Holbrook Answers Alired's Demand

Shot By Pupil

Seriously wounded but expected to recover, Miss June Mapes, 39, above, Western principal of the school, today announced that she had been shot by a pupil, O. W. "Red" Shaylor, 12-year-old pupil, who shot himself after fleeing from the school, also is expected to recover.

Was "Stood Up"

Rip Smith and wife have moved to Midland from Wichita Falls and he will be in charge of grounds and equipment of Midland Fair. Inc. Living at the plant, he will board and train horses for private owners, succeeding Red Eagle who is moving to Illinois October 1.

FDR Defends Money Spent For Big Dams

He tied in the \$51,000,000 underwriting with his program for regional development. "I am sure we will get the best results out of this program," he said.

Late News

BERLIN, Sept. 28 (AP)—Premier Mussolini and Reichsmarschall Hitler tonight told 900,000 Germans and a world-wide radio audience that peace would be maintained.

Interstate Cooperation Urged to Settle Problems

KANSAS CITY, Sept. 28.—Spirited interstate cooperation is urged by the passage of a strict Federal oil control bill. Those of us who have felt keenly about the sovereignty of the states did everything we could to prevent this seeming encroachment by the Federal Government.

Opposition to Allred's Tax Program Foreseen

AUSTIN, Sept. 28 (AP)—Governor James V. Allred appealed Monday for the legislature to keep faith with the people of Texas by levying new taxes for the state's social security fund.

Taxpayer Is Needing Rest, Tells Senate

AUSTIN, Sept. 28 (AP)—Senator Holbrook, Galveston, today replied to Governor Allred's demand for more taxes and his refusal to submit the subject of governmental economy.

'Smoke Screen' Said Raised By Governor In Message Monday

AUSTIN, Sept. 28 (AP)—Senator Holbrook, Galveston, today replied to Governor Allred's demand for more taxes and his refusal to submit the subject of governmental economy.

Wiggins 1 Dean Flows 60 Bbls. in Hour and a Half

Flow of 60 barrels in an hour and a half when casing was opened was made yesterday by Wiggins, Lawson and Hyde No. 1, Carrizo Springs, W. Co., which is represented by a built-up head. The turns showed acid water for the first 15 minutes, but it later made pipe-line oil. Operators suspended pumping when repairs to boiler being made down to 5,000 feet and has been acidized with a total of 4,500 gallons.

Specialist Gives Discussion Here Of Trench Silos

Briefly outlining and discussing the trench silo program and emphasizing the fact that the program is to be derived from the program by farmers and livestock raisers, E. R. Eudaley, trench silo specialist of the Texas A and M. College Extension Service, addressed a gathering of over 30 persons at a trench silo demonstration on Oct. 10.

History of School Course Is Reviewed By Instructor Here

Although the vocational program now in operation in Midland is "brand-new," its origin dates back to 1917, and the passing of the Smith-Hughes Act.

Lifer Cleared By Death Confession

LITTLE ROCK, Ark., Sept. 28 (AP)—Robert La Follette, assistant superintendent of the Arkansas state penitentiary, today had been advised that George B. Hays, 39, Akim, Minn., had made a death-bed confession that he murdered a man in Minnesota, a crime for which another man now is serving a life sentence.

Fiscal Officers To Urge President To Balance Budget

WASHINGTON, Sept. 28 (AP)—The administration's two fiscal officers will urge President Roosevelt to balance the budget in the next fiscal year, informed officials today, even if it requires new taxes.

Man in Gray Cap Sought as Kidnap Victim Of Chicago Victim

WASHINGTON, Sept. 28 (AP)—A police department official disclosed today that he is seeking information on the kidnaping of aged Charles S. Ross, Chicagoan.

Kansas Field Sinks Into Underground River

The bottom dropped out of Charles R. Joseph's wheatfield near Potwin, Kan., leaving the sinkhole above, 300 feet long, 250 feet wide and of depth unknown. As huge chunks of earth crumbled away, the sinkhole widened and deepened. An underground river was believed to have dissolved the limestone strata and to have dissolved the limestone.

Anniversary of Oil Discovery Will Be Observed at Ranger

RANGER, Sept. 28.—A galaxy of eminent public officials is expected in Ranger when the elaborate celebration of the twentieth anniversary of the discovery of oil is held on October 1.

Wanted a Pilot—Got a Stewardess

Midland Flying Service, of which "Little George" McEntire is pilot, secured the services of a "stewardess" at 4:20 a. m. today and the pilot was proudly announcing her arrival.

538 Bales Cotton Ginned in County

A total of 538 bales of cotton had been ginned in Midland this up to noon today, a report showed. Picking had been slowed up by the lack of persons available to gather the large crop but with the moving of many pickers here from South Texas the gins are expected to get much busier for the next few weeks.

Farmed Plane Grasshopper Caused By Landshopper

DOLGELVILLE, N. Y. (UP)—A grasshopper caused a forced landing of an airplane here. While the plane was being refueled the insect became lodged in the fuel pipe, and shortly after take-off the motor stalled. The pilot landed his craft in a field without serious damage, however.

Badges Worried Nudivists

SAN JOSE, Cal. (UP)—Perhaps the gravest question which the western nudivist convention had to solve when it met near here was just where a nudivist should pin his badge when in high school. They are "secretly" worried by the question, which has been settled.

AMERICA CONTRIBUTED WAR IDEAS TO JAPAN

Any American who feels that the Japanese have shown themselves up for a crew of greedy and unprincipled muscle-men by their unprovoked assault on China ought to remind himself that a pretty fair part of it is America's fault.

Along with the rest of the western world, America made Japan what she is today. The war in China and all the horrors that go along with it are not native growths. The orient imported them, and we Americans did our share of the shipping.

The whole recent history of Japan, for that matter, is by way of being a sharp, ironic commentary on our civilization.

Until the middle of the 19th century, Japan was living like a silkworm in a cocoon. She neither knew nor cared what was going on in the outer world. She was the "forbidden kingdom" in sober truth. Nobody could get in and nobody could get out; as a result, Japan was living in the middle ages.

