

Senate Sub-Comm. Approves Black

Heavy Crowd Expected At Polo Games

Midland Club Said Ready for Wichita Falls '4' Saturday

With approximately one-third of the 1,500 tickets for the first polo game here tomorrow between Wichita Falls and the Midland team already sold, officials today were optimistic over chances of a complete sell out by the time the game gets underway.

Selling for only 40 cents, the tickets have been sold rapidly since the sale was started yesterday afternoon.

The game is to start at 5:30 p. m. at the new field just east of the Midland Fair rodeo arena, and one of the prize games of the year in Texas is looked forward to. The invaders will be favored over the new local club, due to their having played together as a club over a long period, but officials of the local club are confident they will prove more than a little bit tough for the visitors to take into camp.

Jay Floyd, captain of the Midland team and the only local man that will appear in the role of a player, said today that his club was in tip top shape, that the horses were in the best of condition and that only the breaks would decide the games, if concerted effort was to mean anything.

Members of the Midland team, Floyd, Gus White of Lamesa, Gene Linticum of Barnhart and A. C. Woodward of Lubbock, have appeared on several teams together, also have played opposite each other on different occasions and are confident of their ability to defeat the hard riding, high scoring Wichita Falls quartet.

Franklin Cowden, local youth who was earlier counted on as a member of the Midland team, will be unable to appear in the matches here and his position will be filled by White. White had earlier been listed as an alternate.

The teams will meet again Sunday at the same time.

The starting line-ups will probably be as follows:

Midland	Wichita Falls
Woodward	1 Fain
Linticum	2 Robbins
Floyd	3 Weeks
White	4 Featherstone

Senate Group Says President Willing For Cotton Loans

WASHINGTON, Aug. 13. (P) — A senate delegation reported after a conference with President Roosevelt today that he had agreed immediate loans would be made to farmers who have pledged to comply with the surplus control program to be enacted next session.

Senator Bilbo, Mississippi, said the loan amounts had not yet been determined, but he believed it would be ten cents on cotton and a government grant subsidy of two cents, in effect, pegging the price to 12 cents per pound.

He said he believed growers of wheat, corn and hogs would be given the same consideration as cotton farmers.

Iraq 'Strong Man' And Aide Slain by Baghdad Soldier

BAGHDAD, Iraq, Aug. 13. (P) — Iraq Thursday gave a state funeral to Major General Bekr, Sidki Pasha, minister of all defense and Colonel Mohammed Ali Jawad, chief of the Iraq air force, assassinated Wednesday at Mosul.

General Sidki had been the strong man of the kingdom, considered the power behind the throne of King Ghazi, since last October when he led a military coup d'etat which placed a new government in office.

An official announcement said the two officers were shot by a soldier as they were resting at sunset on the lawn of the airbase at Mosul northwest of here.

Authorities tried to discover the assassin's motive, but what they learned was not disclosed.

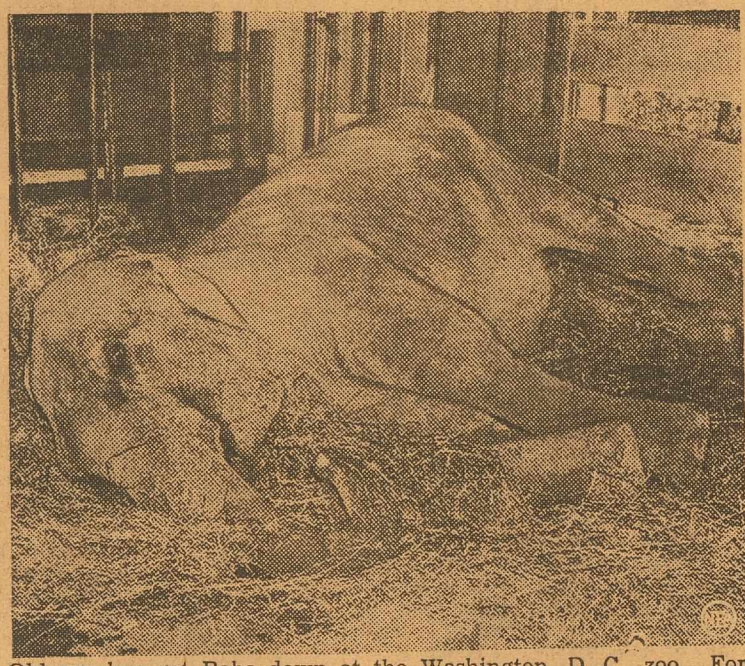

General Sidki was known for his efficiency in suppressing tribal uprisings and other threats to the regime. Four revolts had been put down in recent months.

Yez, or Mesopotamia, formerly part of the Turkish empire, became an independent state as an aftermath of the world war.

No Relief Sighted From Hot Weather

DALLAS, Aug. 13. (P) — Despite scattered showers in Texas last night and today, and a forecast of partly cloudy, Dr. J. L. Cline, government weather man, said there was no relief sighted from the 100-degree temperatures general over the state.

Too Old To Get Up

Old age has got Babe down at the Washington, D. C., zoo. For nine years the 80-year-old elephant, a one-time circus performer, stayed on her feet, apparently afraid she'd never be able to rise if once she lay down. She tripped on a door sill in the elephant house, sagged to the floor, and hasn't been able to raise her 8500 pounds again. Babe, favorite of thousands of tourists and circus fans, is expected to die.

Texas Ranges Hold Up Well Despite Extremely Hot And Dry July Weather

July has been extremely dry and hot in Texas, but ranges, generally, have held up well, according to the monthly livestock and range report of the Bureau of Agricultural Economics issued through the office of V. C. Childs, senior agricultural statistician. Rainfall has been limited to typical summer showers, but while these showers were local, they were heavy in some areas and furnished moisture in excess of normal in those areas. In the extreme south district the drought situation is becoming critical, and the northern half of the Panhandle is getting very dry. Subsoil moisture is adequate in most other districts, and feed crops have not suffered as much as would be indicated by the deficiency in precipitation during the month.

The condition of cattle ranges is now reported at 76 per cent of normal, compared with 77 per cent a month ago, 85 per cent a year ago, and 79 per cent the 10-year average August 1 condition. The average decline in range condition from July 1 to August 1 is 3 points. This year the decline was only 1 point.

Sheep and goat ranges, notwithstanding the dry, hot weather during July, are holding up well through the sheep and goat area, and the August 1 condition at 79 per cent of normal compares with 79 per cent a month ago, 88 per cent a year ago, and 82 per cent the 10-year average August 1 condition. Subsoil moisture is adequate in most of the district, but the top soil is getting very dry.

Cattle marketings have continued heavy during July, and marketings to July 1 amounted to 1,213,000 head of cattle and calves, compared with 880,000 head during the same period last year. The condition of cattle is generally good, and they have made good gains during July in most districts. A condition of 81 per cent of normal on August 1 is the same as was reported on July 1, and compares with 88 per cent a year ago and 83 per cent the 10-year average August 1 condition. The condition of sheep at 84 per cent on August 1 is 3 points. This year the decline was only 1 point.

Farmer's slayer identified by son. AUSTIN, Aug. 13. (P) — Norman Payton last night identified a desperado who wounded him and his mother and killed his father as Lawrence Rea, South Texas "bad man" wanted for the recent Houston shipside payroll holdup.

