Strike Conference Called Off Today

EASY INJUNCTION PROCURANCE TO BE PROBED BY HOUSE

Resolution Tabled
After Entry By
Sponsors

REST TUESDAY Committees Prepare For Inaugural Ceremony

AUSTIN, Jan. 18. (P)—A resolution authorizing an investigation of reported unwarranted granting of injunctions by district judges was tabled in the house today.

Jap Lucal, Athens, one of the sponsors, said that peace officers in his district were hampered by injunctions in drives on liquor and gambling dives.

Resolutions in both houses asking for an investigation of the expenditures of the Texas Gulf Sulphur company for "public relations" were sent to committees.

A joint committee has arranged for the inauguration tomorrow of Governor Allred.

MARLAND SCORNS EXTRA GUARDS AS NOTE IS IGNORED

Extortion Letter
Writer Fails To
Bother Gov.

OKLAHOMA CITY, Okla., Jan. 18. (P)—Scorning extra guards, Gov. E. W. Marland went about his usual Sunday routine, ignoring the threats in a \$5,000 extortion letter delivered at his executive offices Saturday.

"I can take care of myself," said Marland, smilingly calling attention to his ability as a pistol marksman.

He posted a \$500 reward for the sender of the letter which threatened both the chief executive and his wife.

"If somebody else had received the letter I would have made it a damned substantial reward," he declared. "I hope anybody else does receive a letter like that they will report it to police."

The Governor and Mrs. Marland relaxed at a movie Saturday night, a few hours after the pencil-scratched note had come to their attention. They were driven as usual by their chauffeur and the customary night watchman guarded the executive mansion in the heart of Oklahoma City's rich oil field.

State crime bureau operatives, to whom Marland sent the letter, gave no indication they had any clues to the identity of the sender. The letter, postmarked 9 p. m. Friday and signed Blk, was handled by four attaches in the Governor's office before it was called to his attention.

J. V. STOKES IS MAYOR CANDIDATE

Ranchman Announces For
Office Subject To
April Election

J. V. Stokes, Midland cattleman, announced today his candidacy for the office of mayor of the city of Midland, subject to the regular April city election. A mayor, three aldermen and city marshal will be named in this year's election.

Stokes, who has lived in Midland for 45 years, at one time served a six year period on the city council. At another time he was a member of the county commissioners' court for eight years. He has been a director of the Midland National bank for about 25 years, and chairman of the board for much of that time. His business, throughout the time, has been cattle and sheep raising. He retired from active ranch life a few years ago when he sold his "home" ranch east of Midland.

The candidate said he was making the race for mayor in the belief that, with his ample time to give attention to city affairs, he can be of much service; and that he will give it strictly a business administration.

VISIT HODGES
Miss Myrtle Holley of Lubbock visited her cousins, Misses Helen and Ruby Hodges during the weekend.

Agony Stamped On Spanish Faces

Poignant studies in anguish are the expressions on the faces above, in pictures sent from Madrid as propaganda, but still faithfully portraying suffering of war victims. Top photo shows a friend trying to restrain a frantic father from searching through a bombed building for his son, last seen there. Left below is a Spanish mother, grief stricken after a rebel bomb had killed her son. Right below is another mother, hysterically rushing to her child after a bombardment.

Pioneer Resident Of City Succumbs Today

Mrs. C. W. Crowley, 64, died at her home here Sunday morning at 11:25 o'clock, after an illness of about nine years. Funeral services were being held at the First Methodist Church here at 3 p. m. today, the Rev. Cliff M. Epps officiating. She had been a member of the church for more than thirty years.

Mrs. Crowley was born September 9, 1872, in Bedford county, Virginia. She had been a resident of Midland for 37 years.

She is survived by her husband, a well known cattle and sheep rancher of Midland, and one son, John Wesley Crowley, also of Midland. Prior to her illness, which prevented her being away from her home, she had been an active leader in religious organizations.

Funeral bearers for the funeral service were listed as N. G. Oates, W. I. Pratt, George Glass, H. C. Barnes, J. L. Tidwell, and Stacey Allen.

Value of Resettlement Administration Shown in Year's Accomplishment Record

Citing the work done by the organization during the past year, the Resettlement Administration has released numerous figures as proof of its usefulness in the recovery of prosperity of the country.

According to figures released, the Resettlement has:

- Made additional emergency loans and grants in the drought area amounting to \$8,300,000 to 256,955 farm families.
- Brought about reduction of \$32,820,000, or 25.6 percent in the debts of 41,820 farmers.
- Loaned \$1,700,000 to enable 55,000 farmers to participate in cooperatives.
- Purchased 9,100,000 acres of substandard land.
- Started the development of this land for useful purposes.
- Completed 19 rural resettlement projects; built 2,695 good rural homes. Construction going on in

44 additional rural community projects.

Began construction in three greenbelt towns for housing 3,000 low-income industrial workers and farmers.

Loans

- Made loans to 386,412 farm families.
- These loans amounted to \$93,783,598.
- These loans have been made for the purchase of seed, feed, and equipment, for rent, taxes, doctors, food, and clothing.
- Loans have been made for periods from two to five years with interest rates of 5 percent.
- Farmers who received these loans were unable to obtain credit anywhere else.
- They were considered good credit risks by the Resettlement Administration because of their willingness and ability to do for themselves and because of their cooperations in planning intelligent farm and home management in order to get the greatest possible benefits from their loans.
- These farmers have proved themselves. (Resettlement) Page 2

REVISED PLAN IS STUDIED TO KEEP EUROPE FROM WAR

Seeking to Blockade
Spain by Neutral
Endeavors

RUSSIA ADAMANT Collective Action Only Kind She Will Aid

By Associated Press
The International non-intervention committee considered a revised plan today to blockade Spain with neutral shore observers and a six-power warship patrol of peace in an effort to keep Spain's civil war isolated.

Russia opposed any action not collective. Germany and Italy indicated the same view through silence but expressed their desires for a Locarno accord with France, Britain and Belgium to preserve the territorial status quo, which would isolate Russia.

Insurgent claimed the capture of Marbella, the gateway to the government port of Malaga. They bombarded Madrid anew but the advance was repulsed.

While agreeing volunteers should be banned from Spain, Russia declined, in a note to the British ambassador Sunday, to adopt prohibitive measures of its own.

"The Soviet Government, although it presently does not practice the dispatch of volunteer detachments, does not consider it expedient to adopt unilateral prohibitive measures," the note said.

It was handed to Viscount Chilton by Foreign Commissioner Maxim Litvinoff and was published after the latter's departure for Geneva. Officials emphasized the note was not a rejection of the British effort to effect a ban by European powers against enlistments in Spain, but it pointed out Russia feels such measures now would be futile, unfair and premature—that the Spanish Fascists and those helping them would be the only side to benefit. Germany, Italy and Poland have not yet replied to the latest British appeal.

CAR OVERTURNED, TRIO SPEND NIGHT TRAPPED INSIDE

All Luckily Escape
Without Serious
Injuries

Mrs. Dick Graves is in a local hospital today and her husband, Dick Graves, and daughter, Granda Saye, received medical treatment today following an accident last night when the car in which they were riding overturned about 10 miles south of Midland.