Then the dikes were broken. If you remember your history, you may recall that it was the United States navy which broke them. Japan came out of her cocoon and confronted a world which had got about six centuries ahead of her.

And it was right there that the western world, including America, handed out a stone in place of a loaf of bread.

For the Japanese seem to have looked around and decided that the more advanced white nations were relying on a policy of force, pure and simple. No matter which nation Japan took for an example—America, England, France, Germany, Russia—she could not fail to see that national expansion, prosperity and greatness were being sought and won at the point of the bayonet. And the power of example is the most forceful of all arguments.

So Japan followed suit. She modernized her army along western lines. She built a great navy along western lines. She adopted a policy of imperialism along western lines. She saw what kind of game was being played, called for the same sort of cards, and set out to get all she could out of them.

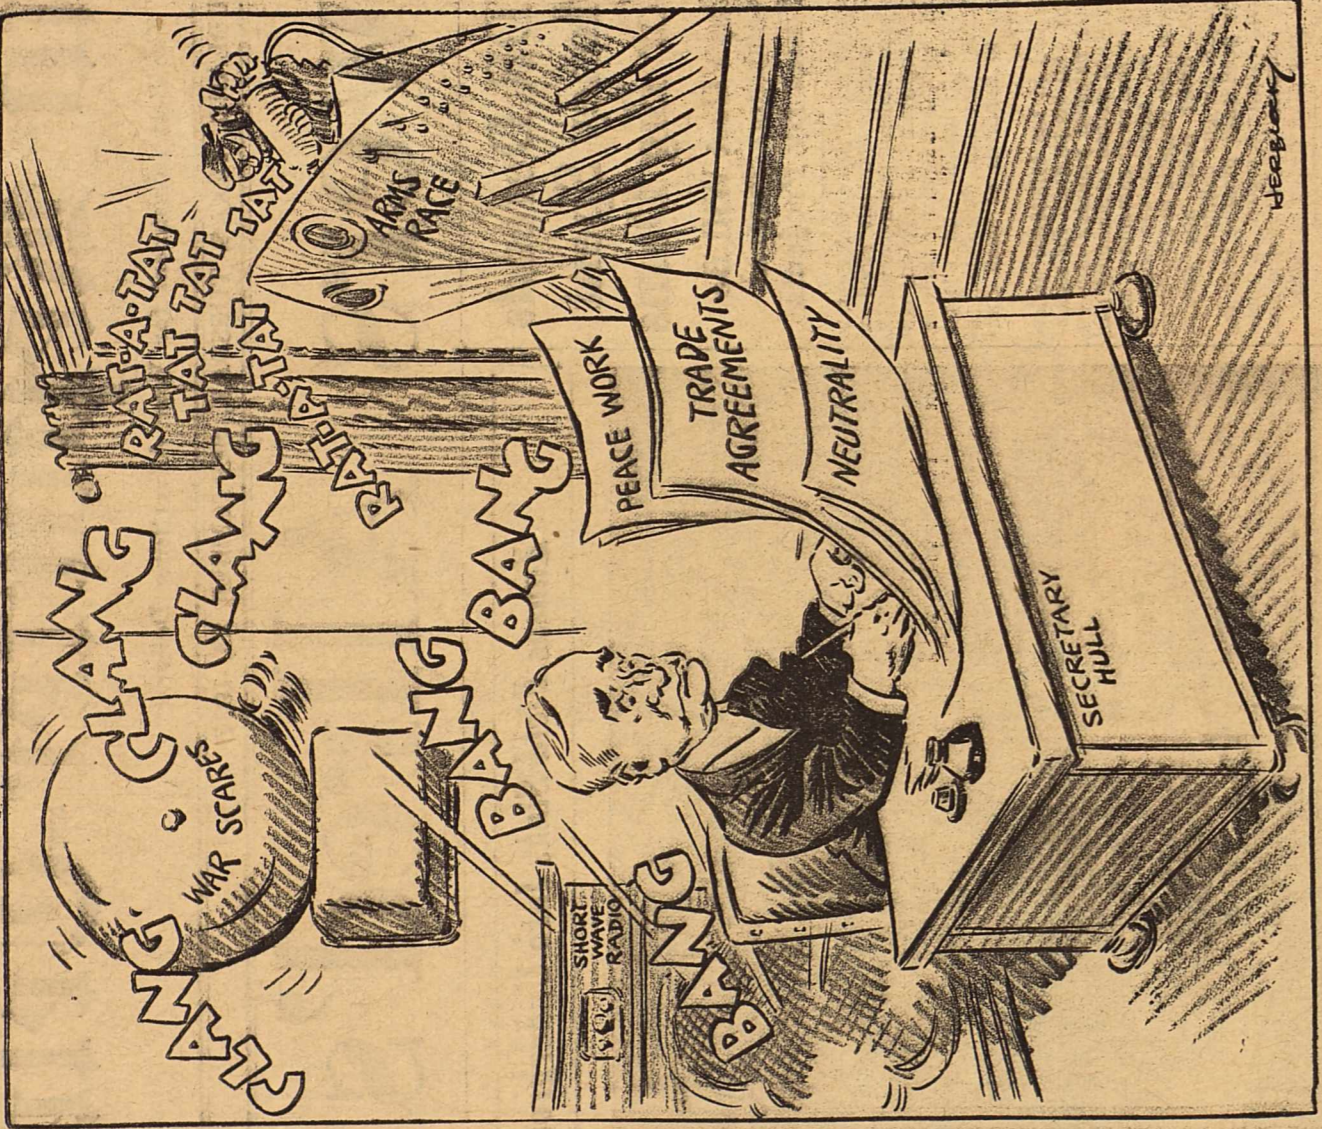

So what is happening in China today is happening because Japan learned her lesson from the western world too well. The very airplane with which Japan is scourging Chinese noncombatants is an American invention; the idea of using it on defenseless cities came from Europe; and the notion of taking another nation's territory by force may well have come—in part, at least—from our own excursion into Mexico in the 1840's.

Before we unload too much moral indignation on JAPAN, we really ought to examine our own record a little more closely.

Americans are advised there is a market for artificial fingernails in Australia, but it's too late. Our supply was exhausted in the court issue face-scratching.

