## BOVINA CHAMBER OF COMMERCE AND AGRICULTURE--

### WHITTLIN'

BY DOLPH MOTEN

We couldn't pass up the opportunity last week to talk to a real live baseball coach and tried to make the most of it. The coach in question was Berl Huffman of Texas Tech, who was guest speaker at Bovina's chamber banquet. Our seat next to his gave us an opportunity to quiz him to some extent about baseball in general and college baseball in particular.

We aren't especially interested in the sport of course, but we figured he was since he coaches baseball and we tried to direct the conversation in that direction. You can believe we weren't interested if you want to.

Huffman started out by saying that his Red Raider team this season got off to a rough start, but he feels that it is potentially a good team and that it will come around with a respectable record by season's end. Ramey Brandon is a member of Huffman's pitching staff this season as he has been for the past two. Brandon is a former star Bovina High athlete and the son of Mr. and Mrs. C. R. Brandon.

He is one of Huffman's baseball team captains this season. Ramey won seven games for Tech last season, as a junior. That was most games ever won by a baseball pitcher in Tech's history and, of course, he is expected to have another good season this year.

We used to watch Brandon pitch high school ball and for the old sandlot Bulls.

Huffman pointed out Ramey is not an overpowering pitcher, but "he has a tremendous curve ball and when that thing's working right, he's sure hard to beat."

He went on to say that Brandon doesn't "give" the opposition anything in that he walks few batters and that he does a good job of fielding his position.

Huffman also mentioned Brandon's ability to bunt to near-perfection. "When I have a man on base that needs moving up, I'd as soon have Brandon at the plate as anybody I know," Huffman, who also doubles as freshman football coach at Tech, told us.

We thought those were fine words coming from the coach of the last Bovina High athlete to attend college on an athletic scholarship.

Tech doesn't play a Southwest Conference schedule in baseball and is thus not eligible for the championship of the league. Reason for this is the great amount of travel involved for a "non-revenue" sport.

Huffman said that some work was being done to correct this situation.

He offered a couple of proposals which would allow Tech in the conference baseball picture. One is to have a conference tournament to decide the champion, after playing a regular slate of games during the season.

Another plan which he thinks would be good would be to play a series of games after making the trip to another school and not play on a home-and-home basis during the season. In other words, Tech would go to Houston to play Rice a series one year and Rice would come to Lubbock to play Tech the next year.

Arkansas is in the same boat with Tech as far as a baseball championship is concerned. "That makes two of us on the same side to start with," Huffman said, "and that helps."

Warning to the subject, he went on to say that college baseball may not always be a non-revenue sport. "With our colleges becoming more and more crowded, it may become necessary to convert to four three-month semesters on a year 'round basis," he said.

"If and when that happens and we have regular school during summer months, college baseball will come into its own," he implied.

In an effort to get in a plug for Bovina, we told Huffman that baseball was returning to the high school sports picture here this spring after an absence of two years.

"More and more high schools (Continued on Page 2)

# Banquet Attendance Sets Record

## Honor Morton, Mrs. Caldwell

## Total Of 235 Hear Huffman

Warren Morton, superintendent of Bovina Schools, and Mrs. Margaret Caldwell, a private music teacher, were named outstanding man and woman of the year at Third Annual Chamber of Commerce and Agriculture Banquet Thursday night in school cafeteria.

Each was presented with a handsome engraved plaque on behalf of the chamber by Roy Crawford, outgoing chamber director who received citizen of the year award in 1961.

Morton, who has been superintendent of schools here for seven years, is a past director of the chamber board. He is a lay speaker and a choir member in Bovina Methodist Church.

He has been active in Lions Club here, serving as chairman of sight conservation committee, and he is currently a nominee for the president's post for next year.

A Mason, Morton has been in the teaching profession for 22 years, most of them as a superintendent.

Morton has lived here since he became superintendent in 1956.

Mrs. Caldwell has been a resident of Bovina for 38 years. During that time, she has been active in civic and church work.

She has been an officer in Bovina Cemetery Association and has been active in Red Cross work in years past.

She organized and taught kindergarten classes here.

Mrs. Caldwell has taught piano to hundreds of area people and is still engaged in that profession.

Currently president of Wesleyan Service Guild, a women's organization in Bovina Methodist Church, she has been a Sunday School teacher.

A widow herself, she organized and directs activities of Bovina Widow's Club.

In recognizing Mrs. Caldwell, Crawford pointed out that she "receives much enjoyment in welcoming newcomers to the

community and renders faithful service to people who are sick and in need."

Warren Morton and Mrs. Margaret Caldwell, winners of the Chamber of Commerce and Agriculture award for 1962.

OUTSTANDING CITIZENS--Warren Morton and Mrs. Margaret Caldwell.

### Davies Resigns, Wright Named Ass'n Manager

R. G. (Pete) Davies, manager of Panhandle Growers Labor Association here, submitted his resignation to the board of directors at a meeting last week.

The resignation is effective at the end of the month.

J. W. Wright, who has farmed here for past several years, was named to succeed Davies by the directors Tuesday.

Wright began his new duties today (Wednesday).

Davies has been manager of the association since 1958, the year it was formed.

Purpose of the organization is to provide bracero labor to farmers in the area.

Members of the board of directors are John Dixon, Tom Caldwell, James Boardman, Travis Dyer and Bruce Parr. Dixon is president.

### Ware Now Sole Owner Of Agency

Jim Ware has purchased the interest of his former partner, Dean McCallum, in Bovina Insurance.

The business will continue to share offices in First National Bank Building with McCallum Real Estate as it has in the past, Ware says.

McCallum will continue to be associated with the insurance firm but not as an owner. Ware will also be associated with the real estate agency.

An advertisement in this issue of The Blade makes announcement of the ownership change.

### Weather by Willie

Very little, if any, moisture before Sunday. --Willie

GUEST SPEAKER--Berl Huffman, speaker at Third Annual Bovina Chamber of Commerce and Agriculture banquet, is shown addressing his audience.

### FIVE MEN SEEK TWO POSITIONS--

# City Election Set Tuesday

Five men are seeking election to two positions on city council in annual city election which is slated for Tuesday, April 2.

Polls will be open from 8 a.m. to 7 p.m. and will be in American Legion Hall.

Candidates are:

Tom Bonds, owner-manager of Bonds Oil Co.;

H. J. Charles, owner-manager of Charles Oil Co.;

A. E. Crump, co-owner-manager of Parmer County Farm Supply;

Jerry Rogers, owner-operator of Jerry Rogers Barber Shop; and

James C. Russell, manager of Bovina Wheat Growers.

Crump is seeking re-election as he is now completing his first two-year term on the city government.

Hodge Rigdon will be election judge.

The two candidates who receive the highest total of votes will serve two-year terms on the six-member council.

Term of Al Kerby, who withdrew as a candidate after being petitioned for re-election, also expires.

Holdover members on the council include Mayor Boyd Gil-

reath and Aldermen J. E. Sherrill, Jr., A. R. McCutchan, and A. L. Glasscock.

Rigdon will name assistants to help him conduct the elec-

(Continued on Page 2)

### GRISSOM, DONALDSON--

# Bovina Spellers County Champs

Mike Grissom, seventh grade student, of Bovina Schools, was named champion speller of Par-

mer County in a bee conducted here Friday.

He will represent the county

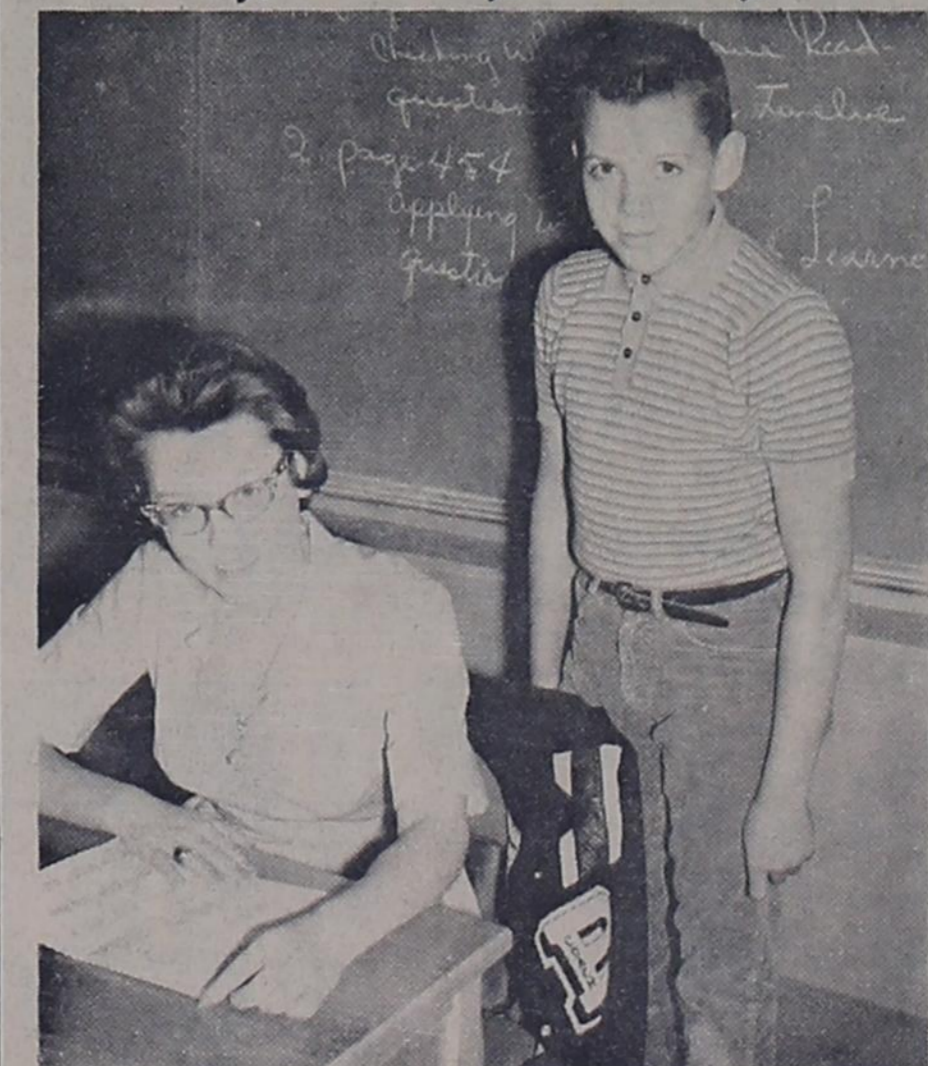

in area spelling bee which will be held in Amarillo in the near future. Area winner will compete on a national level in Washington, D. C. Contest is sponsored by Amarillo Globe-News.

Zelda Donaldson, seventh grade student, was runner-up in the contest.

Other contestants were downed and the final contest was between Grissom and Donaldson. They spelled approximately 100 words before the winner was named.

Both students are previous runners-up in the county contest.

Students from Farwell and Friona also participated in the bee.

SPELLING CHAMPS -- Looking over a list of spelling bee words are Mike Grissom, champion of bee held here Friday, and Zelda Donaldson, runner-up.

### Tire Store Plans Opening For Next Week

Grand opening of OK Tire Store in Bovina will be observed next week, Darrell Holland, manager of the business, announces.

Free coffee and Spudnuts will be served Monday and Tuesday and visitors may register for free prizes which will be given away at a drawing at 3 p.m. Saturday, April 6.

The tire business, which was opened in November, offers new, used and recapped tires as well as complete tire repair service, Holland points out.

The public is invited to attend the opening in an advertisement in this issue of The Blade.

GRAND OPENING--OK Tire Store on Highway 60 in Bovina will observe its grand opening next week. Darrell Holland, manager of the business, and Larry Williams, are shown beneath new signs which have been erected on the building.

### Fire Causes Little Damage

Bovina Volunteer Fire Department answered a call Thursday afternoon to a grass fire at the home of Mrs. Earl Ware on Eighth Street.

The flames were quickly extinguished and little damage was done.

Two shrubs in the yard were destroyed by the fire and a portion of the grass was burned.

# Reflections From The Blade

**SIX YEARS AGO**  
March 27, 1957  
School district purchased Block 9, site of the present baseball field, for \$1750.  
Bovina missed the brunt of a March blizzard which crippled areas just a few miles north of here. Mail wasn't available here as a result of trains being stalled by the storm and no milk was available for use at school one day. Winds caused the greatest damage here as an estimated 75 television towers were blown down during the storm.  
City commission agreed to share the cost of a deputy sheriff for this area with the county.  
Bovina's fire insurance key rate was lowered from 97 cents to 90 cents. Fire Chief Otho Hammonds pointed out that another decrease was expected "within the year."  
A Blade editorial boosted the candidacy of Ralph Yarborough for U. S. Senator.

**THREE YEARS AGO**  
March 31, 1960  
Some 40 persons are rehearsing for Lions Club Minstrel Show which is scheduled for April 8.  
LaVonda Newbrough was crowned Miss Bovina Tuesday night. The contest was sponsored by Town and Country Women's Club. Judy Roach was runner-up and Marilyn Brandon was third.  
Ann Lynn Wilson, daughter of Mr. and Mrs. Bob Wilson, and an eighth grade student, was named champion speller of Parmer County.  
Bovina's entry in district one-act play competition took third place at Happy, Happy one first. Members of Bovina's cast included Suezey Estes, Marilyn Brandon, Verna Marie Estes, Patsy Hart and Cynthia Patterson.

## CITY-OWNED-- Dumpgrounds Get Cleaning

City of Bovina's dumpgrounds are in the process of getting a general cleaning.  
Trash and debris had been scattered throughout the area causing what some citizens considered an "unsightly mess."  
City council agreed to clean-up the area at a meeting last week and work, under the direction of Billie Sudderth, was started the next day.  
Much of the trash was burned and the remainder has been or will be bulldozed into a pit.  
Charlie Jefferson, county commissioner, had agreed to dig another pit for the trash. However, city officials feel that the present pit will last the rest of this year.  
Total cost of the clean-up job is now estimated at about \$800 which is some less than the original estimate.  
When the clean-up work is completed, Mayor Boyd Gilreath says, the dumpgrounds will be opened one day a week for individuals to dump trash there.  
A charge for using the grounds will be made. Charges are slated to be \$1 for trucks and 50 cents for pickups.  
Impatient youngster: "Look, pop, how old do I have to be before I can do just as I please?"  
Patient father: "I don't know son. Methuselah probably asked the same question when he was 969 years old."