The car, as it overturned, hurled a fence and came to rest bottom side upwards, pinning the occupants inside and they were forced to remain inside the car all night, finally being discovered early this morning. All were immediately rushed to a hospital for treatment. Mrs. Graves being the worst injured of the three.

Graves and the girl received only slight injuries and were both released by doctors after treatment. Mrs. Graves' injuries had not been diagnosed but it was thought that bruises and a severe "shaking-up" were the most serious. She suffered no broken bones, although she was reported to be suffering from exposure to the cold all night as were her husband and daughter.

Fourth Victim Of Plane Crash Dies

LOS ANGELES, Jan. 18. (P)—Earl Spencer, Chicago, died today, the fourth victim of the Salt Lake Los Angeles air transport crash Tuesday.

Martin Johnson, famed explorer; James Braden, Cleveland business man and A. L. Loomis of Omaha were the other victims.

TO FORT WORTH

Fred Wemple and Hilton Kaderli are leaving today for Fort Worth and Galveston. Wemple, district governor of Rotary, will visit the Grandview club tomorrow.

TO INAUGURATION
Jas. H. Goodman left today for Austin where he will attend the inauguration of Governor Allred Tuesday.

Plans Completed for Ball to Honor Birthday of President on January 30

Today

President Franklin D. Roosevelt, whose birthday January 30 will be the occasion for a series of 5,000 celebrations to be held throughout the country to raise funds for the nation's war against infantile paralysis. Right, Colonel Henry L. Doherty, for the fourth time national chairman of the world's biggest birthday party.

FIRE ON TRAIN IS BLAMED ON GANG; 100 PERSONS DEAD

Smugglers Alleged
To Have Set Fire
To Express

CANTON, China, Jan. 18. (P)—Authoritative sources today attributed yesterday's fire aboard a railroad train in which more than 100 were killed to a feud between rival smuggling gangs. They claimed one gang set the other's contraband on fire.

Rescue workers searched along 15 miles of tracks for the bodies of victims who leaped from the blazing train.

The express was on the way from Canton when the fire broke out in a third class coach. The victims fought madly to escape. The engineer discovered the fire only when the train rounded a curve.

Officers blame fog that obscured road for the accident.

COUPLE KILLED AS CAR HITS BRIDGE

Officers Blame Fog That
Obscured Road For
The Accident

CORSICANA, Jan. 18. (P)—Edna Slagle, 25, and Ernest Douthet, 35, both of Palestine, were killed today when their automobile crashed into a bridge near here.

Elbert Slagle, brother of the dead woman, was seriously injured.

Officers blamed the crash on a heavy fog that obscured the vision of the driver.

POPE PIUS ABLE TO SEE COMPANY

Receives Group Sunday
For First Time In
Over Six Weeks

VATICAN CITY, Jan. 18. (P)—Pope Pius received three German cardinals Sunday in his first group audience since he fell ill six weeks ago.

The Holy Father talked with Cardinals Schulte of Cologne, Faulhaber of Munich and Beltram of Breslau for more than a half hour and it was understood they reported on the Catholic Church's difficulties in Nazi Germany.

They detailed that German bishops are pledging support to Chancellor Adolf Hitler in combating Communism as evidenced by their recent pastoral letter, but that friction still exists on the question of the Catholic youth organization and freedom of the Catholic press.

Although the Pope passed a restless night, his condition was described as sufficiently satisfactory. He was improved in spirit by the wheeled divan, which enabled him to be moved from room to room. However, his fundamental heart and circulatory ailments were unchanged.

The pontiff said he hoped to be able to celebrate mass soon. This, he said, would be a great spiritual solace.

BIG SPRING SCOUT MEETING WILL BE ATTENDD BY MANY

Local Scouters Will
Attend Banquet
Tuesday

All Midland scouters are expected to attend the annual meeting and convention of the scouters of the Buffalo Trails council that will be held in Big Spring tomorrow afternoon and night.

Three Midland men, Rev. Winston F. Borum, Claude O. Crane and Wallace Wimberly will appear on the program. Borum will lead in the singing of scout songs, Crane will offer recognition to veteran scouters and Wimberly will have charge of the closing ceremony.

Ollie B. Webb, assistant to the president of the Texas-Pacific railway will be the principal speaker. Delegates from 15 counties will be in attendance and are expected to hear the address. The speaker is well known throughout West and Southwest Texas as an entertainer of repute.

A special award is being offered the town with the largest number of delegates and Midland scouters hope to win the prize as a large number of local citizens are planning on attending the session.

BAR ASSOCIATION HOLDS MEETING

10 Members Present For
Dinner Held Here
Saturday Night

Members of the Midland Bar Association met together Saturday night at the private dining room of the Scharbauer hotel for a "get together" meeting.

Frank Stubbeman, vice president of the organization, was in charge of the meeting, president Ed M. Whitaker being out of town on business. Proposed laws now before the Texas legislature provided the general course of conversation.

Ten members present included Ollas Klapproth, John Perkins, T. D. Kimbrough, Hamilton McRae, Joe Seymour, R. W. Castleberry, Merritt F. Hines, Don Traynor, W. E. Whitcomb and Stubbeman.

'BREAK' IS HINTED IN MATTSON CASE

Leader in Search Makes
Trip to Confer With
Federal Agents

LOS ANGELES, Jan. 18. (P)—Harold Nathan, leader in the search for the kidnaper-murderer of Charles Mattson, conferred today with federal agents here but whether or not the trip presaged a "break" in the investigation officers declined to say.

J. H. Hanson, agent in charge of the Los Angeles federal office, said he was making a check on two men arrested here for questioning.

Groups Ends In
Dissension

OCCUPY PLANTS Strikers Maintain Places Inside Factories

DETROIT, Jan. 18. (P)—Homer Martin president of the United Automobile Workers of America, said today that the "conference is off" after a meeting with General Motors officials concerning negotiations in the widespread automotive strike.

Martin indicated the corporation had refused to negotiate because strikers continued to occupy two Fisher Body plants in Flint.

Sitdown strikers, scheduled to march out of two General Motors plants Sunday afternoon, changed their plans and held the fort while hasty conferences were held to determine whether the corporation had promised to bargain collectively with their nonunion employees.

With wage and hour negotiations scheduled to start Monday, the union's sit-downers said they will not leave the plants if General Motors bargains collectively with the Flint Alliance, an organization that includes many nonunion employees of the corporation. The Flint Alliance was not a party to the Lansing tract made between the union and General Motors.

George E. Boysen, leader of the Flint Alliance, was hanged in effigy by sit-down strikers and union members outside the factory to pieces when it hit the dummies.

LOVING COUNTY WILDCAT STILL HOLDS SPOTLIGHT

Mason No. 2 Kyle Has
3,000 Feet of Oil
In Hole

By FRANK GARDNER
Mason Production Company No. 2 Mrs. Minnie Kyle, Delaware production prospect in west central Loving county, remained one of the chief topics of interest today among West Texas oil men. Late reports on the well were that operators were planning to run casing. It is standing with 3,000 feet of oil in the hole, an accumulation of 36 hours.

