

5 New Amendments Voted In State

Japs Advance Along Front In Shanghai

Strong Resistance Met Entire Way as Chinese Fight Back

SHANGHAI, Aug. 24 (P).—Japanese smashed Shanghai today in a "big offensive" against stubborn Chinese resistance. The Japanese said they advanced two miles in different spots, driving to flank Chinese troops.

An American destroyer uncovered its guns and escorted the liner President Pierce to sea with American refugees.

Three Chinese divisions were squeezed into a military nutcracker in an attempt to beat 30,000 Japanese bogged by rain southwest of Peiping.

Secretary of State Hull appealed to the nations to "refrain from a resort to war."

Japan's emperor called an emergency session of parliament to consider ways of footing the war bill.

Victorious battle raged for miles along the Yangtze river's southern shore, 12 to 17 miles north of Shanghai, while the Japanese tried to put ashore enough men to give them victory in the devastating battle for Shanghai.

Chinese officials said only 15,000 Japanese had landed, and that at heavy cost.

Chinese artillery, machine guns and airmen fought bitterly to keep the invaders from getting a foothold on the banks of the Yangtze.

Japanese guns wrecked Woosung, 12 miles down river at the Wang-poo junction with the Yangtze, but did not silence Chinese machine guns.

Following the example of her aunt, Miss Fannie Florey, who has done her school teaching in foreign countries and on remote islands, another former Midland woman, Mrs. Bernice Blount, sailed last Saturday from New York for Caripita, in Central Venezuela, to begin duties of a recent appointment by the Standard Oil Co., in educational work.

The daughter of Mr. and Mrs. J. E. Hill here and wife of J. F. Blount, associated with the Southwestern Bell Telephone Co., Mrs. Blount took special training for the post and will be engaged there for several months. Miss Florey is located only ten miles away, at the company's main offices and schools.

Ex-Midland Girl Sails to Teach in South America

Following the example of her aunt, Miss Fannie Florey, who has done her school teaching in foreign countries and on remote islands, another former Midland woman, Mrs. Bernice Blount, sailed last Saturday from New York for Caripita, in Central Venezuela, to begin duties of a recent appointment by the Standard Oil Co., in educational work.

The daughter of Mr. and Mrs. J. E. Hill here and wife of J. F. Blount, associated with the Southwestern Bell Telephone Co., Mrs. Blount took special training for the post and will be engaged there for several months. Miss Florey is located only ten miles away, at the company's main offices and schools.

Father, Champion Swimming Daughters Ex-Residents Here

Sam "Pop" Dillard, formerly of Midland but for 20 years a resident of Fort Worth, accompanied by his championship swimming daughters, Nancy and Jane, stopped here briefly Monday afternoon, en route to San Francisco for the national outdoor A. A. U. swimming meet which opens September 3. Nancy holds the southwestern championship for back stroke and Jane the same award for breast stroke swimming.

Jane recently made the fast time of 34 3/5 seconds in fifty yards, setting a record in the breast stroke. The two older daughters, Babe and Mary Belle, also have won their championships. Dillard and wife operate the Rocky swimming pool at Fort Worth and the youngsters have been swimming since they were "big enough to walk."

Commenting on the Dillard girls and their swimming, the Fort Worth Star-Telegram said Monday:

For 15 years Pop Dillard has faithfully trained five daughters as expert, competitive swimmers. The older ones, especially Babe, came close to being national champions but never quite clicked.

There was, for instance, the 1928 Olympic tryouts in New York. Babe was giving Helene Madison and Lenore Knight a stiff race. Then she strangled on the salt water. She finished fourth. And only the first three made the team.

Pop tossed off the disappointment. After all, there were Jane and Nancy left to make his dream come true.

And so Pop shoved off by motor car with the two "young uns," bound for San Francisco and the women's national outdoor championships. He believes that one, or both, has a chance to win a title. He is just as confident that both have an excellent chance of making the 1940 Olympic team.

Rotary Ladies Night Banquet Thursday

Rotary meeting for the week is scheduled for Thursday evening, rather than at noon, with a ladies' night banquet honoring District Governor J. Edd McLaughlin on his official visit. The Ralls banker who succeeded Fred Wemple in the post, recently returned from the international convention at Nice, France, and from an extended European tour.

Each Rotarian is asked to bring his wife or lady guest, with privilege of bringing other guests as desired, upon notification of the secretary as to the number who will attend. The banquet will be at Hotel Scharbauer at 7:30 p. m.

Last Member Karpis Gang Caught Today

INDIANAPOLIS, Ind. Aug. 24 (P).—H. H. Reinecke, department of justice, announced today the arrest here of Anthony Joseph Amersbach, one of the last remnants of the Karpis-Barker gang.

He said that Amersbach had been indicted in connection with the kidnapping of Edward Bremer, St. Paul banker, for harboring Karpis gangsters.

Gas Rate Slash at Ft. Worth Ordered

AUSTIN, Aug. 24 (P).—The Railroad Commission today ordered reductions equal to 97 cents per thousand cubic feet in rates by the Lone Star gas company in Fort Worth, and instructed the company to refund the difference between the old and new rates from August 7, 1935, to September 1, 1937.