## Letter to The Editor

Dear Mr. Moten:  
I would like to subscribe to the Bovina Blade as we enjoy reading the news from there. We take only one paper here, the Progress Bulletin.  
We have been reading about the weather you have had this winter. I don't know which is worse, snow, cold and high wind or smog, fog and traffic.  
I live seven miles from work and it took from one to two hours to reach home through the fog, driving by the white line.  
But we have had a mild winter here so far. We have had our first snow fall on the mountains this year and have had a good rain in the valley.  
Truly yours,  
J. M. Vestal  
1188 E. Grand  
Pamona, Calif.

## Postpone Chamber Meeting

Directors meeting of Bovina Chamber of Commerce and Agriculture, slated for tomorrow (Thursday) morning at 7 has been postponed, Jack McCracken, chamber manager-secretary, announces.  
Reason for the postponement is because of conflict between breakfasts which are being held in connection with First Baptist Church and Bovina Methodist Church.  
The directors' meeting has been rescheduled for the following Thursday.

## City Election--

(Continued from Page 1)

The men elected to the positions will be installed at the regular meeting later in April.  
School board election is slated for the following Saturday, April 2.  
Four candidates, including the two incumbents are seeking election to two seats on the board.  
Incumbents are Grady Sorley and M. H. Carson. Other candidates are Richard Vaughn and Don Murphy.  
All four candidates are farmers.  
That election will be held at the school.

## Contract Let--

(Continued from Page 1)

highway department made no mention as to the starting date of the project.  
Curbs and gutters were installed on the streets named last fall at property owner's expense. The state had agreed to construct the additional paving if property owners provided curbs and gutters.

## DPS Warns Of Sticker Inspection Deadline

The Director of the Texas Department of Public Safety in Austin today reminded the 1,300,000 motor vehicle owners who have not secured their 1963 inspection stickers that they only have two weeks to do so.  
Col. Homer Garrison Jr. said that as the April 15 deadline for inspections approaches, waiting lines will begin forming at the 5,000 official inspection stations.  
"Under the law there can be no extension of the deadline, and motorists who fail to display the new sticker on and after April 16 are subject to arrest," he said.  
Authority for the enforcement of the provisions of the Motor Vehicle Inspection Act is vested in law enforcement officers of the Texas Department of Public Safety.  
(Continued on Page 3)

# AT LAZBUDDIE-- District Literary Meet Saturday

Bovina Schools entries in District 4-B Interscholastic League literary meet have been announced by school officials.  
The meet will be at Lazbuddie Saturday with first events beginning at 9 a.m.  
Elementary entries include:  
**DECLAMATION**  
Grade 4 -- Mike Beauchamp and Sharon Hemke with Betty Cruger and Gayle Long alternates;  
Grade 5 -- Stuart McMeans and Betty Kesler with Dennis Ellison and Edith Varner alternates;  
Grade 6 -- Randy Hutto and Vicki Hawkins with Gary Lide and Lilly Ramirez alternates;  
Grade 7 -- Bill Caldwell and Linda Hemke with Sharon Pierson alternate;  
Grade 8 -- Randy Jones and Karen Beauchamp with Sherry Hutto alternate.

**BEARDS IN ALTERNATE:**  
**PICTURE MEMORY**  
John David Ferguson, MacLonia Ramirez, Donald Pesch, Lisa Charles, Edith Varner, Stuart McMeans and Loy Christian.  
Entries in high school division include:  
Debate -- Judy Crawford and Ken Hron with Wyndol Davies alternate;  
Extemporaneous speaking -- Donnie Dyer and Linda Estes; Persuasive speaking -- Gary Beauchamp with Melton Crisp alternate;  
Poetry Interpretation -- Billie Minter and Connie Vaughn with Ann Lynn Wilson alternate;  
Prose reading -- Fred McLean and Lonya Vee Ivy;

Ready Writing -- Kathy Jones and Katie Jones;  
Spelling and plain writing -- Irene Thornton and Ann Lynn Wilson;  
Typewriting -- Mary Ann McKinnery and Kathy Jones with Judy Crawford alternate;  
Number sense -- Don Cumpston, Philip Lloyd, Gary Stevenson with David Anderson alternate;  
Science -- Ken Horn, Lawrence Kriegel and Judy Crawford with E. L. McCutchan Jr. alternate;  
Slide rule -- Laurence Kriegel, Joe Jordan, Eddie Reeves with Francis Williams alternate;  
Schools participating other than Bovina and Lazbuddie are Happy, Hart and Nazareth.

## MAYOR SAYS-- "Sewer Needs No Lubrication"

Pouring motor oil in Bovina's sewer system is a dangerous business.  
That's the announcement from Mayor Boyd Gilreath and Water and Sewer Superintendent Paul Holcomb who say that someone has been pouring enormous amounts of the black, thick liquid in the sewer system.  
"Too much oil in the system will stop the plant's bacteria from working and will disrupt the complete system," Holcomb says.  
Oil has been poured into the sewer periodically for the past several months and the city officials say that "a bad situation" will exist if the system is ruined.  
"The sewer system cost about \$100,000 to install and it would be a shame to have it destroyed," Gilreath says. The mayor pointed out that the city makes payments of \$583.93 per month on the sewer bonds until 1985.  
"That's a big investment," he says. "We need to take care of it, not try to tear it up."  
"Tell whoever is putting motor oil in the sewer to please stop," the men told The Blade.

## Whittlin--

**THE YOUNG BRIDE'S REALLY VERY SMART, SHE COOKED WITH GAS RIGHT FROM THE START**

Dean Hastings, Santa Fe agent here, made arrangements for C. W. Carter of Amarillo who is with the same company, to attend the chamber banquet.  
Carter, following Hastings' instructions, he said, arrived at the banquet 30 minutes early. According to Carter, Dean had told him that the banquet started at 7 while the scheduled time was 7:30.  
Confronted by Carter with the fact that he had issued incorrect information, Dean replied that he wanted him (Carter) to be there early so there would be no danger of being late.  
Carter's comment: "Dean had me as far off schedule as our trains are sometimes."

FOR WEEKEND MEET--

# Track Team To Levelland

Bovina Mustang tracksters finished sixth in Class A and B division of a meet at Hale Center Saturday.

They were first among Class B teams, however, as the five squads which were ahead of them were Class A.

Wyndol Davies lead the maroon and white with a tie for first place in pole vault.

Jerry Frazier finished second in broad jump, was fourth in discus and was a member of the mile relay team which was

fourth. Other members of mile relay team were Dennis Johnston, Phillip Lloyd and Laurence Kregel.

Johnston was sixth in 80-yd run. In mile run, Richard Carson picked up third place points for Bovina and Ronnie Taylor was fifth.

Coach Halle Gee's cindermen earned 38 points for their sixth place finish. Class A teams placing ahead of them were PETERSBURG, Springlake, Farwell, Crosbyton and Hale Center.

This weekend -- Friday and Saturday -- the track team competes in an all Class B meet at Levelland. Teams from all over West Texas and the Panhandle are slated to participate.

Ken Horn, the squad's leading high jumper and high hurdler, is slated to return to competition this week after being out of action with an injury.

District track meet will be Saturday, April 6, at Springlake.

The Mustangs, because of their showing in practice meets this season, will probably be favored for the district crown.

### DPS Warns--

(Continued from Page 2)

Safety, any sheriff or deputy sheriff and any city policeman, Garrison pointed out that in the remaining weeks of the inspection period, there is sufficient time for the remaining vehicles to be inspected without inconvenience provided the owners act promptly.

"We are very well pleased," he said, "with the contribution that the vehicle inspection program has made toward reducing accidents on our streets and highways. We hope that through the continued cooperation of the people of Texas, these accidents can be further reduced."

## Bank Deposits Set New Record

A new record in deposits at a "call date" was established by the three Parmer County banking institutions, according to figures released this week by the banks.

According to figures on the three banks' quarterly statements, there was on deposit in Parmer County banks on

March 18 a total of \$14,827,095.85.

The deposit figure compared to that of \$14,317,885.51 reported on December 31, 1962, the last call date, and \$13,478,134.19 for the first quarter's statements a year ago.

That means that bank deposits in Parmer County are up a total of \$1,348,961, or roughly nine per cent over the same time a year ago.

Two of the three banks, Security State of Farwell and Friona State Bank, reported their highest deposit figures on record for a call. The third, First National Bank of Bovina, had its deposits fall somewhat from the last quarterly report, which was a record for deposits there.

Security State Bank of Farwell showed the largest increase, from \$5,416,856.28 at this time last year to \$6,398,495.27. This represented a gain of \$981,638.99 in deposits in the one-year period, or over 15 per cent.

"We were up by about a half million dollars from our December 31 statement," said Bob Anderson, vice president of the bank, who credited sales of farm commodities after the first of the year as being mainly responsible for the big jump. Friona State Bank went from \$6,307,398.91 in deposits last March, its former all-time high for a call, to \$6,547,180.73 at present, an increase of \$239,781.82.

The Bovina Bank showed deposits on March 18 of \$1,881,419.85, which was \$121,389.92 below its December 31 figure of \$2,002,709.77, but was still \$127,540.85 more than it had on deposit at the same time last year.

Total assets at the three banks likewise set a new all-time record for the county. That figure on March 18 was \$16,111,987.84, which compared to \$15,456,498.85 on December 31, and \$14,584,075.69 at this time last year.

### It's Time For... EYE CARE

Dr. Newton K. Wesley THE LENS IN YOUR EYE

Let us talk a little about the crystalline lens, which is a very important part of the eye. It bends the rays of light and changes shapes.

In a camera, we think of re-focusing by mechanical means. The shape of the lens in the eye is changed by a muscular ring around the crystalline lens. The exact functioning of the crystalline lens is not completely understood, but it is thought that the muscles surrounding the lens actually apply or decrease pressure on certain ligaments to center the shape of the lens.

Wesley

If you look at a close point, the rays of light are more divergent and they must be bent to focus; therefore, the crystalline lens changes shape to become sharper in curvature. This changes the focus and improves your vision.

The resiliency of this lens is very important, and after the age of about 25, it begins to harden. By the time we reach 40 or 45, the lens has hardened just as other parts of the body may harden. Bones are a good example of such action.

At this point, the lens no longer changes to accommodate vision for nearby objects. Then we complain about lighting when we read, or headaches, or we repeat the old joke that our arms are too short for reading when we hold a newspaper.

This "old age sight" is a normal change and nothing can be done about it. We see our eye doctor and he fits us with glasses or contact lenses.

Mrs. J. H. Steelman celebrated her 81st birthday with a luncheon at her home Wednesday.

### B'day Luncheon Honors Mrs. J. H. Steelman

Mrs. J. H. Steelman celebrated her 81st birthday with a luncheon Wednesday at her home. Special guests were members of the Widows' Club. The second annual affair was hosted by her daughters, Mrs. W. A. Moore, Mrs. Von Bowen,

Mrs. Troy Fuller and her daughter-in-law, Mrs. A. E. Steelman. Members of Widows' Club presented the honoree with a potted plant. Attending the celebration were Rev. John Ferguson, Mrs. Vernon Ward, Mrs. Mary Ruth Martin, Mrs. J. Sam Gaines, Mrs. Betty Adams, Mrs. C.O. Edens, Mrs. Ola Free, Mrs. Charlie Gray, Mrs. Mel Gunn, Mrs. Margaret Caldwell, Miss Rita Caldwell, Mrs. Pearl Moore, Mrs. Pearl Hastings, and the hostesses.

### WMU Hears Missionaries

Miss Rae Buster, missionary to Brazil, was guest speaker at a salad luncheon Wednesday at W.M.U., at First Baptist Church. Miss Buster was brought to Bovina by Mrs. Edgar Carney of Friona. She showed films of her work in Brazil and presented a short sketch of her life as a missionary in Brazil. After the luncheon the group had a period of personal testimony and a devotional was presented by Mrs. John Ferguson.

Highlighting the afternoon program was a talk by Mrs. Leonard Lane, a missionary to Nigeria. She presented a talk and films of Nigeria mission life. She was accompanied by Mrs. Rudd of Earth. Attending the day's activities were Mrs. Bobby Englant, Mrs. Homer Kelly, Mrs. Joe Moore, Mrs. Jerry Rogers, Mrs. R. N. Williford, Mrs. J. O. Combs, Mrs. E. H. Moody, Mrs. A. D. Cumpston, Mrs. Don Murphy, Mrs. Arnold Hromas, Mrs. W. W. Wilcox, Mrs. J. E. Owens, Mrs. Johnnie Horn, Rev. and Mrs. John Ferguson.

### Girl Born To Charlie Owen's

Mr. and Mrs. Charlie Owen are the parents of a baby girl born Sunday morning at Farmer County Community Hospital in Friona. The new arrival weighed 5 3/4 pounds and is named Eddie Marie. Grandparents are Mr. and Mrs. Vernon Campbell and Mr. and Mrs. Bill Owen of Amarillo.

### Farwell Hosts Volleyball Meet

The Farwell Junior High School girls basketball team is sponsoring a volleyball tournament for outside teams, both men and women, to be held April 25, 26, and 27. All entries should be returned with entrance fee and names of players by April 12 to James Craig, Farwell Junior High School. Eight players will be allowed on each team. Trophies will be given to first, second and consolation winners in both men's and women's divisions. Admission price will be 25 cents each night to everyone, including players. Proceeds from the tournament will go to buy new basketball uniforms for the junior high girls.

### PINK COTTON DELIGHT

Scatter ye rose-buds on a little girl's cloud white dress, as Joyce Ann has done, and you have a Spring delight. These rose-buds wind their way up onto the bodice and are accented by a swath of pink cotton sateen at the waistline. Eastman Kodak polyester woven with cotton and nylon into a batiste, keeps the bouquet fresh for many wearings. Easy to care for and completely washable, the fabric requires little or no ironing.

### Blade Sawdust by SUE MOTEN

Each year the Chamber of Commerce banquet seems better.

This is real good. We always look forward to attending. The speakers are good and the vocal entertainment was a real treat this year. Have decided that in connection with the banquet the citizens of the year feature brings out the feline curiosity in everyone. About a day or two before the banquet we quiz and are quizzed as to who the honor will go to this year.

Decided this year to be surprised and not even try to pry the secret out of one single person. Was a real treat. Viewed a real strange maneuver the other morning. While we were drinking coffee at Spudnut Shop. Three young boys entered the establishment, ordered three Spudnuts after which they were offered bubble gum by Paul Jones. The amazing thing about this is that the youngsters proceeded to chew the gum and eat their Spudnuts at the same time. Being mannerly little gentlemen they were sitting there about to choke when Lula came to their rescue and offered them some water. When we left they were still chewing their gum and their Spudnuts were consumed. Can't figure out how they managed not to swallow the gum in the process.

Another item on Paul's bubble gum is that one youngster told his mother to go to the Bubble Gum Station to get gasoline. Feel sure the youngster feels that you fill him with bubble gum and get gasoline on the side instead of the other way around.