Checking of samples from the No. 2 Kyle showed the top of the Delaware black lime to have been at 3,859, with broken lime and sand at 3,885, and the top of the Delaware sand at 3,895. It encountered its showing of oil and an estimated 500,000 cubic feet of gas in the sand from 3,901, to 3,911, the present total depth. Baller was run to bottom eight times yesterday, with the first run showing a half-bailer of water with the oil, and the last run yielding only two gallons of water. Observers were of the opinion that the water was drilling water and not from formation.

The No. 2 Kyle, a rank wildcat, is located 2,910 feet from the north and east lines of section 20, block 35, township 1, T. & P. survey, about twenty miles northwest of the Wheat pool at Mentone, the only West Texas field producing from the Delaware.

WPA Funds to Be Used in City Work

Allotment of \$1,400 of federal funds, under the WPA program, recently was made to the city of Midland, it has been announced, to be used for water system and sewer system extensions.

With the federal allotment will be used \$3,765 of the sponsors' funds, giving employment to approximately 25 persons. The project was announced from the offices of H. F. Drought, Texas administrator, San Antonio.

Legislation to Curb Court May Be Enacted Soon

WASHINGTON, Jan. 18. (P)—Senator Minton of Indiana said today after a White House conference that President Roosevelt would hold a conference soon on legislation dealing with the supreme court.

Minton did not disclose details but said that he favors a bill requiring at least seven of the nine members of the court to confer before a congressional act is held invalid.

MICHAEL SEXTON DIES

ROCK ISLAND, Ill., Jan. 18. (P)—Michael Sexton, honorary president of the national association of professional basketball leagues, died here today.

Mrs. Bertha Johnson left Sunday for El Paso where she will attend the annual convention of the Association of Accredited Beauty Culturists at the Hilton Hotel. While there she will take special hair cutting lessons from Walter Wilson of the Baker Hotel, Dallas.

Another new wildcat for Andrews county is the Shell Petroleum Corporation No. 1 E. F. King, 660 feet from the south and east lines of section 10, block A-42, public school land. Cellar and pits are complete, and material is being moved in. The test is a mile west of the old Hum- See (OIL NEWS) Page 6

BEHIND THE SCENES IN WASHINGTON

By RODNEY DUTCHER Reporter-Telegram Washington Correspondent

WASHINGTON, Jan. 18.—The mints are running 24 hours a day to keep up with the demand for change. Thanks at least in part to the Social Security Act and the way its old-age benefits phase makes the pay of salaried workers come out in odd cents, three-shift production has continued right on after Christmas. Usually the mints are able to let down quite a bit after the pre-Christmas trade is over. Production of coins in 1936 broke all records except for 1919, and 1937 promises to turn out more than ever. Mint officials would like to give their men and machines a rest, but believe they may have to keep on that 24-hour schedule for many more months. It's too early to estimate yet how much the demand for coins is being jumped by the security act. The continued heavy demand in the last year is attributed chiefly to the business pickup, increased employment and higher wages, and payments to WPA, CCC, and similar workers, who spend half dollars, quarters, dimes, nickels, and cents with considerable velocity. Last year, the mint reports, it coined 738,642,000 pieces of money, as compared with 560,760,000 in 1935 and 738,642,000 in 1919. By far the biggest increase was in nickels, production of which nearly doubled—90,000,000 in 1935 and 158,000,000 last year. In 1936 the mint also made 379,000,000 cents, 113,000,000 dimes, 50,000,000 quarters, 21,000,000 half dollars,

Resettlement--

Continued From Page One... Davies Asks for "Mercy" Ambassador Joe Davies, just before taking off to Russia with his beautiful and wealthy wife and their 2000 pints of frozen cream, saw the press and pleaded: "Treat me kindly, boys—and soft pedal on the cream." Senator Prentiss M. Brown of Michigan recalls a story told by the late Senator James Couzens a few months before he died. "He told me of the sale of his sock in the Ford Motor Company some 15 or 20 years ago," says Brown. "A friend, John Lodge, who was afterward mayor of Detroit, was shown the check for \$29,000,000 by the senator, with some degree of pride. "Mr. Couzens said, 'John, what do you think of that check?' Mr. Lodge replied, 'Let me carry it around for a while, will you?'"

Mr. Couzens let him have the check. He brought it back the next day and said, "Do you know how much it cost you to let me carry that check around for a day? At the bank interest, about \$2400 a day—\$100 an hour!"

"Brown," said Mr. Couzens, "I did not realize how much money it was until then!"

The General Stands High It was surprise to friends of the men concerned when Gen. Hugh S. Johnson, former overlord of NRA walked in on a conference about the automobile strike situation between John L. Lewis and Assistant Secretary of Labor Edward F. McGrady.

The McGrady-Johnson friendship budded and blossomed in NRA days and still flourishes. Lewis and Johnson also hold each other in high esteem. The bond which cements their friendship is a deep interest in the career of Napoleon.

Another F. D. R. Frank Secretary of Agriculture Wallace picked up his private telephone to the White House the other day and, when a strange masculine voice answered, asked to speak to Miss Margaret LeHand, as is customary when anyone wants to talk to the president.

"Miss LeHand is busy just now," Wallace was told, "but maybe I'll do, what is it?" "This is Secretary Wallace," said

Debt Adjustment Helped to scale down the debts of 41,479 farmers to what they are able to pay. A reduction of 25.6 percent in the cabinet member, "Who are you?" Then Roosevelt stopped disguising his voice and told him.

Land Purchase Purchased 9,100.00 acres of sub-standard land to remove it from crop farming. Families stranded on such land struggled, with practically no chance for success, to make a living from worn-out acres. The fertility of the soil had been decreasing steadily, the people sinking to a lower and lower subsistence level. Over half of the land which the Resettlement Administration purchased has been tax-delinquent for two years or more. Cost of keeping up roads and schools for the sparsely settled population is greater than the value of the land. The land is subject to wind and water erosion which cause dust storms and floods. When used for crop farming these lands are destructive of the natural resources, of property and human life in floods and dust storms, and of the human resources of the people stranded on these lands. Land Use The Resettlement Administration, however, is not permitting these 9,100,000 acres of land to lie

