223 Million Asked For 131 Projects Over The Country

Humble Pay Hike In Effect Today

HOUSTON, April 12. (AP)—A million dollar salary raise, including most of the Shell company's 12,000 employees, went into effect today.

Fights CIO Rule

Ready to take drastic action to prevent the spread of CIO influence among Canadian labor and the sit-down strike technique that tied up an automobile plant at Oshawa, Ont., Premier Mitchell Hepburn (above), of Ontario province declared that, "if necessary, we'll raise an army."

RESOLUTIONS OF RESPECT PAID TO FOUNDER OF CLASS

Men's Bible Class Pays Tribute To Harry Haight

The Men's Bible Class of the Scharbauer Hotel keenly feel its loss in the death of Mr. Harry L. Haight, who was President of the class for many years.

As a man he believed in and practiced the teachings of the Christian religion, exemplifying in his private life faith in God and a love to practice the Golden Rule.

BE IT FURTHER RESOLVED that a copy of these Resolutions be spread upon the Minutes of the class and that a copy be sent to Mrs. Haight.

Chas. L. Klapproth Chas. A. McClintic T. O. Midkiff Committee.

SENATE SENT BILL TO BOOST NTAC TO A SENIOR COLLEGE

AUSTIN, Apr. 12 (AP)—The house sent to the senate today a bill elevating North Texas Junior Agricultural College of Arlington to senior rank; and kept alive by printing on a minority report a bill releasing penalties and interest on delinquent taxes; changed a decision on sending the senate bill against sit-down strikers to the labor committee and referred it again to the criminal jurisprudence committee, which is to hold another hearing Wednesday night.

The governor signed a bill limiting the annual earnings of utilities to eight per cent of their investments, giving cities regulatory powers over telephone companies, not excluding towns of less than 2,000 population.

Delinquent Tax Act Case Kept Alive By The House

NEW UTILITY ACT

Governor Signs Bill Limiting Profit Of Firms

The senate set Wednesday for consideration of the house bill extending Texas' participation in the interstate oil compact.

Scout Troop To Study First Aid

First aid and signaling will be the chief objectives of the meeting of all boy scouts of troop 54 tonight at the scout hall at 7:30. In preparation for the annual Round-Up all members are expected to be in attendance and special work will be given on knot tying, tug-of-war, obstacle race and the antelope race.

Band, Orchestra Contests Will Be Held In Lubbock

PALESTINE, April 12.—The Western Division State Band and Orchestra Contest, under auspices of the Texas School Band and Orchestra Association, will be held in Lubbock, April 29, 30 and May 1.

He has since appeared with leading symphony orchestras and has sung major roles in light and grand operas and oratorios under such prominent conductors as Erno Rapee, Yaska Bunchuk, Fulgenzio Guerrieri, Alexander Pulgia, and George Dasch.

Hailed by the press as the greatest American basso, Patrick is undoubtedly the most promising young artist in opera today.

CAUSE OF PLANE CRASH IS GIVEN

Air Commerce Bureau In Explanation of Feb. 9 Tragedy

WASHINGTON, April 12. (AP)—The bureau of air commerce announced officially today that a radio microphone, inadvertently dropped into the elevator controls, had caused the crash of the United Airliner into San Francisco bay last February 2, in which 11 persons died.

AMERICAN LEGION MEETING TUESDAY

Delegates to The Pecos Convention Are To Be Selected

The regular meeting of the American Legion will be held tomorrow evening at 7:30 in the court house. Delegates will be elected to attend the 16th district convention which will be held at Pecos April 24 and 25.

What Happens When A Child Genius Stubs Her Toe?

Playing at roundup, left, copying from her books, center, and tearfully joyful like any other child when she stubbed her toe, right, Mary Christine Dunn, 28 months old, amazed psychologists with her precocity. The Bonne Terre, Mo., child, daughter of Mr. and Mrs. Lawrence T. Dunn, converses easily on world events, hopes the Duke of Windsor and Mrs. Wallis Simpson will be "very happy."

NOTED BASSO TO APPEAR HERE ON SCHOOL PROGRAM

Enviability Reputation Made by Patrick In 4 Years

John H. Patrick, Basso Cantabile of the Chicago City Opera Company will be presented as guest singer at the high school auditorium Wednesday night. Discovered in 1932 by Erno Rapee, musical director of Radio City music hall in New York, Patrick did character roles and solos on the stage and over the networks for nearly a year.

General plans for the convention are being pushed to completion under the direction of Gus Rosenberg, Brownwood business man, who is chairman of the convention executive committee, Chester Harrison, secretary of Brownwood chamber of commerce, and Jed Rix, convention manager, and various local committee chairmen.

Convention visitors will be entertained Monday and Tuesday nights, May 10 and 11, with two outstanding shows, "West Texas Polies of 1937". Each town and city affiliated with the WTCC has been asked to name a sponsor to take part in the show.

MIDLAND BOY SCOUT LEADERS ATTEND SECTIONAL CONFERENCE HELD SUNDAY

"Recovery and Expansion" was the theme of a sectional conference of Region Nine, Boy Scouts of America, at the St. Angelus Hotel in San Angelo yesterday, over 100 Scout leaders from over West Texas and New Mexico attending.

CO-OP. Assn. Group Hold Meeting Friday

The Midland Cooperative Marketing Assn. Inc., is calling a meeting of its members to be held at the Valley View school house Friday evening at 7:30.

BEST SPEED

London's growth is so rapid that, it has been estimated, there are a half million people living on its borders for whom there are no church accommodations.

President Invited to Appear with Allred and Thompson As WTCC Convention Guest

BROWNWOOD, April 12.—President Roosevelt has been invited to attend the West Texas Chamber of Commerce convention in Brownwood, May 10, 11 and 12. The invitation was extended by D. A. Barden, WTCC manager.

More interest is being shown in the Home Town Speaking Contest this year than ever before, according to Rix. Twenty-five entries already have been received and at least 75 are expected.

Chambers of Commerce also will take part in an achievement contest. An award will be given the chamber showing the best completed program for the past year.

Two general assemblies will be held during the convention, on Tuesday and Wednesday mornings. Four group conferences will be held. Subjects of two of these will be "Soil Conservation and Flood Prevention," which is the general theme of the convention, and "Oil and Gas Development in West Texas."

NEW ORDOVICIAN PROSPECT CLEANS SELF IN 12 HOURS

Gulf No. 4 Waddell Shut in For Test

BY FRANK GARDNER Gulf Oil Corporation No. 4: W. N. Waddell and others, newest deep production prospect in the Sand Hills Ordovician pool of western Crane county, yesterday gave indication of its possibilities when it cleaned itself without agitation in two hours after running 2 1/2-inch tubing to 5,981, eight feet off bottom.