WOMAN WOULD BE SHERIFF

WAYNESBURG, Pa. (U.P).—The citizens of Greene county will vote on a woman candidate for sheriff this fall for the first time in history. She is Mrs. Edna Staggers Baxter, a Democrat.

Americans on Guard in China War Zone

With barbed wire entanglements and sand-bags very much in the scene, American troops are shown above in one of the latest pictures from China, as they stood by to protect American lives and property in Tientsin, scene of fierce fighting between Chinese and Japanese, and still a dangerous area.

Where U. S. Refugees From China Seek Shelter

Evacuated from the danger zone in war-torn China, hundreds of Americans, mostly women and children, sought refuge in Manila, Philippine Islands, whose water-front is shown in the air view above. To add to their problems, insular officials and Red Cross authorities were confronted by an earthquake which shook the city soon after the arrival of the liner President Jefferson, which bore the Americans from Shanghai.

Extra 3 Million, Half Needed for Old Age Pensions

AUSTIN, Aug. 24 (P).—Giles L. Avriett, auditor for the Old Age Pension organization, estimated Monday an extra \$3,500,000 would be needed to support the program during the fiscal year starting September 1.

He made the calculation in response to an inquiry from the Senate's efficiency and economy committee. The legislature will be called in special session about September 20 to levy taxes for old age and teachers' pensions and the state's general fund.

Avriett asserted the \$3,500,000 would be sufficient to repay most of a loan of \$1,626,487 from a Dallas bank in addition to meeting current requirements. After the loan has been liquidated, he said, only about \$2,500,000 extra money each year will be required.

"Assuming the law is not changed," the auditor wrote, "the average number of pensioners during the next two years will be approximately 120,000."

"On the present basis of \$14 state and federal money per person, we will need \$840,000 per month, plus \$40,000 administrative expense. It may be necessary to raise the average budget about \$14. If we are permitted to care for the doubtful, meritorious marginal cases, the number of recipients will exceed 120,000."

Proof of Hot Summer: Popcorn in Field Pops

CLEBURNE, Tex. (U.P).—Enos Jones, Joshua farmer, has proof that the Texas summer was hot—the popcorn popped in his field.

Jones gave as evidence an ear of popcorn taken from his patch with several kernels already opened.

POULTRY CONGRESS HUGE

CLEVELAND (U.P).—One million persons are expected to visit the World's Poultry Congress and Exposition, which opens here in July, 1939. The convention, reputedly the largest in the world, will last ten days.

Ex-Wife of Gifford Dies in Fall Today

NEW YORK, Aug. 24 (P).—Mrs. Florence P. Temple, 45, former wife of Walter S. Gifford, American telephone and telegraph company president, was killed in a fall today from her eleventh floor apartment.

She divorced Gifford in 1929 and later married John Temple, electrical engineer. Her father, Walter Pittman, said she had been in ill health.

Escapes Uninjured As Train Hits Car

J. P. Collins, local cattle buyer, had a narrow escape from certain injury or possible death last night when his car was struck by a freight train at the crossing one mile east of town.

Collins was reported to have told officers that he leaped from his car just before the train struck after seeing that he would be unable to get the car clear of the train.

FITZGERALDS HAVE GUESTS

Guests in the home of Mr. and Mrs. James FitzGerald, 1901 W. Holway, are Mr. FitzGerald's mother, Mrs. James FitzGerald, and her daughter, Miss Mary FitzGerald, and son, Billy Pat, of Tulsa, and Mrs. C. E. Allen of Bartlesville, Okla. Mrs. B. F. Dansby left last night for her home in Iowa after a visit here in the FitzGerald home.

Special Session Talk Opposed By House Democrats

WASHINGTON, Aug. 24 (P).—A group of house democrats expressed strong opposition today to a special fall session on the grounds that it might increase in part discussion. One member said "no practical good, maybe some harm," could come from a session to consider farm, wage and hour legislation.

Meanwhile, opponents were gathering ammunition against President Roosevelt's government reorganization plan, which may furnish a major controversy.

Senator Byrd of Virginia charged the plan would concentrate too much power in the White House and effect no real economies.

Chairman Jones, Texas, asked members of the house agriculture committee to seek by personal interview with farmers of their state views on general farm legislation.

Rescuers Seeking Four Missing Men After Plane Crash

SAN DIEGO, Calif. Aug. 24 (P).—Rescuers today hunted for the bodies of four of the six killed and two injured, including J. W. Blackman, aviation ordinance man of Cleburne, Texas, when a \$150,000 naval plane struck an abandoned whaling ship last night. Two bodies had been recovered.

Reports indicated the flying boat's tail struck a partly submerged boat hull and the boat tipped over on its nose.

The two taken from the plane were identified as T. P. Dougherty, aviation machinist's mate, third class, suffering from severe sh and multiple lacerations, and J. W. Blackman.

The crash was the first major accident to any of the navy's flying boats. Ships of the same type had mass flights from San Diego to Hawaii and Panama this year without mishap.

Big-Time Artists of Rodeo World to Be On Program Here

Three premier entertainers of the rodeo world have been engaged to appear at the Midland Cowboy Contest September 4, 5 and 6. It was announced today. All were contacted yesterday by Roy Parks and Donald Hutt, members of the rodeo committee, at Fort Worth.