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything.) your possessions because somebody else wants them. If you know how to keep old friends, you know how to make new friends. The motto of the Tightwad: "Charity begins at home." The impudent newspaper: "In our town the committee on improvements makes less improvement than any other group in town." There is a very smart boy in Midland. He can play two games at once. Hookey and baseball. E. W. Howe, in 1891: "Every man is an enemy until he has proven himself a friend; this is pessimism. Every man is a friend until he has proven himself to be an enemy. Believe that, and you are an optimist." Men on west Illinois street are very proud of one of their group. He has learned how to sneak into his house at 3 a. m. without waking his wife. That, folks, is talent. A very lucky man is he who talks too much but does not get into trouble. You probably are pleased with

idle; they are being used for valuable purposes. Land which is too dry for crop farming is being used for grazing land. The original cover of soil-binding grass is being restored to prevent wind erosion and consequent dust storms. Land in cut-over forest regions which cannot support farm life at a decent level is being put back to trees; the established forests are managed on a controlled yield basis furnishing a permanent source of livelihood for the communities and a protection against water erosion and floods. Other land is being developed for parks, wild life preserves, migratory waterfowl refuges, additions to Indian reservations, and various erosion-control projects. Thus, the development of this land is furnishing demonstrations of valuable uses for land which cannot be used profitably for crop farming. Thus, the development of this land is providing examples of how our land resources can be conserved and used properly at the same time. The development of this land has provided employment for an average of 55,000 workers daily. Rural Resettlement The Resettlement Administration is purchasing 500,000 acres of good land for good farms. Eighty-six projects are being set up where about 10,000 farm families will have new economic, social, and educational opportunities. More than 4,000 rural homes are now under construction. Houses being built come up to all standards of good rural housing. There are 2,143 farm families—more than 11,000 people—already occupying new homes built by the Resettlement Administration. These farm families are buying their own homes on a long-term, easy-payment plan of forty years at 3 percent interest. Monthly payments on occupied homes are 93.34 percent paid up to date. This is a strong indication that the tenants recognize their obligations and will be able to meet them. Occupants for these communities were selected from farmers who have received Resettlement loans and proved themselves capable of operating a farm of their own; families living on sub-standard land purchased by the Resettlement Administration, and young couples with farm background, who are seeking a place to start farming. A demonstration tenant project for the Resettlement of 1,000 selected tenant families in 10 southern states offers tenants a chance to own a home and farm of their own and at the same time attacks the problem of tenancy which is steadily growing more acute. Suburban Resettlement The Resettlement Administration is now constructing 3 suburban communities. Homes for 3,000 workers and farmers will be provided in these communities. These communities are located near Washington, D. C.; Milwaukee, Wisconsin; and Cincinnati, Ohio. These are carefully planned towns, surrounded by a greenbelt of forests, parks, and small farms. The communities will have their own stores, schools, and community buildings. Residents will enjoy the advantages of both town and country. Rents will be within the reach of a group whose income ranges from \$1,200 to \$2,000 a year. The community property will be taxable; development of these com-

munities will add to the income of the counties in which they are located. Construction work is furnishing daily employment for over 7,000 workers. These communities provide homes for a group that are badly in need of decent housing; they provide work for thousands of unemployed; they serve as demonstrations of high-grade housing for people with modest incomes; and they provide examples of modern town planning which can be followed to advantage in all types of suburban development designed for the average urban family. The Resettlement Administration has kept the families aided off the relief rolls and placed them in a position to buy more goods. It has removed unprofitable land from cultivation. It has relieved local communities of tax burdens for roads, relief, and education costs of families stranded on these lands. It has shown profitable uses for land in problem areas. It has taken long steps toward the conservation and restoration of land resources throughout the nation. And it has begun town planning in America.

are exposed the body will be able to resist invasion of the germs. "Sufficient rest, cleanliness of hands, mouth and teeth, fresh air while at work and at sleep, regulation of meals and bodily functions, wholesome food and freedom from anxiety will increase bodily resistance and go a long way to avoid contracting the disease. "The complications of influenza are far more important than the disease itself. Pneumonia all too often follows in influenza. Don't neglect your 'cold.' If you have the slightest suspicion of fever, go home, go to bed immediately, and call your physician. Stay in bed until he tells you that you can get up, and follow his advice explicitly."

Still Coughing? No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled. Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

Texas Influenza Is Not Alarming AUSTIN.—Reports to the State Department of Health indicate a seasonal increase in influenza, but there are no indications of an epidemic in any such degree as that which swept the nation with such disastrous results during the World War, is the assurance given Texas by Dr. George W. Cox, State Health officer. "The number of cases reported for the first two weeks in January is not in excess of those reported for the same period last year," he said, "and the situation does not call for alarm, such as is likely to arise in the minds of the people because they recall the terrible destruction wrought by influenza in 1918. "Influenza is an acute, contagious, and highly infectious disease, occurring in epidemic and isolated form and often characterized by suddenness of onset, fever, headache, marked prostration and a tendency to severe complications of the lungs. Practically everybody is susceptible to it. No matter how many times you have had the disease you may contract it again. "Attempted preventive measures fall naturally into two groups—first, everyone should try to avoid exposure to the disease by avoiding overcrowded places, and stay away from persons ill with the disease; and, second, every person should form such health habits as will keep the resistance of the body at a maximum, so that when they

Audience Delighted With Review Of 'The Many Mizners'

On Friday night about fifty people had the pleasure of hearing Mr. J. A. Seymour review "The Many Mizners" by Addison Mizner.

With an ease and naturalness that made the characters real and highly amusing persons, Mr. Seymour portrayed "The Many Mizners," his dry sense of humor adding the final touch that drew a frequent and hearty response of laughter from his audience.

All who heard this book review must have gone home with a feeling of having known the Mizner family, and shared in the pranks of these irresponsible children, and the changing fortunes of their adult years.

With keen sympathy and understanding, Mrs. Seymour drew numerous vivid pictures of their highly colorful careers, the result being that many who hear him are expressing an eager desire to read the book.

Christian Endeavor Sunday Programs

The topic studied at the Senior Endeavor of the First Christian Church was "The Cross of Jesus," which opened with Rex Sackett, president, giving the leader's talk.

The Scripture was read by Billy Joe Hall after which a business session was held at which a report of the Endeavor cabinet was given by Robert Howe.

Those taking parts on the program were: Vivian Smiley, Adale Reiger, Marvin Parks, Robert Howe, Anna Beth Bedford, B. W. Recer, and Buster Howard, after which a general discussion was held.

At the close of the program, there was an appointment of committees to entertain the Youths World Convention that is to meet here in February.

Paris Tires On Its Latest Innovations

THERE'S no happy medium in smart Paris evening wraps—either they are long or short. Molyneux' handsome version of soft lightweight blue tweed quite sweeps the floor. It is lined with bordeaux red velvet and is worn over a dull crepe dress in pale rose.

Baptist Unions Present Programs

Joan Blair was leader of the program, "What We Believe," at the Junior Union, which was under the sponsorship of Mrs. R. V. Hyatt.

Those who presented topics on the program were Lewis Wingo, Algern Undercross, Joan Blair, Hazel King, Alene Eiland, Lena Fay Shelburne, Bobby Hyatt, M. L. Alexander, Basil Rogers, and Spurgeon Blackburn.

Mrs. Herbert King directed the members of the Primary Union in their program, "Honor Thy Father and Mother." The children who took part on the program were Billie Jean Chandler, Eddie Joe Bryan, Goodman King, and Betty Lee Hays.

After the dramatization of the story, "Jacob and His Father," the children occupied themselves by drawing in their scrapbooks.

Rural Schools

New Students From Stokes

Mr. M. W. Alcorn, principal of Stokes School, visited the local high school Monday and brought five students from the Stokes school, who enrolled in classes here for review work and the mid-term examinations.