Young Payton, shot in the thigh, looked at a police picture of Rea and said he was the man who slew B. N. Payton, Govalle community truck farmer, when the latter tried to prevent the theft of his automobile. The farmer's wife was wounded in the stomach as she ran to her family's aid.

In a car left at an Austin residence where officers surprised the suspect, was found a long-clip rifle, an automatic pistol and some money in bags of the First National bank of San Antonio.

Payton grappled with the man and his sons, aroused by the noise, ran to his aid. A bullet killed the former and another wounded Norman Payton, 23, in the thigh. Mrs. Payton was seriously wounded in the stomach as she ran to aid her family.

A younger son, Leon Payton, 16, was forced to obtain the automobile keys, drive a block from the Payton home, and then kicked from the car.

Officers found the vehicle, a mass of wreckage, on the Walnut creek bridge, about six miles east of Austin. It was bloodstained and they surmised the fleeing man had been injured and probably had not traveled much farther.

AT THE AIRPORT. Bum Cowden flew in his Fairchild plane to Abilene on business today. Plans landing at Sloan Field were a P-26 flown by Lieut. F. R. Dent, en route to El Paso from Randolph Field; J-F1, piloted by A. B. Thompson, from Barksdale Field to Tucson; an A-17 with Major Perry as pilot, en route to Tucson, Ariz., from Barksdale Field; and a civilian Fairchild plane piloted by Huntington, en route to California from El Paso.

WILLIAMSON BUYS CATTLE. It was announced today that Frank Williamson had leased Walter Cowden's 16 section ranch, 10 miles south of Odessa, and has bought his cattle.

Chinese And Japs Battle At Shanghai

Scores of Buildings Fired as Warfare Rages Unimpeded

SHANGHAI, Aug. 13. (P) — Japanese naval guns and Chinese and Japanese land batteries hurled hundreds of shells to open Shanghai warfare tonight, setting fire to scores of buildings on the northern fringe of the city. A strong wind threatened a holocaust like that of 1932.

The United States Asiatic squadron steamed in to protect 4,000 Americans in the Shanghai area, and Britain rushed additional troops from Hong Kong to supplement their regular garrison.

It was estimated 7,000 Japanese bluejackets and thousands of Chinese regular army troops skirmished in Chinese areas north of Shanghai in the international zone. The troops were entrenched and skirmishing started early today after a peace conference failed.

The Japanese government, following a special meeting of the cabinet, was understood to be rushing further naval, military and air reinforcements to Shanghai.

Markers Placed On Garden City Road

The erection of signs directing the way to Midland at all confusing intersections on the Garden City Midland road was announced by the Midland chamber of commerce yesterday, the signs eliminating the tourist hazard of making the wrong turn and getting lost on the road. The sign work and erection was done by the Kyle Sign Co.

Traces of Poison Found in Body Of Cincinnati Man

CINCINNATI, Aug. 13. (P) — A city chemist today reported to prosecutor D. M. Outcalt the discovery of "positive traces of metallic poison" in the body of George Sellman, 67, elderly acquaintance of Mrs. Anna Hahn, 31.

Police were investigating the mysterious deaths of five, with whom it was said Mrs. Hahn had been friendly.

Reward Offered for Conviction of Tar And Feather Gang

NEW YORK, Aug. 13. (P) — The American Civil Liberties union announced today a \$1,000 reward for information leading to the arrest and final conviction of persons participating in violence in Dallas, Texas, August 9, when a socialist was tarred and feathered and two labor leaders hurt.

FSLA Pays Heavy Dividends in U. S.

WASHINGTON, D. C., Aug. 13. — Dividends of more than \$15,055,000 have been paid to savers and investors by Federal Savings and Loan Associations for the first half of 1937, according to a preliminary report made public today. The rate averaged about 3.7 per cent annually.

These earnings went to some 769,000 individuals whose savings are in the custody of these federally supervised mutual thrift and home-finance associations, located in practically all states of the union. The Federal Government, as an investor in many of these institutions, shared in the dividend distribution.

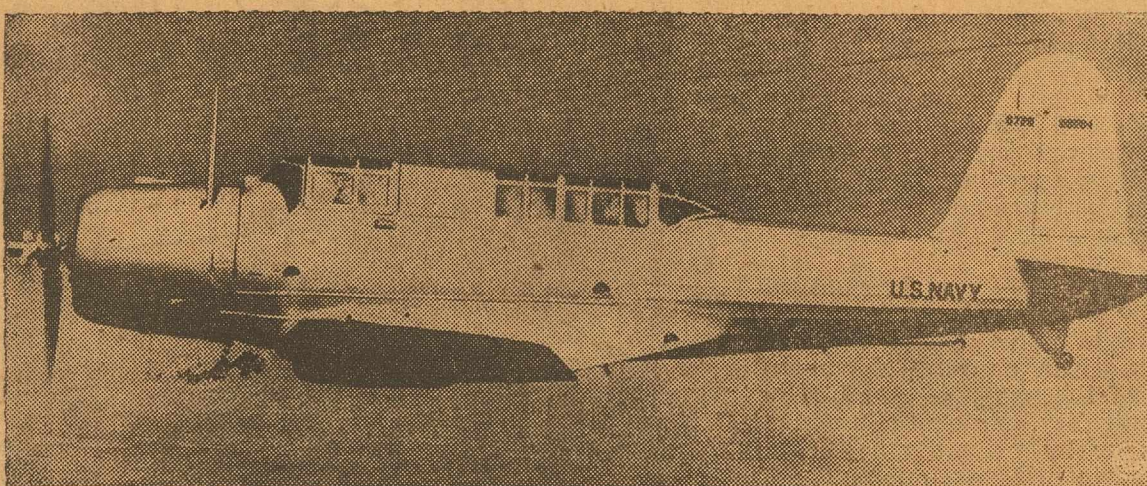

During June, nearly 11,000 new savings accounts were opened in these institutions. These, together with regular periodic investments by other savers, brought approximately \$12,000,000 in new funds into the Federal associations during the month.

"The accelerated flow of money to Federal associations in many cases has represented a re-investment of mid-year dividends of corporations to their stockholders," commented Preston Delano, Governor of the Federal Home Loan Bank System, the supervising body for these associations. "The safety feature provided by insurance of investors' accounts up to \$5,000 each is contributing greatly to the mounting popularity of these institutions."

In many states, accounts in Federal Savings and Loan Associations are legal investments for the funds of trustees, executors, savings banks and insurance companies, Mr. Delano said.

There were 1,293 Federal associations, with combined assets estimated at \$1,002,000,000, in operation on July 31.

54 Recruits Like This for Navy Air Fleet

Faster scouting and better bombing—that's the aim of the U. S. Navy air service. And here's the latest sample of stream-lined flying death, the first of 54 scout bombers, just after she was delivered to the navy's hands at the Anacostia base. She carries a 1000-pound bomb and has a performance capacity higher than any existing service types, according to aeronautics engineers.

Representative of Washington Efforts to Keep Cool

The Washington, D. C., weather hardly suits anyone in summer—except electric fan and air conditioning salesmen—so Congressmen's wives just suit themselves to the weather while their husbands sweater in Capitol Hill to wind up the legislative program. Bathing suits and long, cool drinks on the shady porch of the Shoreham Cabana Club enable Mrs. John J. Dempsey, left, New Mexico; Mrs. D. Clark of Idaho, and Mrs. Harry B. Coffey, right, Nebraska, to keep cool.