From time to time we have urged you to call in your local news, in order that we can keep up with all that is happening in our area. So we will use our space to once again ask that you call and tell us of your trips, parties and other newsworthy functions.

Miss Marilyn Brandon, bride elect of Bobby Neal Fulks of Friona, will be honored with a bridal shower and reception Friday, April 5 in the home of Mrs. A. M. Wilson.

The come and go courtesy will be between the hours of 3 and 5 p.m.

Hosting the occasion will be Mrs. Paul Jones, Mrs. J. W. Harris, Mrs. E. R. Hutto, Mrs. Clifford Leake, Mrs. J. A. Loflin, Mrs. Chester Rogers, Mrs. Jessie Williams and Mrs. Wilson.

### Shower To Fete Bride Elect

Hosting the occasion will be Mrs. Paul Jones, Mrs. J. W. Harris, Mrs. E. R. Hutto, Mrs. Clifford Leake, Mrs. J. A. Loflin, Mrs. Chester Rogers, Mrs. Jessie Williams and Mrs. Wilson.

### Wilbur Charles Has Surgery

Wilbur Charles underwent surgery Friday morning at Farmer County Community Hospital in Friona. He is reported to be improving.

### Reading Group In Moore Home

Mrs. Joe Moore hosted Nellie Dean Whitten Roundtable group Tuesday morning at her home.

Mrs. John Ferguson, Mrs. Don Murphy, Mrs. Jim Russell, Mrs. Jerry Rogers, Mrs. Charles Embry and Mrs. Joe Moore presented reports on books read for this month.

Following the program refreshments of coffee and Spudnuts were served by the hostess.

### Visits Parents

Mrs. Art Vinyard and children, Billie and Becky, are visiting in the home of her parents, Mr. and Mrs. A. E. Steelman, Mrs. Vinyard is from Joshua.

### Terry Adams In Boston

Terry D. Adams, machinist's mate second class, son of Mr. and Mrs. P. A. Adams of Bovina, is serving aboard the guided missile cruiser USS Boston, which returned to her homeport, Boston, Mass., February 28, after seven months Mediterranean duty.

### Church Changes Singing Date

Community singing conducted each month at Pentecostal Holiness Church has been changed to the first Sunday of each month at 2 p.m., according to Rev. Archie Cooper, pastor.

Mr. J. W. Murdick is in charge of singing.

### Catholic Women To Plainview

St. Alice School in Plainview is the scene of a meeting for the Plainview Deaconry of Diocesan Council of Catholic Women today (Wednesday). Several Bovina women are attending.

Workshops on youth, rural life and libraries and literature will be presented in the morning with a general workshop during the afternoon session.

### Bowling Team Entertained

Bovina Restaurant Bowling team was entertained with dinner party Friday night at a Clovis restaurant.

Following dinner the group went to Friona to bowl.

Attending were Mrs. Joe Wilson, Mrs. Cash Richards, Mrs. Pete Davies, Mrs. J. W. Harris and Mrs. Henry Minter.

Hosting the party was Mrs. Cash Richards.

## Methodist Revival Continues

Rev. Tilden B. Armstrong, who is currently conducting revival services at Bovina Methodist Church, is superintendent of Pampa District of Methodist Church.

Rev. Armstrong began his pastoral work in 1943 at Fallett. Since that time he has served as pastor at Roby, Throckmorton, Floydada and Andrews. He became district superintendent in 1961.

Prior to becoming a minister, he was a school teacher at Swearington and Sunray. He is also a former postmaster of Sunray.

The revival which Rev. Armstrong is conducting here began Sunday and continues through Friday.

Rev. Curtis Lee, pastor of White Deer Methodist Church, is song leader for the services.

### Farwell Boy Wins Contest

Bradley Billingsley, 13, of Farwell Junior High is winner of a drawing contest which was sponsored by Bovina Woman's Club and Texas Panhandle Heritage Foundation.

The drawing will be placed in the Palo Duro Canyon amphitheater and a bronze reproduction will be hung at his school.

Other winners were Jimmy Gremless 13, Mike Smith, 14, and Wade Coker 13 all of Friona.

Judges were Dr. Dean Merritt, Mrs. Laura Griggs, Marshall Junior High teacher and Mrs. Dexter Todd, all of Clovis.

### Mrs. Glover At Home

Mrs. J. R. Glover returned recently from an extended trip to California where she visited Mr. and Mrs. Erwin Bryant and also Truth or Consequences, N.M., where she visited her son and wife, Mr. and Mrs. Johnny Glover.

# County Schools Set For Trustee Elections

The four Farmer County school districts will elect school board officials Saturday, April 6.

Two trustees will be elected at Bovina, Farwell, Friona and Lazbuddie.

Lazbuddie will have the most candidates on its ballot, six, while there will be five at Farwell, four at Bovina and three at Friona.

At Bovina, incumbent trustees M. H. Carson and Grady Sorley are on the ballot, along with Richard Vaughn and Don Murphy. Joe Wilson is up for re-election as county school trustee, commissioner's precinct 2.

Farwell will elect two trustees from among Melborn Jones, Preston Martin, W. D. (Bill) Prince, Sterling Donaldson and James W. (Pat) Patrick. Terms of Clay Henson and Walter Kaltwasser are expiring, but neither announced for re-election. Clyde Mag-

ness is candidate for county trustee.

D. C. Herring and W. M. Massie are up for re-election at Friona, with Charles Howell, a farmer, as the third man on the ballot. J. L. Shaffer is the candidate for county trustee at Friona.

Lazbuddie voters will have the biggest choice. Of the six candidates, Alton Morris is up for re-election.

E. T. Ford is the other board member whose term is expiring, but he did not come out for re-election. Others besides Morris on the Lazbuddie ballot include Hoyt Eubanks, C. W. Bradshaw, Don McDonald, Fred Burch and R. B. Seaton.

At Friona, the election will be held at the primary school building, as opposed to the high school, where it has usually been held.

Voting will be from 8 a.m. until 7 p.m. in each of the elections.

The NEW Santa Fe Trail A report on some of Santa Fe's newest milestones BY THE PRESIDENT OF THE SANTA FE In 1963, Santa Fe is investing some 90 million dollars on new equipment and improvements. All this money is being used to keep the Santa Fe up-to-date in every way. As a matter of fact, so many new and exciting things are happening on the Santa Fe today that some people are calling it "The New Santa Fe Trail." Here are just a few highlights of the many improvements. • 2545 new boxcars. • 500 Mechanical Temperature Control cars. • 550 covered hopper cars. • 194 double and triple deck autoveyors. • 181 flat cars. • 58 new diesel locomotives. • 24 hi-level passenger cars. • 31 semi-lightweight mail and baggage cars. • Increasing our microwave communication system to 2084 route miles. • Experimenting with new and more efficient freight cars such as compartmentalized cars for automobile parts. • Advancing our piggy-back operations to include joint rail-truck rates. And we haven't been standing still up until now. We've invested over a billion dollars in progress since World War II. For example: • The new cut-off line into Dallas. • Major line relocations in Arizona.

YOUR FAIR SHARE... Most Texans, we believe, are fair-minded folks. They believe in fair play, square dealing, and mutual respect for personal and property rights. Those who want to take advantage of their neighbors are the exception. Sometimes it may be hard to define "a fair share." This can occur in dividing oil or gas production, when two or more landowners are involved. As we all know, oil and gas don't pay any attention to fence lines. Here in Texas many wells have been allowed to produce more oil or gas than they should have because they were drilled on very small tracts. That extra oil or gas came from under the neighbors' land. Some oilmen made a regular practice of this type of operation. Obviously, one owner got more than his fair share--others, less. People in 26 out of 29 oil-producing states have found a way to divide their oil and gas so that each owner gets what is rightfully his. They simply put their small acreage together and share the costs and income. This system is known as POOLING. Such a system is needed in Texas. It is proposed in a bill now before the Legislature, HOUSE BILL 510. When the neighbors cannot agree, the Railroad Commission would set up a drilling block and see to it that the rights of all owners are protected... all costs and proceeds equitably divided. Oilmen who have made fortunes at the expense of others could not be expected to support House Bill 510. They are bitterly opposing it. But the responsible oilmen of Texas are overwhelmingly for it. So are the informed citizens who want to see justice done. Ask your Senator and Representative at Austin to support House Bill 510--so Texas, too, will have a reasonable and legal way to assure to each landowner his FAIR SHARE. (This ad paid for by Committee for Equitable Development of Texas Oil & Gas Resources, 341 Mellie Esperson Building, Houston 2.)

FIRE TRUCK A'COMING--

# Council Buys New Vehicles

To the tune of more than \$20,000 Bovina city council got in a vehicle purchasing mood at a special meeting Friday night.

Ordered was a new fire truck for the city which will cost \$18,814.76.

Cost of the truck, which was purchased from Reeve Chevrolet Co. of Friona, was \$5,000.79 with the balance of the cost -- \$13,813.97 -- to be for fire fighting equipment on the truck.

The equipment was purchased from and will be installed by Howe Fire Apparatus Co. Cost of the equipment will be financed by the same company at six per cent interest.

The truck is slated to arrive in Bovina within the next 50 days, Boyd Gilreath, mayor, says. The present fire truck, now in use, will be retained.

The city will pay cash for the truck itself with only the equipment to be financed.

Councilmen considered two bids on the fire truck equipment and five bids on the truck.

Also the council accepted a bid from Baccus Chevrolet Co. of Sudan on a new pickup for the city. The low bid was \$1,738. Four bids were considered. This new vehicle was picked up in Sudan Saturday by city officials. Cash was paid for it.

Bids are now being accepted at city hall for the city-owned '56 International pickup which has been replaced by the new one, Gilreath says.

Aldermen present at the Friday night session, other than Gilreath, were Al Kerby, Bud Crump, and A. L. Glasscock. Fire Chief Bill Denney and R. L. Hoplingardner represented the fire department at the meeting.

## Bank Deposits Up Slightly

Bank deposits in Bovina are up slightly from this time a year ago.

Deposits at time of bank's most recent call, which was March 18, totaled \$1,881,419.85, which is an increase over the \$1,753,879.00 which was on deposit in First National Bank of Bovina March 26, 1962.

This year, loans are up to \$962,313.69 from the \$687,748.36 which they totaled a year ago.

Total assets and liabilities of the bank this year are \$2,137,423.84 as compared with \$1,972,557.81 which they were in March of '62.

Capital has remained the same during the past 12 months -- \$50,000. Surplus has been increased from \$100,000 to \$125,000.

Undivided profits are shown this year at \$28,163.97 while they were \$35,901.53 in '62. Reserve for losses has been increased from \$32,776 to \$50,706.

The bank's official statement of condition appears in this issue of The Blade.

## 1963's Crop Outlook About Same As In '62

Our weather outlook for Parmer County in 1963 as benefits the crops is about the same as last year, according to J. W. (Indian) Crim, the county's official weather prophet.

Crim made his annual prediction last Friday morning, March 22 at sunup, the first morning after spring's arrival.

"We won't have any general rain -- it will come in streaks, followed by dry spells," Crim said. "But we shouldn't have as many hail storms either," he added.

Crim makes his forecast by observing a burning pile of boards at sunup each year on March 22. He said the steadiness of the wind indicated that there should not be many storms during the year, such as hail

storms and tornadoes.

Crim said he expected the current dry spell to continue probably through June. "We definitely won't have enough moisture to plant, so the boys had better keep their irrigation engines in running order," he said.

He commented that it was usually the case that after a dry fall season such as we had in Parmer County, that the drought would be broken in January. But, this year has been sort of a "freak," Crim said.

The Lazbuddie farmer has been making his traditional predictions public since 1962. "We've been trying to come up with a good prediction moisturewise for the past 12 years," Crim said. It was pointed out that the last ideal crop year as far as moisture was concerned was in 1949, with 1957 coming in as a "fair" year. Although he's been making

his predictions public for only 12 years, Crim has carried on the tradition from his father each year for nearly a half-century.

He said he remembered the annual "weather test" as far back as 1913. "And as far as I know, our observations have never been rained out in those 50 years," he said.

As is customary, the Crims used the occasion for a family reunion. Five of the family's six children and their families were present for the event.

Those present were Mr. and Mrs. Buck Crim, Mr. and Mrs. Max Crim and Mrs. Weldon Crim, all of the Lazbuddie area; Mr. and Mrs. Earl Monroe of Magdalena, N.M., and Mr. and Mrs. Fred Curtis of Farwell.

Another daughter, Mrs. Lovel Johnson of Garland, was unable to attend.

## Contract Let For Roadwork In Bovina

A contract for 1.9 miles of construction on SH 86 and FM 1731 in Parmer County has been awarded to a Lubbock firm, it was announced in Austin this week by the State Highway Commission.

James C. Kerr submitted the low bid of \$119,815 on the project. Grading, flexible base, and three course surface treatment from west to east city limits of Bovina and from US 60 to south city limits in Bovina, is expected to take 100 working days, according to O. L. Crahn District Highway Engineer at Lubbock.

Rhea Bradley, Resident Engineer at Littlefield will be in active charge of the project while it is under construction.

## One-Act Play Takes Second In District

Bovina High entry in district interscholastic one-act play contest took second in a field of five.

The competition was at Plainview Friday.

Happy won first place with Anton taking third, Lazbuddie fourth and Amherst fifth.

Cast members were Ann Lynn Wilson, Connie Vaughn and Billy Minter.

Miss Wilson was named to the all-star cast as best actress and Minter was selected as runner-up actor.

The play was under the direction of Superintendent Warren Morton. Mrs. Roy Crawford assisted in the play's direction.

FOOTSAVING EDUCATION

by James E. Edwards

Why We Won't Compete With Discount Stores!

Drastic price cuts would prohibit us from giving you the quality products and services you want and have come to expect from our shoe department. For instance:

1. REPUTABLE BRAND NAMES. We would not be able to offer you the quality materials, workmanship, and long wear that you get with our carefully selected, established brand names. Likely as not you would end up spending the money you "saved" by buying new shoes more often.

2. SKILLED FITTING. You would not have the benefit of the years of experience and knowledge of our skilled, professional shoe fitters. You would be on your own to find your size. Your youngsters would take the brunt of this hit-or-miss fitting, because proper fit now is vital to good foot health in later years.

3. COMPLETE SIZE RANGES. There is no such thing as an "average" foot, but a price cut would demand that we stock just a limited number of the so-called "popular" or "average" sizes. Your exact size might not be there.

4. NEWEST STYLES. A style selection means a bigger investment, so we couldn't offer you much of a style choice in men's women's, or children's shoes.

Our reputation is at stake with every pair of shoes we sell. And that's something we will not gamble away by selling cheap, "bargain" shoes. It makes good sense to us, and we're convinced it will to you, too. May we serve you?