In a talk before the assembly Mr. Alcorn complimented the Midland schools, saying that he had heard many favorable reports from all sections of the state in regard to the high standing the Midland school system had attained. "I feel that I have done the best I can possibly do for my students," he stated, "if I prepare them and see that they are enrolled in the Midland High School."

The students who came in from Stokes are: J. W. Jarvis, W. T. Lewis, Coleman Collier, Irene Roberts, and Iva Grace Collier.

Surrealism At Its Peak

What's next? Here is the latest at one of the cafes here where the bosses are tired of their coffee customers asking that their cup of coffee be "warmed up." Cup, saucer and spoon are fur-lined to keep the coffee from cooling too fast on cold days.

Personals

Jack Prothro, H. L. Haag, James White, and Allen Dorsey, all students at Texas Tech, visited here with their parents and friends during the week end.

Merwin Haag and Curley Flint went to Lubbock Sunday to visit friends.

Mrs. Conn Thomas, who has been visiting her mother, Mrs. B. Frank Haag, returned to her home in Dallas today.

Mr. and Mrs. Billy Smith of Odessa visited with Mrs. Smith's mother, Mrs. Ellis Cowden, Sunday.

Mr. and Mrs. J. L. McQuery returned Sunday to Vernon after visiting with Mrs. McQuery's mother, Mrs. E. C. Hitchcock.

Wadley's Footwear Section Enlarged

Expansion of the shoe department of Addison Wadley Co. was completed today, providing much more room for the department and giving completely new fixtures. A deeply cushioned rug runs across the width of the store.

New fixtures include twelve modernistic chairs for customers, finished in red leather and silver.

Additional new counters will be installed in the main floor of the store at an early date, replacing all "old type" counters now in use, and giving a harmonizing effect throughout.

HERE FROM BLISS

Paul Roberts, former Midland boy, was here for the week end from Fort Bliss where he is in army service.

Mrs. E. V. Guffey Teaches League

The Intermediate department of the Methodist League had as their subject of study, "Serving Through the Church," which was introduced to them by their sponsor, Mrs. E. V. Guffey.

Cleo Tidwell led the prayer.

The members attending were: Cleo Tidwell, Josephine Barber, Frances Guffey, Helen Barber, Lois Guffey, Carolina Oates, Ruth Reed, Mildred Conner, Joyce Beauchamp, Nellie Mae Terry, Mary Ruth Roy, Eleanor Hedrick, Foster Hedrick, Mimmie Frances Merrill, Marie Beauchamp, Helen Conner, Bertha Flournoy, Louise Terry, Trueman Whittaker, and Juanita Boyett.

Naomi Class Has Lesson From 'John'

"Jesus The Water of Life" was the lesson taught by Mrs. J. Howard Hodge Sunday to the Naomi class.

Miss Eva Batchelder read the lesson reading, and the scripture, taken from Isaiah, was read by Miss Ethel Long.

Mrs. O. A. Lamar played the offertory after which a prayer dismissed the class.

BOESEKE IS HERE

Elmer Boeseke, West Coast oil man and sportsman, is here looking after oil interests. Boeseke is one of the world's leading polo players.

MOVE FROM ANGELO

Mr. and Mrs. Tom Sloan and son, Tom, moved here today from San Angelo to make their home and will reside at the Scharbauer Hotel for the rest of the winter. Mr. Sloan and Frank E. Lewis, former San Angelian, are partners here, being independent oil operators.

home of Mrs. J. R. Crump at two-thirty Tuesday afternoon.

WEDNESDAY

The Modern Study club will meet at the home of Mrs. A. H. Riley Wednesday afternoon.

The Play Reader's club will meet at the home of Mrs. Wade Heath, Mrs. R. W. Hamilton will read.

The Woman's Wednesday club will meet at the home of Mrs. Andrew Fasken, Mrs. J. M. DeArmond will be leader.

The Woman's Golf Association will meet at 10 o'clock at the Midland Country Club. All interested are urged to attend.

THURSDAY

The Ace High club will meet at the home of Mrs. S. F. Hazlip 911 West Wall at 2:30 o'clock Thursday afternoon.

THURSDAY

The Home Art club will be entertained at the home of Mrs. B. W. Recer Thursday afternoon at 3 o'clock.

FRIDAY

The Belmont Bible class will meet at the home of Mrs. Paul Smith, 900 West Kentucky.

SATURDAY

The Children's Story Hour will be held at 10 o'clock in the Junior Library of the county court house.

Announcements

The Midland County Public Health Board will hold its annual meeting in the county court room at 8 o'clock Monday evening.

TUESDAY

The North Ward P. T. A. will meet at the school Tuesday afternoon at three o'clock and all members are urged to attend.

The Edelweiss club will be entertained at the home of Mrs. Hugh Corrigan at 2:30 o'clock Tuesday afternoon.

The Business Woman's auxiliary will meet at the home of Mrs. John B. Mills Tuesday night at 8 o'clock.

The Bridgette club will be entertained at the home of Mrs. Kinne Reese at three o'clock Tuesday afternoon.

The Alpha club will meet at the

MEETING POSTPONED

The W. M. U. of the Methodist church will have the social meeting Monday, January 25 as scheduled at 3:30 p. m. instead of the regular circle meetings.

HERE FROM MOUNTAINS

Mr. and Mrs. M. O. Means are here from their ranch near Valentine, visiting her parents, Mr. and Mrs. E. P. Cowden.

This Safe, External Treatment Helps END A COLD Quicker

The 3-Minute VapoRub Massage

Massage VapoRub briskly on the throat, chest and back (between and below the shoulder blades). Then spread it thick over the chest and cover with warmed cloth.

Almost before you finish rubbing, VapoRub starts to bring relief two ways at once—two direct ways:

- 1. Through the Skin.** VapoRub acts direct through the skin like a poultice or plaster.
- 2. Medicated Vapors.** At the same time, its medicated vapors, released by body heat, are breathed in for hours—about 18 times a minute—direct to the irritated air-passages.

This combined poultice-and-vapor action loosens phlegm—relieves irritation—helps break congestion.

VICKS VAPORUB

Mother's Luck in your VapoRub package for full details of Vicks Plan—a practical home guide to greater freedom from colds. In clinic tests among 17,353 people, this Plan cut sickness from colds more than half!

Cagers Adopt Zone Defense Under Three-Second Rule Now In Effect

Game Declared to Be Speeded up By New Ruling

By HARRY GRAYSON
Sports Editor, NEA Service
NEW YORK, Jan. 18.—The three-second rule has basketball coaches abandoning the man-for-man zone defense.

Long Island University switched following the snapping of its 43-game winning streak by the Stanford stalwarts.

"The three-second rule, which virtually has eliminated the bucket or pivot, has been the biggest boost the zone defense has received," says Clair Bee, L. I. U. coach. "It is one reason why I believe that type of defense will be almost universal before the end of the season."

Stanford, College of the City of New York, and other hoop leaders long have employed the zone defense.