Conoco 1 McCarty Moore Flows 111 Barrels Last Hour of Test

By FRANK GARDNER.

Flowing 111 barrels of oil per hour with 6,310,000 cubic feet of gas the last hour of 4-hour test before re-treating with 4,000 gallons, Continental Oil Company No. 1 W. McCarty Moore today definitely placed the Wesson pool of northwestern Gaines among the more important production sources of the West Texas region. The well made its large flow following acidization with 3,000 gallons at total depth of 4,985. Before first acid, it had made 10 barrels in 15 minutes through open tubing and casing. While cleaning out after acid job, it flowed 124 barrels through tubing the first four hours, then, when opened wide through both tubing and casing, flowed 169 barrels of oil in one hour, with around five million cubic feet of gas. Main pay in the Conoco well was found from 4,971-95. It is located 440 feet from the south and west lines of section 46, block AX, public school land, a mile northeast of Carter-Conoco No. 1 A. L. Wesson, the discovery well, which flowed 333 a day, natural, upon completion at 4,959.

A. G. Carter No. 2 J. R. Sharpe, one mile due south of the Big Continental producer, flowed 272 barrels of oil in 12 hours after recovering oil load used in first acid treatment with 1,000 gallons. It was re-treated with 2,000 gallons and is now cleaning out acid and load. Bottomed at 5,000 feet, it is located 440 feet out of the southwest corner of section 47, block AX, public school land.

Swabbing 40.5 barrels of fluid, 39 per cent water, the last 10 hours, Amerada Petroleum Corporation No. 1 Florence Matthews indicated that packer set at 4,930 was not holding, and operators will pull tubing and re-run with packer at around 5,000. The well is bottomed at 5,018 feet in lime and has been treated with 1,000 gallons. It is in the northeast corner of section 417, block G. C. S. D. & R. G. N. G. survey.

Harper Extension. A. G. Carter No. 1 J. E. Parker, indicated two-mile northwest extension to the Harper pool in Ector, was estimated good for 150 barrels a day natural as it headed off while drilling this morning at 4,140 feet in lime. The last three heads, estimated at 15 to 25 barrels each, came at 6:50 o'clock last night, at midnight, and at four this morning. Pay in the well was topped at 4,080 feet. Gas volume is estimated at one-half million feet. It is located 330 feet from the south and 2,310 feet from the east line of section 15, block 44, township 2 south, T. &

L. H. Wentz No. 1 Paul Moss, a mile and a half southwest of the Parker strike, halted drilling at 3,768 feet in lime and anhydrite and is running 7-inch casing. Location is 1,300 feet from the north and east line of section 28, block 44, township 2 south.

Hargrave & Peters No. 1 Jerold Riordan, wildcat over a mile southeast of the town of Andrews, was measured up this morning at 5,013 feet, 13 feet past contract, and will be plugged and abandoned. It failed to encounter any shows. Location is 1,980 feet from the north and 660 feet from the west line of section 10, block A-44, public school land, about seven miles south of the Means pool.

Another apparent failure in Andrews is the Blanchard & Porter No. 1 Cox, in section 4, block A-30, public school land, northwest part of the county. It was shut down at 4,710, making a baller and a half of salty sulphur water hourly, topped at 4,670.

M. J. Delaney Co. No. 1 H. A. Moore, northwest, outpost to the Means pool in Andrews, is fishing for baller and will be shot following its recovery. It had balled two barrels hourly, 20 per cent oil and the rest drilling water.

Appointment Said Legal By The President

Open Opposition to Senator Voiced by Two Solons Today

WASHINGTON, Aug. 13. (P) — The senate judiciary sub-committee swiftly approved today the nomination of Senator Black, Alabama, to the supreme court, acting only a few minutes after President Roosevelt had told a press conference that Attorney General Cummings had informed him the nomination was legal and constitutional.

The sub-committee voted after rejecting a move by Senator Austin, Vermont republican, to hold up action pending a study of the legal questions involved.

Chairman of the group, Senator Neely of West Virginia, immediately tried to arrange a meeting of the full committee either this afternoon or tomorrow to act on Black's nomination. Neely held that it was not the duty of the committee to "construe the constitution" but to pass on the qualifications of Black.

Immediately after the committee acted, two senators, Burke of Nebraska and White of Maine, came out as open opponents of confirmation of Black's appointment.

Employees Are Listed Inaccurately, Shown In Reports of TUCC

AUSTIN, Aug. 13. — Figures made public today by Orville S. Carpenter, chairman-director of the Texas Unemployment Compensation Commission, showed sixty thousand Texas employees inaccurately listed or not listed at all with the Commission.

These employees, representing ten per cent of the covered workers in the state, will receive no credit on the records of the Commission, for work performed in the last three months, or for any work until they have a correctly set-up account.

Chairman Carpenter pointed out that the Social Security Account Number is the basis of the record of an employee and thus the basis of his claim for benefits during periods of unemployment. If this number is not submitted, or is given inaccurately, it is impossible for the employee to receive proper credit for each quarter's work. At the least, this will result in delayed payments; at the most, none or reduced payments.

Carpenter further stated that the 13.74 for benefit paymaster's was rapidly increasing. Contributions received in the week ending August 7 brought the total fund to \$13,110,182.56, indicating that the Commission's estimate of a \$20,000,000 fund by 1938 would be reached.

In accurately reported Social Security Account Numbers can be definitely determined since the number is so arranged that the first three numerals symbolize area, the second two, sub-area, and the remaining four, the sequence number of the worker. Only certain numbers are used for area and sub-area, and some are not assigned, so if an error occurs, personnel of the Unemployment Commission soon discover it.

Employees without numbers are urged to obtain them at once from the district Social Security headquarters which are located in Austin, Dallas, Fort Worth, Houston, San Antonio, El Paso, and Beaumont. Numbers are also available at all post-offices except the main post-offices in the above mentioned cities.

Trans-Polar Plane Bucking Headwinds On Flight to U. S.

SEATTLE, Aug. 13. (P) — The army signal corps reported at 9:39 this morning, 10:39 Central Standard Time, that the Russian trans-polar plane carrying six to the United States was bucking terrific headwinds and could not reach Fairbanks, Alaska, a refueling point, earlier than 4 p. m. 6 p. m. Central Standard Time.

ATTENDS EXPOSITION. Mrs. Lura Hollingsworth, county home demonstration agent, will attend the Pan-American Exposition in Dallas and the Frontier Fiesta in Fort Worth, and visit other Texas points on her vacation.

LEAVE FOR EL PASO. Mr. and Mrs. Bates Hoffer and daughter, Janette, left yesterday for El Paso.

Football Drinking Banned. COLUMBIA, Mo. (U.P.) — Drinking at University of Missouri football games has been banned by the committee on intercollegiate athletics. Special police will attempt to enforce the order.

Bullet Is Personal Souvenir.

ROUNDUP, Mont. (U.P.) — A Minnesota tourist, who refused to divulge his name, returned to his home town with a souvenir of the Old West. The Easterner was struck in the back by a .22-caliber rifle bullet during the recent 49'er celebration here. The missile penetrated his clothing and lightly scratched his back.

Plane Spots Fish.

NORTH BEND, Ore. (U.P.) — Modern warfare methods have moved into the pilchard fishing industry. Fishermen, weary of wandering aimlessly with their nets, have hired Charles Ganier to spot the fish from the air in an amphibian plane. He marks the runs of fish with smoke bombs. Pilchards are a fish similar to sardines.