Bob Calen, widely known trick roper, cowboy singer and radio announcer, who each week is heard over WBAP, has been secured to fill all these capacities here. He will announce the show on each of the three afternoons and three nights, interspersing trick roping acts and cowboy songs on the program.

Tad Lucas, world champion woman trick rider, also will be here for the three day and night event, performing with her educated pony between acts of the cowboy contests.

Buck Stewart, renowned trick rider, roper, bronc rider and all-around rodeo entertainer, will be on the program here at each of the six shows. His feats of horsemanship are said to be without a peer in the southwest.

Bohago Flowing Three Barrels Hourly As Dawson Well Fills

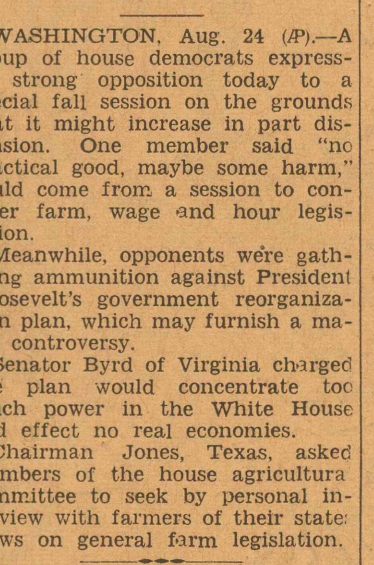

By FRANK GARDNER.

Interest in the northern area of the Basin continued at high level today with the promise of production in wildcats in Hockley and Dawson counties, gauging of a new Yoakum strike at better than three barrels hourly, and logging of more oil showings by other tests in that sector.

Bohago Oil Corporation and Bond Oil Corporation No. 1 J. L. West, discovery producer eight miles west of the Bennett pool in Yoakum, was heading through tubing this morning while crew awaited orders. The well, already treated with 1,000 and 3,000 gallons of acid, will be given another dose of 4,000 gallons. On 16-hour gauge through 3/4-inch choke on 2-inch tubing it flowed 87.75 barrels of oil, with an estimated one million cubic feet of gas. The well flowed 13.75 barrels the first hour, 5.50 the second, 7.32 the third, and is now making an average of 2.75 an hour. Total depth of the No. 1 West is 5,255 feet in lime. Two-inch tubing is set at 5,240, with packer at 4,992. It is located 1,980 feet from the north and west lines of section 606, block D, John H. Gibson survey.

Denver Producers & Refiners No. 1 J. A. Whittenburg estate, new producer six miles northwest of Gaines' Wabson pool, is preparing to run tubing to acidize. When bailed down, it made two barrels of oil hourly, and is expected to be greatly increased by acid. Total depth is 5,015 feet in lime, and location is 660 feet from the north and west lines of section 831, block D, Gibson survey.

Car Plunges 25 Feet Off Trestle

Seven men and two women, huddled together, frightened, for two hours being rescued, when the interurban car, above, plunged 25 feet from a washed-out trestle into a swollen, rain-fed creek near Wolcott, Kan. Workmen are shown above salvaging the car which lay half-submerged in 12 feet of water, and threatened any moment to wash away into the Missouri river, just 50 feet distant.

\$82,000 Gymnasium Grant For Midland Is Announced

President Foy Proctor of the local school board today received the following telegram from Senator Tom Connally at Washington:

"PLEASE TO ADVISE GRANT OF \$81,818 FOR MIDLAND SCHOOL DOCKET 4539." Similar telegrams were received by other school authorities, by Dr. Jno. B. Thomas, former president of the school board, and by the Midland Daily Reporter-Telegram. This is the amount of the grant applied for by the local board of education some time back, same to be placed with the \$75,000.00 bond issue and the cash supplement of \$25,000.00, making a total of \$181,818.00 for the two buildings, namely the new grade school now nearing completion at a cost of approximately \$90,000.00, and the proposed physical education building, or gymnasium, the plans and specifications of which have been approved by the local board of education and by the Public Works Administration at Washington.

The new grade school will be approximately \$90,000.00 to be used in the physical education building. Plans and specifications, prepared by Voelcker & Dixon, Wichita Falls architects, have been accepted by the school board. The proposed physical education building, or gymnasium, as approved by the school board and the PWA at Washington consists of a combined gymnasium and auditorium, with band room, and other departments. The basket ball court will consist of a large regulation court, and two small courts, one of which may be on the large stage, with arrangements for the state court to be screened off for a girl's gym. As an auditorium, the total seating capacity of the balconies and playing floor will be twelve or fifteen hundred. On each side of the gym will be provided the most modern and ample showers and lockers for both boys and girls. When this building becomes a reality, the plan is and has been to introduce a complete physical education and health department for both boys and girls.

At one end of the gym-auditorium proper will be situated the band room, including large band room, sound-proof practice rooms, offices and repair rooms for the band. The original plan also calls for a cafeteria, and a manual training department in connection with the high school curriculum. Many have said that the proposed physical education plant will also give Midland one of the finest schools in the state, and school authorities are being congratulated heartily over the securing of this long-sought-after addition.

AT THE AIRPORT

Ten planes came in from Kelly Field this morning and landed at Sloan Field. There were two O-19 ships, one BT8, and seven O-25 planes.