An oil industry bulletin charges that a U. S. gasoline bootlegger has fled to Spain. Probably there to organize the pirate petrol.

It's A Gift

The Jawn Quack

teer good-will merchants to go to neighboring towns every time a chamber of commerce banquet, rodeo, fair or any sort of get-together is held. Midland citizens don't visit around enough. The growth of Goldsmith is having a quieting and or anxious to have visitors from neighboring towns. The Andrews fair will be held October 6. Lubbock is holding a fair all this week. At this time of year there are few people in the country and two or three men stand in the line. With center snaps the ball to a back who cannot run with it, but must pass it. Also the field is smaller, there is a regulation field. The game is more open and there is less line plunging and playing close to the ground. It sounds like a good game at those of give younger boys plenty of fun and when they get to an eleven man game, they hope some of them can catch a pass.

Fire prevention week comes up October 3-9. The Baptist church will hold a revival meeting at the same time, which isn't entirely out of line with fire prevention week. Midland needs a flock of volunteers.

declined to \$31.16. The number of farms in the United States increases from 5,659,085 in 1910 to 5,797,332 in 1920, and since 1910 the increase in the number of farms has been very small. In fact, there were fewer farms in 1920 than in 1910. Strict immigration laws cut immigrant remittances and the rapid expansion of exports of raw materials and food products as early as 1923.

The World War completely wrecked any possibility of continuing the old system on a sound economic base. In the first place, it created an enormous demand for large quantities of both agricultural products and manufactured goods which caused great difficulty for an artificial market. Land in farms increased 77,000,000 acres in the United States from 1910 to 1920 and the value of agricultural exports increased from \$1,143,000,000 in 1913 to \$3,580,000,000 in 1919.

The growth in the exports of manufactured goods has been much greater than the exports of agricultural products. The value of all exports of manufactures in 1913 was \$1,506,000,000; and in 1919 it had reached the enormous sum of \$4,480,000,000.

Europe paid for its enormous imports during the war by shipping to the United States goods which had been accumulating for over a century; and when they were exhausted, by piling up a huge debt.

In brief, the close of the World War found the United States not only without free land but facing a period of declining ability to pay for our agricultural products other than with immigrants and manufactured goods; one of which we excluded by strict immigration laws and the other by high tariffs. Finally, the manufacturing capacity of the United States, the source of the caught-up surplus, has now reached a point to buy but had enormous quantities to export.

We staved off the inevitable collapse of the old system immediately after the close of the war because of the necessity of Europe to rebuild not only its manufacturing but much of its agricultural resources sums of money to Europe with which it was able to buy our raw materials and manufactures with which to rebuild. The loans paid for our exports; and they together with installment selling in this country expanded manufacturing until 1929 when we were unwilling to make more loans to Europe or to further extend installment sales. Figures themselves tell the story most dramatically. During the ten years—1919 through 1928—our exports of all goods exceeded our imports of goods by \$8,000,000,000. The balance of our foreign customers. During the nine years—1920 thru 1928—foreign loans less gold imports amounted to about \$8,000,000,000.

Policy makers from 1929 to date have not recognized a policy which gives due recognition to the fundamental economic changes which have taken place in our change in international economic relations. Lack of adjustment in policy is revealed by the fact that our merchandise exports of goods from 1929 through 1935 exceeded imports of goods by a grand total of \$2,972,000,000. These excess exports were paid for largely by the net importation of a large part of the raw materials and commodities of the world's supply. Since American economy is a market economy, the key to profitable market economy, and a satisfactory standard of living is a ready market. A loss of a substantial por-

U. S. ECONOMY BUILT ON EXPANDING PRODUCTION OF AGRICULTURAL SALES

It is impossible to understand the agricultural problems of the United States and, much less the cotton problems, without an understanding of the background of the country.

Fundamentally, the economy of the United States was built on rapidly expanding production for sale of agricultural commodities, which or commercial agriculture, which was based on a large supply of fertile, free land in the United States. The market for this large surplus

of agricultural raw materials and rapidly expanding industrial population in the United States and Europe resulting from the mechanical revolution, the latter paying for its heavy imports of our raw cotton and food products with heavy international trade development of heavy interest payments, immigrant remittances, freight costs, and other similar items.

This rapid expansion of commercial agriculture based primarily on cotton, wheat, tobacco, naval stores and live stock products created a surplus of goods in the United States, which the government was able to use by means of higher prices, artificially created by tariffs as an incentive to develop the large manufacturing resources in the United States.

The three major pillars then upon which the greater part of the United States was built are: 1. The industrial development of agriculture based on free land, a tariff offsetting and serving in effect to distribute advantages of free land and rising land values, and the opportunity for Europe to pay for food and raw materials with remittances other than material goods.

The foundation of this system began to disintegrate by the beginning of the World War. Free land was practically exhausted in the 1890's, by the net importation of a large part of the raw materials and commodities of the world's supply. The average price of farm land was \$18.95 per acre; in 1900 it was still only \$19.81; but by 1910 it had advanced to \$39.10; and in 1920 it had reached a peak of \$69.38. From 1920 to 1935 average land values

Trained Ship Officers Inadequate for Japan

TOKYO. (UP) — Japan is under going a serious shortage of trained ship officers. In a few years the nation has rapidly expanded its shipping activities, mostly in the line of freight vessels. Nautical institutes and technical training schools have not been able to turn out graduates fast enough to fill available jobs.

Recently newspapers have run stories sharply illustrating the lack of men. Lists of engineering schools and the number of men in their graduating classes were printed, and immediately following the number of graduates who are already spoken for by various concerns in maritime cases jobs are concerned, as far as three years in advance.