On drill-stem test last week between 5,800 and 5,980 the No. 4 Waddell flowed 43.5-gravity oil for three minutes at the rate of four barrels an hour, with 2,000,000 cubic feet of sweet gas. Flow was through 3/8-inch bottom choke on formation tester. Production is from dolomite in the Simpson, middle Ordovician, topped at 5,824, nearly 50 feet above the same marker in Gulf No. 1 Waddell, deep discovery a half-mile to the west.

In northern Crane, Sinclair-Prarie No. 1-24 University, southwest corner of section 13, block 35, University survey, is drilling line at 3,397, while the company's No. 1-27 University, section 12, block 35, is drilling line at 3,560. Both tests have had inconsequential oil shows.

BRITAIN TO GUARD SHIPS OUTSIDE OF THREE-MILE LIMIT

LONDON, April 12. (AP)—Prime Minister Stanley Baldwin told the House of Commons today that Britain will guard her shipping outside the three-mile limit in the Bay of Biscay, but will not protect British food ships actually entering the insurgent blockaded port of Bilbao, Spain, where the city is reported on the verge of starvation.

5-4 DECISIONS ARE REGISTERED IN 4 OF THE RULINGS

Associated Press Is Loser of Suit In Verdict

ONE UNANIMOUS

Coach Company Plea Only 1 Overruled By All Judges

WASHINGTON, April 12. (AP)—The supreme court, by a 5-4 decision, today upheld the constitutionality of the Wagner Labor Relations Act as applied to the Associated Press; affirming the national labor relations board directing reinstatement of Morris Watson, New York editorial employe.

Watson contended he had been dismissed because of activities for the Newspaper Guild. The Associated Press said that his discharge was because his work was not up to proven capability.

The Guild charged the Associated Press violated the Wagner Act by discouraging membership in a labor organization.

In three other 5-4 decisions and one unanimous decision the court upheld the Wagner Act as applied to all businesses engaged in interstate commerce.

Split decisions were rendered in the cases of Jones and Laughlin, steel corporation of Pittsburgh; Fruehauf trailer company, Detroit; Friedman-Harry Harkes clothing company, Richmond.

The court was unanimous in the Washington, Virginia and Maryland coach company case.

NEW TUCC FIELD MAN APPOINTED

H. H. Rumph to Supervise Work of 27 Counties; Midland Included

AUSTIN, April 12.—H. H. Rumph has been appointed field man for the Texas Unemployment Compensation Commission in the Abilene district, Chairman-Director Orville S. Carpenter announced today.

Rumph will direct the Commission's work in the following counties: Stonewall, Haskell, Throckmorton, Fisher, Jones, Shackelford, Stephens, Nolan, Tom Green, Taylor, Callahan, Eastland, Coke, Comanche, Brown, Mills, San Saba, Concho, McCulloch, Runnels, Sterling, Midland, Irion, Glasscock, Reagan, Upton, and Coleman.

Rumph will have headquarters in the Abilene chamber of commerce, and will be available to all employers in his district for help in the solution of individual problems arising under the Texas law. Rumph will also explain to employers the effect of the amendments to the Texas act which were recently passed by the Legislature.

DOLLARS OUTRANK LIVES IN TIME OF WAR

Now that we have got through observing the 20th anniversary of America's entrance into the World War, it might be sensible to re-examine the whole question of the things which happen to a democracy in wartime.

War is a hard, grim business. When you start it you have to go ahead and win at any price. And one of the ordinary rules of democracy for the duration of the war.

Nothing, for instance, could be less democratic than a universal conscription law. If a citizen can be dragged from his home, forced into the army, and compelled to travel to foreign soil and fight and die in a war which he believes unjust, he is to all intents and purposes under a dictatorship.

Yet that is simply part of the price of war. We did it in 1917, and we shall undoubtedly do something similar in the next war. The price of preserving democracy in wartime, in regard to military service, might very well be defeat.

That would not be so bad, if it bore equally on everyone. But the men who served in the army in our last war discovered, when they came out, that the dictatorship had not rested with equal weight on everyone. They learned that some people had made a fine thing out of the war; that something like 22,000 new millionaires had been created; that great industrialists, far from being conscripted by the government, had enjoyed fat profits; that the government, instead of seizing those profits to pay the cost of the war, had gone into debt to the tune of some 30 billions.

And so people began to wonder why a democracy at war should make such a sharp distinction between personal rights and property rights. They began to wonder why, if a government has the right to make a citizen give up his life, it does not also have the right to make him give up his property.

Out of all this has grown the current agitation to "take the profits out of war," to "draft industry," and so on.

Congress is now struggling with bills designed to do precisely those things; and Congress is discovering that the job isn't so simple as it looks. For here, again, there is the fact that winning the war must be the first consideration. You might, just possibly, create the infinitely complicated machinery to make war profitless; if it worked, the production of ships, shells, oil, iron ore, guns, clothing, and other essentials would almost certainly be so greatly delayed that you would lose the war.

Now it is rather important for us to understand all this in advance; to understand that the inequities and glaring injustices of wartime can't be eliminated no matter how hard we try. If we go to war again, men will be treated in one way and dollars will be treated in another; and we might as well make up our minds to it for that's the way wars are.

And if we do appreciate that fact, we may be able to muster the good sense to stay on the sidelines the next time a war comes along.

RETRIBUTION

There is a certain grim justice in the fate which has overtaken Henry Yagoda, for many years the head of Russia's dread OGPU, or secret police.

Yagoda was, in effect, Russia's lord high executioner. As such, he was one of the busiest mortals in the Soviet union. Just how many people went to their deaths under his orders will probably never be known, but the number must be well up in the thousands. Over a long period of time he actually held as effective and as dreaded a power as the head of the government.

But the mighty always fall, sooner or later. Yagoda is now himself lodged in an OGPU prison. Moscow accuses him of having grafted on his job. And so the lord high executioner is now right where he put so many other people; and before long, unless Moscow becomes unexpectedly tender-hearted, he will pay the penalty that he himself meted out so many times in the past.

School children are being guarded from Communism nowadays. Perhaps the girl in the book should be called Little Red, White and Blue Riding Hood.

A Viennese barber won a contest by shaving a man in 18 seconds. With time out, of course, for replacing divots.

