, try using them to apply wax, shoe polish

or any cleaner.

Two pies that are very simple to make yet different from the usual run of pies are good for right now or will be very good for that Thanksgiving or Christmas dinner you are making plans for.

CRANBERRY CASSEROLE PIE

Pastry for single crust pie
 2 3/4 cups sugar
 1/2 teaspoon salt
 1/4 cup flour
 3/4 cup water
 4 1/2 cups cranberries
 Juice and rind of 1 lemon
 Line baking dish (6 1/2 x 10 inches) with pastry. Combine sugar, salt, flour; gradually blend in water and heat to boiling. Add cranberries; cook until skins begin to pop. Remove from heat; add lemon juice and rind.

Cool 1/2 hour. Pour into pastry-lined pan. Top with triangles of pastry. Bake in hot oven (425 degrees F) 35 minutes. Cool pie on rack. Cut into 6 squares for serving.

MERRY CHRISTMAS PIE

1 envelope unflavored gelatin
 1/4 cup cold water
 1 cup sugar
 3 tablespoons flour
 1/4 teaspoon salt
 1 1/2 cups milk
 1/2 teaspoon almond flavoring
 1/2 teaspoon vanilla flavoring
 1/2 cup heavy cream, whipped
 2 egg whites (large)
 1 1/2 cups shredded coconut
 ten inch baked pastry shell
 Soften gelatin in cold water. Combine 1/2 cup of the sugar, flour and salt; gradually add milk and cook over medium heat, stirring constantly until

SOIL CONSERVATION DISTRICT NEWS

Next Monday afternoon, September 26, the annual "Soils and Crops Tour" will be held. This tour will be conducted by the Soil Conservation District, the Extension Service and the Soil Conservation Service.

The tour will form at the Soil Conservation Service office in the American Legion building in Friona and will leave at 1:15 p. m. to visit the farms of Arthur Drake, Elmer Euler, Bruce Parr and George Warner. Projects to be visited include lake pumps, concrete pipeline repair, sugar beets and various varieties of grain sorghum and grasses grown for seed and grazing.

Refreshments for those making the tour will be provided by Gifford Hill Western.

The annual Soil Conservation District banquet will be held Tuesday evening, September 27 in the Friona High School cafe-

thick.

Remove from heat; add softened gelatin, stirring to dissolve. Chill until mixture begins to thicken. Add flavorings. Fold in whipped cream. Beat egg whites until foamy; gradually add remaining 1/2 cup sugar, beating until stiff.

Fold into pastry shell and chill until firm. Pile remaining coconut on top. Makes 6 to 8 servings.

teria. Guest speaker will be Max Carriker, state representative from Roby.

Awards will be presented to those who have done outstanding work in the field of water and soil conservation and also to the essay contest winner. A musical program will be directed by Mrs. Roy V. Miller Sr.

Tickets for the banquet may be obtained from the following SCD supervisors, A. L. Black, Bruce Parr, T. O. Lesly, Dean McCallum and Robert Calaway or from Steve Messenger.

Talley Utilizes Profit Planned Lake Pump

Calvin Talley, who farms over a section of irrigated land northwest of Friona is pretty proud of his Byron Jackson lake pump which was recently installed on his land by the Farmer County Pump Company.

The four-inch BJ pump, powered by a 1950 Ford 6-cylinder combine motor, is pumping 1,100 gallons of water per minute through 1,000 to

7,000 feet of concrete pipe which reaches almost every part of the Talley property.

The pump is installed on a tank, dug by Talley who is in the earth-moving business in addition to his farming activities, and stores tailwater from approximately 15 irrigation wells.

This "waste" water enables this pump to operate con-

tinuously adding many thousands of dollars worth of water valued at \$20 per acre foot to his land.

Call 3201 in Friona, or come by the Farmer County Pump Company today and see how easily you can utilize your waste water which is now running uselessly down the barrow ditch.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

LEGAL NOTICE Notice is hereby given that the Farmer County Commissioners Court will conduct a public hearing on the proposed 1961 Farmer County Budget at 2:30 p. m., Monday, Sept. 26, 1960, in the courtroom at the county court house in Farwell.

CLOVIS MUFFLER SHOP Mufflers, Tail Pipes & Shocks Bob's '66' Ser. Sta. Ph. PO 2-0254 101 Main, Clovis

2-ct

Individual should take the initiative in developing industry and family income interests. The view of Farm Bureau people, from the individual member to the national level, is that the individual should be given the opportunity to seek his level of livelihood by exercising his initiative in the realm of private or public employment.