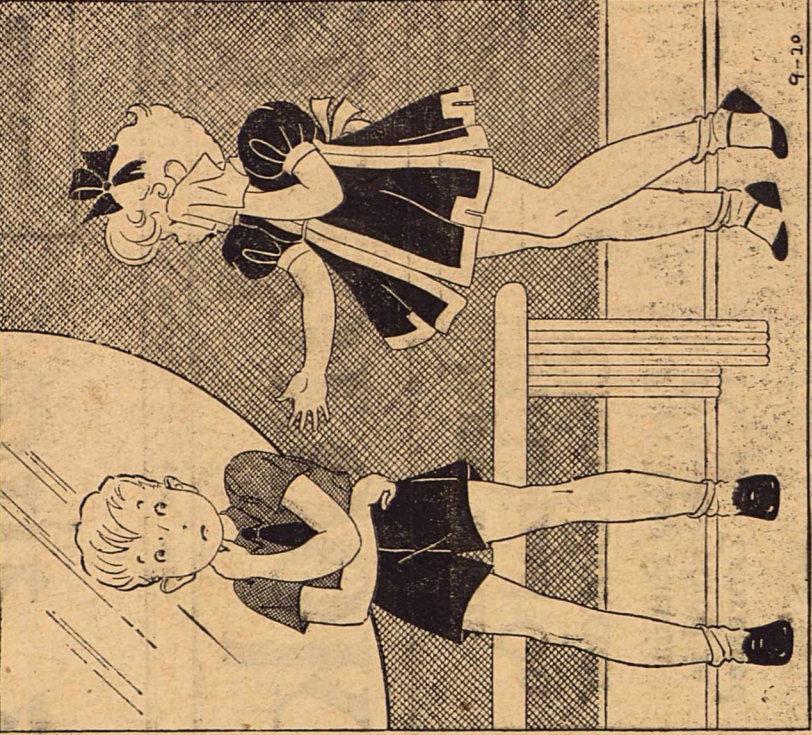

tion of the market, must necessarily result in lower incomes, unemployment and unsatisfactory conditions in general. The fact is, most of the trouble with the American cotton industry may be summarized in a few words: "The supply of cotton is inadequate; the demand is excessive." The United States, September 1, were 19,790,000 bales compared with 15,776,000 bales last year and 17,960,000 bales two years ago. This is the largest supply on a September 1 since 1922—the bottom of the depression—when the supply was 20,170,000 bales.

The New Orleans spot price was 7.92 cents at that time and the buying power, or index, price, was equal to 12.14 cents; today, September 25, the actual price is 8.44 cents, and the buying power price is only 9.64 cents. According to government figures, the buying power index is 11.15 per cent lower than at any time during the depression except for September and October, 1921, and May and June, 1922, when we had an all-time high supply of cotton in the United States of 21,850,000 bales for the year 1921-22.

The good price of New Orleans spot cotton now stands at 11.15 cents compared with the lowest price during the depression of about 1.16 grams per pound in June, 1922.

According to averages over the past seven years, each change of 100,000 bales in the supply of cotton should cause a change of between 1¢ and 1.5¢ in the spot price; this year the New Orleans spot cotton price is due to go close to 8 cents, based on these factors alone. These figures do not take into account the unprecedentedly large foreign crop or war demand. The Bureau's supply-price chart on the about 9 cents indicates a price of 32's twist yarn in Manchester and the price of cotton in Liverpool was 229 in August, compared with 178 in August, last year. The price margin, August 1925, was 44¢. This indicates a strong demand for cotton at least in England.

Mary Scharbauer Circle Meets With Mrs. J. M. Prothro

Mrs. J. M. Prothro was hostess yesterday afternoon to the Mary Scharbauer circle of the First Methodist church, with Mrs. D. W. Young, chairman, presiding.

Mrs. N. G. Oates gave the devotional. Mrs. Finkling gave the life and a brief history of the church and Mrs. Cliff M. Epps discussed interesting facts of the Moslem woman.

Plans were made for the study course that is to begin next Monday. After a closing prayer by Mrs. E. F. Cowan, the hostesses served a refreshment plate. Mrs. E. M. Haygood, Mrs. E. M. Epps, J. M. Young, and Mrs. H. A. Oates.

New Fall Innovation

The Tiny Pompon Chrysanthemums Are Set Off Well Against the Black Handbag.

A smart innovation for fall makes use of fresh flowers on the black handbag. They are particularly lovely when carried with a tan or brown outfit. A small cluster of tiny white flowers is very dressy on a black bag.

Flowers can be easily fastened to the bag. In this case of cloth material, the bag is made of leather or other tough material a clip can be used with a beaded bag without damaging it.

Announcements

WEDNESDAY.
The Midland County Health Board sponsors a health program each week, from 11:00-11:15 a. m., broadcast over KRLH. Tune in.
The meeting of the Play Readers Club scheduled for Wednesday has been postponed.

THURSDAY.
The Twelve-ite club will meet at 9:15 Thursday morning at the home of Mrs. W. F. Knight, 1002 West Missouri.

The Home Arts Club will meet Thursday afternoon with Mrs. H. B. Dumagan, 210 South Pecos.

The Ace High Club will meet at 10 o'clock Thursday with Mrs. Nelson, 905 West Louisiana.

Mrs. J. M. Haygood, 708 West Kansas, will entertain the Beth Amigos Club Thursday at 2:30.

The Midland County Museum, in the courthouse, will be open from 2:30 until 5 o'clock. The public is invited.

The Thursday Sewing Club will meet at the home of Mrs. R. L. Stewart, 706 W. Illinois.

FRIDAY.
The Belmont Bible Class will meet at the home of Mrs. W. L. Pickett, 905 West Missouri.

SATURDAY.
The Midland County Museum, in the courthouse, will be open from 2:30 until 5 o'clock. The public is invited.

The Children's Story Hour is each Saturday morning in the children's library from 10-11 a. m.