"Block plays can't hurt a team playing a zone defense," explains Bee. "If you have tall men, your zone defense is so much more effective. With a zone, blocks are effective only on center tip-offs and out-of-bounds plays. Because blocks are legal in some sections and illegal in others, a zone defense is a uniform protection against them."

Under the three-second rule, limiting offensive players to three seconds in the foul slot and entire foul circle, Bee visions basketball developing into a game placing even a greater premium on tall men than in years gone by.

Pivot Decidedly Beneficial
Maneuver in Open Territory

Yet the Brooklyn strategist is among the large group of coaches seeking to have the back half of the foul circle re-established as part of the regular floor because a pivot man in this spot constitutes a small club's best chance to break up a zone defense as played by giants.

"The pivot in more or less open territory is a decidedly beneficial maneuver," asserts Bee.

"Long Island U. managed to get

Not the least reason why Wih Henry was such a skillful handler of the ball in the Illinois University backfield was that he is a fine guard in basketball. The Illinois three-letter man is pictured dribbling somewhere in a hurry.

Elimination of The Center Jump Is Hailed

difficulty."

L. W. St. John, Ohio State athletic director and chairman of the national basketball committee, doubts that the coaches' association meeting in Chicago, March 14, 15, and 16, will ask for any change in the present rules, but if one is made it is likely to be the universal elimination of the center jump.

Eliminating Center Jump Has an Equalizing Effect

"Eliminating the tip-off has an equalizing effect and does not concede everything to a team with superior height," says Harold G. Olsen, whose Buckeyes played four games without the jump in California during the holidays.

Stanford's transcontinental trip and a jaunt by California into the southwest meant much in the way of missionary work for the elimination of the tip-off.

"The premium is placed on speed and cleverness," asserts Olsen. "The elimination of the jump makes for more continuous action, lessens the parade of officials from basket to basket, and tends to expand the scope of floor and decrease dead spots. The tip-off elimination adds approximately five or six minutes of actual playing time to each game."

"It practically does away with freezing of the ball by a team with a slender advantage late in a contest, as is possible under the present rules."

"With the abolishment of the center jump there will still be a place for a big youngster who is clever along with it, for the rebound and under-the-basket play still will be important. It will, though, mean a facelift on the part of monstrosities who do nothing but control the center tip."

Basketball coaches and the rules committee have a big game on their hands. After the March meetings, playing the same way everywhere should be mandatory. They've monkeyed around with a good thing long enough.

Marius Russo, who now coaches our freshmen. When we lost Russo as a player the job became increasingly tough and the defeat by Stanford largely was a culmination of this

Hardships Shaped Lewis' Life

Lewis when he first became known to the public, as war-time vice president of the United Mine Workers. Constant strife is leaving its marks. Lewis in 1922 is well-scrapped bottom and come back to gain, all in a decade. Today, at 56, he sets a greater goal, seeks to organize millions in mass-production industries never organized before.

LITTLE NIP PUTS TOP ROW ON FEET

Although he isn't a drinking horse, Top Row, winner of the \$100,000 added Santa Anita Handicap last year, celebrates recovery from a serious illness by taking a little nip—at his trainer, A. A. Baron's thoroughbred is expected to be in shape for the third running of the world's richest race on Feb. 27.

country on the subject.

American. We can not fight our government."

The strike was officially off, but getting the men back into the pits was another matter. The more radical and militant leaders refused to obey, and the strike dragged along with varying degrees of effectiveness until early December, by which time people were growing more bitter as their coal bins grew emptier.

Mr. and Mrs. B. H. Blakeney will leave tomorrow for a vacation trip in Mexico City. They will make the trip by automobile and expect to be gone until about February 10.

HERE ON BUSINESS

Lyle R. Sproule of Fort Worth is here today, looking after oil interests.

HAS OPERATION

Mrs. R. C. Tucker is reported to be recovering rapidly from an appendectomy performed Saturday night at a local hospital.

John L. Becomes Miner

John L., a strapping, red-headed youth of 17, went down into the mines with his father. The years of hardship had left their mark. Already through his schooling had ended with the seventh grade, John was a serious lad, reading continually, taking part in a debating society, managing a baseball team.

Then, for five years or so, the younger Lewis wandered through the west, working in metal mines of Colorado and Montana. He was working in a Wyoming pit when a nearby disaster killed 400 miners. Impressions of the callous conditions of mining in those days were piling up all through what Lewis now calls "by years of irresponsibility." Lewis is reticent about those years. In 1916 he returned to Lucas, and married the girl he had never forgotten through the years of wandering.

She was Myrtle Edith Bell, school-teacher and daughter of a doctor whose family was American since before the Revolution. As young folks together in the debating societies and parties, she and Lewis had been comrades, and the slender young schoolteacher often lent books suggested reading, and generally helped the education of the ambitious young miner.

Both Lewis and William Green, then secretary-treasurer of the miners, were indicted under the Lever Act, a war-time measure aimed against conspiracies to limit production of necessities. Chief lawyer for the U. M. W. was Charles Evans Hughes, the present chief justice, who contended that the Lever Act was void and unconstitutional.

The whole world was short of coal on Nov. 1, 1919, when Lewis "pulled the miners." The pinch was felt almost immediately. Stores shortened hours, mills closed. People were uncomfortable in homes and offices.

Many states called out troops, schools closed or shortened hours. A federal court in Indiana issued an injunction instructing Lewis to cancel his general strike order. On No. 11, after a 20-hour session with other union heads, he issued his famous statement, "Gentlemen, we will obey the mandate of the court. We do so under protest. We are

SLICK S-MEN SHOOT FOR SYRACUSE

Sinuous, slick, sly scorers and sensationally sleight-of-hand are these five S-men of the Syracuse basketball varsity. Dribbling in the direction of the camera are, left to right: Wilmetth Sidat-Singh, said to be the only Hindu in American basketball, and Bob Stewart, forwards; Ed Sonderman, center, and Johnny Schroeder and Capt. John Simonaitis, guards.

The SPORTS HORN

BY JESS RODGERS

SPORTS FODDER

Don Budge, America's No. 1 ranking tennis star, confided to friends here that he regarded his fellow statesman, Bobby Riggs, and the veteran Sidney Wood as the most likely candidates to join him on the 1937 Davis Cup team. Riggs, he said, was coming along fast and may be given the preference over either Frankie Parker or Betsy Grant. Wood, he believes is on the verge of a great comeback. The next day Budge bowed to Grant in straight sets in the finals of the Miami Biltmore championships . . . And don't think Budge is not casting a glowing eye toward the professional field since Fred Perry's auspicious debut . . . The report lingers that the California red-head was seen practicing daily with Ellsworth Vines on the Pacific Coast . . . Sunny Jim Fitzsimmons, famed race horse trainer, has bet on only one nag in his life, a mare, and it ran a dead heat for first money at Arlington Park . . . Students of gold