Lt. Quinn piloted a Navy observation plane in from El Paso. He was en route to Hensley Field, Dallas.

Fee System Is Retained By 3-2 Margin

Five of the six proposed amendments to the state constitution carried in Midland county in yesterday's election, and the sixth proposal was tied.

Interest in the election was at a record low ebb, only 104 votes being cast in the county, 86 in precinct 1, 7 in precinct 2, 3 in precinct 3, and 8 in precinct 4.

Amendment No. 1, providing for the amount of the liability of stockholders in state banks, carried by a vote of 60-39; number two, providing for assistance to destitute children under the age of 14 years, carried, 76-28; number three, providing for the legislature to fix the manner and basis of compensation for all district, county and precinct officers, carried, 50-47; number 4, providing property shall never be assessed for taxes at more than its fair cash market value, carried by a vote of 80-23; number five, providing that Harris county and any road district therein may upon a vote of the people therein adopt a road plan and levy taxes for road and bridge construction in lieu of the issuance of bonds, failed to carry the vote being 47-47; number six, providing for assistance to needy, blind, carried by a vote of 81-22.

Authorization of Cotton Loans Is Asked by Wallace

WASHINGTON, Aug. 24 (P).—Secretary Wallace urged President Roosevelt at a luncheon conference Monday to authorize a loan of 9 cents a pound on this year's cotton.

He told reporters afterward that there could be no decision on the loan rate and other conditions until a meeting of the Commodity Credit Corporation later in the week to study data gathered by department of agriculture experts and economists.

Wallace contends a 9-cent loan would permit American cotton growers to sell in world markets, and that growers could be assured a total return of 12 cents by additional subsidy payments of up to 3 cents. Some members of congress advocate a 10-cent loan and two-cent subsidy, arguing that policy would give producers a higher immediate return and cost the treasury less in the end.

The subsidy payments, authorized by congress shortly before it went home Saturday, will be payable next year to farmers who comply with a proposed crop control program.

Asked by reporters today whether he considers a special session of congress necessary this fall, Wallace replied he always has favored such a session. Previously he had said he considered crop loans unwise unless accompanied by crop control capable of preventing surpluses like those of 1932.

Officials said details of the 1937-38 cotton loan program have not yet been drafted.

In general, they asserted, the loan probably will follow the lines of the 10-cent loan program of 1934-35, but the exact stipulations can not be decided until after the meeting of the Commodity Credit Corporation.

Under the first loan program growers stored their cotton under government supervision and received loans of 10 cents a pound on it. Local committees did much of the work of administration.

Former Resident Of Midland Dies

John S. Mitchell, formerly manager of the Southern Ice and Utilities company plant here, succumbed Saturday in a Dallas hospital, friends here were notified today. The body of Mitchell was taken to Danville, Kentucky, his former home, for burial.

Mitchell moved to Midland from DeLand, Fla., in 1931 and lived here until July, 1935, when he was transferred to McAllister, Okla., as manager of the company plant there.

The deceased is survived by his wife and one small daughter.

Rain Falls South Of Town Monday

Rain fell over a large ranching area south of Midland late Monday, it was reported here today. Ranches of Buddy Hutchinson, S. R. Preston, T. O. Midkiff, Joe Youngblood and others received some moisture. The rain did not extend far eastward, however, to territories still dry after last week's rains over much of the Midland cattle country.

Fireman Drives Train After The Engineer Dies

MUSKOGEE, Okla. Aug. 24 (P).—Mike Murphy, veteran Katy engineer of Denison, Texas, died at the throttle today near Tushka; fireman C. L. Haron, Denison, brought the train into here with the passengers' unaware of Murphy's death.

Dawson Pool Looms

E. L. Wilson et al No. 1 T. H. Scanlan estate, northwest Dawson well, encountered an increase in oil from 4,945-47, and at that depth oil rose from the 250-foot level to 750 feet in one hour. Swab was pulled three times over a period of seven hours, each time showing yield of from 10 to 15 barrels of oil. The well is drilling ahead today. First oil shows were from 4,836-50 and from 4,902-09. Location is 660 feet from the north and west lines of section 83, block M E. L. & R. survey.

In southwest Hockley, about two and one-half miles southeast of Texas No. 1 Slaughter, 502-barrel discovery, Stanolind Oil & Gas Company No. 1 Slaughter is shut down for test, oil having risen 300 feet in 16 hours. Total depth is 4,965 feet in lime. Show of gas was struck at 4,940, and oil was found See OIL NEWS Page 6

FREEDOM IS FREEDOM WITHOUT EXCEPTION

For 30 years and more the American people have been accustomed to think of freedom of speech in terms of a radical on a soap-box being allowed to speak his piece without interference from the police.

Such infringements as we have allowed of our cherished principle of the freedom to speak and publish, have in nine cases out of ten been made where radicalism was concerned.

The picture of the Civil Liberties Union upholding the right of uninformed Nazis to hold public demonstrations is interesting. It makes clear the ACLU point of view: "We are not concerned with the doctrines of this or any group."

It is irritating to Americans to grant American liberties to groups which, if in power, would grant no liberties to anyone else.

Yet the way to improve these groups is not the way of suppression. The most savage repression in pre-war Russia and in post-war Germany has not eliminated the radical movement.