VOTERS WILL CAST BALLOTS ON SIX CONSTITUTIONAL AMENDMENTS AUG. 23

Editor's Note: This is the first story of a series of three explaining proposed amendments to the state constitution to be voted on Aug. 23.

AUSTIN, Aug. 13. — The people of Texas will vote Aug. 23 on six proposals to amend the state constitution.

Two would authorize financial assistance to adult needy blind and to destitute children and thereby enable Texas to participate in another phase of the federal Social Security program. The others would eliminate double liability for stockholders in state banks, give the legislature power to prescribe a new system of re-

munerating district, county and precinct officials, permit a discount method of paying taxes and allow Harris county to levy a tax for a master road plan.

A peculiarity is that the election will be on Monday instead of Saturday as usually is the case in Texas.

The proposed amendment to aid the blind would authorize the legislature to provide for payment of not more than \$15 a month to needy blind persons more than 21 years old, with some exceptions. Because the federal government will match the state money, an individual might receive a maximum of \$30. Habitual criminals, habitual drunkards and persons who are

ALONG THE HARD ROAD TOWARD NEUTRALITY

As the Chinese-Japanese conflict dangerously approaches actual large-scale warfare, it is none too soon to begin thinking about neutrality. Already factors are beginning to pile up, before there is any formal war, which will make the neutral course hard.

In London, a vast \$100,000,000 loan is already being negotiated for China. The Morgans are believed to be interested, and part of the loan may be raised in the United States from individual subscribers. Every such subscriber immediately acquires a stake in Chinese victory, and will find it hard to be neutral.

The danger to Americans now in China has not yet been averted. A statement by one missionary organization that Japanese victory would nullify the effort and money spent in China by American churches for many years, is already an example of the pressure that will be brought against complete neutrality. Enterprises undertaken by private individuals or by private associations in China must not be permitted to influence our policy as a nation.

Word comes from the west coast that American flyers are being recruited to fly for China, and American planes are being sold to the Chinese. American individuals leaving the United States to fight for China or any other foreign power forfeit any protection they might expect from this country. We can not prevent free American individuals from doing anything they like, but we can make it clear that, once enlisted in a foreign cause, they forfeit American protection.

The constant pressure on the American State Department to change its policy toward Spain is a good example of pressure that will multiply a hundred times over if there is a war in the far east. Radicals continue to insist that the U. S. policy of refusing to ship arms to either side in Spain is all wrong. Because Portugal, Italy, and Germany are shipping arms to Franco, and only Russia is shipping them to the legal Valencia government, radicals argue that the U. S. ought to even things up by shipping arms to Valencia.

That, of course, is not neutrality. Neutrality means not getting into a war, and treating equally those who are in it. If the contestants are unequally matched, or find themselves in a spot where equal treatment helps one, hinders another, that is their hard luck, and they ought to think about that before going into the war.

The conception of neutrality that argues that we are somehow bound to see that contestants are evenly matched and to back the weaker, is hard to understand.

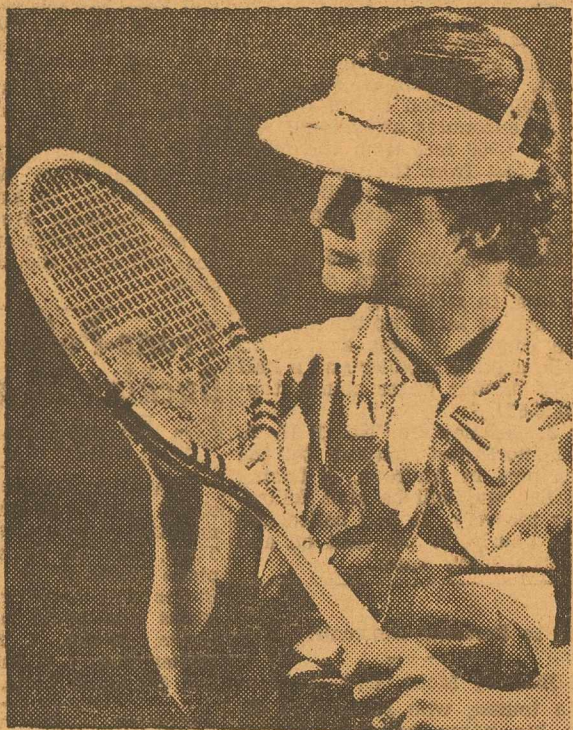

Should China and Japan fight, it seems likely that American neutrality would be harder on China than Japan, which has control of the seas, money, and armament.

Quite regardless of any sympathy, one may have for China, neutrality means equal treatment for both, even if China gets the short end. Any other kind of neutrality, which would change policy with the wind to see that the odds were somehow evened, is not neutrality.

MIDLAND STEAM LAUNDRY
PHONE 90

Trying To Organize A Farmer-Labor Party

Senator Harry F. Byrd, persistent critic of the New Deal and heretofore undisputed political boss of Virginia, had just suffered a crushing defeat in the nomination for governorship of Lieut. Gov. James H. Price by a vote of 8 to 1. (Democratic nomination in Virginia means election.)

Byrd's First Defeat

PRICE entered the contest as an avowed anti-Byrd machine candidate, and Byrd scoured the state for a man strong enough to oppose him. Price also publicly endorsed Roosevelt and his record, as did most other Virginia candidates. There is no question that Byrd hated to see Price win and that Price is a somewhat more liberal, definitely more pro-Roosevelt man than Byrd.

But the picture is more complicated than that. Byrd never could find a man, although he tried for several, whose candidacy he could get off the ground. Many voters who ordinarily would have voted with Byrd's machine voted for Price because his opponent, State Senator Vivian Page of Norfolk, obviously couldn't win or because there was no Byrd-endorsed candidate. Voters who always want to be with the winner piled on the Price bandwagon.

Byrd himself kept quiet after he realized that Price's election was a certainty. Presumably he will in any event have to share power with Price if he is to preserve any power at all.

But Byrd is now expected to approach Price and urge an alliance which will still leave the senator a political dictator in Virginia. The definitely anti-Byrd and pro-New Deal forces, which furnished the big push in Price's campaign, are not any too certain that Price will not make a deal with Byrd. The test will come when Price takes office. Meanwhile, however, it can be reported that Harry Byrd and his machine have been beaten for the first time.

Reed Still Best Bet.

SOLICITOR GENERAL STANLEY REED is still the best bet as the next presidential appointee to the Supreme Court. Reed comes from Kentucky.

But Roosevelt may decide to play politics with the appointment and tie-hed-oes he will not appoint Reed. If he decides he wants to make a bow to his Senate enemies he will pick Circuit Judge Sam Brantton of Albuquerque, a former senator with liberal leanings.

Donald Richberg, who still remains in the White House inner circle advisers, is by no means an impossibility. This correspondent's judgement is that he has about the best chance next to Reed.

Your correspondent, who last Feb. named Judge Joseph C. Hutcheson, Jr., of Houston, Tex., as one of the six men Roosevelt would name to the court if he had the opportunity, has some new impressive dope to the effect that Hutcheson hasn't a chance now. When Senator Tom Connally of Texas publicly urged Hutcheson upon Roosevelt, he just about cooked Hutcheson's goose. Connally helped conspicuously to defeat Roosevelt in the court fight.

Many Claims Urged.