At the Library

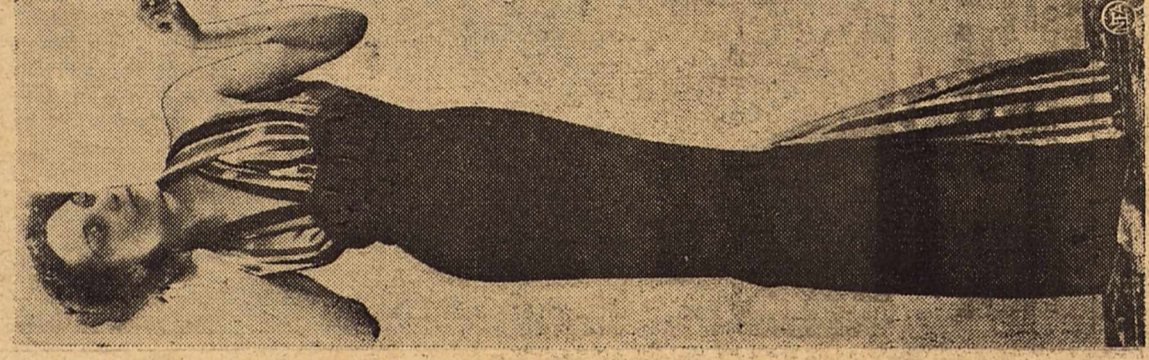

The Mott Family in France, by Donald Moffatt. The Motts were a family of the past, but they are not dead. They are still with us, and they are still living. They are still with us, and they are still living.

The Langworthy Family by Elizabeth Coburn. The Langworthys are a family of the past, but they are not dead. They are still with us, and they are still living.

The story of the two Pierce sisters, beautiful, charming, and whose goal was a millionaire playboy, and the lovely Pamela who followed at the pure white light of her love.

The Langworthy Family by Elizabeth Coburn. The Langworthys are a family of the past, but they are not dead. They are still with us, and they are still living.

Zestful Style

Beautiful, red, blue, orange, and purple, pink and mauve, and the high bodice and laced back bare in this Marcell Rochas slim sheath gown.

years as a domestic servant, and then later she entered it in a Finnish prize novel competition, winning the Helsingfors Prize. It has been published in nine different countries.

Children of Strangers, by Lyle Saxon. The rigid distinctions that existed between the whites, mulattoes, and Negroes in the deep south during the 1890s are shown in this personal story of Fame, one of the proud Louisiana mulattoes who were always free and had inherited land from their French ancestors, ancestors who as cultured and as rich as the white planters. "A sincere and moving book, quietly written, well done." (Booklist, A. L. A.)

The Nutmeg Tree, by Margery Sharp. Julia had hardly let what might be called an exemplary existence, since she had been married sixteen years later, she received a letter from Susan asking for aid, she left no stone unturned to reach her, and succeeded not only in solving Susan's problem, but in finding romance for herself, as well.

The first Rebel, by Nell H. Swanwick. Being a true narrative of America's first uprising against the English military authority and an account of the first fighting between armed colonists and British regulars, together with a biography of Colonel James Smith. "About ten years before the American revolution broke out in Pennsylvania, uprising against the British troops. Later captured by the Indians, Smith was kept several years later. These and subsequent bloodcurdling adventures are recounted with a fictional veneer to make a vigorous, fast-moving, and absorbing tale." (Rustler, H. Spencer Lewis; Giving a complete history of the Revolution.

Nationally Known Artists To Be Featured In Series of Concerts

Rose Palmer, mezzo-soprano, will be presented on the January program, along with Mae Gilbert Reese, pianist. Another of those "dreams do come true" girls, Miss Palmer was discovered by a Chicago music critic who attended a Gilbert and Sullivan opera at Coe College, the vocalist had a part. So enthralled was he with her voice he sought her out and assisted her in receiving the best musical instruction. Three years of study have borne out his prediction of her ability and following this season's concert she will return to New York to study with the Metropolitan Opera.

Her accompanist, Miss Reese, has a masculine style of playing which is quite a variance to her striking blonde beauty. A brilliant interpreter of Liszt and Chopin, whose compositions are always included in her programs, she never fails to bring her audience a new appreciation of those masters. Subtle and carefully pedaling mark all of her work.

A woman believed to be the world's greatest trumpet soloist is Grace Adams East, who will appear on the February concert. She recently appeared as guest soloist with the U. S. Navy band when they broadcast from Washington, D. C. A leading newspaper said of her: "The music she plays is a masterpiece of technique and style."

Adams East and the trumpet-instrument of soldiers and of Gabriel, the male angel—as well as and better than most men—

The fifth and final concert brings John DeBois, a bass baritone, who is a newcomer to concert audiences. Flying his own amphibian plane several times on Lake Ontario last summer, he came to the attention of the Metropolitan Opera for instructions after beginning his training in New York City under Ethel Cove Cole. Flying visits to friends led him to Homer Moore, a well-known voice coach, under whom DeBois has perfected his repertoire.

"Scarlet Fever" Is Subject of Paper

"Scarlet Fever" will be the subject of Mrs. W. B. Chapman's talk Wednesday morning on the weekly health program. She has been talking each week over KRLH from 11-11:15 on a communicable disease. There will be a transcribed musical program, with Leslie Hale accompanying.

The Midland County Health Board sponsors this program.

Members will receive a Bible if they attend Sunday School for six consecutive weeks. Mrs. Frances Sjaal, president, is the teacher.

Present were Glennia Jones, Elma Jean Noble, Edith Fay Dublin, Doris Jean Shockley, Helen Kirk, Bobby Stalworth, Virginia Wright, and Doris Lynn Pemberton.

Mother Nature has a Special Recipe for making FOLGERS Different

PUT CHOICE COFFEE PLANTS IN EXTRA RICH SOIL ON VOLCANIC PEAKS

ADD PLENTY OF MOUNTAIN OZONE AND A DASH OF TROPICAL RAIN

EXPOSE TO DAZZLING MOUNTAIN SUNSHINE TILL THE COFFEE BERRIES ARE BURSTING WITH FLAVOR

FOLGER'S HAS SO MUCH EXTRA FLAVOR YOU USE 1/4 LESS

LIKE DRIP COFFEE? You'll like it better made with Folger's Drip Grind. Designed especially for drip-makers, Silex and other glass coffee-makers. Never crushed or mashed—but scientifically cut to give far more flavor!

Not Just a Different Brand—But a Deliciously Different KIND of Coffee —It's Mountain-Grown

You could taste dozens of different brands... and find Folger's the only coffee that has a distinctive flavor. The reason is simple. Most brands taste alike because they all use the same kind of coffee—the thin, flat-tasting coffees grown in the lowlands. But in Folger's you get a different kind of coffee—the thrilling, racy tang of coffees that are mountain-grown!