WILL PAY CASH FOR CLEAN COTTON RAGS BRING 'EM TO THE REPORTER-TELEGRAM OFFICE AT 112 WEST MISSOURI

By The Way--

All Cars on Roads Need Changes in Oil

Every motor vehicle that has been in operation during the winter months should have its engine oil drained, the crankcase should be flushed, and refilled with new oil of the proper grade for the spring season.

"Engine oil in cars that have been running during the cold months is certain to be diluted and contaminated to the extent that its lubricating value is badly impaired, and in a good many engines this contamination has reached the point where damage to bearings, cylinders and pistons is likely to result if the oil is not changed," the Gulf official continued.

"During winter months considerable water gets into engine oil and contaminates it. Over a gallon of water is produced in an auto engine with the burning of a gallon of gasoline, and during warm weather most of this water is dissipated through the exhaust in form of vapor or steam. Moisture in the crankcase is condensed to water much more rapidly in cold weather."

"Motor oil is further diluted by the action of automatic chokes. With cold engines, automatic chokes may remain in operation throughout the period of a short run and permit too rich a mixture, or even raw gasoline, to get into the cylinders and thereby cause dilution of the motor oil."

M'DONALD OBSERVATORY DISCOVERS GALACTIC LIGHT. FORECAST BY DR.

AUSTIN, Apr. 12.—The McDonald Observatory of the University of Texas, in cooperation with the Yerkes Observatory of the University of Chicago, has recently discovered a faint milky glow which envelopes all the dark spaces between the stars in the galactic zone of the stellar system, according to Dr. Otto Struve, director of both observatories.

"Leakage of anti-freeze solutions, collection of dust and abrasives, and the chemical change that constantly is taking place in motor oil in an engine in addition to water contamination, makes it very necessary that every car owner have his winter oil drained without delay," Mr. Carlisle concluded.

instrument—the photoelectric photometer—which was constructed in the shops of the Yerkes Observatory for use at the McDonald Observatory prior to the completion of its great 8-inch reflector, it was explained by Dr. Struve.

"The 'galactic light' discovered at Mt. Locke, had been predicted several years ago, by Dr. Struve. His studies had indicated that the universe is filled with a fine dust which is faintly illuminated by the combined lights of all stars, as a band of fog may be illuminated by the lights of a city. The observational results are in complete agreement with his theory."

"Dr. Elvey intends to continue his observations until the big reflector has been completed—which is now expected to take place some time in the summer," Dr. Struve continued. "The optical experts at the Warner and Swasey plant in Cleveland, Ohio, are now busy putting the final touches on the 82-inch Pyrex mirror for the McDonald Observatory. This final process in the manufacture of an astronomical mirror is called 'parabolizing.' The upper surface of the mirror is being polished in such a way that its cross section has the shape of a 'parabola.'"

"While this optical work is taking place in Cleveland, the astronomers of the two cooperating universities are making preparations for the observations of the stars which will begin immediately after the installation of the mirror. An accurate astronomical clock made by Riefler in Munich, Germany, has recently been purchased for the McDonald Observatory. This clock is operated from the electric current of a dry cell, which once every 30 seconds, or so, transmits an impulse to a small brass weight. The pendulum of this clock beats second. In order to prevent errors resulting from temperature expansion, the pendulum is made of invar, a special alloy, which does not appreciably expand when it is heated. The rate of the Riefler clock must be regulated to a hundredth of a second. A small appliance which looks like a barometer, compensates the rate of the clock for variation in atmospheric pressure."

"Another important instrument is the stereo-comparator, made by the Carl Foiss Company, of Jena, Germany, an instrument intended for the examination of photographs taken with the reflector. Two photographs can be inserted, and examined simultaneously. The instrument then acts like a stereoscope of gigantic dimensions. Comets, asteroids or other moving objects in the sky stand out in front of the background of stars. Accurate scales are provided, so that the photographs may be measured while they are in the stereo-comparator."

"Practically all scientific work with the reflector will be carried on by means of photography. Progress in the preparation of photographic materials has been so rapid in recent years that it is now possible to photograph and study many stars and nebulae which cannot be seen by the human eye, even through the most powerful telescopes. At the Yerkes Observatory stars are now being photographed in infra-red light, which the human eye does not register. These stars, which popular writers have aptly called 'ghost-stars' are too red to be seen, but not too red to be photographed on special emulsions made for this purpose. Similarly, astronomers can now photograph

Garrison Finisher

Byron Nelson, affable Texan, and Reading, Pa., golf pro, scored one of the most smashing finishes in golf history when he overcame a four-stroke disadvantage and three opponents on the last seven holes to capture the Masters' Tournament at Augusta, Ga. Nelson's 283 total was two strokes better than that of Ralph Guldahl, runner-up.

(Reserves the right to "quack" about everything without taking a stand on anything).

A Midland man who formerly lived in Taylor and Runnels counties said he saw a scissor-tail yesterday, which meant it was time to plant cotton where he came from.

Not long ago I gave out a lot of signs of spring, but I admitted the mesquites hadn't begun to put out. Well, now they have, so I guess you would call that a sign of summer. Anyway, if you stir around a little bit, it isn't hard to get up a sweat.

Ranchers south of town say the grass is putting out nice and green, and the weeds are rank all over the country. We could use another general shower about now, just to get the entire country green.

Another joke received too late for the contest:

Mose was trying to ride a horse that wasn't often used for that purpose. Mose managed to get on the horse but first the horse's heels were in the air and then he would rear up in the saddle. After several gymnastic tricks, the old horse managed to get one hind foot caught in the stirrup. This was about enough for Mose and he said, "You looka heah, if you is gonna get up heah and ride, I is glittin' off."

NO. 13 LOOMS LARGE IN LIFE OF MAN, 79

ACTON, Mass., Apr. 12 (UP)—Arthur E. Tuttle sat down and figured out that:

He was a 13th child. He was born on July 13, 1858. He left school when 13. He entered the building contracting business July 13, 1913. He has had automobile registration 96-13 for 13 years. He has had telephone number 13 for 13 years.

He started building a home for his daughter last June 13 and completed it Oct. 13. And he has a sister aged 94, which digits total 13.

Daimler is said to have built the first V-type engine in 1888.

Hiawatha, immortalized in Longfellow's poems, was a real Mohawk Indian.

PARKING METERS LIKELY FOR CLEVELAND SOON

CLEVELAND, Apr. 12 (UP)—Installation of parking meters in Cleveland appears a certainty as Traffic Commissioner Edward J. Donahue and his men proceed with a survey to determine where metered zones should be established.

City council has authorized creation of the zones and, through purchase of meters has not been authorized as yet, has declared a policy favoring their installation.