ALL sorts of candidates, many of them preposterous, are being urged on Roosevelt—some by men who may or may not know how bitterly Roosevelt hates them. A correspondent in Georgia writes that all of Senator Walter F. George's friends are advocating Judge Gordon W. Chamber of the City Court of Richmond county, a resident of Augusta, as the best man to succeed Justice Van Devanter. Judge Chambers is said to be well pleased with the idea.

Thus far the chief reason behind the movement for Judge Chambers is said to be the fact that if he doesn't get the appointment he will run for the Senate against George, an anti-New Dealer, next year. Chambers won't be appointed.

If he lived on the moon, a baseball pitcher could throw no curves. There would be no air resistance to give a break to the ball.

Vitamin D, necessary in the diet to prevent tooth decay, is contained in spinach, cabbage, eggs, milk and cod liver oil.

Letters To Editor

Dear Sir:—
What do we old timers and many of our young people know about the Biological Survey? Wrong is wrong and right is right!
No, man, what is our legislature and game commission for if not to protect the people? I will go a little farther on the game laws—when we have a rain between Aug. 1 and Sept. 15, and it fills up all our lakes, five days after there are thousands of ducks here. We feed them and furnish them water, but we can only sit by and look at them.
Why, Mr. Biological Survey, says we can't shoot them until November 16. They are all gone then down to our noble citizens of central and south Texas to shoot and eat.
Now, Mr. Biological Survey, kindly read my article in the Midland Reporter-Telegram of August 12, and answer it.
Yours very truly,
J. Arthur Johnson.

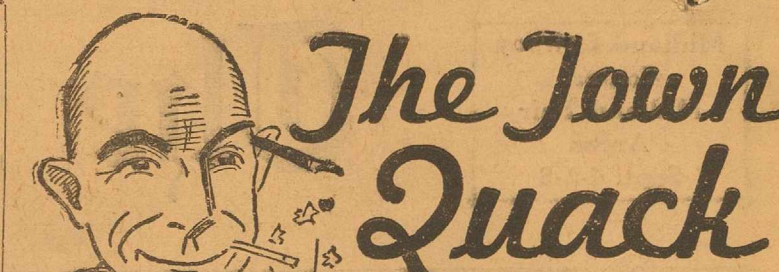

Zoology Professor Authors Lecture

AUSTIN—Dr. T. S. Painter, professor of zoology at the University of Texas, has prepared for publication a resume of a lecture he gave last year as one of five eminent scientists selected by Sigma Xi to speak before local chapters of the scientific organization on "The Frontiers of Science." Dr. Painter's lecture was on the subject of his research in genetics and was entitled "Recent Developments in Our Knowledge of Chromosome Structure and Their Bearing on Genetics." The lectures are to be published by Sigma Xi, probably in book form.

Ship Ducks Christening.

NAGASAKI, Japan (AP)—Officials of the Osaka Shosen Kaisha, attired in morning coats and silk hats, arrived here for the launching of the 7,000-ton Yalu River Maru only to find that props had given way during the night and the ship was already riding on the waters of Nagasaki Bay. The unofficial launching had been successful, so the officials went through their dedication formalities anyway.

Since there is no atmosphere on the moon, there would be no friction such as is set up when a ball is thrown through air.

The Town Quack

(Reserves the right to "quack" about everything without taking a stand on anything).

I wish I had one of "Doc" Thomas' joke books. I don't seem able to think of any I have heard recently.

If you don't think Midland is "booming" just go in any cafe here at noon time. You are darn lucky to get a seat in any of them.

Wonder if it will take as long to seat a supreme court justice as it does the court to act on anything.

I'll bet there are not three people in town who can tell what the six constitutional amendments to be voted on Aug. 23 are.

One reason why there are so many simple-minded and useless laws passed at each session of the legislature is because the voting public does not take any interest in what is done.

Electricity Protects His Food Throughout The Entire Year

Day in and day out, electricity is always on the job to keep food fresh and wholesome for growing youngsters. Robust health depends upon fresh foods, and perishable foods today are kept fresh by adequate refrigeration from the time they are produced until they reach the home of the consumer.

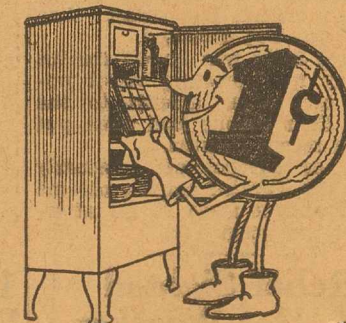

Electricity brings to your home the same, safe food protection that is used in packing plants, dairies, markets and other places where perishable foods are prepared and sold. Electric refrigeration in your home is final assurance that the food you buy will stay fresh until it is used.

Safeguard the food your family eats with electric refrigeration and you can be sure that hungry boys and girls, and grown-ups too, will have wholesome, palatable meals, free from bacterial accumulations that are caused by poor refrigeration.

Ask your electric refrigerator dealer to show you the new models which are easy to buy and cost only a few pennies a day to operate.

Penny Wise Says:

"Your grocer and your butcher know the value of proper refrigeration, for their reputations depend on selling fresh foods. But refrigeration is more important to you, for your health depends upon eating fresh foods. Use electric refrigeration and be sure."

"Feminine" Girl Scouts of Future Will Camp on Trail of Beauty

Set China and Japan Good Example

Their countries are fighting it out around Peiping, but Chang Hsueh Min, left, Chinese Girl Guide, and Ruth Sumi Sakurai, secretary of the Japanese Girl Guide Association, appeared the best of friends on arrival in New York from the Orient to attend the world convention of Girl Scouts at Briarcliff Manor, N. Y.

By MARIAN YOUNG

NEA Service Staff Correspondent.

BRIARCLIFF MANOR, N. Y., Aug. 13.—Beauty and charm and fashion will vie with sewing and cooking and handicrafts for the attention of the Girl Scout of the future.

Eye-lash curlers, manicure scissors, emery boards and nail varnish may find a place in the kits that once held only pots and pans, needles and thread, embroidery hoops and camping paraphernalia.

For Miss Girl Scout of 1937 is to be taught to be feminine.

Informal discussions at the International Encampment of Girl Scouts here at Camp Andree, where 75 American Scouts and their guests from 26 foreign countries are gathered together for a "three-week house party," will enter these new fields of personality and poise for the first time in Girl Scout history, it has been announced.

Although the majority of the members (membership now is a million and a half) are under 14, many are between the ages of 14 and 19. For these especially, the leaders of the organization are encouraging individual troops to engage lecturers to speak on subjects pertaining to social matters

—poise, beauty, fashion, manners.

Take Up Boy Problem, Too.

How to get along with boys is another new theme under the heading of Girl Scout and Boy Scout activities. Each unit now is encouraged to invite boys to their parties, to know the importance of young men in a growing girl's social scheme of things.

Classes in the art of makeup, how to dress attractively on your budget, how to be interesting to others—these will supplement traditional Girl Scout learning of matters pertaining to homemaking and handicraft arts.

The American Scouts arrived at Camp Andree a week before their foreign visitors and put in a busy time ordering supplies, making beds and thinking up various ways to entertain amusingly. Each girl from other countries became a guest from the moment she left her own doorstep in her homeland. In other words, all her expenses to the Encampment are paid by the United States national chapter. After two weeks here, on the lovely campsite provided by former Senator and Mrs. William A. Clark of Montana, in memory of their daughter, Andree, all of the girls will go to Plymouth, Mass., for another week of fun and play.