will follow play in the Fifth Annual Miami Biltmore Men's Amateur Championship, January 17-22, when the new 14 club rule for tournament players will be given its first trial . . . A move is afoot to cancel all race programs in Miami next New Year's Day in recognition of the annual Orange Bowl game . . . The Australian barrier, which permits the thoroughbreds to get off to a running start, is expected to revolutionize the Sport of Kings in America following its debut at Hialeah Park when Ruben G. Gray, its inventor, was among the on-lookers . . . Jay Levy, a deaf mute from the age of two, is an entrant in Miami's roller derby . . . Miami's popular sport of Jai Alai is controlled by an international association in Spain to which all contestants send five percent of their earnings . . . This money is used as pensions after the players' terms of usefulness have ended . . . Mayor Damon Runyon of Sunny Isles has made Jack Dempsey chief of police, and Harry Richman, the song man, head of the fire department. Now all they need is some guns and a fire hose, not to forget a city hall . . . There was a difference of only \$100 in first and second prize money when Ray Mangrum of Dayton defeated Tony Manero of the Miami Biltmore pro staff in the Miami Open playoff . . . Pop Warner, Temple coach, is gunning for his 300th coaching victory which should roll around next fall . . . Warner's teams have won 299 games and the Owls disappointed him by not making it 300 last year . . . With 22 players having already ac-

WINTER SAFETY TIPS

TOLEDO, Ohio, Jan. 12 (U.P.—Jay E. Thompson, secretary of the Toledo Safety Council, offers these tips to motorists for safe driving in winter weather.

You can see better with dim headlights than with bright ones in fog, rain or snow.

You can clear an ice-coated windshield by holding up the hood on the driver's side with two small plugs of paper so that warm air from the motor can blow against the windshield.

You can decrease slipping on icy pavements by letting five pounds of air out of each rear tire and by setting the hand brake slightly to apply friction to the rear wheels.

Mrs. Marsh of Graham, Texas, is visiting Mrs. Eaaron Smith who is recovering from injuries received in a car wreck.

cepted, only ten invitations remain to be extended for the Miami International Four-Ball Open, March 7-9 . . . Henry Picard and Johnny Revolta are the defending champions.

J. B. (Rocky) FORD

Indian Woman at 92 Holds U. S. Forest Job

DULUTH, Minn. (U.P.) — Mrs. Charles Baker, 92, a wrinkled, white-haired full-blooded Chippewa Indian, is employed by the U. S. forest service. She still is an expert in her native crafts.

Recently Mrs. Baker completed

repairs on 49 pairs of snowshoes to be used this winter on the Isabella ranger district of the Superior national forest.

She has retired to a shack deep in the woods where she lives with her son, Frank. Until spring the cottage will be snowbound. She and Frank will live on what food he can get in the woods — rabbits, deer, and moose. Frank will reach the outside world occasionally by dog sled. Mrs. Baker will remain at home.

This fall Mrs. Baker gathered large quantities of wild rice from Four Mile lake to add to winter's food supply.

Unemployment Compensation In Texas

What Is An Employer?
Question 16: "What is an employer?"

Answer: Briefly, an employer is any person or firm, who, during 1935 or after, has employed as many as eight persons for at least one day a week for any 20 weeks during the calendar year.

The "twenty weeks" provision is very strictly defined. Say that your normal payroll is seven persons, but occasionally you have to hire another worker for a half day at a time. If that worker is employed for any part of a day in 20 different weeks throughout the year, you become an employer and must pay the tax on your entire payroll.

If you, with seven workers, acquire another business which had eight workers, and thereafter disband the newly-acquired business leaving you with your normal payroll of

Bridge Over Golden Gate Nearing Completion

Its 4200-foot span adding mechanical grandeur to San Francisco's famed entrance from the Pacific, the Golden Gate bridge, above, is approaching completion, with formal opening set for May 1. Huge suspension cables and the 746-foot towers are the supports for the bridge floor, over which autos will, for the first time, drive above the Golden Gate. With the already opened Bay bridge, San Francisco, long "isolated" on a peninsula, will have direct overland outlets north, east, and south.

Texas Twins' Toes Twinkle

Blain, left, and Wayne Bidcutt, twins of North Texas Teachers' College at Denton, rocketed into the track picture in the Sugar Bowl meet in New Orleans. Wayne reeled off the second fastest two-mile in American history as the brothers teamed to repel Don Lash of Indiana. Time: 9:03.5.

Records of Water Wells in Martin County in Library

The Board of Water Engineers has placed copies of the records obtained by the Works Progress Administration Martin county ground water project in the local libraries.

The purpose of this project was to obtain information concerning existing wells, to ascertain the quantity and quality of water they yield, to put down test holes in areas where no wells or few wells existed, and to compile and publish the information thus obtained.

This mimeographed release on Martin county is one of the steps in the study of the ground water supply in Texas. The records published will be a great help to well drillers and water supply engineers and geologists working in the county. They will serve as a guide to all persons interested in the industrial and agricultural development. Local people will be interested in the chemical analyses of the water they drink and they may find the analyses of water from their own well. Prospective buyers of undeveloped land will be able to ascertain the depth to water and its probable chemical character from the records of nearby wells. County agents, home demonstration agents and teachers of vocational agriculture often find these reports of considerable help in their work. The logs of the test wells give considerable information about the soil and subsurface of the county, and are valuable to the geologist. The Board of Water Engineers and the United States Geological Survey use these records as a basis for their replies to inquiries from individuals and from industries requesting information pertaining to ground water. These data serve as the groundwork for later quantitative ground water studies to be carried out as needed by the Board of Water Engineers assisted by the United States Geological Survey. When these later quantitative studies are completed, they will incorporate and coordinate

week of employment prior to the time you came under the law.

If you have any questions concerning the operation of this law as it affects employers or workers, you can have your questions answered by writing to R. B. Anderson, chairman, Texas Unemployment Compensation Commission, Austin.

ate the results of the well and spring inventory and will enable the people of the state to develop and regulate intelligently the withdrawal of water from the ground, thus assuring them that an essential resource will not be needlessly exhausted.

Field work was started in Martin county on December 16, 1935, and completed in July, 1936. Joe W. Lang, a geologist, was project superintendent. The Big Spring district office of the Works Progress Administration made the work possible by their constant help and cooperation. This project was part of a statewide ground water project. The United States Geological Survey cooperated in the technical direction of the work and Dr. E. P. Schoch of the Bureau of Industrial Chemistry of the University of Texas directed the chemical work. Samuel F. Turner of the United States Geological Survey was Technical Director and W. O. George of the Board of Water Engineers was Assistant Director of the statewide project.

This release contains 50 pages of well records with descriptions of 391 wells and 2 springs, 4 pages with 20 drillers' well logs, 15 pages of test hole logs with records of 174 holes and 12 pages of chemical analyses with the analyses of 394 water samples. The locations of all wells, springs and test holes listed are shown on a map in the back of the release.

Copies of this release may be consulted in the Midland County Library, Midland; and in the high school libraries at Stanton, Big Spring, Andrews, Lamesa, Odessa, and Garden City.

Drivers Overcome Fog With Touch of Amber

PORTLAND, Ore. (U.P.) — Oregon motorists have discovered a simple way of cleaving fog with their headlights.