It is in the free and open air that deviant doctrines are fumigated and their explosive powers dissipated.

Behind the Scenes in Washington

WASHINGTON, Aug. 24.—The national radio address which John L. Lewis will deliver the Friday before Labor Day is expected to be an attack on enemies of the C. I. O., an aggressive defense of the new labor movement and a statement of C. I. O. policies.

There will be another Lewis speech on Labor Day. Lewis is more than likely to enter the political field in one or both speeches. But he hasn't decided yet what tactics to take and which ones to leave out.

Some of the advisers are radical to the point where they are definite enemies to Lewis. They would have him break with Roosevelt, be contemptuous of "public opinion," declare flatly for a farmer-labor party now and ignore moderate counsels of other important union chiefs in C. I. O.

SOME of the other leaders have worried about the sourness of Lewis toward Roosevelt and the former's seeming obliviousness to C. I. O.'s increasingly bad public relations.

The Town Quack

Midland has done more things at the last minute, and done them well, than any town I ever heard of. Now when the rodeo gates are almost ready to swing open, and we haven't heard a thing about the special entertainers, along comes the news that three of the outstanding people of the rodeo world will be on hand to help with the show.

Not being a sports writer, I can say a few good things for a rodeo announcer. Without a good announcer, many a good stunt falls laying low as a strategic maneuver, ignoring the public. To friends who have urged him to make public defense against attacks on C. I. O. he has heretofore replied:

Water Buffalo a Feature of Film

It is hard to believe that the Wild Water Buffalo is one of the most dangerous animals on earth, an enraged bull, will attack anything, and often wins even against such antagonists as tiger or elephant.

However, after several thousand years of patient tutelage on the part of the Chinese farmer, the Chinese Water Buffalo is today, not only one of the most important, but one of the most affectionate and dependable animals on earth.

Smiles at Charge in Poison Death

PITTSBURGH (U.P.)—The cost of administering unemployment relief in Allegheny county has more than doubled since the low point of the depression despite reductions in the number of unemployed.

Relief Cost Up In Pittsburgh

This was revealed here in reports by the Bureau of Business Research, the University of Pittsburgh, the Allegheny County Emergency Relief Board and the WPA.

Miss Melba Nixon Becomes Bride Of Hunter Midkiff

Young Couple to Be At Home in Midland

Miss Melba Nixon became the bride of Mr. Hunter Midkiff in a ceremony Sunday evening at 7 p. m. at the home of the bride's parents, Rev. Cliff M. Epps, pastor of the First Methodist church, officiated.

Attendants were Miss Marcelle Scarborough and Mr. Sam Midkiff. The wedding party entered the strains of Mendelssohn's Wedding March, played by Frank Nixon, brother of the bride.

The bride was attractive in a navy blue frock with matching accessories.

An informal reception was held immediately after the ceremony for members of the family and immediate friends who attended.

For traveling, Mrs. Midkiff chose an ensemble of black crepe. The couple left after the reception for wedding trip to San Antonio and Corpus Christi, after which they will be at home in Midland.

Both the bride and bridegroom are graduates of Midland high school and Mrs. Midkiff attended Murray College in Abilene.

Present at the wedding were the bride's parents, Mr. and Mrs. J. F. Nixon, the bridegroom's parents, Mr. and Mrs. T. O. Midkiff, Mrs. Henry Scott of Paris, Texas, Mrs.

Mrs. Sutton Hostess To Bible Class

Mrs. W. L. Sutton, 511 North Pecos, was hostess at the last meeting of the Belmont Bible class. Mrs. W. L. Fickett taught the interesting Bible lesson. Next Friday the class will meet at 4 o'clock at the home of Mrs. Fickett, 905 West Missouri.

Present were Mrs. W. P. Lawrence, Mrs. J. M. King, Mrs. H. H. Nicholson, Mrs. W. J. Stewart, Mrs. E. A. Rogers, Mrs. C. E. Nolan, Mrs. A. B. Stickney, Mrs. Herbert King, Mrs. J. B. Vivian, Mrs. D. E. Holter, Mrs. T. O. Midkiff, Mrs. W. L. Fickett, Mrs. J. C. Hudman and a guest, Mrs. Stella McConaha.

Mrs. Stevens Will Sing for Program

Mrs. B. W. Stevens will sing "That Little Boy of Mine" and "Sweet and Low" Wednesday morning on the health program which will be broadcast over KRLH from 11:00-11:15 a. m. She will be accompanied at

A Starlet's Favorite Lunch

There is nothing more tempting to children or grownups than a delicious plate of tender green vegetables, garden-fresh, cooked just enough to be palatable and yet retain some of their raw crispness. Add a glass of fresh cold milk and you have a lunch fit for a queen—or a princess of the movies.

Virginia Weidner, Paramount starlet currently appearing in "Souls at Sea," likes nothing better, and here's the way her mother recommends preparing them.

To keep green vegetables crisp and fresh in color, drop them into rapidly boiling water and cook uncovered just enough to be tender. In the case of cabbage and cauliflower which develop a strong flavor, if cooked long or covered, a large amount of water should be used. Cover with plenty of butter and serve piping hot.

Author's Home Is Either Stable Or Old Palace

the piano by Mrs. Lee Cornelius.