THE HIGH PLAINS FARM AND HOME

Weed Control Conference At Hub Was Well- Attended

A conference on chemical control of weeds was well-attended at the Hub Community Center last Thursday. The meeting was sponsored jointly by the County Extension Service and the Texas Experiment Stations.

Three representatives from the experiment stations gave the gathering of farmers the latest findings on chemical control of weeds, and pointed up its efficiency and economy over hand labor.

"Farm labor is becoming more difficult to obtain, and in the future it may be necessary to eliminate hand hoeing if we are to continue row crop production," stated E. B. Hudspeth Jr., agricultural engineer with the U. S. Department of Agriculture, Texas Experiment Station, Lubbock.

"The real benefits in eliminating hand hoe labor in the immediate future would be the possibility of lowering the cost of production," Hudspeth said. He pointed out that the use of post-emergence herbicides

offers a good possibility of reducing or eliminating altogether hand hoeing in cotton grown on the High Plains.

"Cotton in 40-inch rows was produced without hand hoeing at the Lubbock station in 1962," Hudspeth said. He said the cotton was planted May 1 and the weeds were controlled with a rolling cultivator from the time of emergence until July 9.

On July 9 a multi-purpose, wheel-type post-emergence spray applicator was used to apply Diuron and a surfactant in a 10-inch band across the drill row. On July 19, the same applicator was used to spray the middles and ten days later a second broadcast application was made.

A cultivator or hand hoe was not used in the plots after July 9. Total cost of the chemicals used throughout the season was less than \$5 per acre, and could have been less, Hudspeth said.

A. P. Wise, agronomist with the Southwestern Great Plains Field Station in Bushland, dis-

cussed the pre-emergence application of diuron.

In pre-emergence application, rainfall must activate the chemicals. It was pointed out that weather records show that pre-emergence applications of diuron will be activated by rainfall two years out of three.

Under favorable conditions, diuron reduced hoeing costs in weedy fields, and the cost was only about \$1.50 per acre.

Weed control in sorghum has also been studied since 1950 at the Bushland station. Early studies have shown the feasibility of using 2,4-D for broadleaf weed control. Later studies showed that the chemical could most safely be used near sensitive crops when applied in high carrier volume and low spray pressure.

Later trials have shown that propazine is the most promising for a pre-emergence herbicide for sorghum which control both grasses and broadleaf weeds and not be toxic to cotton.

The specialists recommended that good seedbed preparations prior to planting, along with cultivation, rotary hoeing or harrowing, is probably the cheapest way of controlling weeds in sorghum.

In discussing close-row spacing of cotton, Hudspeth said a five-year study had shown that yields averaged 10 per cent higher on close-spaced rows than on conventional 40-inch rows. "No special difficulties were encountered in the planting and weed control operations, and mechanical stripper harvesting could be adapted to close-row planting," Hudspeth reported.

He said that general observations showed yield increases ranging from six to 25 per cent; lint yield increases as high as 165 pounds per acre. Fiber quality measurements and the results of close-spacing are as yet inconclusive. Fertility and water relationships and the effects, if any,

on fiber quality caused by close-row planting need further study, Hudspeth said.

Clovis Man Named Conference Prexy Lazbuddie FHA

New president of the Southwestern Savings and Loan Conference is Lynn L. Martin, executive vice president and director of the First Federal Savings and Loan Association of Clovis, New Mexico.

Martin's election to office was announced last Wednesday night at the annual banquet of the Conference in Corpus Christi. Other officers announced along with Martin include: W. Marion McGough, first vice president, Greenville, Miss.; J. B. Douglas of Tecumseh, Nebraska, second vice president; and Herschel J. Rogers of Brownsville, secretary-treasurer. Robert G. Lake of Pratt, Kansas, is immediate past president of the Conference.

Martin is active in business, civic and religious affairs in Clovis. He is a member of the

U.S. League Committee on Federally Chartered Savings and Loan Association, and is immediate past president of the New Mexico Savings and Loan League.

Attends Meeting

By Jan Nowell

The Lazbuddie Future Homemakers of America attended the Area I FHA convention at Lubbock March 16. Gayla Seaton ran for the office of treasurer of Area I, but was defeated in a run-off.

The chapter is very proud of member Mariana Gammon, who will represent Lazbuddie High School in the state chorus in Dallas, one of four altos going from the area.

After the meeting, the girls went bowling before returning home. Mrs. Charley Walton, the chapter's advisor, accompanied the girls on their trip.

Use a curved, pointed grapefruit knife to remove soft-balled eggs from their shells.

Harts Buy Bull From Kepley

Dale and Laura Hart, Friona, have purchased Red Buddy F28-2763, a three-year-old bull, from F. E. Kepley, Farwell, Texas.

The new animal is a registered Milking Shorthorn and the record of the transfer of ownership has been made by the American Milking Shorthorn Society at Springfield, Missouri.

TRAINING FUTURE FORECASTERS in the art of forecasting weather the way the Indians did it years ago is J. W. Crim of Lazbuddie. In this case the future forecasters are Crim's grandsons, who attend the family ritual each year. Crim noted that the smoke was carried almost due north by the southerly wind, promising "no more" rain than we had last year.

# WITH THE COUNTY AGENT

DERYL COKER

By Deryl Coker

Since we have lost a fairly large per cent of our wheat, especially on the beds, we probably will have a more severe weed problem than usual. I have noticed that a lot of wheat fields have a good stand of Lancy Mustard, and Pepper weeds. Field control of these weeds is fairly easy at this time of the year.

Control can be obtained by using one-half pound per acre of ester or acid formulations of 2,4-d applied as soon as the wheat is fully tillered in the spring (Feb. 15 to April 1). Spraying wheat before it is fully tillered reduces the number of tillers which produce heads. Spraying during the boot or flowering stage may cause poor seed set.

Last week we had a county-wide weed meeting, in which experiment station personnel dis-

cussed weed control in cotton and grain sorghum, using the new chemicals that have come on the market the last year or two. There is certainly a place for these chemicals in weed control and if they are properly used, complete weed control can be obtained.

Probably the best news obtained at the meeting was that Karmes D. L. plus a surfactant can be used as a post emergence spray and does give excellent weed control at a cost of less than \$1 per application. If anyone is interested in chemical weed control I have some good information in the office. Later on I will go into more detail on the subject.

There is nothing that will replace good seedbed preparation prior to planting, however, but it is certainly nice to know that we do have chemicals that will do a nice job of controlling weeds.

# 95 Per Cent Of County's Farms Sign For Program

A total of 1202 Farmer County farms signed up for participation in the 1963 Feed Grain program, according to Prentice Mills, office manager of the Parmer County Agricultural Stabilization and Conservation Service.

This number compares to a total of 1266 eligible farms in the county, Mills pointed out, or roughly 95 per cent participation among the eligible farms.

"Actually, with the exception of four or five fairly large grain farms, we signed up almost all of the farmers who have any grain base to speak of," Mills

said. Of the participating farms signing up, a total of 63,375 acres were pledged as diverted acres for 1963, with the remaining 200,689 acres to be planted in grain.

This represents a decrease in the number of layout acres as compared to 1962, and an increase in the number of acres to be planted, the ASCS official stated.

The total diversion payment to be earned by the 1,202 farms in 1963 amounts to \$1,197,650, it was announced.

# NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

The 14th annual membership kick-off banquet held at the Farwell School Cafeteria and served by the senior girls and their mothers on the 18th, was, in our opinion, one of the best in history - The meal was delicious, service was courteous and continuously good. Table decorations, depicting patriotism and part of Farm Bureau's export marketing program, were unusually good. Mrs. Vernon Symcox did the decorating, we understand.

President Hamilton got the meeting going, and things kept moving right through the fine address by Odell Frazier, of the Levelland Farm Bureau. Then, Vice President Frank Hinkson took charge, gave instructions and community workers got together and planned their work, and it was over. Sixty four were present.

We are glad to see H.S.R. 247, by Clayton and Moyer, introduced in Texas Legislature last week, urging the 58th Legislature of the State of Texas to go on record in opposition to the policy of the United States Arms Control and Disarmament Agency. We hope you are already familiar with this subject, and that you will keep abreast of any developments regarding it.

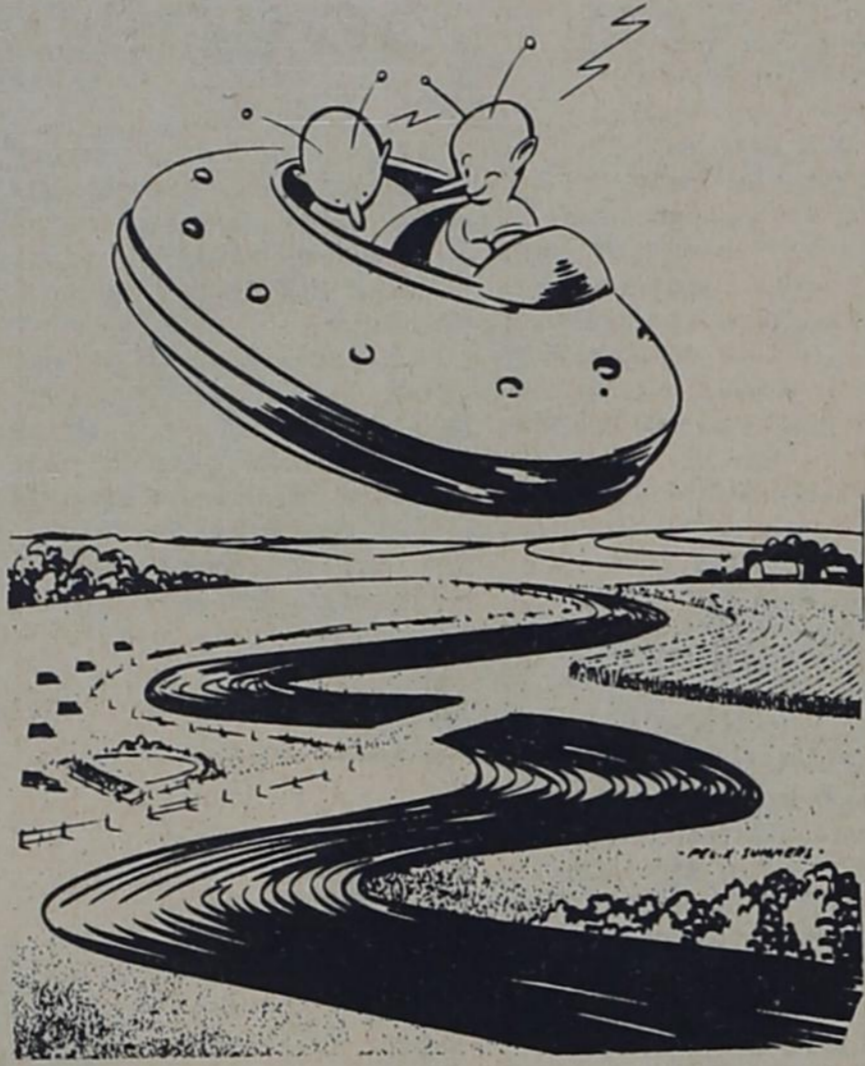

And then there is another, H.S.R. 234, by Macatee, opposing the same Disarmament Proposal, and stating that The House of Representatives will consider unconstitutional any such agreement surrendering the sovereignty of this nation to the United Nations. Farm Bureau favors both of these bills, and if you do, why not write your legislator in Austin and encourage him to vote for the bills.

Another, S. B. 230, which we mentioned sometime ago, and received some inquiries about, has been amended to strengthen, and reported favorably out of the Senate Committee on Jurisprudence last week. Senator Owen authored the bill, and it would prohibit the display of the flag of the United Nations on any property owned by the state, County, Cities or any political subdivision in Texas, and providing appropriate fines for violation. Your letters on this will be well worth while, too, we believe.

We would like to give our personal endorsement to Joe Jones, Jack Patterson, and all others associated with the March of Dimes for the fine job they did in helping get your contributions together, and then putting them to work in the most appropriate manner, rather than leaving the funds in account, doing no one any good.

CONSIDER THIS: Hell and destruction are before the Lord; how much more then the hearts of the children of men? Proverbs 15:11.

"CONSERVATION FARMING IS 'OUT OF THIS WORLD'!"

According to the Washington Daily News local taxpayers increased their debt from \$3.8 billion to \$12.1 billion for schools from 1952 to 1960.

From the Carlsbad, New Mexico, Current-Argus: "Half of the U. S. women getting married now do so before the age of 20, and the men they wed are two and a half to three years older. Assuming that this pattern continues, there will be about 90,000 more women than men of typical marriage age by 1965. The following year, maidens will outnumber youths by almost 365,000. That will be the high point of imbalance, but as late as 1968 young women are still expected to be substantially more numerous than the young men."

The Philippines Republic has swapped position with Cuba as America's No. 1 source of cigar imports, says the Philippine Tobacco Board.

Ralph T. Moore writes in the Oregon Victor: "Just about every thinking person in these United States, from the President on down, is deeply concerned with our tax situation and what it is doing to our economy. A current cartoon epitomizes the issue rather well when it depicts a taxpayer leaning over a fence to watch an attractive-federal taxcut prospect, while a horse of local and state taxation approaches with teeth a-gape to take a big bite out of his, the taxpayer's, rear. And so it goes all over the nation. The higher taxes so blithely voted in past years now return to clobber us where and when it hurts the most."

You can always spot a well-informed man. His views are usually the same as yours.

# Off To England For Grain Sorghums

Dr. N. W. (Nick) Kramer, grain sorghum specialist at the Paymaster Seed Farm, Aiken, left this week for London, England, to participate in four meetings with feed manufacturers and feeders to talk about the "Quality factors in grain sorghums as related to its nutritional value."

These meetings are sponsored by the U. S. Feed Grain Council and the Foreign Agricultural Service of the USDA. The Grain Sorghum Producers' Association is part of the Feed Grain Council.

"The object, naturally," said Kramer, "is to improve the exporting of feed grain from the U. S. to the United Kingdom."

Kramer said that the two big feed grain meetings will be held in London, England, and Dublin, Ireland. The other two meetings on the islands will be determined later. The persons to whom Kramer will be talking will not be farmers and cattle feeders, but mostly feed manufacturers, swine and poultry feeders. Kramer said that the beef cattle industry in England was well es-

tablished and had good forage for feedings, but that the intensive feeding of poultry for meat and eggs, and swine for pork, was not so well established. Another thing which Kramer and the Feed Council will try to sell, besides quality grain sorghum for concentrated feeds for mixtures to the manufac-

turers, is the idea that grain sorghum tariffs should be lifted and put on an equal basis with corn. At the present time, corn may be imported by England with little or no tariff, but grain sorghum carry a 10-cent tariff on each bushel.

As Kramer said, "My job is to sell U. S. grain sorghum to the manufacturer, the feeder and the politicians!"