SIT DOWN STRIKERS ARE JAILED

CARUTHERSVILLE, Mo., Apr. 12 (UP)—Sheriff John Hosler jailed seven farm laborers here when they staged a sit-down strike on the plantation of T. J. Greenwell.

## Senior Endeavor Elects Officers

At a business session which preceded the regular program of the Senior Endeavor of the First Christian church the following officers were elected to hold office for the next six months:

Marvin Park, president; Donald Griffin, vice president and chairman of the program committee; Vivian Smeley, secretary; Louie McHargue, treasurer; Nell Ruth Bedford, chairman of the social committee; Glenn Brunson, chairman of the attendance committee; Frank Wade Arrington, chairman of visitation and sick committee. It was also voted to send the first Sunday offering to missions. Mr. and Mrs. E. W. Reiser were re-elected sponsors of the organization.

After the business session the president, Rex Sackett, turned the meeting over to the leader for the program Miss Louie McHargue. The subject was Christian Stewardship. Those having part on the program were Glenn Brunson, Billy Noble, Nell Ruth Bedford, John Pickering, Frank Wade Arrington, Marvin Park, Donald Griffin and Zack Reader. There were seventeen members present and three visitors.

## Naomi Lesson Is Taken From Genesis

Mrs. Carl Covington presided Sunday morning at the meeting of the Naomi class in the private dining room of Hotel Scharbauer. The scripture was read by Mrs. W. C. Maxwell, and the lesson reading by Mrs. Ruth Guy. Miss Jean Farnham played "Have Thine Own Way" as the offertory.

Mrs. J. Howard Hodge brought the lesson, on the subject of "The

## Announcements

St. Thomas study club meets at 3:30 at the home of Mrs. J. J. Kelley, 700 W. Kansas.

**TUESDAY**

Visit the Midland County Museum. It will be open from 2 until 5 o'clock.

Mrs. George Bennett will be hostess to the Alpha club.

The Delphian club will have a regular meeting at 9:30 a. m. in the private dining room of Hotel Scharbauer.

Business Woman's Auxiliary will meet at the home of Miss Maedalee Roberts.

Woman's Bible class of the Church of Christ will meet at the church.

**WEDNESDAY**

The Women's Wednesday club will meet at 3 o'clock at the home of Mrs. R. L. Miller, 202 S. Big Spring, with Mrs. James H. Goodman as hostess.

Listen to the Health Program broadcast weekly over KRLH from 10:00 until 10:15 a. m.

The San Souci club will not meet this week as scheduled.

Mrs. Fred Fuhrman, 705 W. Storcy, will be hostess to the Fine Arts Club.

**THURSDAY**

The Home Arts Club will meet at 3:00 o'clock at the home of Mrs. John Dunagan, 1904 West Wall.

Visit the museum. There are many interesting things there on display.

The Thursday Sewing club will meet with Mrs. Leonard Skaggs, 310 S. Pecos.

Mrs. Vaughn McCalister, 304 S. Pecos, will be hostess to the Ace High club.

Girl Scouts will meet at 3:30 at the Baptist Annex.

**FRIDAY**

Midland County Club Ladies' Golf Association will meet at the club at 9:30 a. m.

Mrs. Herbert King will be hostess to the Belmont Bible class.

**SATURDAY**

Midland County Museum will be open from 2 until 5 o'clock.

The Children's Story Hour will be conducted from 10:00 until 11:00 in the Children's Library.

Sin of Adam and Eve," Genesis 3:1-4:26.

Committees were appointed to complete plans for a class party at the Midland County Club the week following Sunday, April 18.

## SUMMER BLOSSOMS

Milliners Give an Advance Peek At Hats For Hot Weather

Spring's hardly here, but already they're unveiling the summer hats. Four that made the Ritz-Carlton preview in New York so dramatic are grouped together above—all flattering, all new as the first breath of spring. "Madame Bovary" (left) is of ruffled taffeta with clover daisies at the back. "1860" (center, back) is green leghorn with a belting crown. Notice the interesting pleated detail on the brim. The wide-brimmed white starw model (right) is banded with red ribbon and finished at the front with a row of scarlet poppies. The Victorian bonnet (center front), of chartruese baki, is trimmed with purple pansies and purple velet ribbons.

## 'The Great Offensive' by Maurice Hindus As Reviewed by Mrs. R. S. Johnston

"The Great Offensive," by Maurice Hindus.

This book, "The Great Offensive" by Maurice Hindus, was written and published just after the official completion of the first "Five Year Plan," and the beginning of the second. At that time the author could already see the miraculous achievements of industrial independence of the rest of the world, for Russia.

It is a dramatic and concrete account of what the Russian Revolution means today to the Russian city dweller, as well as to the proletariat of the machine, and to the peasant on the community farm.

It describes the gains that have been made in achieving economic self-sufficiency and in altering, almost beyond recognition or comparison with the old Russia, religion, the family, education and the life of the living voice of the Revolution, proclaiming the new ideas, new inventions, new principles, new adjustments—that the proper care of rubles will do for the country; the kind of houses to build; new games that are to be played; new health laws that are to be observed. Nowhere is there a book whose title or subject is suggestive of doubt, scepticism or regret.

People have money to spend for books, food, and clothes. And while books are plentiful, food and clothes are not. Meats, sweets and fats have not been so scarce in a whole decade. The author says he knows men who have been trying to buy an overcoat for three years.

There is a shortage of every conceivable commodity in the country, from food to footwear—from safety pins to good ink, and it is the great dream of every Russian school child to own a good pencil.

Before the first 5-year plan began there were few automobiles in Russia, and those were all of foreign make; few home-manufactured tractors, and no home-made aeroplanes, but at that time peasants, and workers had substantial and sometimes ample supplies of meat, eggs, cheese and butter.

At the end of the first 5-year plan and the beginning of the 2nd, there are scores of the most modern and best equipped factories in the world, but of the things people need for bodily comfort there are less and less. It is this decline in the material welfare of the people that gives the impression of gloom to so many foreign visitors to Russia.

The Great Offensive, of which the first 5-year plan was the beginning, has for its aim a classless society in which there shall be no classes and no causes to create them. There shall be no private ownership of the means of production, or of the machine, and no chance for any human being to employ or exploit any other human being.

Eventually the state itself is to disappear. There is to be no unemployment; there are to be racial creeds, and no religious faith.

Before all else Russia needs an industrial machine of her own. Under the Czars Russia was primarily an agricultural country, with 80 percent of the people living in the villages, working the land with primitive implements. The coal, iron and machine building industries were nowhere near well enough developed to meet the nation's needs. And there was only a bare beginning of the chemical industry.