The practical aspects of camp housekeeping will not be neglected in the glamor program that has been arranged for the discussions at Camp Andree. The task of supervising the comfort and activities of girls from all over the world falls on the shoulders of Mrs. Arthur W. Hart, left below, of Brookline, Mass., chairman of the Silver Jubilee Camp Projects Committee of the Girl Scouts.

Dictator Lands Not Represented.

Germany, Italy and Russia—nations which prefer to train their own youth along strictly nationalistic lines—are conspicuous by their lack of representation at the Encampment here. But from such far away places as China, Japan, England, Australia, Iceland, Greece and Brazil, gay young ambassadors of good will have travelled to this "house party" which is part of this year's Silver Jubilee celebration of Girl Scouts the world over. While young women of fascist

and communist lands parade in youth movements and learn to shoulder arms in the best military manner, the leaders of Girl Scouts here feel that the guests from foreign shores and their young American hostesses will accomplish as much in the name of peace. Cooking, hiking, swimming and singing around campfires together will, they think and hope, establish a step or two toward the kind of friendly understanding which eschews war.

Dramatize Spirit In Pageant.

The visiting Girl Guides and Girl Scouts are not segregated in national units. Divided into small groups, each of which is made up of American girls who speak several languages and five or six foreign guests, the groups are allowed to plan their own activities and to discuss world problems informally and easily.

The good-will spirit of the camp is dramatized by the opening-day pageant, "Hands Across the World." Toward the end of the evening, after singing and storytelling, each foreign guest, in native costume, places a fagot on the giant bonfire and at the same time states the outstanding program or idea her country has contributed to world culture.

Shirley Ruth Jolly Is Honoree At Farewell Party

Friends Entertain For Classmate

A lovely party was given recently at the Guffey home, 723 W. La., when Frances Guffey and Jacqueline Campbell entertained a large group of girls honoring Shirley Ruth Jolly who is moving to Abilene with her parents.

Shirley Ruth is a popular young musician of Midland and her leaving is severing the association of these girl chums who have been classmates since their early junior high school days and on into their sophomore year in high school.

The unique feature of the party was that time turned backward in its flight a very few years and the young guests came dressed as tiny lads of yesteryears.

After the games of which Lucille McHargue was the winner, a shower of gifts for the honoree was presented in a doll buggy. At the close of the evening an ice course was served to guests: Betty Jane Sessums, Helen Connor, Mildred Connor, Helen Barber, Joana Barber, Marie Beauchamp, Bieknah Gambell, Joyce Saunders, Anna Blackburn, Lucille McHargue, Beth Prothro, Beth Reeves, Eleanor Hedrick, Lois Guffey the honoree and hostesses who were assisted by Mesdames Campbell and Guffey and Miss Lydia G. Watson.

Attacks of sudden dizziness while flying are sometimes relieved by giving a loud, high-pitched yell, while emitting as little breath as possible.

lar social and cultural backgrounds are more likely to be more successful in marriage, while those who participate in organized community life seem more likely to succeed. Developed hobbies and interests help make a marriage successful.

Honor George Hyatt By Birthday Party

George Hyatt was honored on his fourteenth birthday Thursday afternoon with a party at his home, 1307 W. Holloway. The guests were served a picnic supper at the Hyatt home at 6:30 and then went to the Yucca Theatre where they saw the picture "Wings Over Honolulu." Present were James Mims, Billy Barron, Clayton Upham, Bobby York, Tad Crane, Bobby Hyatt, Wolcott Knox and George Hyatt.

The Amazon river discharges about 5,000,000 cubic feet of water into the Atlantic ocean every second.

FIRST BAPTIST CHURCH Rev. Winston F. Borum, Pastor 9:45 a. m. Sunday School. 10:50 Morning worship. Subject: "Going and Growing." 8:15 p. m. Evening worship. Subject: "The Keys of the Kingdom."

Junk Becoming Scarcer. WILSON, N. C. (U.P.)—Louis Arner, local junk dealer and one of the largest dealers in North Carolina, believes that the supply of junk in this state is virtually exhausted. Arner, who has seen carload after carload of scrap metal head from his yards to port terminals, believed the demand has exhausted the supply.

CHRISTIAN SCIENCE SERVICES

"Soul" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist on Sunday, August 15.

The Golden Text is: "My soul thirsteth for God, for the living God: when shall I come and appear before God?" (Psalms 42:2.) Among the citations which comprise the Lesson-Sermon is the following from the Bible: "These are they which came out of great tribulation, and have washed their robes, and made them white in the blood of the Lamb" (Revelation 7:14.)

The Lesson-Sermon includes also the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Truth will at length compel us all to exchange the pleasures and pains of sense for the joys of Soul" (page 390).

Candlewick Spreads Thrive on Washing

Candlewick bedspreads have survived since the days when our thrifty Colonial ancestors embroidered bed covers and other household goods with the thread they used for the wicks in candle-making. Beautiful, serviceable, and easy to launder, this type of covering is especially suitable for bedrooms furnished in early American style.

A sunny windy day is best for washing a candlewick spread. Use lukewarm water and enough soap-suds to make a thick lather. Rinse well, and if possible, hang it out of doors. When the spread is almost dry, shake it vigorously to fluff up the tiny "wicks."

No ironing is necessary. Place the spread on a bed or some other flat surface when dry, and brush it lightly with a clean whisk broom to smooth the surface without flattening the embroidered threads.

Excessive speed is stated to be responsible for more fatal accidents in England than any other individual driving cause.

The Cary Butchers To Visit Mexico

ROSSELL, N. M., Aug. 13.—Mr. and Mrs. Carp P. Butcher, nee Clara Phinizy, plan to return to their home in Midland, Texas, Wednesday and will leave from there the last of the week for a three weeks trip to Mexico City. After September first they will be at home to their friends in Midland.

Miss Phinizy and Mr. Butcher were recently married in Houston and have been visiting her uncle and aunt, Major and Mrs. Robert R. Brown, in Roswell. Mr. Butcher is district geologist for the Tidewater Association Oil Company in Midland.

Working Girl Best Wife, Cornell View

ITHACA, N. Y. (U.P.)—To assure a successful marriage, marry a girl who has worked before becoming a bride, Cornell University's department of rural social organization advises potential husbands.

Girls who, before marriage, were active in community affairs, or who were responsible housekeepers in their own homes, are also "good bets."

"The poorest bet of all," according to the department, "is the girl who, after finishing school, stays at home with no responsibility either in the home, or on a job, or in a community."

Future husbands also were discussed by the department. Husbands with a record of irregular employment and a lively interest in their jobs are one and one-half times more likely to have a well-adjusted marriage.

Those who earn at least \$150 a month at the time of marriage have slightly better chances of success in marriage. Husbands who have saved between \$500 and \$1,000 at the time of marriage are better bets than those with no savings. More important, however, than the actual amount saved is a consistent policy of saving.