Incidentally, Dr. Kramer is the first U. S. commercial grain

specialist to be invited to participate in foreign feed grain economics. Up to this point, most all our representatives overseas have been from colleges, universities, experiment stations, and governmental agencies.

# Cotton Variety Test Is Reported

Thirty varieties of cotton were tested at the High Plains Research Foundation in 1962. The lint yields ranged from a high of 825.88 to a low of 452.82 pounds of lint per acre. The average was 609.5.

Each variety was planted at the rate of 32 pounds per acre with a spacing of 40 inches between rows. Rainfall received from April 1 to October 1 amounted to 19.07 inches. One irrigation of 3.24 inches was made on August 15.

The research was conducted by Barry Love and Paul M. Belcher of the Foundation's staff. Their report No. 57 issued several days ago included early vigor, bloom date, stand, height, number of bolls per plant, per cent open bolls, storm proof rating, ginning per cent and lint yield pounds per acre.

There was no significant difference in yield of the first twelve of the thirty varieties tested. The yields in these 12 varied from 825.88 to 657 pounds. There was little evidence of disease or insect damage in any of the varieties. The 30 varieties were originally planted on April 27, but a severe hail destroyed the complete test on May 16. All varieties were replanted on May 23 when the soil temperature was 65 degrees Fahrenheit.

The research was conducted by Barry Love and Paul M. Belcher of the Foundation's staff. Their report No. 57 issued several days ago included early vigor, bloom date, stand, height, number of bolls per plant, per cent open bolls, storm proof rating, ginning per cent and lint yield pounds per acre.

## The HAPPY HOMEMAKER

BY JUNE FLOYD

At this time of year most homemakers begin thinking of planting seeds indoors for transplanting later in the season. Several Parmer County homemakers have cabbage plants, tomato plants, pepper plants and several varieties of flowers already growing in boxes and cans.

Annual flowers and vegetables that dislike being transplanted may be sown in individual plant containers or in peat pots. By using these containers and pots it is possible for any gardener to transplant all plants without disturbing the root systems.

Some plants that will profit by using this method are cantaloupes, watermelons, lima beans and some varieties of flowers. Individual containers are quite small and a large number of them may be placed on a small space.

After the tiny plants come up and all danger of freezing is past the container is placed in the soil and there is no shock or setback for the root systems.

Knowing when to plant vegetables and flowers is of utmost importance to anyone interested in growing them.

Some vegetables are called "hardy" because seedlings and small plants will live even if a light frost should occur when they are growing. These are the vegetables you can plant as soon as frost is out of the ground.

In alphabetical order, they are: asparagus, beet, cabbage, carrot, chard, kale, lettuce, onion, parsley, parsnip, pea, radish, spinach, turnip and New Zealand spinach.

"Half-hardy" vegetables, to be planted when danger is a heavy frost is over, include broccoli, cauliflower, celery, endive and kohlrabi.

"Tender" vegetables, which must wait until all danger of frost is past, are bean, corn and potato; while cucumber, eggplant, lima bean, melon, okra, pepper, pumpkin, squash and tomato are "extra tender" and soil temperature should reach 60 degrees before seeds are sown.

Larkspurs are one of the annuals that grow best when the weather is cool, even cold. That's the reason their seeds should be sown just as early as it's possible to do so. It even may be better to sow on soil that hasn't been carefully pre-

pared than to wait for weather which permits tilling.

Certainly larkspurs are among the most beautiful of annual flowers. Their long spikes of bloom in deep or sky blue, pink, red, salmon or white give a lift to the late spring or early summer garden. They are exceptionally good cut flowers and, even when there isn't a bud in sight, the dark green, finely cut foliage is a pretty sight.

Two salads which are tasty and yet a little different are Pineapple-Cottage Cheese Mold and Kidney Bean Salad.

**Pineapple-Cottage Cheese Mold**  
 2 tablespoons gelatin  
 3 tablespoons cold water  
 1 cup pineapple juice or pineapple juice plus water  
 2 tablespoons lemon juice  
 2 tablespoons sugar  
 pinch of salt  
 1/2 cup drained crushed pineapple (9 ounce can)  
 1/3 cup finely chopped celery  
 1/3 cup cottage cheese  
 Sprinkle gelatin on cold water and soak a few minutes. Heat fruit juices, add sugar, salt, and gelatin. Stir until gelatin is dissolved.  
 Chill until thick enough to hold solid food in place. Stir in the pineapple, celery, and cottage cheese.  
 Pour into small loaf pan or individual molds.  
 Chill until firm.

.....

**Kidney Bean Salad**  
 2 cups drained cooked or canned kidney beans  
 1/3 cup thin tart dressing  
 1 small onion sliced in rings  
 1/3 cup chopped celery  
 1/4 cup chopped sweet pickles  
 Salt and pepper to taste  
 Mix beans and dressing; chill an hour or more. Turn beans in the dressing occasionally so they will absorb the flavor.  
 Just before serving, add rest of ingredients. Mix lightly. Season to taste.  
 Serve in lettuce cups, garnished with slices of hard-cooked egg.

.....

If you haven't tried a Spiced Prune Cake, you have missed an adventure in good eating. Clip the following recipe and add it to your collection:

## Hinn, New Variety Soybean Is Introduced

HALFWAY -- A new variety of soybean was introduced Saturday during the semi-annual meeting of the board of directors of the High Plains Research Foundation.

The new variety, Hinn, was named by Dr. Earl Collister, breeder and developer of the strain, to honor Harold Hinn, chairman of the executive committee and board of trustees. Mr. Hinn has been one of the strongest supporters of the Foundation since before its conception.

Hinn variety has already been approved by the state board of certification. Its development has come about over the past two years at the Foundation by Dr. Collister.

Field production of certified seed will be carried out this year. The Foundation will make contracts with cooperating farmers over the area. The seed will then be turned over to seed companies next year for sales and expanded production.

Because of its charter, the Foundation will not participate in the sales of the seed. Production of seeds this summer will be overseen by the staff, but only for certification and proper cultural practices.

When asked about the seed's characteristics, Dr. Collister said simply, "It's good."

The plant breeder and director of the High Plains Research Foundation stated the Hinn variety virtually does not shatter. The lack of shattering and increased yields will make the Hinn variety superior to the Lee and Hill varieties now considered the only adapted varieties for growth on the High Plains.

Yields by Hinn at the Foundation the past two years have averaged about 45 bushels, Collister said, adding "We've not had good conditions here either year, with hail almost wiping us out in both."

NEW SUB STATION

A sub station will be established by the Research Foundation in the Valley this year, with approval being voted at the meeting.

The station will be established between Edenberg and Hartlingen. No land is dedicated to the station, but work in flame cultivation, as in the past two years, will be carried on with cooperating farmers of the area.

Don Staggs, recently promoted from field assistant to laboratory assistant, will handle the operations in the valley.

Farmers in the Valley area requested the sub station. Because of the very successful work carried out there the past two winters, they decided they wanted more of the same, so year-round work will now be carried on.

Valley supporters guaranteed complete financial support for all personnel and equipment needed for the work down there.

FIELD DAY SET

The Foundation's annual Field Day will be held Sept. 10 this year. It will combine the two field days held annually in the past, the flame cultivation and annual crops demonstration.

REQUESTS GRANTS

Among the grants requested for research at the Foundation are one for \$73,400 for a four-year period from the Cotton Producers Institute and one for \$36,000 from the Plains Cotton Growers, it was pointed out at the meeting.

The DuPont Chemical firm has (Continued on Page E)

# NITROMITE

82.2% NITROGEN

A PRODUCT OF THE SHAMROCK OIL AND GAS CORPORATION

## NITROGEN FERTILIZER

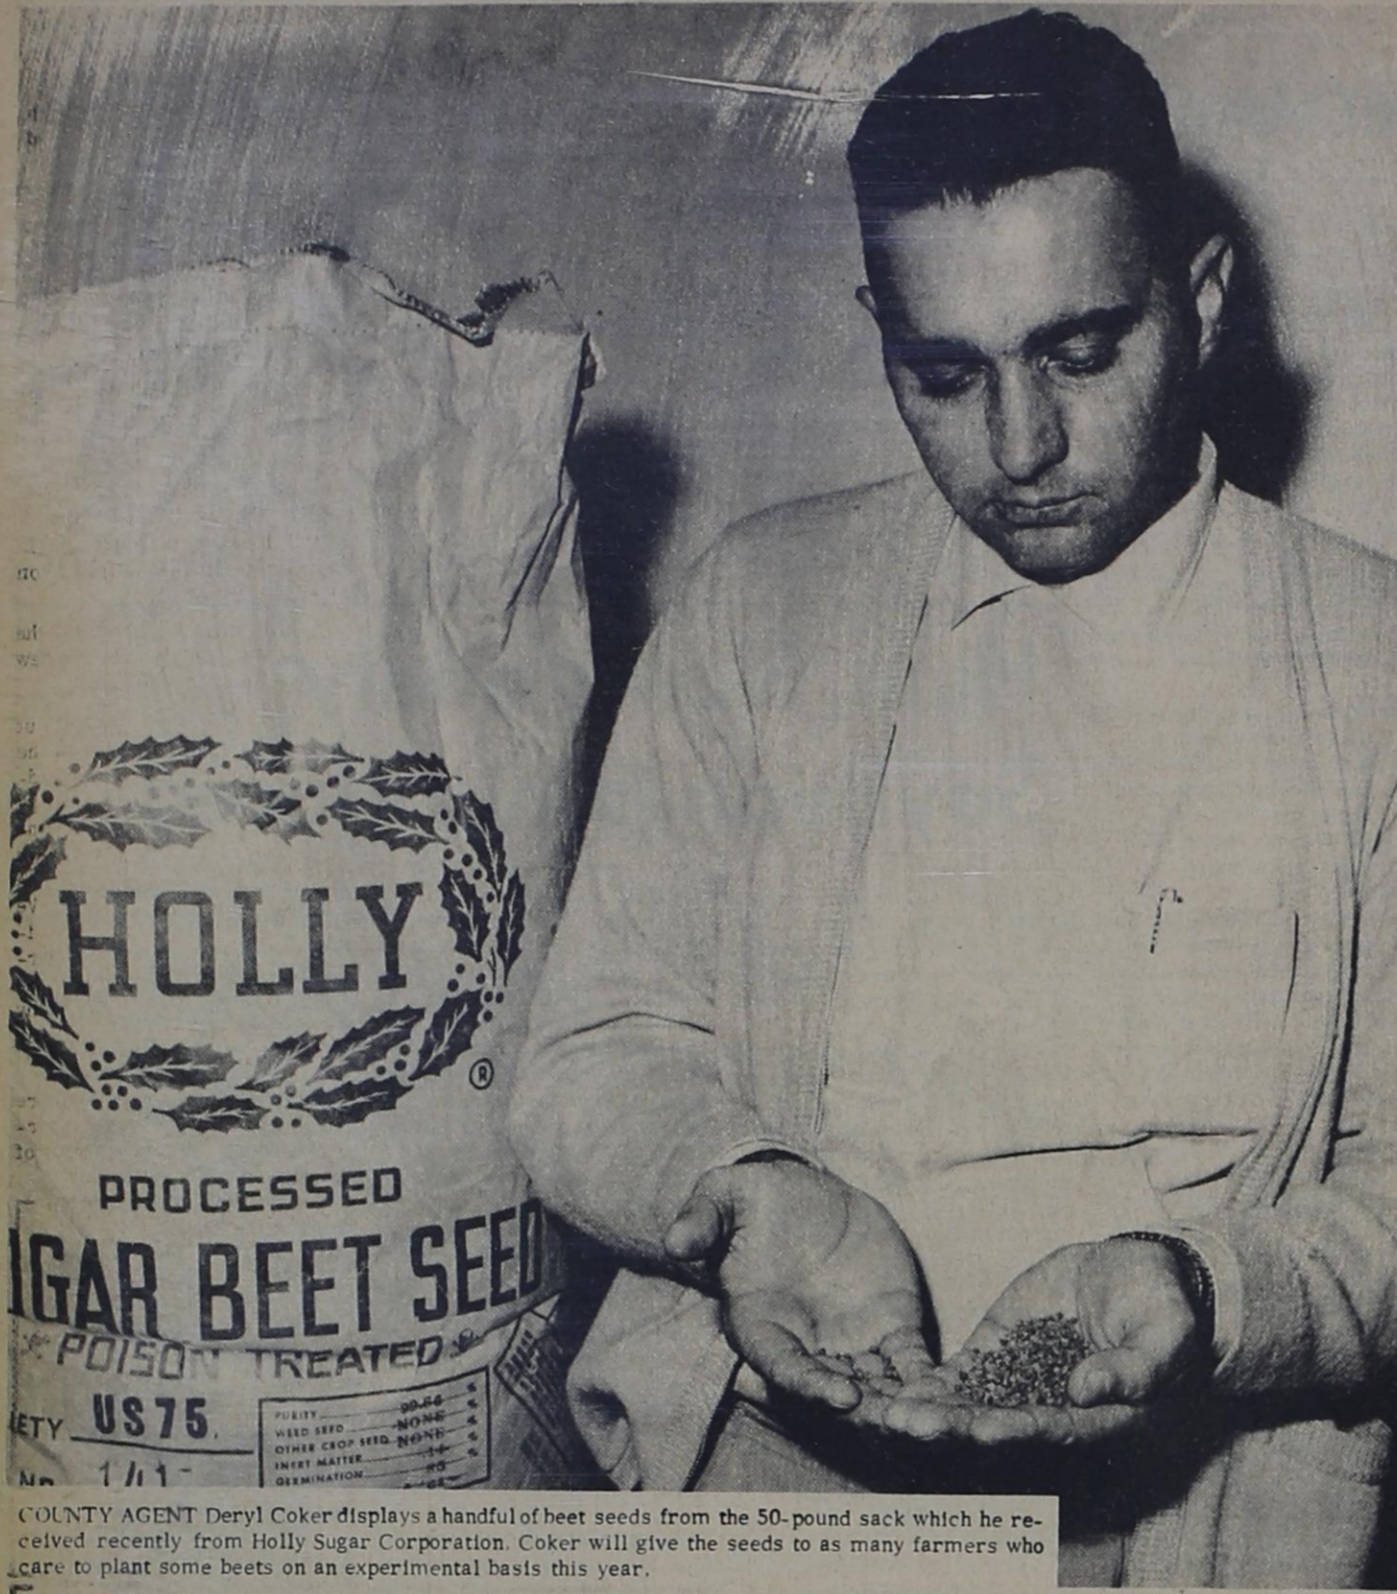

**TIME** The period of greatest utilization of nitrogen by all crops is the 6 to 10 weeks following germination. By the end of that period the die is cast and any deficiency in nitrogen cannot be overcome by later application. The plant and its fruit will reflect that deficiency regardless of how well cared for otherwise. This means that for maximum effect on the quantity and quality of the crop, the nitrogen should be in the soil waiting when the crop is planted, available from the first day the plant can utilize it. There is much to be said for Fall plow-down and side dress applications of nitrogenous fertilizer. But the single most important consideration is that nitrogen be available during the plant's early growth. It means that if you haven't fertilized with a high-nitrogen fertilizer since harvest, it would be wise to do so as soon as possible.