The first 5-year plan was merely the first step in the process of building up this very necessary industrial machine.

Economically, the general aim of

## Rural Schools

Prairie Lee: Our twenty ninth school week has closed and we are becoming more and more aware of the fact that our school year is rapidly approaching the end.

Our lesson work has gone on with little interruption this week as has practice on our closing programs.

Attendance promises to be better than usual right on until the last day, and the students are eagerly preparing for their final examinations. We are sorry to report that Douglas Patterson, Junior Lands, Norma Jean Bramlett, and Alta Mae Bryant have been absent a few days recently due to illness.

The honor roll last month was as follows:

Primer—Luis Cardenas, First grade—Lavada Crudup, Melvin Meisner. Second grade—Ila M. Franks, Jane Rice. Third grade Betty Jean Graham, Rossie Lee Hart, H. D. Livingston, Jack Livingston.

Fourth grade—Avalene Crudup, Betty Jo Rice, Jack Taylor. Fifth grade—Lynora Livingston, Junior Franks. Sixth grade—Iva Hart, Betty Jo Stewart. Seventh—Mary Livingston, Jessie Ray Hart, William Franks. Ninth—Idus Ray Flowers. Tenth—Norris Bryant.

Among visitors this week were: Hollingsworth, county home demonstration agent, Miss Wilson, county health nurse, Mr. and Mrs. Davis of North Midland, and W. T. Bryant. Singing was conducted at Greenwood Monday night and Thursday night.

The first 5-year plan was to intensify industrialize the country, and to bring about in 5 years what other nations had required decades to achieve.

This was made possible because Russia could buy modern machinery ready-made in Germany, America and England, and then engage competent engineers to operate them. In other words Russia has leaped and not grown into industrialization.

There were two pressing purposes which dominated every move in the Offensive. The first was national defense.

Russian leaders have an irrefragable dread and fear of war, and they wanted to fortify Russia in the quickest possible time with all modern weapons of warfare—from tanks to chemicals; from bombing planes to gas masks.

Only slightly less momentous has been the aim to industrialize agriculture, and the hastening of the manufacturing of agricultural implements.

Now that the first 5-year plan has ended let us see just what is Russia's success in these and other aims.

First, it is well to state that the Plan was condensed into 4 years, and three months. Originally it called for the building of only 12,600 railroad cars in its last year. Actually in 1931 alone the 3rd year of the plan 20,000 cars were built. The same excess of production was to be found in almost every manufactured article or piece of machinery. Shoes, soap, rubbers, tractors, locomotives, beet-diggers, cotton-picking machines, potato-diggers, manure-spreaders, corn-crushers, flax-drills, any many, many more. Numbers of these never having been manufactured in Russia before this time.

However, Russia cannot boast of the high quality of her manufactured goods. If measured by European and American standards, her tractors do not stand up as well as American tractors, and articles of everyday use are notably inferior.

Our Author, Mr. Hindus, says it will take many a 5-year Plan to discipline the Russia industrial machine so that it will function as well as the American or European industrial machine.

It is true that Russia has been so eager to make records, to exceed programs, that she has sacrificed quality to volume in the making of machines, and speed to caution in the handling of them.

Yet with all these short comings, she has reached a point of independence. Prior to the days of her Offensive, a war, a blockade or an international boycott would have been disastrous. If any of these should happen today Russia could manufacture practically all her own armament, including chemicals.

Another outstanding achievement

## 'Work in Church' Is Endeavor Topic

The Junior Endeavor of the First Christian Church met Sunday afternoon to discuss the topic "Our Work in the Church." After the song service Mrs. Glenn Brunson read the scripture lesson, which was followed by sentence prayers by the group.

Those taking part on the program were Clarissa Mann, Leora Mann, Charles Reader, Adah Belle Reader, Betty Ruth Pickering, Sharon Lee, Cornelious, Bonnie Collins, Betty Mae Collins and Shirley Brunson. Mrs. J. K. Graves conducted the Bible drill.

ment of the Offensive is the wiping out of nearly all private enterprises. The young generation of today profoundly despises private enterprises.

Mr. Hindus writes an entire chapter on Russia's natural resources. Her vast mineral deposits, iron, lead, zinc, copper, manganese, coal, potash, and phosphates, millions and millions of tons of them. Also raw materials for chemical industry, the cultivation of plans for rubber-production, her rich farm lands, and the possibility of raising tremendously vast herds of reindeer for food.

Russia is having every phase of Siberian resource studied and carefully mapped, her forests, lakes, rivers, agricultural prospects, mineral deposits, etc.

There are already, either in operation or in course of construction, huge steel plants, paper-mills, chemical plants, machine-shops, canning factories, sugar-refineries, ship-building yards, smelters for copper, gold, lead and other metals, etc.

Another two chapters are given to describing visits to many small Russian villages, talking with the people, and learning their views of the present conditions.

The collective-farms have deprived these poorer people of much that they were accustomed to, and to most of them it has been a misfortune and not a boon. Of course they thought only in terms of immediate results. But the Russian peasant is neither a business man, nor a philosopher. However, this is true only of the older generation, for with the younger generation all is different. They seem to realize that in the building up of a new civilization mistakes and setbacks cannot be avoided. Today things might be bad, tomorrow they would be good. The younger generation takes it all in good humor, yet the grievances of their elders are real and overpowering. Indeed they constitute the saddest aspect of the Revolution.

Much is said about the collective farms. Although the idea was bitterly fought by the small landowners, it proved economically sound. It assured the government a monopoly of agricultural products, and has pushed agriculture out of ancient backwardness. This movement is destined to become one of the greatest achievements of the Soviets.

## Buffet Supper At Cunningham Home

Mr. and Mrs. J. C. Cunningham, 1007 W. Missouri, entertained Saturday night with a buffet supper. Spring colors were used in the appointments and sweet peas decorated the house.

Following the supper, Mrs. R. C. Crabb won high score at bridge for the ladies and S. S. Stinson won high for men.

Guests were Mrs. Crabb, Mrs. Butler Hurley, Mr. and Mrs. S. S. Stinson, Mr. and Mrs. J. L. Greene, Mr. and Mrs. Johnnie Bricker, Mr. and Mrs. W. L. Miller, Mr. and Mrs. Ben Carsey.

phets. When ever a party member strays from Party Policy he must recant, publicly disavow his error of belief and promises to conformity in the future.

There are confessionals, and so-called cleansings, to which party members and officials are periodically subjected.

But, for all the similarities of religion Bolshevism has no God. Neither does it offer anything in the nature of prayer, and it repudiates the ten commandments and the golden rule.