An instructive paper on "Skin Diseases of Children" will be given by Mrs. W. B. Chapman.

Father Edward P. Harrison, O. M. I., will announce for the program, which is under the sponsorship of the Midland County Health Board.

Mount Lassen volcano, in California, is the only volcano in the United States that has erupted during the present century.

KENNEBUNK, Me. (U.P.)—Kenneth Roberts, author, prefers to live in a converted stable and a half-baked palace. At least that is what he calls his two homes. The "stable" is in Kennebunk, Me., where he is spending the summer, and the "castle" at Porto Santo Stefano, Italy. He spends about equal time in these two places.

The author, whose latest work is "Northwest Passage," believes in the "live method" of writing. He recently said he "writes, rewrites, throws it away and writes it again so he can rewrite it." He contends that revision and rewriting are the most important parts of an author's work.

The period to which Roberts has devoted his writing is bound up with his own family. He was born Dec. 3, 1885, at Kennebunk, Me. From this town two of his ancestors went as captains of the Continental army, and another sailed as a privateer captain in the War of 1812. Another of his forebears was a member of the secret expedition led by Benedict Arnold against Quebec.

Roberts is a former Boston newspaper man, but he writes a manuscript on bound pages of yellow paper with a pen that "always is fuzzy." He is a stickler for facts, even hunting almanacs 170 years old to find the condition of the moon on a certain date.

How to write a novel? Roberts believes the way to write a novel is to write a novel. That's what he does.

Support of Teachers Asked in State Exposition Movement

DALLAS, Aug. 24.—Statewide movement of school children to the Greater Texas and Pan American Exposition has won the endorsement of Dr. N. R. Crozier, Dallas school superintendent and outstanding Texas educator. The school movement starts September 9.

"Governor Allred is to be congratulated on proclaiming holidays for every Texas school so that students may visit this great international show," Dr. Crozier said.

"Since the opening dates of the school movement include the city of Dallas and Dallas county, I am sure we will set a mark for the rest of the state. Included in this visit on September 9 and 10 will be the children of Ellis, Kaufman, Navarro and Rockwall counties. Scheduled dates will include every county in Texas later.

"I appeal to the teachers of Texas to interest themselves immediately in this movement. Beyond question two days at the exposition, which visit can be made at a nominal cost, is of far greater value than the same time in the classroom. The Cavalcade of the Americas, the Texas Hall of State, the Museum of Texas History, the Pan American Building, all free, are alone well worth the trip.

"Since the railroads have granted the extra low rate of half a cent a mile, and the exposition management has made every arrangement to entertain visitors at nominal prices, I feel that every Texas school child should be given this opportunity for education and amusement."

Iowa Borrows Canada's Noted Expert on Bees

AMES, Iowa (U.P.)—Agricultural experts who have been breeding bees for disease resistance at Iowa State College for the past two years have appointed an international authority on bee-keeping, Gaston Lamarre, Quebec, to assist them in their research studies.

Lamarre, extension apiculturist of the Quebec Provincial department of agriculture, has enrolled at Io-

THOUGH MANY MEN

By Helen Welshimer

THOUGH many men have gone to work again, Some willing hands still have no task to do; They seek such humble ministries and yet The calls for simple service are too few.

OH, surely it must try the weary heart Of any man who sees smoke overhead From others' labor, while he still must quest From door to door to beg his daily bread.

SINCE man must live by sweat of brow, we know, Then is it not our right, dear God, to ask That work go round? Oh, when men are sincere In asking toil, then, God, create the task!

wa State as graduate student.

In addition to the scientists at the college, the U. S. Bureau of Entomology and the experiment stations of Texas, Wyoming and Wisconsin are participating in the experiments.

Zoologists and plant pathologists are working to develop a strain of bees resistant to the American foul blood disease.

Hope for the ultimate success of the project lies in two facts already established by the Iowa State experiments. They are:

1. That some bees already possess disease resistance.
 2. Such disease resistance can be inherited.
- There is no known method of combating the American foul blood disease, which experts say is capable of destroying an average bee colony.
- At the present time, Lamarre and Howard Shipton, Iowa bee inspector, are in eastern Iowa making a series of observations and inspections of bee colonies.

Out-of-Town Guests Entertained by Mrs. W. L. Holmsley

Mrs. W. L. Holmsley entertained yesterday with a luncheon in the private dining room of Hotel Scharbauer for a number of out-of-town guests who attended the wedding of Miss Read Thomas and Mr. Henry Meadows.

Seated at the attractive luncheon table were Mr. and Mrs. Fred Williams of Hobbs, N. M., Henry Moore of Comanche, Mrs. Clara Slack of Comanche, Mrs. Jack Holmsley of Midland, C. W. Meadows, Howard B. Cox, Mr. and Mrs. Claude W. Meadows, Jr., Miss Janet Pilcher, Miss Mildred Waring, and Charles Waring, all of San Angelo, and Mr. and Mrs. Charles E. Seay and George Seay, all of Dallas.

Some of the games played by children in rural England are more than 1000 years old.

FOWLS SWALLOW NUGGETS.
MAGALIA, Calif. (U.P.)—There's still "gold in them thar hills," according to Mrs. Charlotte Sawyer of Butte County. At least one of her chickens which had been grazing in the hills had 98 cents worth of gold in its craw when killed while a duck yielded 20 cents worth.