Your Nitromite dealer is ready now to put this profit maker to work in your fields. Call him right away. He has all the information on the Shamrock Farm Credit Plan.

COUNTY AGENT Deryl Coker displays a handful of beet seeds from the 50-pound sack which he received recently from Holly Sugar Corporation. Coker will give the seeds to as many farmers who care to plant some beets on an experimental basis this year.

## Beet Seeds Are Offered Farmers

Farmer County farmers who might be interested are invited

**W & J AUCTION**  
Are You Looking For One--Or Are You Trying To Get Rid Of 'em?

**WE CAN HELP YOU**  
Every Tuesday Night  
108 PILE CLOVIS

to come by the County Agriculture Agent's office in Farwell and secure beet seeds for experimental plots in 1963. Holly Sugar Corporation, which is to begin construction of its \$18 million sugar refinery near Hereford in the next few weeks, sent a 50-pound sack of seeds to the county agent's office, for use by anyone who might want to try them. "For those farmers who have never planted beets, we will try to give them what information we can, although at present we are like most every-

one else -- we are inexperienced in growing beets," said County Agent Deryl Coker.

Coker emphasized that the extension service office would work with Holly Sugar Corporation and the area farmers in keeping farmers abreast of developments regarding signups for acres and so forth.

There will be no limit on the amount of seeds farmers can have -- they may have whatever they care to plant, Coker said.

**FIRST ICE IN TEXAS**  
Ten cents per pound was the cost of ice in Texas in 1875. That's the year the first ice plant was established in Texas. Site of this first ice plant is on the present Marion County Court House grounds in Jefferson, Texas, in the North East part of the state.

Later, this ice plant was moved to Harrisburg. Had ice plants flourished more rapidly in Texas, who knows, we might be larger than Alaska today.

### To Trap A Fox

You fox trappers can make more and faster catches by using bacon.

Just place one or more strips of raw bacon on an overhanging limb, or on a pole with cross stick, about three feet above a stump. Set the trap on the stump.

Fox will be caught as he leaps for bacon.

## Call Screwworm Headquarters When Infestation Is Found

Knowing immediately where every screwworm case in the Southwest is located has become so important to the eradication program that arrangements have been made so livestockmen can call the Mission headquarters collect when an infestation is detected.

When a screwworm case is found, officials would like producers to do two things: (1) collect about 10 worms from the wound, place them in water or alcohol and hold for further instructions and (2) report the infestation to eradication officials by calling collect to Justice 5-1646 (Mission). No telephone call should be made unless a sample is available.

The following information should be available at the time the call is made:

1. Name; 2. Address and telephone number where producer can be contacted; 3. Date when sample was collected; 4. Location of farm or ranch where case was found; 5. Location of wound on animal.

Producers are urged to call day or night, whenever the infestation is found. At night or on weekends, the information will be relayed to eradication officials, who will contact the producer for further information and instruct him to either mail the sample or hold it to be picked up by a livestock inspector.

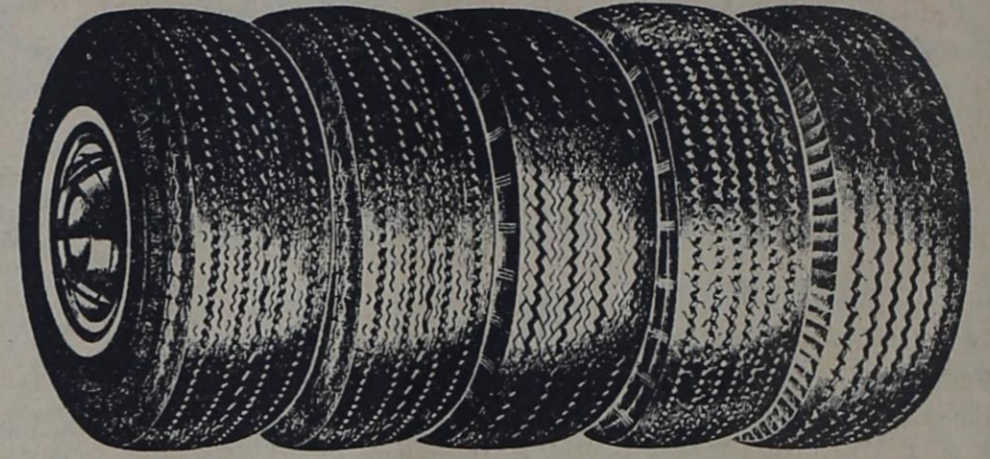

From the information received, a determination can be made as to the action that is necessary. In many cases, a screwworm livestock inspector will be sent to the premises to pick up the sample and obtain additional information. If the sample is identified as a true screwworm, sterile flies will probably be dispersed in the area.

The key to the system, officials said, is that sample of worms be collected at the time the wound is detected. Without the sample, they won't know whether the infestation was from a screwworm or from some other maggot, similar in appearance and characteristics. Screwworm infestations are now at a minimum, the eradicators said, and through

prompt reporting, action can be taken to prevent the infestation from mushrooming into a large scale outbreak.

**New Polyethylene Pipe May Boost Water Conservation**

Farm and ranch owners who are faced with the problems of water conservation and the need for a more economical method of supplying water to livestock, may find their best answer in a new coil-type high density polyethylene pipe which has been recently field and laboratory-tested and approved by the National Sanitation Foundation, according to A. J. Brumbaugh, agricultural marketing authority of the Southwestern Plastic Pipe Company, Mineral Wells, Texas.

"Polyethylene not only has become one of the most reliable types of water system piping available, but high density polyethylene meets the United States Department of Agriculture requirements for Practice B-8

plastic piping," Brumbaugh stated. "This is a very important factor. It is a comparatively new type of polyethylene, which is made of first-quality basic ingredients. NSF-approved polyethylene pipe can be safely used for drinking water systems, not only in stock watering lines, but it is equally suitable for domestic systems serving the farm and ranch home."

It was also pointed out that one of the principal advantages of using this type of plastic pipe for farm and ranch watering systems is the fact it has a high tensile strength, and generally will withstand even the lowest temperatures. It is resistant to minerals and acids, which sometimes deteriorate

metal piping. This means it will not rust or corrode, Brumbaugh said.

"There are a number of other types of plastic pipe on the market today, but for a good low-cost watering system, high density NSF-Approved polyethylene pipe will prove to be a sound investment for any farm or ranch owner," the Southwestern Plastic Pipe official concluded.

A packet of applications bulletins and descriptive information on how to select and install plastic piping for farm and home water systems is offered, without charge, by the company, Brumbaugh said. Address Southwestern Plastic Pipe Company, P. O. Box 340, Mineral Wells, Texas.

**Hinn, New Variety--**

(Continued from Page C)

been contracted for a research grant on the company's weed chemicals and herbicides.

The board gave voted permission to the executive committee to sell the land on which the original office building and equipment shed once stood, should a reasonable offer be made. The house would be moved.

Plans for a new steel equipment shed were shown to the board. It is hoped by the board a grant requested from the Clayton Foundation for \$18,490 would pay for the U-shaped structure. A gin building for testing gin unit would also be figured in on the construction.

Present location ideas for the buildings would be near the new Foundation office building.

Delbert Langford pointed out that in the very near future the Foundation would be needing additional acreage to conduct experiments, should requests continue to flow in. "At present we have almost 6,000 plots on the 310 acre farm," he said. "We must have uniform soil conditions for crops, but using various amounts of fertilizers and chemicals and having so many tests, this is hardly possible any more," he pointed out.

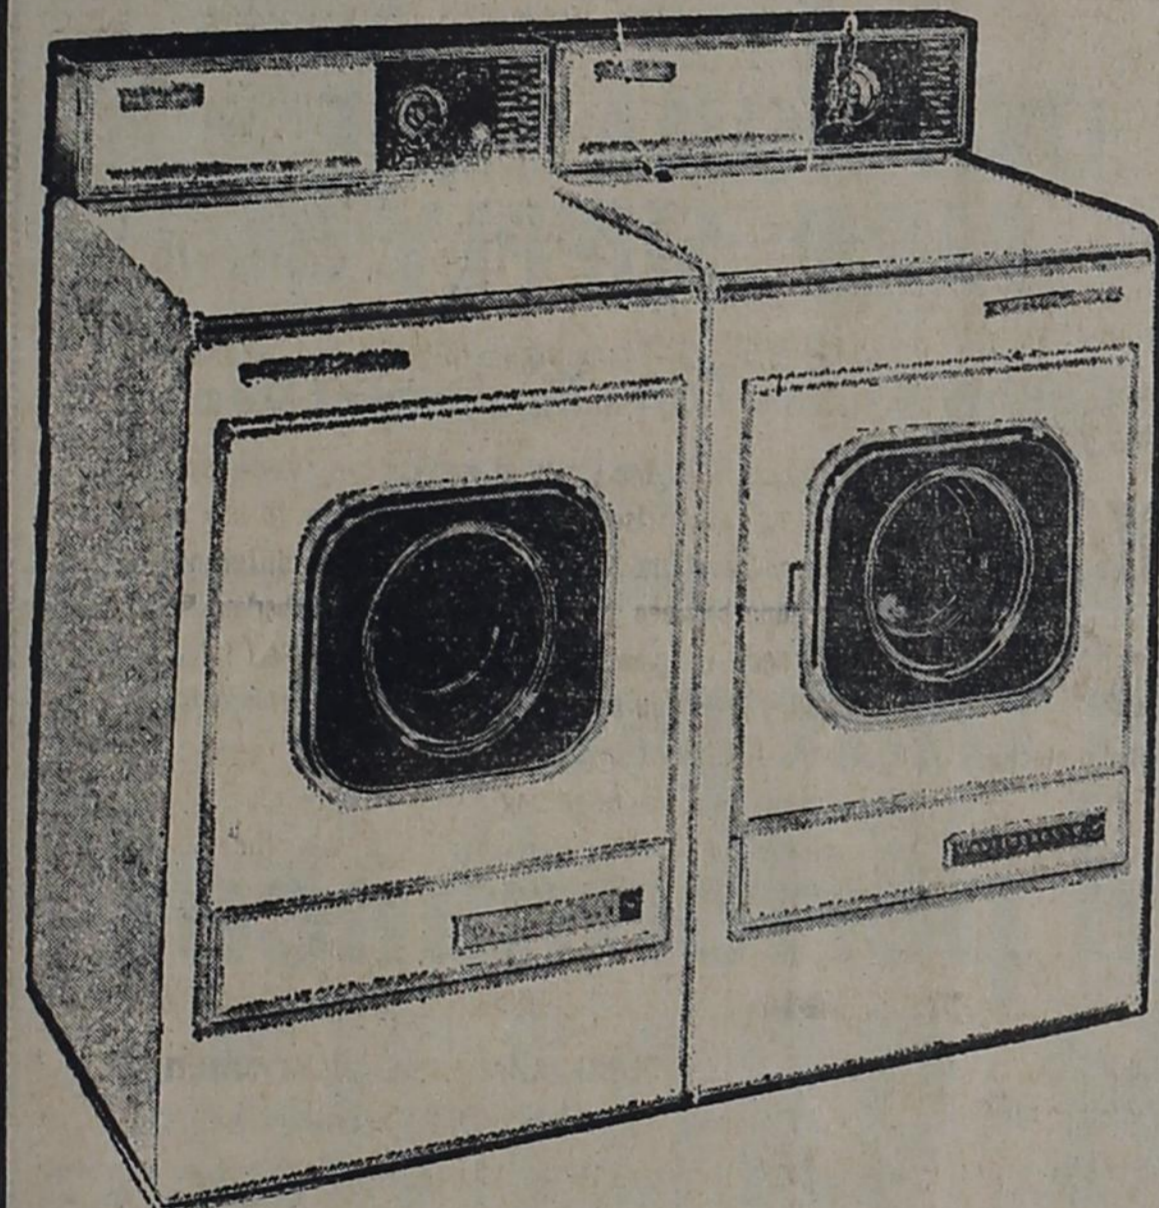

Langford said many plots are now being planted on neighboring farms through cooperation of the farmers.

**SPORTS AFIELD**

By Ted Kesting

It's true; real landlubbers are rare today. But the sportsman who goes out only in the boats of friends is likely to get just a passenger's viewpoint and, if each friend has a different sort of boat, he may get no real insight into any.

If you have yet to buy your first boat, there is one big, important point to remember: there are rules for good, safe boat buying, rules for any boat buying. You must follow them; being a beginner is no excuse. Only experts can make exceptions — they alone can figure out a calculated risk.

A boat must be chosen to suit both the waterway it will be run on and the load it will carry; that is the basic consideration you as a first-timer must never lose sight of. Nothing can reveal sheer imbecility better than buying a boat smaller than what the waterway calls for, simply because as is often said, it is easier for a beginner to handle. Only proper size can combat

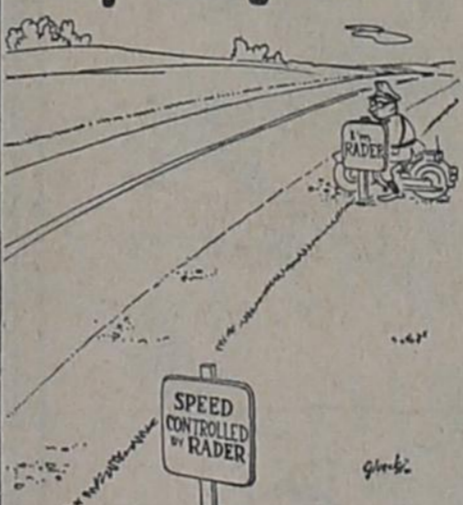

steep waves, in a powerboat, and it's a genuinely safe bet no waves will ever level down because a novice is out in them.

This does not mean you have to buy a big boat, says Willard Crandall, Boats Editor, Sports Afield Magazine. The waves of the ocean, Gulf and large lakes, such as the Great Lakes, will not offer any problem, for you won't be going out on them. Not only are sheltered waters safer for those getting their experience, but also they afford quicker and more fun-filled chances to get that experience.

Of course, it is quite evident that circumstances vary for any first boat. Sheltered waters are of all kinds: swift rivers, tidal bays, quiet ponds, and so on; and they offer a variety of places on which to keep the boat as well as to run it.