The new man in Russia has lost all faith in God, and all fear of God. The very idea of God has no place in his consciousness.

Let us look at the morality of the Soviets.

All laws which governed man's sexual behavior were swept away. He was left to his own tastes and judgment.

The principal of free-love held full sway. Marriage and divorce were stripped of external compulsions.

The emphasis now is not on marriage, but on mating. A man and a woman may live in a free union as long as they are satisfied. But the word adultery does not exist in the Russian legal code. Seduction is, however, a major crime and is punishable with death.

If a couple wishes they may go to the marriage or divorce bureaus and have them registered, no witnesses are required, and no vows or promises are made, and there is no ceremony.

Applicants must be 18 years old no feeble minded or closely related can marry, not even step brother or step sister.

The registration clerks asks a few simple questions, names, age, whether they have either been married before or divorced, or have any children, their nationality, occupations, and whether or not the bride wishes to use her husband's name or her own.

After filling out the answers the clerk pronounces them married and charges them the equivalent of \$1. Just as easily could they be divorced.

There is a physician connected with the bureau, and all applicants

SURVEY STARTED FOR BUILDING OF BASEBALL PARK

Preliminary work on the construction of a fence around the Midland baseball diamond and a club house was started today with a survey of the grounds and ordering of materials needed.

Material for the erection of the fence was not available when work was scheduled to start on the actual building this morning, officers being forced to wait until it can be delivered here.

Although some doubt remains as to whether a club house will be built or whether some building in town will be leased or bought and moved to the grounds, the club house is a certainty.

Joe Schultz, official of the Cardinal "farm" system, is expected to be here today to see Wray Query, Midland manager, and complete all arrangements in the new West Texas-New Mexico League.

TEXAS UNIVERSITY ANNUAL ROUND-UP OF EX-STUDENTS WILL BEGIN FRIDAY

AUSTIN, April 12.—Finishing touches were applied over the week end to Texas University's eighth annual Round-Up, three-day homecoming celebration beginning here Friday, when committee heads reported last minute revisions in the plans and outlined the complete reunion program. From now until Friday, when the curtain rings up on the Round-Up Parade, first fea-

ture of this year's program, campus organizations taking part in the mass presentation of the University in action, will taper off for their parts in the program.

From a spectator's angle—and Round-Up heads predict a larger registration this year than the 9,000 visitors in 1936—three main divisions of the celebration, the parade, the revue and ball, and the all-university pageant, will be of interest.

The parade, traditionally three miles of decorated floats, splined with bands and official cars for visiting dignitaries, will begin Friday afternoon at 4 o'clock. The revue and ball, which will present the Sweetheart of Texas—elected but unannounced as yet—along with visiting royalty from six Southwest Conference schools, will follow that night at 8:15 o'clock.

The all-university pageant, a cross-section of the university in action, employing a cast of nearly 1,000 university students, is scheduled to show Saturday night in Memorial Stadium at 8 o'clock. The hour-and-a-half show, completely

floodlighted by batteries of searchlights mounted around the concrete rim of the stadium, will be free to Round-Up visitors.

Registration for visitors on the campus will begin at 9 o'clock Friday morning in the Union Building on the campus, John McCurdy, secretary of the Ex-Students' Association here, said yesterday. Inspection tours over the campus will be held for ex-students, parents and visitors during the rest of the day.

At 11 o'clock and repeating again at 3 o'clock, the Frang Reaugh pictures, "Twenty-four Hours with the Herd," typical paintings of the old West will be shown in the Union Building to the public. Organization and class luncheons will follow for returning ex-students at noon Friday.

Scheduled for the next spot on Friday's program after the parade, is the annual Round-Up Revue and Ball, directed for the sixth consecutive time, this year, by Janet Collett, Broadway star, and featuring

the presentation to the state of the university's most beautiful girls.

In addition to the Sweetheart of Texas, yet to be announced from the university's five most popular coeds, Ida Mae Autrey of Port Arthur, Therese Dean of Beaumont, Brownie Green of Dallas, June Learned of Houston, and Pat Wassell of Corsicana, visiting sweethearts from six Southwest Conference schools will, together with 297 nominees for Bluebonnet Belle, official university beauties, complete the list of royalty.

The six girls representing their schools at the University Round-Up will be Marie Fearing of Camden, Ark., University of Arkansas; Garland Mae Chapman of Kerens, S. M. U.; Marguerite Rose of Odessa, T. C. U.; Rebekah Wilcox of McKinney, Baylor; Olive Horne of Houston, Rice; and Evelyn Norton of College Station, A. & M.

Registration, inspection tours and class reunions, Saturday morning to be followed at 11 o'clock with an official meeting of the Texas Ex Club officers and a luncheon for all members of the association and visitors.

At 3 o'clock Saturday afternoon, Uncle Billy Disch, longtime firey Longhorn baseball mentor, will trot his charges onto the diamond for a baseball game with A. & M. As yet the University's conference record is unblemished, having won four games and lost none. The Steer base ball nine has been bumped as yet only by major league competition, and has taken one from from the Tulsa Oilers, last year's Dixie Series winners.

A. & M., on the other hand, whom the Longhorns have nosed out of the pennant race for the last two years, promises to have one of the strongest clubs in the circuit. To date the Aggies have dropped only one game—that to Baylor.

Reunion features of the afternoon will be the official open house and banquet for all oldtime occupants of old B. Hall, last remaining landmark on the campus and once a boys' dormitory. The old building is scheduled soon to give way for modern construction, university officials say.

"Varsity on Parade", the all University night-time pageant, and a new feature on this year's program, will present a panoramic, flood-lighted view of University life, employing a cast of almost 1,000 students out of campus organizations, varsity and intramural athletics and physical training groups.

Its director, Col. George Hurt, director of the Longhorn band, promises a fast-moving show of fencers, boxers, weight-lifter, and wrestlers from the athletic department, a girls' sports revue, exhibitions by the varsity football and baseball squads. Swinging from the field of sports to art, choral groups from the University Light Opera Company, and both Men's and Women's Glee Clubs will sing. Skits will be presented by campus dramatic organizations, and a background of music will be furnished by the Longhorn band and local organizations. Finale of the show, Col. Hurt says, will be the formation of a large star by white-clad co-eds with torches who will sing the "Eyes of Texas."

Sunday, last day of the celebration, will be given over to class reunions and exhibits of various organizations placed on display over the campus.