Instead of smearing such compounds as onion oil on their windshields, or lighting candles just inside the glass, they now wrap ambered colored cellulose material over the lens. They say it works, the colored light overcoming much of the white mist.

STORIES IN STAMPS
By F. S. Klein
GUIDE TO WOMEN IN DISTRESS

FRANCOIS DE SALES seemed to be fulfilling the hopes of his father, by taking up law in college. But despite parental plans, the youth took holy orders in 1593, when he was 26. So zealous was he as a priest that he ventured into strong Protestant communities to preach Catholicism. Early in the 17th century he met Jean Françoise Fremoyt, widow of Baron de Chantal, and now a saint, and with her he organized the Salesians, or Visitants, otherwise known as the order of the Visitation of Mary. Here was to be an asylum for widows and other women in distress, all devoted to a religious life and to service for the sick. The order now has more than 100 convents and 3000 inmates.

St. Francis continued to preach and write until he died in 1622, at the age of 55. His portrait appears on one of the stamps issued by the Vatican in 1935, in connection with the Catholic Press Congress in Rome.

Oil News--

ble No. 1 Walker, a small producer which has been shut in lately, and about two miles northwest of the main body of the Fuhrman pool.

Seven inch casing is being run in George F. Getty, Inc., No. 1 Moxley, Andrews prospect nearly five miles southwest of the Means pool. A 20-minute drill stem test from 4445 to 4698 showed 300 feet of drilling fluid, a slight amount of gas, and no oil. Previously, saturated cores had been recovered from 4,680-98. The well is in the center of the northwest of the northeast of section 15, block A-45, public school land.

Shows Drilling Fluid
Stalling No. 1 J. A. Morrow, Gaines wildcat, showed 120 feet of drilling fluid, with no oil or gas, when tested from 4,710 to 4,788 with the formation tester open for one hour and 20 minutes. It is now coring ahead below 4,788. Location is in section 20, block A-24, public school land, four miles west and slightly north of the Landreth No. 1 Kirk discovery.

A mile south of the No. 1 Kirk, Amerada No. 1 C. E. Robbins, center of the northeast of the northeast of section 9, block A-22, public school land, is drilling lime at 4,783, no shows reported.

In southeast Terry county, W. L. Pickens et al No. 1 Lewright, closely watched wildcat in section 1, block 3-37, public school land, ten miles northwest of the Ray Blough No. 1 Robinson discovery in Dawson county, is reported drilling lime and anhydrite at 4,200 feet.

Cleaning Out
York & Harper and Sloan & Zoek No. 1-B Foster, extension test which spread the Foster pool of Ector county a mile to the northeast, is cleaning out today at 40 feet off bottom, with 3,500 feet of oil in the hole. It bridged following 410 quart shot from 4,127 to 4,319, but made a 12-barrel head day before yesterday when the upper part of the bridge was broken through. Total depth is 4,332, plugged back from 4,448. Location is in the southwest corner of section 8, block 42, township 2 south, T. & P. survey.

One of the wells linking Cummins and Goldsmith production in Ector American Maracabo No. 1 Scharbauer, section 19, block 44, township 1 north, T. & P. survey, is shut down at 4,230 feet awaiting pipe line connection. Storage tanks totalling 3,500 barrels have been filled. The well will be drilled deeper before completion.

Roosevelt Test Shows
Roosevelt county, New Mexico, attracted attention today when Maxwell, Crandall and Osmond No. 1 Williamson, wildcat in the center of the northwest of the northwest of section 7-8s-36e, was reported to have encountered some free oil at 4,802. Details on the amount of the showing were not available.

In the Lovington area of Lea county, N. M., Magnolia Petroleum Corporation No. 1-G state encountered a baller of oil per hour at 4,451 and is temporarily shut down. The test

'I-I a Hit-Run Killer?'

A dim street, a swerving auto, shrill laughter, a thud, a writhing body on the pavement. Arrested as a hit-and-run driver, Miss Dolly Ford, San Francisco, here points to herself in disbelief. Intoxicated at the wheel? Yes, she admitted that. Informed that the victim had died, the girl grew hysterical and fainted. She didn't even remember hitting the pedestrian with her car, she declared.

triazation to the state and its people. Encouragement of industrial development stemming from the proximity of these resources combined with the state's great facilities for shipping, transportation and a phenomenally expanding consumer market in the southwest is a prime need if the people of Texas are to get their rightful share of benefits from the growing, nationwide move toward decentralization of manufacturing, the Council's report states.

Natural Resources Exhibit to Promote Industrialization

DALLAS, Texas. (Sp.)—The exhibit of natural resources of Texas, which was so popular and eye-opening feature of the great Centennial exposition here, may be the wedge for an educational and industrialization movement that will see the Lone Star state rise to even greater heights as "the state that has everything," according to John M. Spellman, president of the newly-chartered Institute of Natural Resources. Plans now being made to make the exhibit a permanent one will perpetuate the work not only of further educating the people of Texas to the state's native wealth, but also of interesting practical industrialists and scientists in development of scores of resources whose potentialities heretofore have been recognized only in an academic way, says a report of the All-State Development Council.

While it is somewhat generally known that the natural resources of Texas are more varied and plentiful than those of any other state, and that some of them have played dominant roles in Texas' phenomenal growth and prosperity, scores of minerals and stones in their original condition await only management, capital and labor to give them economic stature and bring additional fruits of industry.

is 330 feet from the north and 2-310 feet from the east line of section 24-1734e, over a mile southeast of the old Vacuum-Rycade No. 1 State-Bridges, a 120-barrel natural producer drilled over seven years ago but never connected with a pipe-line.

"TOUR" EUROPE with this New 1937 PHILCO!

Here's your radio guide through Europe—South America—the whole world of colorful foreign reception. It's the amazing Philco Color Dial—which names and locates foreign stations in color... and it's a part of the Philco Foreign Tuning System of this new 1937 Philco 630X*. Other big features, too! Come in for free demonstration.

Collector Assembles 4,000 Comic Cartoons
ROCHESTER, N. Y. (U.P.) — A. D. Bessey has an unusual hobby — collecting comic cartoons from newspapers. His collection numbers more than 4,000 cartoons, all neatly pasted in scrap books.

"Lots of people think it's a foolish way to spend time," Bessey says, "but I've yet to see anyone, man, woman or child, who would not gladly spend an hour looking through the collection if they got the chance."

vide great economies in manufacturing.

The rubber industry, which uses great quantities of cotton, carbon black and sulphur, and the paper pulp industry are two major manufacturers which would find Texas outstandingly qualified as a seat of manufacturing operations by reason of availability of these and other native resources, the report says.

DREADED MIDDLE-LIFE
Mrs. F. L. White of 711 Cherokee St., Muskogee, Okla., said: "When passing thru middle life I had no appetite and was tormented and had terrible headaches and back-aches, associated with functional disturbances. I took Dr. Pierce's as a tonic and it caused my appetite to improve and I felt fine." New size, tabs, 50c., liquid \$1 & \$1.35. Buy today of your neighborhood druggist.