Husbands and wives with simi-

AN OLD FRIEND RETURNS Southern Select BEER THE BEER THAT BECAME AN INSTITUTION Back in the pre-prohibition days of the old South, Southern Select Beer was the drink of the critical, the cultured, the distinguished as well as the favorite of the butcher, the baker and the candlestick maker. The fame of this celebrated old brew went far beyond the borders of its homeland and became world-renowned. Its rich and mellow flavor made it the social center of every occasion just as its sparkling tang and thirst-satisfying goodness made it the undisputed favorite in every home. Now—that same rare and satisfying beer is waiting for West Texas folks at their favorite hotel, cafe or retail beer dealer. Made by the same exact formula and by the same renowned family of brewers who gained world acclaim with Southern Select Beer. "ASK GRANDPA — — — HE KNOWS" a Product of GALVESTON-HOUSTON BREWERIES, Inc., Galveston, Texas Distributed by W. J. RUSSELL Distributing Co. MIDLAND, TEXAS

HARDWARE CONTINUES ON TOP

KRLH, SINCLAIR CLUBS DEFEATED THURSDAY NIGHT

The Midland Hardware and the Ford V-8 clubs maintained their positions at the top of the Industrial League standings last night when they both won over the Sinclair and KRLH clubs.

In the first game, the Hardware defeated the cellar KRLH club easily by a score of 17-6, and in the nightcap the Ford managed to eke out a one-run victory over a tough Sinclair club, 6-5. Much of the latter game was played in a hard sandstorm but the game turned out to be one of the toughest in the league this season.

The Hardware club remains a half-game ahead of the Ford club at the present time with the Hotel club, in third place, two games and one-half back of the Ford.

The Wednesday night game between the Sinclair and Hardware, reported yesterday as resulting in a 25-23 victory for the Hardware, has been declared no contest because of a scorekeeping error. A re-check of the runs scored in the game showed the final count to be 25-25. Whether or not the game is to be played off is to be left up to the opposing managers.

The box scores:

Rolling Pin Throwers Vie.

REIDSVILLE, N. C. (U.P.)—The latest sport of picnicking groups here consists merely of throwing a rolling pin (the heavy type) at a dummy figure. A bullseye is drawn on the figure to designate the center of the target. Mrs. Frank Christian ranks as unofficial champion now.

Sitting in a draft does not cause a cold. The chilling of the body which the draft produces lowers the powers of resistance and germs which were hitherto harmless then produce their disastrous effects.

Horse-Sense

"His insurance company makes him use it."

STORIES IN STAMPS

THRICE-DESTROYED CAPITAL

TURBULENT history is that of the capital city of the Central American republic, Guatemala; turbulent because three times it has fallen before the onslaughts of ruthless natural forces.

First Spanish capital of the country was Ciudad Vieja. It was destroyed by "Aguia," the mountain of vomiting water, one of Guatemala's greatest volcanoes. Thundering down upon the quiet city at its feet, "Aguia" belched forth a deluge of water which completely wrecked the capital. This was in 1541.

Guatemala, on its present site, was founded following an earthquake which in 1773 destroyed the older capital. The government was formally transferred to this location in 1779. Laid out at an altitude of 4877 feet above the sea on a virtually isolated tableland, the city, in the opinion of its founders, would be safe from earthquakes.

This hope was blasted, however, one year after founding when a heavy tremor shook the area, and in 1917-18 the city was virtually razed by a series of earthquakes. The site was not abandoned, however, and the present Guatemala has risen on the same streets and on the same building lots as before. The city is often pictured on Guatemala stamps. The issue here, current, shows a principal street.

Scoter Traffic "Menace."

LORAIN, O. (U.P.)—The foot-pedaled, child-ridden scoter is Lorain's newest and apparently dangerous traffic menace. Louis Mikula, 7, was gashed on the head when he was knocked against a tree by a "scooting" playmate.

Stuttering Sam Wins Success Finally

FORT WORTH, Aug. 5.—Here's a story that O. Henry would have enjoyed writing about—the chronicle of lovely Mary Dowell, better known as "Stuttering Sam." She is a Fort Worth girl. Her father is chief of police.

Miss Dowell, stutters, as her nickname indicates. Last fall she was in New York City trying to get a job on the stage or in radio. She spent hours in waiting rooms and then, when at last she faced an executive, she became so excited that she stuttered until the busy man broke in.

"Smart girl, eh, I've got no time for practical jokers," said the booking agent. A booking agent heard of the Texas show girl. He was looking for someone to fill a spot on the Rudy Vallee program and sent for Stuttering Sam. She was handed a piece of paper containing a few lines she was to say and, reading them over and over to herself, she breathed a wish that for once she would not stutter. Sure enough when the test was given, she repeated the lines without a bit of stammering.

"Pshaw!" said the booking agent. "I knew that stuttering business was a gag." And so, because he really had wanted a performer who stuttered, Miss Dowell lost the opportunity to take part in one of the great national radio hours.

But here's the happy ending: In Billy Rose's Casa Manana revue at the Fort Worth Frontier Fiesta, she wears the gorgeous golden peacock costume in the "Lost Horizon" scene with its Oriental splendor, and in the finale, "Te Can't Happen Here," she is clad in the largest gown ever made, 1,200 yards of spangled satin, with 28 attendants carrying the train. And so success has come to Stuttering Sam. O. Henry really could have made a good story out of this.

Pat O'Brien Is A Regular Guy

Like all film stars, Pat O'Brien has a chair with his name on it. But, Pat's different. He seldom sits in his chair. It is usually occupied by one of the sound men, or a grip, or a make-up man. An though O'Brien has a dressing room on the set, it really isn't his. Visit any stage he's working on—the last one being that on which was made "San Quentin," now showing at the Yucca Theatre, and take a peek into Pat's dressing room. You may find Pat in it. And if he's there, you'll find half a dozen other fellows. If he's working, his

AIR CONDITIONING,
TOO!"

Carrier PORTABLE SUMMER Air Conditioner

PRACTICAL, low-priced air conditioning is a reality at last! Carrier engineers have made it possible with the Carrier Portable Summer Air Conditioner.

Perfect for your office, living room, any single room, because it plugs into the light socket, requires no alterations. It cools, dehumidifies, ventilates, filters out dust and dirt, cuts outside noises to a minimum. The Carrier Portable is designed and perfected by the same organization that has made installations in the U. S. Capitol, Radio City, the "Queen Mary."

Call us today—early today!—so that we can deliver and install your Carrier Portable without delay.

kards, and inmates at any state-supported institution will not be eligible, and additional restrictions would be an applicant for assistance must have lived in Texas five years of the nine immediately preceding his application and continuously for one year just preceding it.

The legislature specifically would be given the power to extend aid under such limitations, regulations and restrictions as it deemed expedient, and these have been set forth in an enabling act adopted at the session which submitted the amendment.

The act creates a division of public welfare in the state board of control to administer the assistance to needy blind and destitute children, as well as certain other social welfare work.

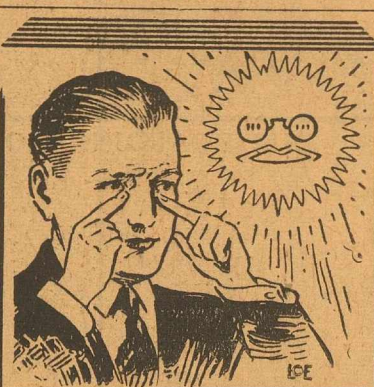

It also provides for examination of applicants' eyes each two years, for treatment in an effort to re-

cent of normal compares with 84 per cent a month ago, 85 per cent a year ago, and 84 per cent the 10-year average. Marketings during the first six months of the year have exceeded 1,500,000 head and is the largest movement during any first six-month period on record.

Western Range States.