The coffees in Folger's come from tiny mountain-top plantations in Central America! A small region that's a coffee paradise... With an amazingly fertile volcanic soil, abundant rains, and the purest mountain air and sunshine! Up there nature grows an extra-keen flavor and wuey-tang into the coffee berries! A flavor so rich, and wuey-tang they use 1/4 less of Folger's and still get better flavor plus their coffee savings!

Try Folger's just once—and your taste will tell you it's the different coffee you've been looking for!

Twenty-five Attend Auxiliary Service

Mrs. A. P. Shirey presided at the inspirational meeting yesterday of the auxiliary of the First Presbyterian church, with Mrs. T. E. Wilton in charge of the program. The program was as follows: "Enlarging Home Horizons," Mrs. W. J. Coleman; reading, "Home," (Edgar A. Guest), Miss Lucille McMullan; violin solo, Mrs. Tom Sealy.

Announcement was made of a rummage sale to be held by the auxiliary on October 30.

Plans were made for the district meeting to be held in Midland on October 7, and entertainment of the representatives of the P. Y. S. on October 10.

A social hour followed the program, with Mrs. Fred Turner, Mrs. W. P. Knight and Mrs. Duke Kimbrough as hostesses. There were twenty-five present.

Ruth Class to Have Party Tonight at 8

The Ruth Class of the First Baptist church invites all members and prospective members to a social given at the Midland Country Club at 8 o'clock tonight.

Mrs. Norwood Is Hostess to Circle

Mrs. D. C. Norwood was hostess to the women's circle of the First Methodist church at the home 2104 West Brunson, Monday afternoon. Mrs. Barron Kidd gave a review of the book "Return to Religion," and Mrs. Karl Rathir gave a talk on "The Virgin Mary."

The hostess served a sandwich plate to the following: Mesdames Childers, T. N. Roberts, Dallas Dale, O. B. Holt, M. C. Uimer, Barron Kidd, T. C. Younger, S. P. Gathier, Reese Cleveland, A. B. Cather, Stanley Morian, and Tom Rambolt.

Please remember to get your old clothes ready this week. Many people are ready to get their old clothes cleaned to collect them or phone 159.

IMMEDIATE IMPROVEMENT

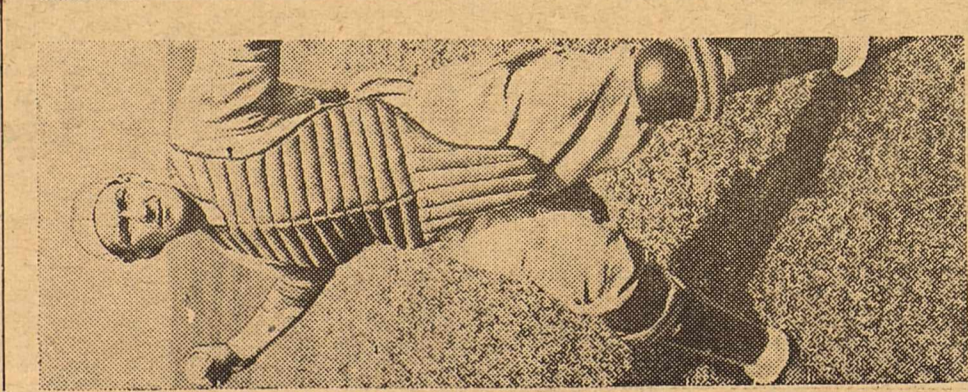

The school boy and girl whose eyes are fitted with correct eyeglasses, show immediate improvement in their studies. How about your child?

Maranville, Davis, Hafey, O'Doul, Hartnett Are Managerial Nominees

By RICHARD McCANN
NEA Service Sports Writers
who said he might finish first this year, was right—except for the tense. As things turned out, he was finished first.

Charlie, it seems, made the age-old mistake of asking on, pounding on the desk, and going the boss just when he stood in the bread-line, looking for a job.
Of course, it won't be long before he'll be having some company, but there won't be as many major league managers fired as was expected a few months back.
You see, the Brooklyn surprise happened, including the Philadelphia Grimes another year. Charles Grimm was given another contract by the Chicago Cubs; and there's talk now that Mr. Pie Traynor's goose will not be put on the stove for one more season at least.
Two months ago the future of these respective clubs was about as bright as Isidore Abraham Finkelstein's in Berlin.

Move Over, Charlie.
Here Comes Wilson.
However, Mr. Dressen can be sure of getting Jimmy Wilson "fringed" into the employment office any day now and take a seat on the bench alongside him.
And they're still saying, as usual, that Steve O'Neill's job at Cleveland is no more permanent than a wave.
There is a strong possibility of Chicago's Bucky Harris in Washington.
There is absolutely no hope for Wilson in Philadelphia, but not love their brothers there—but not the other day came right out and announced, Jimmie, in a single sentence, "The material is optional on my part." "Is there if Manager Wilson can only bring it on." But if Jimmy is given his involuntary resignation as manager of the Phillies he won't be out

Virgil Davis

Walter Maranville

Gabby Hartnett

The shifting tides of fortune and public sentiment or whatever it is that causes the firing and hiring of major league managers may wash these four fellows into pilot posts before another baseball season rolls around.
Possible successors to Charlie Dressen are Rabbit Maranville, top center boss of the Montreal Royals, and Frank O'Doul, infielder, San Francisco's Seals. Manager, may be hired by the Bees, Indians, Phillies, or Reds.

been developing major leagues out of Cincinnati newspaper boys think that he will be hired as Dressen's successor.
Five others may get the same job. Catcher Virgil (Spud) Davis or Chick Hafey, veteran outfielder, may be elevated to the major league. Ditto for the catcher by the name of Gaby Hartnett, who has done a fine job as manager of the Montreal Royals, or Frank (Lefty) O'Doul, who has

settled Bay country should a successor for Bill McKechie be needed. And it does look as though Bill will go to Cleveland to take over Steve O'Neill's thankless job.

Lefty and Rabbit Maranville seem to be the best spot for either of these two colorful, deserving gentlemen. O'Doul, because he's Irish, and Maranville, because of his gallant service with the old Braves, would be acclaimed up in the Massachusetts open after the world series.