An outboard of about 16 feet is about the most popular boat in America today; it's well-suited to a trailer, to one of intermediate size that's the easiest of all to learn to handle. For a first boat, you're wise to choose something outstandingly popular—since there's obviously less chance of going wrong in view of your inexperience. Besides, a 16-footer is a remarkably versatile boat. It's as good for the fun of family or guest cruising as for fishing.

# Texas-Southwestern Cattle Raisers Re-Elect Officers

All officers were re-elected and five new directors were elected at the 86th annual convention of the Texas and Southwestern Cattle Raisers Association in San Antonio, March 18-20.

Officers are Leo Welder of Victoria, president; Fred Wulff of Brady, first vice-president; Ben Carpenter of Dallas, second vice-president; Joe Clarke of Fort Worth, treasurer; and Joe Fletcher of Fort Worth, secretary-general manager.

New directors elected to the TSCRA Board are William C. Donnell of Marathon, Benjamin Eshelman, Jr., of Corpus

Christl, Jay Pumphrey of Fort Worth, Ray Smyth of Aledo, and Oscar Evans of White Castle, La.

In his report to the convention, President Welder pointed out that membership in the Association stands at an all time high of 12,562 members and that membership increased more than six per cent last year.

Secretary-general manager Joe Fletcher reported that the

Association, in cooperation with local and state law enforcement officials, developed 214 cattle theft cases during the fiscal year ending February 28. These resulted in 283 years in the penitentiary plus one life sentence being assessed. Of these, probated sentences accounted for 97 years, and suspended sentences, 26 years. Thirteen cases were dismissed, and there presently are 150 cattle theft cases pending.

Fletcher said the Association's inspectors had inspected more than five and one-half million cattle during the past fiscal year. The field inspectors investigated the ownership of

1,535 cattle which appeared to be in improper hands. Of this number, 1,508 head, or the proceeds of same, were turned over to the rightful owners. The ownership of 27 head is still pending. The value of the returned cattle computed at the average price of those which passed through the markets amounts to \$145,779.45.

Fletcher emphasized the value of the Association in preventing cattle theft in these words: "Doubtless, our cattle theft problem would be much greater were it not for the fact that our market inspectors daily send in reports to headquarters describing all cattle sold on

posted markets in Texas, and listing the license number of the vehicle in which they were delivered and other pertinent facts which help in the apprehension and conviction of cattle thieves."

In a featured address, Senator Clinton Anderson of New Mexico said cattlemen in Texas and the southwestern quarter of the United States should have a great interest in every phase of water resources activity. "Serious shortage of water to

sustain growth—yes, to sustain even the present population—now exists in the extreme southwestern corner of the nation, the shortage area, and is moving steadily eastward," he cautioned.

Governor John Connally complimented the cattlemen for their efforts in raising funds through voluntary contributions to be used in the screwworm eradication program and said he was vitally interested in this program.

Dallas was selected as the site for next year's convention.

## Club Entertains Home For Aged

Lazbuddie Future Homemakers chapter visited King's Manor, the Methodist home for the aged at Hereford on March 24.

The girls presented a short program for the residents, and afterwards were taken on a tour of the home. Refreshments of homemade cookies and punch, brought by the girls, were served to the residents, and gifts were presented.

Spinning reels were first used in England, around 1900.—Sports Afield.

Food chains with two or more stores had a sales volume of \$27,535 billion last year, according to Chain Store Age—a gain of 3.8 per cent over the previous year.

From the New York Times: "The 17-nation disarmament conference . . . is to give priority to the nuclear test ban talks broken up by the Russians in New York, but the prospects for success are slim because the scene is now dominated by the Soviet maneuvers to exploit the Western differences for their own ends. What these ends are is bluntly stated by the United States Arms Control Agency . . . In a report forwarded to Congress by President Kennedy, the agency accuses the Soviets of making their disarmament proposals solely as an 'extension of their foreign policy objectives aimed at expansion of Communist influence by gaining military advantage' and showing no desire to reach agreements 'to insure the security, freedom and independence of all nations.' That is why, regrettably, the United States has resumed underground tests."

According to a Department of Agriculture publication, the persistence of a relatively high birth rate, a low death rate, and a moderate amount of immigration have made it likely that the U. S. population will rise to 245 million or more by 1980. That is 30 per cent above the present population of 187.5 million.

TEXAS' Betty Crocker Home-maker of Tomorrow is Mary Lois Wilson of Abilene Christian high school, Abilene. She will receive a \$1,500 scholarship from General Mills for gaining the highest score in the state in a written home-making examination.

## Shorthorn Journal Carries Hart Story

By Dale Hart, Friona, Texas

ON March 23, 1962, we entered our herd of Polled Milking Shorthorns in Performance Registry International, Denver, Colo. This was our first record as ours was the first Milking Shorthorn or any dual-purpose breed to enter in PRI. So far we have weighed and qualified three calves for PRI certificates. Hartsdale Texas Master WR 22 was weighed and qualified for a PRI certificate on November 9, 1962. He scored our second first for the breed by being the first Milking Shorthorn or dual-purpose animal to qualify for a PRI certificate.

Our three calves to qualify so far are Hartsdale Texas Master WR 22, weaning at 249 days of age at 610 lbs. with a 2.45 lbs. per day of age, 217 lbs. of adjusted daily gain, 515 lbs. adjusted 205 day weight. Hartsdale Texas Royal, weaning at 245 days of age at 600 lbs. with a 2.45 lbs. per day of age, 216 lbs. of adjusted daily gain, 513 lbs. adjusted 205 day weight. This compares with the PRI standard of 475 lbs. at 205 days and 1.97 lbs. of adjusted daily gain.

Our heifer, Hartsdale Texas Regina, qualified, weaning at 223 days of age at 500 lbs. with a 2.24 lbs. per day of age, 1.93 lbs. adjusted daily gain, and 466 lbs. adjusted 205 day weight. The PRI standard for heifers is 1.73 lbs. adjusted daily gain and 425 lbs. at 205 days.

Now for the conditions that these records were made under, neither the cows nor the calves had a bite of protein or concentrates. They were just running out and under poor grazing conditions much of the time at that. They were grazed on over-grazed native grass, stalk fields, cot-

ton fields and what have you, just out roughing it. Also, the cows had two calves on them for about the first three months to take care of the extra milk. Even under these conditions our calves made better gains than the average of the beef breeds where the calves were creep fed and the cows caked.

David McVey, our Friona Vocational Agriculture teacher, who certified our test was very surprised at our records. He said that these gains were as good or better than many of the club calves that were being fed out for the shows, they being on nurse cows and a very high grain ration. Also, the county agent was very impressed with these gains. "What would the gains have been under irrigated pastures, supplemental feeding of the cows, and creep feeding such as many of the registered beef breed calves were receiving while on test?"

Some of the aims of PRI are to measure "grow-ability" rate of gain, efficient conversion of feed to meat, desirable carcasses, the searching out of superior herd bulls and brood cows and many others.

Our two bulls were also entered in our own Gain Registry program. Yes, we think we have a true dual-purpose breed.

(Editor's note: This article was featured in the March issue of the Milking Shorthorn Journal, a copy of which was sent to Parmer County Newspapers by Ray Schooley, managing editor of the Journal)

### New "Hummel" Hunter

Hunting for a new figurine? Stop the search and add "Good Hunting" to your collection. This latest addition to the famous "Hummel" ceramics portrays a charming scene. A little boy huntsman is so laden down with gear he misses the rabbit standing right at his feet.

"Hummel" figurines are the most widely collected ceramics in the United States. Adapted from the sketches of the late Sister Bertha Hummel each original design is made with meticulous care by the W. Goebel Company, Bavaria.

Hand tinted in subtle colors, "Good Hunting" stands 5 1/2" high and is available at fine gift and department stores.

Only authentic "Hummel" figurines are identified by the indented M. I. HUMMEL on the base of every piece. These markings assure you of an original design destined to become a collectors item.

Secretary of Labor Wirtz says the public will demand compulsory arbitration of labor disputes unless unions and management devise better ways for settling their arguments.

## TEXAS COTTON GROWERS REPORT:

# Entire Season Control of Thrips, Aphids and Mites...

Untreated plant at four weeks

Di-Syston treated plant at four weeks

### Di-Syston Treated Plants Are Stronger, Straighter... Produce More Squares Earlier

West Texas and New Mexico cotton growers now have a new way to control thrip damage and early-season stunting... with Di-Syston granular insecticide. Di-Syston is placed in the soil with the seed or side dressed after planting. The chemical is then absorbed by the growing roots and carried to all parts of the plant through the sap stream—as soon as the plant emerges. No part of the plant is unprotected—even tender new growth as it is formed.

The result? With Di-Syston, your early cotton grows faster, has stronger, straighter stems, more vigorous foliage. Squares form earlier and the plant produces more of them. Many growers in the Lubbock area have reported full season control of thrip with just the one application. You get higher yields because of the good Di-Syston start. This year, get your crop off to a good start with Di-Syston. Complete instructions for use are printed on the label on every package. Use Di-Syston.

# 36 days that proved Ford's total performance!

**RIVERSIDE, CAL.**  
January 20

In a total performance test of brakes, suspension and steering on the twisting Riverside sports car course, Dan Gurney drove a Ford hardtop to victory over 43 other stock cars. The 500-mile grind demonstrated Ford's superior stamina and road-holding.

**MONTE CARLO**  
January 23

The '63 1/2 Falcon V-8 Sprints made their debut with a fantastic showing in the 2,500-mile Monte Carlo Rallye. Through Europe's worst winter weather they placed 1st and 2nd in class. Besides this... one Sprint defeated every entrant in the Rallye's six special stages.

**PURE OIL TRIALS**  
January 27

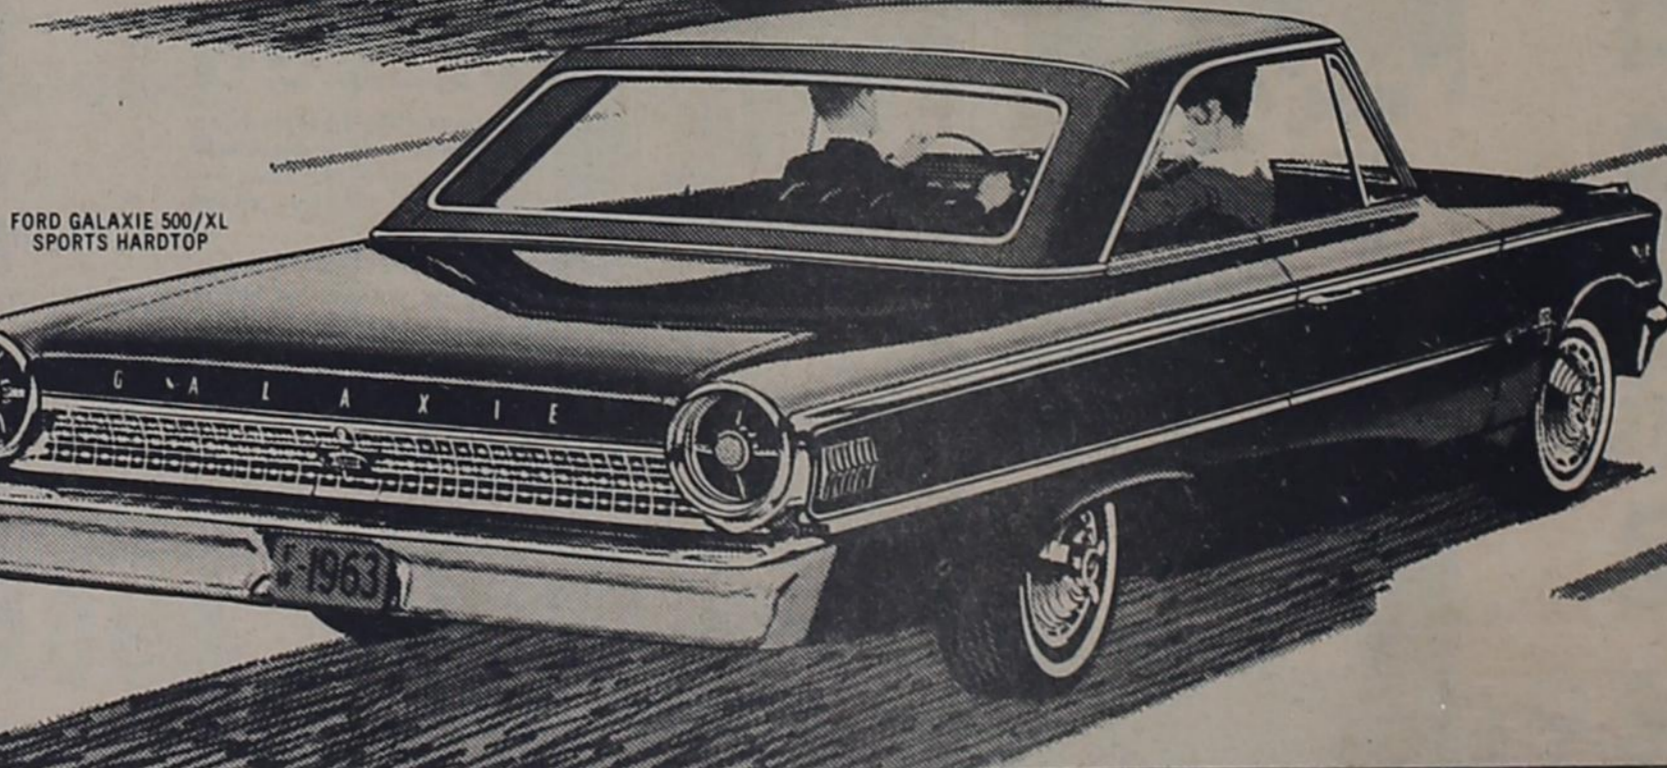

In a competition designed to test all-around performance, Fords were overall winners in Class I and Class II in the Pure Oil Performance Trials at Daytona. Their total performance design added up to most total points in gas economy, acceleration and braking events.

**DAYTONA, FLA.**  
February 24

Daytona "500" history was made when '63 1/2 Fords blazed into the first five places! Since Daytona is the toughest track in the world, this was eyewitness proof that Ford's total performance design can endure the maximum in automotive punishment.

FALCON SPRINT HARDTOP

FORD GALAXIE 500/XL SPORTS HARDTOP

### ... and here are the 63 1/2's that gave total proof of Ford's durability and handling!

You may never see a competitive auto event. But at 30 mph on rain-slick blacktop, in the close-packed rush of 5 o'clock traffic, on a twisting mountain road, the results are important to you. On every slippery surface you need the kind of roadability that placed five Fords out front in

the Daytona "500." On every busy cross street—you want the brakes that won on Riverside's sports car circuit. Your engine will hold up better through years of turnpike use because it's as beautifully balanced as Falcon's Monte Carlo V-8's. The winning competition car is bound to be a great road car—and Ford is the big winner!