Ranges continued very good through July in the higher sections and in the states west of the Continental Divide, except for parts of California and Arizona. East of the Main Range, feed is good in the foothill areas of Montana, Wyoming, Colorado, and New Mexico. The western Great Plains area of eastern Montana, the western Dakotas, western Nebraska and Kansas, and western Oklahoma has poor to fair ranges and pastures, with a general decline in condition. Ranges are very good and above average in Washington, Oregon, Idaho, Utah, and Nevada. The lower ranges in these states have a good crop of matured feed, except in parts of southern Idaho. The southern half of California has good feed, with short supplies in some northern sections. Ranges are good in the western and south-central sections of Montana, Wyoming, all of Colorado except in the east, and all of New Mexico except the eastern and southwest sections. Arizona has good feed in the north but it is dry in the south. Ranges are very poor in northeastern Montana and northwest North Dakota, with only fair feed over much of eastern Montana and the western Dakotas. Western Nebraska ranges are dry with only fair feed. Western Kansas and Oklahoma have poor ranges and pastures. The eastern Dakotas have fair to good pastures, while pastures are only fair in eastern Nebraska and Kansas.

store sight and for disqualification from receiving aid if persons refuse to permit the examination or the treatment. Public beggars are barred.

District or county agencies would determine the amount of aid granted after taking into consideration the individual's resources and necessary expenditures, and a person in need would seem to be one with insufficient income or other resources "to provide a reasonable subsistence compatible with decency and health."

No one knows how many persons would be eligible under the amendment and the enabling act, but Rep. Lon E. Alsop of Carthage, author of the proposal, estimated there were not more than 6,000 needy blind in Texas and probably not more than 3,000 could qualify. Other sources have estimated the number of adult blind in the state at between 3,000 and 5,000.

The legislature decided on the age of 21 as the starting point for receiving assistance because the state school for the blind accepts pupils between the ages of 6 and 21, although many are graduated at 18. Some legislators took the position the three-year cap would serve as a stimulus toward self support.

The proposal for aid to children would empower the legislature to assist those under 14 years old who were "destitute," but the assistance could not exceed \$8 a month for one child or \$12 for a family, and moreover the total for the entire state could not exceed \$1,500,000 annually.

The legislature would be given blanket authority to impose residential and other restrictions and limitations as it wished. The federal government would add to the financial assistance an amount equal to one-third of that put up by the state.

As in the case of aid to adult blind, assistance to destitute children would be administered by the public welfare division of the board of control through district and county agencies, which would consider the individual's resources and necessary expenditures for the purpose of providing "reasonable subsistence compatible with decency and health."

To be eligible, children would not have to be orphans but merely deprived of parental support, which might be by continuous absence or physical incapacity. Estimates as to the number of children who might be eligible have ranged from 30,000 to 50,000, generally, although when the subject was before the legislature some persons predicted the total might be 80,000. A number of sharper restrictions were included in the amendment and enabling act the last moment because of the evident fear the situation might get out of hand.

For example, the amendment originally provided for aid to "dependent" children, but "destitute" was substituted; in addition, the original age provision of 16 years was lowered to 14, and a maximum cost to the state was fixed.

Grand Duchess at Paris Fair

Grand Duchess Charlotte, ruler of the 999 square miles and nearly 300,000 inhabitants of the principality of Luxembourg, is shown above, as she visited the Paris Exposition during a short stay in the French capital. She was accompanied by her husband, Prince Consort Felix.

New Car Registrations For July Drop in State

AUSTIN.—New automobile registrations in Texas during July were moderately below those of the preceding month and the corresponding month last year, according to the University of Texas Bureau of Business Research.

Reports from 14 Texas counties show total sales of 6,013 cars, a decline of 7.7 per cent from the preceding month and 5.2 per cent from the like month last year. Aggregate sales in these counties for the year to date were 42,442 cars, a decline of 4.2 per cent from those of the corresponding period last year.

"The loss in sales compared with last year was confined to the lowest price group," the bureau's report said. "The two intermediate price groups showed substantial gains over July last year, and the highest price group registered a small gain."

Pie or Pickles? Is Concern of Committee

AUSTIN, Texas, Aug. 7.—Whether the college student buys pie or pickles is of concern to a committee of Austin women who have been working with Miss Rosalie Godfrey, business director of residence halls and assistant professor of home economics at the University of Texas, on the problem of how the college student spends his food dollar.

Findings of the committee were discussed at the Second National Conference on College Hygiene held in Washington, D. C., last December, and have recently been published by the Journal of the American Dietetic Association.

Working with Miss Godfrey on the committee were Miss Selma Streit, business manager, Scottish Rite Dormitory; Miss Beulah Smith; Mrs. May Brookshire, resident business director, Jessie Andrews Dormitory and the Woman's Building; Dr. Jet Winters, professor of home economics at the university, and Miss Ann Janzen, director of the university cafeteria and assistant professor of home economics.

Although study of the subject was not completed, the committee found that, in the institutions studied, students spent more money for except that rain improved pastures in southeast Kansas. Eastern Oklahoma has good pastures. The condition of ranges is 80 per cent of normal, compared with 81 per cent last month, 72 per cent a year ago, and the 10-year (1927-1936) average of 79.6 per cent.

meat, fish, eggs, and poultry than for any other group of food; that fruits and vegetables ranked next, and dairy products and ice cream third. The percentages spent for various groups of food follow: Fruits and vegetables, 25.5 per cent; meat, fish, eggs, and poultry, 32.3 per cent; dairy products and ice cream, 19.8 per cent; butter, salad oils, and cooking fats, 9 per cent; cereals, sugars and sweets, 8.3 per cent; miscellaneous, 4.6 per cent.

Paris Styles

By Dorothy Carew J
United Press Staff Correspondent
PARIS. (U.P.)—Gloves have taken a decorative turn and instead of being a last-minute item to top off a costume, they may be the inspiration of an entire ensemble. The individual print glove and bag combinations of matching material and design are the most novel of elaborate designs and are a simple and very effective means of setting off a dark afternoon frock to advantage.

Heavily-embroidered turned-back cuffs repeat the motif of designs on black bags embroidered in rich colors. Circlets of daintily embroidered flowers sprinkle the backs of attractive doeskin guantlets. Colorful sprays of blossoms run from the knuckles to the top of the cuffs for afternoon wear and bright-colored gloves are being worn to highlight individual tones of print dresses.

Gold kid gloves, bag and belt are interesting accessories for smart evening wear, and equally effective is a glove and belt combination accenting the gold kid trim of a formal black antique bag.

For sports wear, contrasting color or fabric is found in many of the new gloves which achieve distinction through the materials chosen. Lizards and serpents with kid palms also are decidedly new in red or black, and dull greens, deep reds, natural pigskin and rich browns are favored colors for sports.

Tailored blacks, browns and navy blues for practical everyday wear follow the trend conservatively, with novelty stitching to vary the traditional effect.

Town Counts Dog Noses.
INDEPENDENCE, Mo. (U.P.)—Declaring that an "emergency" exists, Mayor Roger T. Sermon ordered a dog census here when it was estimated there were more canine noses than human noses to be counted.

Caps That Are Versatile
A prominent hatter is featuring a new gabardine "beret-cap" for active sportsmen. As the name suggests, it combines features of both types of headgear. It can be worn aslant, like a beret, or, if a more dressy cap-like effect is desired, the crown can be pulled forward and snapped to the headband with a glove fastener. The new hybrid head covering comes in gabardine in a full range of colors.

Standard time was adopted in the United States in 1883.