Bierman, Thornhill Wade, Bible, Little Contribute Weekly

THE greatest line-up of coaches ever assembled will write football for The Reporter-Telegram through the NEA Service through the gridiron campaigns.
Go down country coast, and coach up five abler, wiser, more interesting gridiron guides than will be telling Reporter-Telegram readers the who's who, and what's what on the various fronts of the national pugilist warfare this season.
Bernie Bierman, director of the University of Minnesota, will cover the Western Conference, or as it is better known, the Big Ten—and, of course, the multitude of other important elevens in his section.
Wallace Wade, the shrewd Scotsman who has never been defeated in three invasions of the college teams of Duke University, will cover the National Championship, will tell you all about the southern and Southeastern Conferences, and Dixie's other powerful clubs.

Bible's Word in Gospel
Each week will write one article a week during the season, diagnosing the big games and developments in his section, acquainting you with incidents on and off the field, and they will take you on the bench to the star players, explaining amusingly and authoritatively "How to Watch Football" and "How to Watch Football" the players' dressing rooms. Follow them. And you will find yourself enjoying the next game more and more.

But The Reporter-Telegram has more to offer its readers. In addition to the give mighty men, of the sports pages will carry from time to time stories by Harry Grayson, NEA Sports editor, and Richard McCann, of the NEA staff, who will cover the big games.
Sketches of Winning Plays. THEN, too ALF KRENZ, staff at-

Sobriety Test Upset, Motorist Can't Spell
DALLAS, Tex. (UP)—One traffic violator here, being tested for inebriation, found a way to "beat the rap."
When asked by Deputy Sheriff J. E. Butler to write his name on a card while taking a sobriety test, the motorist replied: "I can't. I can't spell it." roared the deputy. "You mean you can't spell your own name?"
"Nope, and I'll bet you can't either," the inebriated motorist said with a grin.
Deputy Butler scratched his head, and was forced to admit that he was stumped. The motorist was released.
The motorist was released six miles across the intervening Bay of Fundy to the sound truck waiting on the island of Grand Manan.

Songs of Birds Radio Recorded
ITHACA, N. Y. (UP)—The first attempt to record the voice of any bird on film by means of radio has been pronounced successful by ornithologists at Cornell University, where the first records ever made of the voices of Atlantic petrels were tested.

Albert R. Brand of the Laboratory of Ornithology at Cornell, sought the petrels on their own doorstep. With the aid of an assistant, Brand traveled in his sound truck to northern Maine where the voices of Atlantic petrels were tested.
Brand of the Laboratory of Ornithology at Cornell, sought the petrels on their own doorstep. With the aid of an assistant, Brand traveled in his sound truck to northern Maine where the voices of Atlantic petrels were tested.

Grand Manan and arrived within six miles of Kent Island, where Bowdoin College maintains a biological laboratory.
A mile from the laboratory, among the rocks on the outer slope of the island, Brand found a colony of Leach's petrels in burrows which they dug in the loose soil. When he got an accurate bird census, but being unable to get the sound truck to the island, a mile from the laboratory, he had a short-wave radio station which keeps the laboratory in touch with the rest of the world, to the petrel colony.
A sensitive microphone, with its pack selected, was attached to the end of the telephone line. When the petrels gave their croaking notes, the microphone picked up the songs and with the aid of an amplifier they were transmitted to the radio station.

France Sides With Great Britain To Guard Own Precious Life Line

If present tension in the Mediterranean leads to war, the French navy will not be caught unprepared. Here is the 24,500-ton battleship Dunkerque, which France built as an answer to the German "pocket battleships" of a few years ago and which is one of a group of France's modern capital ships.

This is the last of four stories by Milton Bronner on the situation on the Mediterranean which has brought acute war-tension among several nations.

BY MILTON BRONNER, NEA Service European Staff Manager.

LONDON.—Like England, France has a "life line of empire" running through the Mediterranean. For that reason, she has been in the vanguard standing together in the new crisis that is developing on that languid sea.

England's life line—the route to India and the Far East—runs from Suez to Gibraltar. Along this line moves to incalculably rich and vital traffic on which the empire's good health depends.

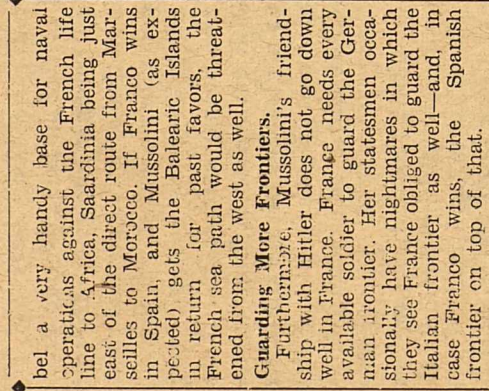

France's life line—the route to the Mediterranean's dominant power looks to England's like a direct threat to this life line.

The French life line goes north and south—from Morocco and Algeria to France. In case of war, France must rely on her great African empire for her main source of many-war materials.

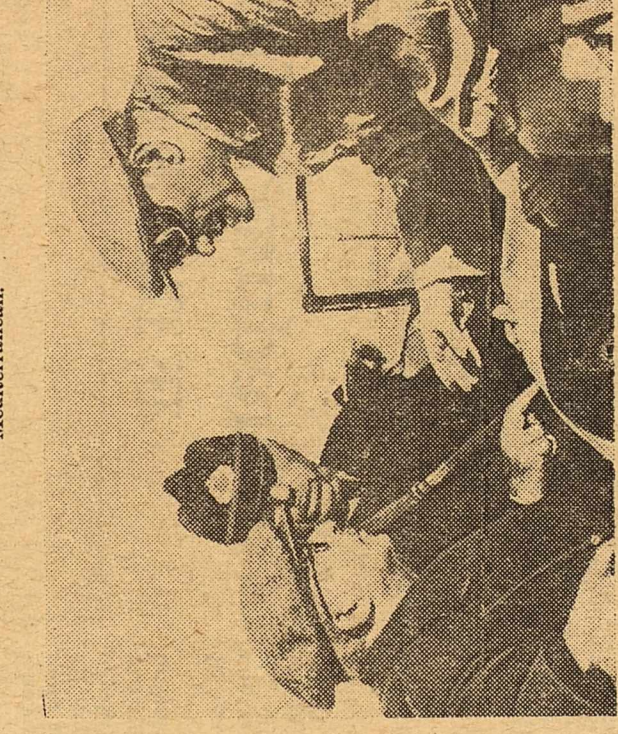

Two years ago, the then premier of France, Pierre Laval, tried to break the French life line by attacking Mussolini. He kept on good terms with London by agreeing to the British demand for sanctions against Italy in the Ethiopian war; but he remained in Mussolini's good graces. It was said, by whispering press sources, that Laval would never have succeeded in doing this.