If it's Ford-built, it's built for performance... total performance!

# OUTDOORS IN TEXAS

By—Vern Sanford

Lake Travis is that long, narrow lake in the Highland Lakes chain that stretches from Austin far back into the Hill Country of central Texas.

Lake Buchanan looks bigger on the map because it's wider, with a sort of tadpole shape.

But—Lake Travis is stretched out more like an earthworm and it's really BIG in the statistics department.

Mansfield Dam, which backs up 42,000 surface acres of Lake Travis water, is 270 feet tall and 6,810 feet long. The huge lake is 65 miles long—but never gets much over three miles wide.

Travis, like a worm in action, is no straight line. Travel the length of it in a boat, and at one time or another your bow will be headed in every direction of the compass. And no telling what kind of water activity you'll see around the next bend. It could be any recreation

from boating and skiing to fishing and skin diving. For that matter there's a variety of outdoor sports ashore too, ranging from horseback riding on the dude ranches to barbecuing in the public parks.

One of the newest attractions is Highland Lakes Marina, located at Volente (Dodd City). This is a showplace of gaily colored steel and aluminum docks, specially designed to satisfy every whim of boaters.

The Marina can accommodate 125 boats. It is located at the mouth of Big Sandy and is constructed so as to provide a break-water and insure a calm surface even when the lake outside is rough.

Facilities include a swimming pool, cafe, fishing lounge, fuel dock and a ship's store.

Stairway leading to the slips is mounted on pneumatic-tired wheels. As the docks rise up and

MAKING HIS ANNUAL weather prediction as concerns crops in the area for the coming year is J. W. (Indian) Crim of Lazzbuddle, as the sun peeped over the horizon the morning of March 22. Crim studies the flames from the burning pile of lumber, and checks wind direction in determining whether it will be a wet year or dry. "About like last year," was the verdict.

Like the great outdoors? Try the Lake Travis area, sometime!

Boating is the fastest growing participation sport in the country today.

More people would like to get

in on the fun. But they simply can't afford the price of a new outboard motor, much less a boat to go with it.

Anyone can rent a boat, but a self-owned motor is almost a necessity. One solution is to invest in a used motor.

Here are a few tips, gathered by talking with several reputable outboard motor dealers, which may prove helpful to sportsmen shopping around.

Foremost thing to remember is to buy only from an authorized outboard dealer. Beware of sharks and independent outlets. Unless you're dealing with a trustworthy, personal, friend, who will vouch for his merchandise, better think twice before you buy a motor from anyone but a person holding an outboard dealership.

A large motor will depreciate about one-third its list price the first year of operation. Naturally the smaller motors have an appropriately lower margin of depreciation.

Don't let the age of the motor fool you, even though the later model motors usually are the best buys. Only through a pinpoint examination of the integral, working parts can a prospective buyer ascertain the true condition of the outboard.

Best way to judge the running operation is to actually test the outboard, on a boat, in the water.

If this is possible, a person can get a first-hand picture of the engine's capabilities and its running condition by close examination.

Don't buy it without first examining its innards thoroughly, even though it operates smoothly. A badly worn part may function well at first. But tomorrow could present an entirely different story.

Two most important things to watch while running an outboard are the cooling pump and the gear shift. The water-pumping unit is one of the most vulnerable parts.

So examine the lower portion of the cowling. Check the water escape duct in particular. Unless there is a steady stream of liquid pouring from this outlet, while the motor is in operation, something is at fault with the water pump.

The so-called "clutch dog" in the outboard foot usually is the part that wears out first.

This is because an operator has the tendency to shift too slowly, stripping the gears. Shifting should be done with a quick, fluid motion.

If the motor won't stay in gear, or won't shift smoothly, normally the "clutch dog" is the part at fault.

After testing the motor (always run one ten minutes or more to allow for normal heating), remove the protective cowling and examine each part individually.

First look for cracks, especially in cylinder heads and block. If either of these parts is faulty, the motor is in poor condition and should not be purchased. Replacement of either is an expensive operation.

Foot and hold brackets (the parts that attach to the boat transom) are other places where cracks are apt to show up.

Occasionally the foot may receive a severe operational jolt against some submerged obstruction, causing it to crack.

Also the twin holding brackets, subjected to continuous vibration and sometimes severe knocks when the motor is laid to rest on the transom, often become cracked.

Check the gasoline tank for dents and be sure there is no leakage at these depressions.

On large motors examine the electrical starter and connections. Make doubly sure the generator is functioning properly. Work the starter cord several

times. If the motor is in acceptable running shape, it should kick off on the first or second crank of the cord.

If you can't afford the price of a new outboard, don't be afraid to invest in a second-hand unit. Just be sure you get what you pay for.

How good a motor you get depends largely on how much you are willing to pay. To double-check a second-hand motor is only a matter of being sure of what you are getting for the price you are asked to pay.

This is that time of the year when people who don't have a boat get the yearns. And those who have a boat want a new one!

So, whether you're a boat owner or an owner to be—read on. We want to tell you about the newest sensation to hit the Texas market.

It's not a large boat—in fact only a little over 13 feet in length. Big enough for a small family outing—yet small enough for ideal lake fishing. And it can be used for skiing if equipped with a 25 h.p. or larger motor. (Actually, it'll take a 40.)

So, it has a three-fold usefulness—family, fishing, and skiing.

What appeals to everyone is its unsinkable features. You can saw it in half, right across the middle, from gunwale to gunwale, and she'll still float.

Now you know we're talking about the new Boston Whaler.

At least you do if you've seen the demonstration pictures which show a man at the bow rowing off with the fore part of the boat, while another cranks up the motor in the stern and speeds away with the aft portion.

Reason it's non-sinkable is this—it has an outside and an inside hull. Between the two is four (4) inches of liquid polyurethane foam flotation.

Flotation is not just in the bottom either. It extends two inches thick up the sides.

With the Boston Whaler, the flotation is poured in, in liquid form. When the liquid cools, it solidifies, and expands . . . to fill all the space between the two hulls. This helps strengthen the boat as well as keep it afloat.

Ever forget to re-insert the drain plug in your boat . . . and have it sink while launching?

Ever have rain fill your boat 'til it sinks?

These things do happen!

But not with the Boston Whaler. Its great buoyancy will keep it afloat even if both drain plugs are out—and a heavy motor hangs on the transom.

Smooth riding is assured with the Whaler's triple-V-bottom—which also makes it virtually impossible to tip over. Great for swimmers—wonderful for skin divers!

And what a boat for children!

All in all it's a beautiful, practical rig. Seldom do you find a boat so ideally built . . . designed efficiently for the fisherman, the skier, and all around family use. But here's one that all can use and all will enjoy.

Only a few Boston Whalers are to be seen on Texas waters—as yet. But they are beginning to appear here and there.

Wherever one is found, you'll find an admiring crowd gathered around it.

# New Fertilizer Plant For Plainview

Plainview has been selected as site for a new fertilizer manufacturing plant.

Best Fertilizers Company of Texas announced Monday of its taking option on a 119-acre tract of land northwest of town, on the Dimmitt Highway. The plant will use only 50 acres of the tract, however.

The chemical complex will manufacture anhydrous ammonia, ammonium phosphate, super-phosphate, ammonium sulfate and other industrial chemicals.

In addition, a sulfuric acid manufacturing plant will be included as a subsidiary to the fertilizer production. This plant will have a capacity of 250 tons of sulfuric acid per day.

This is the second fertilizer manufacturing company to announce building plans on the High Plains in the past two months. Another plant for making anhydrous ammonia will be built at Dimmitt this year.

Completion of the new \$6.5-million plant is expected by Best Fertilizer officials to be sometime late this year. Upon completion the plant will be capable of producing 200,000 tons of chemical fertilizers and industrial chemicals annually.

Equipment and machinery have been ordered and construction will begin in about 30 days.

Credited with coordinating Best's location in Plainview are four members of the Plainview Chamber of Commerce: J. M. Collins, Chairman of the Industrial Development Committee, Mayor M. B. Hood, Hall

Nall and J. B. Wheeler. The site was secured through Leroy Elmore, Lubbock realtor and land development specialist.

The facilities will be capable of producing 250 tons per day of sulfuric acid, as well as a complete line of dry, pelleted fertilizers which company officials describe as being especially well suited for improving crop production in the Southern Great Plains area.

Anhydrous ammonia will also be sold for direct field application.

Best Fertilizer Company of Texas has headquarters at Houston. Operations are directed by R. C. Dellinger, President, Kenneth Winborn is Vice President of Sales. The company markets its products throughout Texas and surrounding states through distributors and applicator-dealers.

Paul Lowry is Sales Manager for the West Texas area, and Dr. Gaylord Haynes is in charge of the upper Panhandle and Oklahoma. Haynes is especially well-known for his work with Oklahoma State University where he did extensive work on increasing crop production through the proper use of fertilizers.

The Disappearing Indian: Texas once had 46 principal tribes of Indians, ranging from the Ais (who lived along the Brazos and Colorado Rivers) to the Xarams, who lived where San Antonio now stands. The only tribe left is the Alabama Coushatta. They live on a 1,280-acre reservation in Polk County and have since 1928.

Equipment and machinery have been ordered and construction will begin in about 30 days.

Credited with coordinating Best's location in Plainview are four members of the Plainview Chamber of Commerce: J. M. Collins, Chairman of the Industrial Development Committee, Mayor M. B. Hood, Hall

Ulcers are the results of mountain climbing over mole-hills.

# Beef, Pork Are Featured On April 'Plentiful' List

April will be a good time to eat "high on the hog," both literally and figuratively.

Texas consumers also may well choose the better cuts of beef, because both pork and beef are on the nine-item April list of plentiful foods, reports the Texas Agricultural Extension Service.

The list features pork and carrots, as April supplies of each promise to run far above usual trade needs.

Beef rates a spot on the list for the first time in one and one-half years. Prices on both pork and beef are noticeably lower than last winter.

Also plentiful are milk, eggs, potatoes, peanuts and all peanut products, including peanut butter, canned freestone peaches and canned ripe olives.

The monthly list is prepared by the Agricultural Marketing Service, a part of the U. S. Department of Agriculture, in cooperation with producers, processors and the food trade. When supplies of any food exceed expected demand, it is eligible for official listing as a plentiful.

Distributors and retail grocers cooperate in the Plentiful Foods Program by providing special promotions, including lower prices on many items. Extension home economists

suggest that consumers will find it to their advantage to serve plentiful often, as foods in abundance usually provide economy, ready availability and wide choice in quality.

According to the Council of State Chambers of Commerce, if Federal expenditures were controlled at current levels the country could have tax cuts and still expect a balanced budget within a year or two. This conclusion was reached in a critical analysis of Administration budget proposals for 1964. That budget--of \$98.9 billion--would be 29 per cent above that of 1960, the last full budget year of the previous administration.

## MIRACLE CATTLE FEEDER

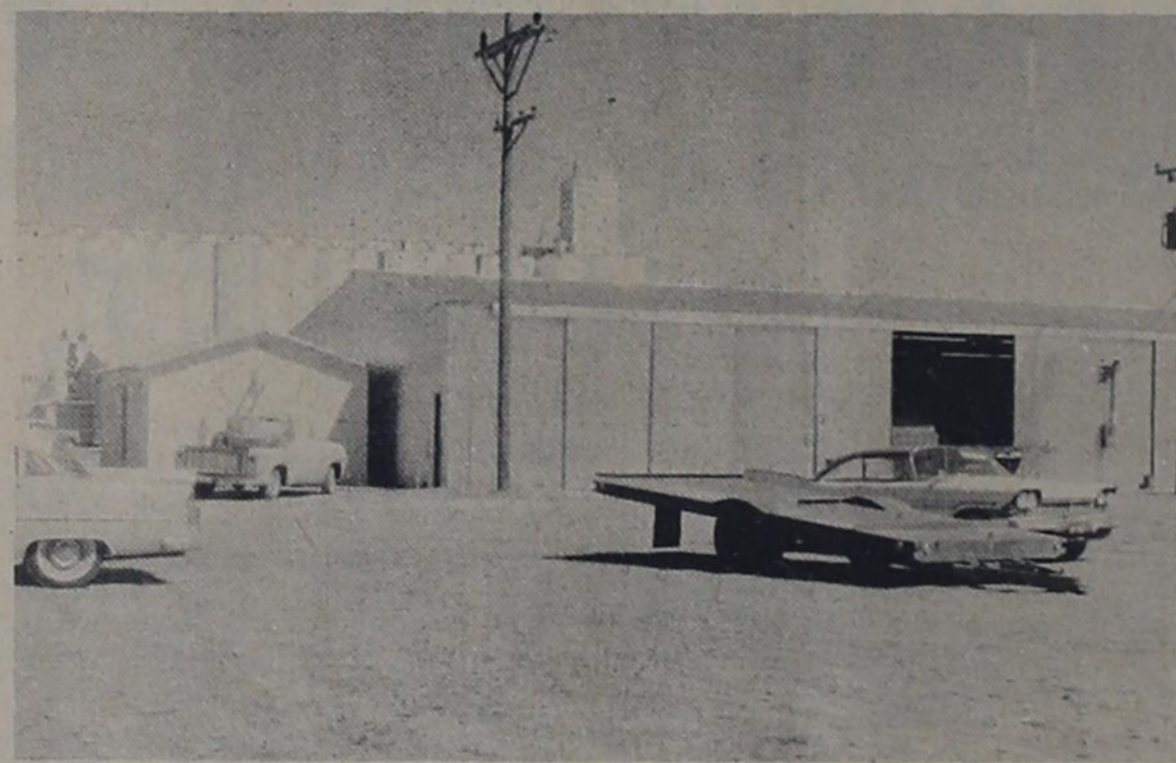

### WHAT THE FEEDER ACCOMPLISHES

- Feeds up to 100 Head
- Feed is protected from weather
- Always Fresh—No waste
- Feed placed all ways before Cattle
- Each animal gets his share
- Requires no Labor
- Dealer delivers direct into Feeder
- Saves time over normal feeding
- Feeds Roughage—
- Concentrates or Mixed Rations

MIRACLE CATTLE FEEDERS are offered under the MIRACLE LEASE PLAN 17.00—Per Month for 36 Months

TOTAL CASH REQUIRED 51.00—to prepay 1st 35th & 36th rentals

THE MIRACLE MFG. CO. ALSO BUILDS TRAILERS, HAY FEEDERS-CREEP FEEDERS

Let us do your farm equipment repairs, or let us furnish the steel and pipe for your farm repair shop. We also handle a complete line of welding equipment and supplies.

If it's made of steel we'll build it.