High Death Toll Of Children is Cited

AUSTIN, April 12.—In Texas during 1936, 700 mothers lost their lives through childbirth and associated conditions. Fatality struck 8,000 babies under one year of age with 4,000 more stillborn. On a national basis the figures reached the tragic total of nearly 85,000. These facts become particularly distressing when it is realized that at least two-thirds of this motherhood penalty could have been avoided, states Dr. Geo. W. Cox, State Health Officer.

"Never before in the history of obstetrics have scientific precautions against complications been so advanced and so available as they are today. However, in spite of the improvement in the techniques involved and the further development an antiseptic control, the maternal mortality figures pathetically indicate the medical knowledge alone cannot solve the problem.

"Generally speaking, innocent or willful neglect is largely responsible for the preventable maternal deaths. It is to be emphasized that the proper time for expectant mothers to seek medical attention is when the expectancy is first realized.

"Indeed, prenatal care is the great defense against many of the conditions that cause tragedy at birth. Consequently, expectant mothers should place themselves under the supervision of a physician at the beginning of the term. If this fundamental safety rule would be adopted more generally, the present maternal mortality toll could be markedly diminished.

"As one authority aptly states, 'To cut the appalling maternity death rate, thoughtful and cooperative initiative must originate in the home!' In other words, science has done its parts, now the prospective mothers must do their."

Marines Active At Sea All During Day

Time has changed in the U. S. Marine Corps, but nowhere is the change more apparent than it is aboard ship, where the sea soldier must follow a very exacting routine from Reveille to Taps. Seagoing schedules are so arranged that they never become monotonous.

Nowadays the marines are an important unit of the ship's gunnery department. They are usually assigned to either the secondary or anti-aircraft batteries, and sometimes to both types. They take part in regular target practices, and handle their own guns with the same skill as that of the bluejackets who man the main batteries.

Marines are also trained and equipped to land, either on a hostile shore against opposition, or for the purpose of protecting American lives and property. As the military force of the Navy they are prepared to come ashore in small boats, manned by sailors. Both aboard ship or ashore, the life of a marine is one of constant preparation for some unforeseen emergency.

Time was when the sea soldiers were familiar with the use of pike or cutlass, or manned the fighting tops of our old sailing frigates. They even scrambled aloft to trim sails or were given other tasks ordinarily performed by seamen. In every age they have merited Kipling's name for them, "Soldier and sailor, too."

Hammocks are disappearing from our modern war craft, and most marines now sleep on sturdy folding cots. Each morning the cots are folded up and stowed away, as all space on ship is needed. The sea soldiers often come ashore, either to stretch their sea-legs, for drills, maneuvers, or for target practice on rifle ranges. Boxing, wrestling and rowing races are among their favorite sports, and they even play baseball or football when ashore in American ports.

Landlubbers are awkward aboard ship, so every marine is given training at a sea school on either the east or west coast before he goes to sea. He learns the drills, duties, customs and terms of the sea before he steps aboard a battleship or cruiser. When he goes to sea he is well prepared to adapt himself to his new environment.

UNITED KINGDOM

The United Kingdom furnished the greatest market for Canadian exports during last October, with the United States second and Australia, Belgium, and Italy following in respective order.

TEA VARIETIES

Pekoe is a grade of black tea, and not a particular kind of tea. Orange pekoe is a grade resulting from sifting the leaves through a sieve with a mesh of a specific size.

FOLDING FAN

The Portuguese introduced the folding fan into Europe from India and the Far East, during the sixteenth century. The fan rapidly spread throughout Europe.

To enable his army to cross the Tigris and Euphrates rivers, the emperor Julian had built a bridge of boats made of skins stretched tightly over osier frames.

The best speed of an average fox is estimated to be about 26 miles an hour—faster than a coyote, but slower than a jackrabbit.

of the Revolution noticeably in theme. All religious subjects were prohibited. The best literature which has come out of Soviet Russia deals with the Bolshevik civil-war, and the famine and suffering which followed it, as does also the finest motion pictures.

Painting and sculpture suffered less than the other arts. Paintings dealt with such subjects as machine shops, and men bent over their tools, or forges and molten metal; collective farms and men working them, etc. They made one feel the beauty in steel and iron, coal and lumber, and in men performing the tasks of industry.

The artists now are among the most prosperous people in Russia, and there is always a ready market and demand for everything produced.

Today, as is the old days of Russia, military service is compulsory and the soldiers must wear uniforms. There was no preliminary training for military schooling of soldiers in the old days as in these new days, that is soldiers from the peasants and common people. Formerly all officers and honors went to the upper class, but now the private gets the honors, he is the public hero. He is not even called a soldier, but "Red Army Man."

He is a person of worth, dignity and responsibility. He cannot be scolded nor shouted at by an officer. The officer must explain, persuade, help and encourage, but never insult, humiliate or frighten a soldier.

There are no titles, except "Commander." They eat together and after drill hours, play games together, football, chess, checkers, rehearse a play or just sit and talk together.

All of this has caused the old dread of military service to disappear, and in its place is an actual desire to serve the Red Army.

The Revolution looks on a criminal as an evil-doer by accident. They believe that if properly treated, taught to read and write, to work and to play, he will develop a social sense, and a revolutionary consciousness and thus become an asset to the New Society. And so they give him every chance.

Punishment, torture, humiliation, severity, have no place in the Soviet Prison system. They assume that it is not the criminal who is under obligation to society, but that society is under obligation to the criminal.

In Russia today, with its sex-equality, women hold as many and as high positions of authority in education, in industry and judicial institutions as do men. They are flooding the medical profession.

In summarizing this book "The Great Offensive we find that truly the Revolution has created new human beings, or at least human beings with a new form of behavior. A new conception of family-life and its obligations. A complete vanishing of religion, a vanishing of race consciousness. All have contributed to the general results.

The new Russian has lost all fear of sex, he has lost all fear of money, he has lost his old fears of the family, he has lost the old fear of insecurity.

Here he is, a robust personage, with an aim, and a mission, and a mentality all his own, a product of a new idea and a symbol of a new society.

# OF LOCAL INTEREST

J. B. (Rocky) Ford, trucking contractor, was removed to a Dallas hospital for treatment last night after being seriously ill here several days.

R. D. (Big) Lee, nightwatchman, underwent a major operation in a local hospital today. His condition was reported today as favorable.

Bill Bennett, employe of the Arrow Drilling Co. in the North Cowden pool of Ector county, is in a local hospital for treatment of a finger severely crushed while working Sunday night. Physicians said it might be necessary to amputate the finger.

James Kenny of the Fred Bennett ranch at Comstock spent the weekend in Midland on business and visiting his mother, Mrs. E. Kenny.