WICKET NOSES OUT M'CAMNEY, 4-3, FOR DISTRICT CHAMPIONSHIP

WINNERS OUTHIT BY STUBORN CLUB FROM UPTON CO.

The Wicket Gullers won the district softball championship here last night, but only after the hardest fight they have had this year.

They had to capitalize on every break and get most of them—to finally eke out a 4-3 win over an underdog McCamey team that actually outhit them by a margin of 10-7.

For four innings both clubs were held scoreless, then both came through with runs in the fifth, both scored again in the sixth and then Wicket finally put across the clincher in the eighth.

It was Franklin Manning, formerly of Midland, that kept the McCamey team in the game all the way. He made no less than three seemingly impossible catches from his utility field position, and it was his booming home run in the sixth inning that once more tied the score after the Wicket boys had taken a lead in their half.

Dameron, McCamey's third baseman, after coming through with a couple of "grandstand" catches early in the game, was the goat of the battle. In the eighth inning, with one on, Jernigan hit a looping double down the right field foul line and raced to third when Dameron dropped a perfect throw from Conway in right that easily had the runner retired. Fry then hit an easy grounder to Dameron and he threw the ball away at first to let the winning run canter home. It was the fourth error of the evening for Dameron and it meant the ball game.

The Wicket club were the first to scratch the scoring ice in the fifth when Abar, center fielder, singled, stole second, advanced to third on an infield out and scored on a long fly to the outfield.

The Conoco club came right back in their half to take a one run lead when four singles in a row by Conway, White, Shelton and Dameron chased across two tallies.

The Ward county boys again took the lead in the first of the sixth when Carter walked and Hodges got a long home run into the cars in left field. Manning's homer for McCamey tied the score in their half, then came the fatal eighth.

Whitley, Wicket's hurler, was the big gun for the winners all the way. Besides striking out 10 of the losers, he made the first hit of the evening, a twister that got away from the Conoco hurler. Abar and Fry got two hits each of Shelton's left handed offerings, while Dameron, Epley and Shelton each got two hits for the losers.

The umpiring, done by Kinnikin, Whitmire and Howard, was the best seen on the local field in a long time, and when the game was over both visiting managers declared themselves to be more than satisfied with the officiating. Never during the game was a decision by one of the officials questioned.

In the final game of the evening the Ford club managed to keep their hold on first place intact by repelling the second place Hardware team's attack, 9-7.

Romance of "Klondike" Era Fades As Modern Business Rules Mining

This is the third and final story by Ernie Pyle, NEA special correspondent, bringing you from the heart of Alaska's platinum field, the story of today's stampede for wealth.

By ERNIE PYLE
NEA Service Special Correspondent.

PLATINUM, Good News Bay, Alaska, Aug. 24.—There's no sense coming all the way to Platinum, and then not seeing how they do the mining.

So Pilot Ralph Savory and I decided to walk out to the diggings on the other side of Red Mountain. It's a mere 20 miles there and back. We started very bravely.

Storkeeper Hanson brought me his rubber shoe-pacs in a back sack, and Savory carried his hip boots over his shoulder.

Not a Tree or Bush Visible. There wasn't a tree or a bush as far as one could see, but the earth was all green with short, coarse grass and little vines that looked like wild strawberries, but weren't.

Walking was tough. We got hot and winded, and had to stop and rest.

We made Clara Creek in two hours and a half. This is Dave Strandberg's platinum camp. It is a creek bed a mile or so long. On one slope sit half a dozen frame cabins where the men sleep and eat. The creek bed is all torn and eroded where the dragline has dug up the gravel, and the sluices spilled it back out again, minus Mining Day and Night.

The 4 o'clock shift had just gone ing the season. They work three to work. Mining never stops during the season. They work three eight-hour shifts a day, Sundays and holidays, from the last of May till the latter part of October. During the winter, the camp is abandoned. There are only six men on each shift.

Draglining for platinum is exactly the same as draglining for gold. The shovel gets a mouthful of gravel from the creek bed, lifts it up, swings around, and dumps it into a large box set up 20 feet

or so on wooden pilings. Up there stands a man directing a hydraulic "giant" from which comes shooting a three-inch stream of muddy water with terrific force. He shoots the water onto the newly dumped gravel, and washes it gradually down into the long sluice box. This is a slanting trough, about two feet square and 50 yards long, with steel riffles in the bottom.

Platinum Settles in Box. The dirt and water go rushing along through this box. The dirt and rocks and water go on out the other end, and the platinum, being heavier, settles to the bottom. Platinum, incidentally, is even heavier than gold.

Every two or three days they have dug all the gravel within reach of the sluice box, so they have to stop and drag the whole grate-like structure farther up the creek bed. And about once every two weeks they stop for the "cleanup." In other words, they clean out the bottom of the sluice

Platinum mining is a simple, unexciting operation. The dragline, center and in background above, with high boom and scoop dumps ore-bearing gravel into the far end of the sluice box, where it is washed across the riffles, depositing the metal. The caterpillar "bulldozer," foreground, scoops up gravel for the dragline. The stampede to Platinum was started by Pete Brevik, shown center, above, in the doorway of his tent, and two other prospectors, who brought platinum out of their drill hole. Dave Strandberg, left above, operates one of the major mining outfits near the boom city. Pete Wold, right above, Scandinavian trader, is the business and real estate tycoon of Platinum.

box and get the accumulated platinum. The digging of platinum is no more spectacular than the steam-shovel digging of a basement for a New York building. In fact, not as much so.