That is, if he wants to work for the other fellow, who chose to invest his funds and try, through good management and judgment, to increase the value of the investment, he can do so, without asking anyone but the employer. If that individual wants a better income than he started at, he should be entitled to higher pay when he demonstrates to his employer that he is making his employer more than he was when he started.

If the employed individual is not making his employer more than when he started, he should understand that another man, who may not have been working as long as he, may be entitled to an increase in pay because he is willing and able to produce more. And, if the employer needs to increase or decrease his number of employees to suit the needs of his productive machine, he should have that right.

Resolutions being prepared by Gilbert Kaltwasser and his committee for the consideration of Farmer County members include reiteration of one that has been presented before: allowing the farmer, whose income fluctuates greatly because of natural, uncontrollable conditions, to average his income over a five year period for income tax purposes.

Probably to be presented, is a resolution calling for the elimination of the "Weed Spray Law" which requires possession of a certificate that

Farm Production Expected To Remain High In 1960

John McHaney, extension agricultural economist, has recently completed an analysis of the 1960 economic situation as compared to the economic situation of 1959. Agricultural production, business conditions and other economic factors affecting agriculture are compared by the specialist.

Another year of high agricultural production is forecast by McHaney. He says that the total crop output in the United States will probably equal the all-time highs of 1958 and 1959, and that the total production of livestock and livestock products will probably be close to that of last year. 1960's wheat crop will probably be the third largest on record, McHaney continues.

The supply of feed grains

and other concentrates will probably exceed last year's record supply. Rice supplies for the 1960 marketing year, which began August 1, are expected to be below those of last year.

A smaller number of layers and tighter egg supplies will probably keep egg prices for the rest of 1960 higher than those of a year earlier. Hog slaughter for the rest of 1960, McHaney continues, should remain below that of a year earlier and prices should begin to improve.

In his comparison of business economic conditions, the economist reports that personal income for the second quarter of 1960 showed an increase over personal income for the same

period of last year. Civilian employment for the second quarter showed an increase over the same three months of 1959.

This same period showed retail sales and sales of the food group gained over last year. Industrial production, however, remained about the same for the second quarter of both years.

On the debit side, housing starts and construction outlays for the month of June showed a decrease from June, 1959, levels. Unemployment and consumer credit outstanding for June of this year were higher than for the same month of 1959, McHaney says.

How Much Can I Pay For A Bull?

Are you planning to buy a new beef herd bull and wondering just how much you can afford to pay for one? Tom Prater, extension farm management specialist, says that you can pay up to \$976 for a beef herd bull that will increase your calves' weaning weight by 15 pounds, assuming 24-cent calf prices. This figure would rise to \$1,108 with 30-cent calves, and it would decrease to \$910 with 21-cent calves.

These calculations are based on the assumption that you would pay \$450 for a bull of the same quality as your present herd-- a bull that would neither increase nor decrease weaning

weights of your calves, Prater explains. The computations are based on genetic expectations and the actuarial determination present values of future production. It is assumed that 20 offspring from the selected sire will be sold each year, and that 5 offspring from the daughters will be sold each year for 5 years. The daughters' offspring average weaning weight is increased by 17 1/4 pounds. The selected herd sire is kept in production for three years.

shows the number of acres to be sprayed, but offers no protection to those who may be damaged because of the spraying. The certificate costs ten cents per acre.

Farm Bureau members believe that every farmer should inform himself of the activities of farm organizations in the area, and become a member of the one he believes to be operating in the interest of a better America and a better agricultural opportunity for all farmers. Farm Bureau makes every effort it can muster to get the ideas of its members so that those ideas will be the policies guiding the legislative and other activities of the organization at all times.

You are urged to be in attendance at the annual Farmer County Farm Bureau Convention at the Oklahoma Lane Community Building on the night of October 6, 1960.

Consider this: Even a child is known by his doings, whether his work be pure, and whether it be right. Proverbs 20:11.

can be recovered in silage made from finely chopped forage instead of coarsely cut forage.

A recent study has revealed that when silage instead of hay was fed to dairy cattle, 5 pounds less total digestible nutrients (TDN) were required to produce 100 pounds of 4 per cent milk, reports A. M. Meekma, extension dairy husbandman of the Texas A&M College System.

Although cows ordinarily eat more hay than silage on a dry-matter basis, nutrients from silage are apparently used for milk production more efficiently than those from hay, the specialist continues. Although the reason for this more efficient use of silage nutrients is not known, the fact that the efficiency does exist tends to offset the lower dry-matter intake found when silage is given as the only forage.

The specialist adds, however, that for best results some hay should be fed along with silage. Recent tests have also shown, Meekma continues, that almost 10 per cent more dry matter