Mrs. Ruth Ramsell is visiting her daughter in Lampassas.

Mrs. George Bumpers spent the weekend in Wickett.

Mr. and Mrs. Walter Harwell of Monahans spent Sunday with Mr. and Mrs. J. C. Smith.

Mr. and Mrs. Norman Woody, Mrs. B. Kenny and son Jackie, Tom Grammer, Hugh Woody, J. Woody, Miss Gladys Williams, and Miss Stella Woody went to Stanton Sunday to attend a birthday dinner at the home of Mr. and Mrs. J. N. Woody, in honor of Mrs. S. N. Woody's 68th birthday.

Mrs. J. Howard Hodge spent Friday and Saturday in Sweetwater where she was a judge for the district 5 one-act play tournament. She returned to Midland Saturday night.

Jack Hawkins, who underwent an appendicitis operation at a local

# 56-YEAR-OLD FEE PAID TO WIDOW OF DOCTOR

GRIMSBY, Ont., Apr. 12 (U.P.)—Mrs. W. E. Millard, widow of Dr. Millard, who died in 1919 after practicing medicine here for many years, received a letter from an anonymous writer in which \$5 was enclosed. The letter read, in part, "Having seen your picture in the paper reminded me again of a small amount owing the doctor for over 50 years. I enclose \$5."

SAN DIEGO, Cal., Apr. 12 (U.P.)—Believed to be the first of its species ever hatched in an incubator, a 24-ounce emu was born at the San Diego zoo, Mrs. Belle Benchley, curator, announced. The baby was named Herman.

The male emu assumes complete charge of hatching and rearing its young, Mrs. Benchley said. The emu is a wingless species of the ostrich family, a native of Australia and next to the ostrich, the largest bird existing in the world.

A giant Sequoia tree yielded 3000 posts, 650,000 shingles, and 100 cords of firewood. The upper one-third and the branches of the huge tree were not used.

hospital last week, will be allowed to go to his home, 205 North H late this afternoon.

New rides, new shows, more fun, more amusement for everybody at Tidwell's Carnival. (Adv.)

# Book Review--

Continued From Page 3

toriums. These were really homes where these maladjusted women could live and be treated. Excellent physicians and trained nurses were employed. As health returns the women are given work to do, and are paid for it. If they have any special talent it is encouraged and developed. A woman may stay one year in the institution, and longer if the physician deems necessary. When she leaves the institute finds a position for her with good living quarters. There is no shame resting on her from her past and she is an equal of any.

The new man of Russia has lost all fear of parental authority, of family opinion and of family position. He accepts the biological and emotional functions of the family as natural and indispensable to human happiness. He welcomes love and children, but he feels none of the compulsions and fears of the old family life.

The youths of Russia today never think in terms of family tradition, family prestige or family glory. There is no such thing in their vocabulary as "an old family," or "an honored family." The State and the New

Society take the place of these. Many forces have come into play which have shattered the many bonds which held the old families together, religion has gone, private ownership of property has gone, marriage and divorce laws have been stabilized; 10 million children are now embraced in nurseries and pre-school institutions, and by the end of the 2nd 5-year Plan all children will be drawn into them; and women have been drawn into industry. And so family life in Russia has completely changed, and its like is to be found no where else among civilized nations.

So, too, have schools and education changed, gone are the old institutions with their uniforms, well dressed teachers, their dignity and formality.

Today the teachers may be university graduates, but the principles are chosen to be "the eye of the party," or its political supervisor. Some have been taken from work shops, and other ordinary business lives, and although they may speak ungrammatically, they are forced to train pupils.

There is free, universal, compulsory education for children from 8 to 17. All schools are co-educational. The great aim of the Revolution is that all illiteracy shall be wiped out.

All modern art in Russia, whether it was literature, the theatre, motion pictures, paintings or sculpture or music, changed with the coming

must be made available to an ever-widening circle of boys and leadership must be more than adequate.

# Different in Europe

For leaders, men of character and broad abilities are needed, declared Mr. Pote, and cited these qualifications: integrity, intelligence, and mental alertness, magnetism and personality, physical stamina, faith and loyalty, a sense of purpose and direction, love of people and a friendly attitude, decisiveness and technical skill and the spirit of a Crusader to build and serve.

The opportunities of serving youth that are the privilege of the Scout movement and the personal freedom enjoyed in the United States were contrasted sharply with the regimentation of youth and the denial of religious choice in some foreign countries. Mr. Pote emphasized that Scouting needs to search out youth's needs and said Cubbing, the junior boy program, illustrated how this is being done. He reported the case of an Eastern lad in whose home the moral standards did not conform to the Scout Code and how, through the influence of Scouting, a father's life had been changed and the proper relationship between him and his son had been restored.

# Midland Students Win Band Honors

Few honors were won by the Midland high band students at the annual Hardin-Simmons university band festival, but their soloists and duets all were winners of medals.

The Midland stage contest team won fifth prize with an average of 87 and in the marching contests the band won third with an average of 89.

John Pickering, with an average of 89 and mark of excellent, was a place winner, as was the saxophone duo of James Mims and Deane Anderson. They were classed as superior by virtue of their grade of 93.

Robert Dunningan won a medal for a trombone solo with a mark of 95, and Val Borum was a first place winner with a cornet solo. He was given a grade of 98, the highest recorded by any entrant at the meet.

# HONOLULU JURISDICTION EXTENDS FOR 900 MILES

HONOLULU, Apr. 12 (U.P.)—Geographically, at least, Honolulu is the largest city in the world.

When boundaries were set after the island became an American territory, it was specified that all islands of the group not included in any other county were to be under jurisdiction of and a part of Honolulu.

This ruling extended the city limits to Palmyra Island, 900 miles south, and to Ocean or Kure Island, approximately 1700 miles to the northwest.

# BUFFALO BILL U. S. NATIVE, SAYS HARVARD PROFESSOR

CAMBRIDGE, Mass., Apr. 12 (U.P.)—Buffalo Bill was not born in Italy. Prof. James Phinney Baxter of Harvard is the authority for the statement and he is backed up by the American Dictionary of Biography.

His statement refutes the claim of a newspaper published in Bologna, Italy, which offers "proof" that William F. "Buffalo Bill" Cody's real name was Giovanni Tambini and was born at Barbigarezzo in 1840.

A piece of wood believed to be 20 million years old was unearthed near Ellensburg, Wash., in 1931, and it was not petrified.

in, co-director. The stage is 300 feet long and 164 feet deep.

W. O. Brickey is supervisor of construction of the stage. Tol Ware is narrator for the show; Vincent Avery is coordinator.