We watched operations for about an hour and then started for Olsen's camp, three miles away. Dinner at Olsen's.

Olsen's camp sits out on Squirrel Creek, also 10 miles away from Platinum. It is a miniature city. Imagine our surprise when we walked up to the cookhouse, some 6000 miles from Broadway, and there standing on the steps was a handsome woman, dressed in a green smock-uniform, ready to ring the dinner triangle.

She was Mrs. Pearl Gustafson, wife of the welder at the Olsen camp. She took us back and introduced us to Mrs. Brown, the chief cook, and then to Mrs. Ed Olsen, wife of the camp owner.

We ate with the men at a long table. Everything is white and clean, and the table so full it almost runs over, and there is a great variety. We had chowder, and red fresh salmon and dressing, and baked potatoes and string beans and carrots and peas, and cake and peaches, and all kinds of jellies and sauces, and either tea

of coffee. Start New Dragline. Olsen's is a big and busy camp. They were the first to start operations around here, four years ago. They have 25 men working now, and within a few days there'll be 50 more, putting the new dragline and dredge together.

These two will be ready to work by next spring, and next summer the platinum will be flying right and left. The dredge, which will work on nearby Salmon River, has enough ground ahead of it for 20 years' work.

After supper we went down where the dragline is working on Platinum Creek, about half a mile from camp. At Olsen's, they work two 10-hour shifts instead of three eight-hour shifts, so the dragline sits idle twice daily, for two hours each time. We went down during that period, which gave us a chance to see the sluice box when it wasn't flooded with water.

Few Find Nuggets. Well, that was another disappointment. They were to have the "cleanup" next day, which meant that, right before our eyes in the box was probably \$15,000 worth of platinum. But do you think we could find a single little grain? Nope. Not a one.

Platinum, it seems, comes much finer than gold. It is really dust,

and is so mixed in with a blackish sand of almost the same color, that one can hardly see it. After the "cleanup" they put it through another sluicing process in a small rocker box, and then ship the results down to Tacoma, Wash., for final processing. They ship it in cloth sacks.

Of course I'm just a cheechako which means an ignoramus and a tenderfoot, but I don't quite understand about platinum. It isn't like gold. The price of gold is fairly stable. Gold is now \$35 an ounce, and mining men don't worry about its changing during the present administration. The government sets the price, and buys all the gold produced.

But the government doesn't buy the platinum. And its price isn't set by the government. It fluctuates badly.

Two years ago platinum was \$25 an ounce. Today it is better than \$60—around \$68 the last time I heard. It has been as high as \$110 and as low as \$17. There is nothing I know of to keep it from go-

ing down to \$5 an ounce. Especially if they find too much of it. If I were a platinum miner, I'm afraid I'd be lying awake nights worrying over stuff like that.

Stampede Without Romance. By now you have seen that Good News Bay, the best that Alaska can produce at the moment, is not a movie Eldorado or a Rex Beach romance. Were riches to pour like lava from the mountains and wash up in molten waves from the sea, the past remains the past, and dead things cannot be recaptured. This is 1937, and times and methods change, and the gay drama that clothes the greed and profligacy of quick riches plays now to a different tune, and there cannot possibly be another Dawson in our time.

THE END.

TAKING ALL PRECAUTIONS POSSIBLE TO
AVOID AIR RAIDS BY CHINESE FLIERS**

AUSTIN.—All possible precautions are being taken by the people of Japan against air raids by the Chinese, it is indicated in a letter just received by Dr. Jet Winters, professor of home economics at the University of Texas, from Miss Mary E. Gearing, head of that department. The letter was written July 30 from Kyoto, Japan, and was received by Dr. Winters Aug. 16. Miss Gearing gave a vivid description of a mimic airplane attack upon Kyoto which included among other phases of training citizens to protect themselves against that mode of warfare, that of seeing safe shelter and protecting themselves against gas. The people of the city were apparently stirred to a high pitch of patriotism and a round of demonstrations in support of the Japanese government

in its war upon China took place during Miss Gearing's stay there. Her letter said that she had planned to leave for Tokyo the following day and that she had made no decision as to her itinerary beyond there. It was the original intention of Miss Gearing to divide her year's leave of absence from the university between visits to Japan and China. In view of the war situation in Shanghai at this time, it is expected that she will have to defer indefinitely and probably cancel her proposed trip to China. She left Austin for Yokohama June 20 and sailed from San Francisco a few days later. While her visit to the Orient was primarily for rest and pleasure, she is taking advantage of any opportunity that may be offered to make a study of educational matters related to home economics during her stay there. Her letter said she has met a number of the country's prominent educators.

While in Japan Miss Gearing met Miss Elizabeth Tarley, assistant professor of home economics at the university. They arrived at Yokohama about the same time. Miss Tarley, however, is now on the Pacific on her way home. It is understood that she will land at Seattle and come direct to Austin.