His successor, Raymond Bism, changed the French attitude. He took up the cause of Europe, and he saw their interests in the Mediterranean as parallel. Both want the sea kept open as a free highway; both, furthermore, have been alarmed by developments growing out of the Spanish civil war. So both Paris and Rome are now united in their opposition during the recent submarine crisis.

The French position is easy to understand. Italian Sardinia could

A strong submarine flotilla is one of Mussolini's most potent weapons in the Mediterranean. These are two crack Italian submarines, the Balbo and the Scipione, which are being sent to the Black Sea in defiance of Russia's charges, that have been sinking merchantmen in the Mediterranean.

Turkey's "strong man," Dictator Kemal, keeps a wary eye on all Mediterranean developments and maintains an army corps at the recently reformed Dardanelles. He is shown here, at right, conferring with aides during recent Turkish army maneuvers.

now close ally of Britain, last year signed a treaty giving England and the 400 all-planes on guard duty at Suez, and granting also the right to use the ports of Alexandria and Port Said for naval bases. The presence of Italian troops in Libya and Syria, and the fact that Italian officers and planes are to be concentrated at Mesa Matruh, in western Egypt.

Turkey is also deeply interested in any possible conflict in the Mediterranean. Turkey, spends about half the country's revenue on its armed forces. He recalls that during the world war Italy was promised by the British, along with a slice of Aden, that Italy's dreams of an empire in Asia Minor have been forgotten.

Friendly With Russia. As a result, Kemal recently negotiated a treaty with the Soviet Union, giving Turkey the right to station all-planes on guard duty at Suez, and granting also the right to use the ports of Alexandria and Port Said for naval bases.

The Greek bases at Salamis and Salamis, together with the numerous harbors and hiding places among the Aegean Islands, constitute a strategic network of great value for all operations in the eastern Mediterranean. An Italo-Greek alliance would be advantageous to both sides. The Greek bases at Salamis and Salamis, together with the numerous harbors and hiding places among the Aegean Islands, constitute a strategic network of great value for all operations in the eastern Mediterranean.

What Greece might do in case of a Mediterranean war is a problem of great interest to England, more or less friendly with England; on the other hand, she enjoys close commercial relations with Germany. Italy is not popular with the Greeks, who still resent Italian seizure of the once-Greek Dodecanese Islands and Rhodes, and remember Mussolini's decade-long occupation of Yugoslavia. It is another Mediter-

Magnesium	0.9 " " "

A NOTE FROM OUR CHEMICAL ANALYSIS

"In comparing it with the analysis on the raw water which we made for you and which you have in your files, note that the turbidity, which would be the color in the water, has been fully eliminated. Note that harmful salts such as calcium and magnesium have been replaced by harmless salts indicated by the sodium. Note also that the pH or alkalinity of the water has been increased to 8.2 which is strongly in favor of the water."

We invite you to visit our plant at 207 South Pecos, to see the equipment we have assembled for the softening and purifying of this water, and to check the complete analysis of our product.

All soda water sold by the Midland Bottling Co. is made with this water.

What About Your Children's Teeth?

After months of research by leading chemists throughout the country we have been able to produce a water which we guarantee to contain less than one part per million gallons of Flourine (the element responsible for the dark stain on children's teeth). Leading physicians, dentists and chemists unanimously agree that 1 p. p. m. is harmless to children's teeth.

AN ARTICLE BY THOMAS DUTTON, M. D., TAKEN FROM THE "MEDICAL TIMES"

I believe many physicians will agree with me that drinking hard water daily is the origin of several diseases, directly or indirectly. I have frequently laid stress upon this fact in articles in medical journals and also in published works during the last quarter of a century.

There is little doubt that in certain subjects the constant ingestion of hard water frequently brings on a state of chronic constipation, the "bug bear" of the present day, because retained matter in the intestine acts as a culture ground for various pathogenic bacteria. These toxins are gradually absorbed into the system, producing auto-intoxication. Toxins so absorbed when carried into the blood stream cause various diseases of the digestive system, and predispose to gout, rheumatism, and kidney complaints. It stands to reason that water loaded with carbonate of lime cannot act as efficiently as it should, as a cleanser of the digestive tract by absorbing the poisons and carrying them out of the circulation through the kidneys. Soft water can cleanse the system in this way, and does, if drunk at proper times and in regular quantities.

I have frequently told my patients that they cannot be cured of gout, rheumatism, and many forms of indigestion, if they continue to drink hard water, and have often had the satisfaction of observing that those who took my advice and used only soft water for drinking were soon relieved of their spasmodic aches and pains.

I have been drinking about a quart a day and certainly have been much more free from those unpleasant shooting pains all over the body, which tend to remind one of those spiky crystals of oxalate of lime and uric which we were fond of gazing at through the microscope in our student days. The bowels have acted more regularly and normally.

In many of the southern watering places where the water contains an abnormal quantity of carbonate of lime, drinking the water soon brings on in some subjects such chronic constipation that all the tonic effect of a bracing climate and a rarified pure air are negated by the torpid condition of the bowels and digestive organs.

War Games Get Hot; Santone's Capture Threatened By 'Reds'

PORT SAM HOUSTON, Texas. Major General James K. Parsons, commander of the army's proposed new infantry division, now under construction at Port San Houston, today sent a force of approximately 125 officers and 3000 enlisted men into the 70,000 acre Leon Springs Military reservation to stem the advance of a hostile "Red" force threatening San Antonio from the northwest.
