Behind the Scenes in Washington

Editor's Note: The opinions expressed in this article are those of Mr. Dutcher, NEA-Reporter-Telegram Washington correspondent, and are not to be construed as expressing the editorial policy of The Reporter-Telegram.

WASHINGTON, June 23. — No "beginners" working for as little as one has yet offered any worth-while estimate of the number of workers whose pay is likely to be raised under the wage-hour act. Those closest to available facts, however, think the number will be much larger than most guessers and commentators have supposed.

Labor leaders who at first snorted in contempt when an initial 25-cent minimum wage was proposed began to look into the facts and were surprised at indications of widespread effectiveness. The fact that minimum wages may be set at anywhere from 40 cents an hour in individual industries might conceivably add one or two millions to the number of workers benefiting. Garment industries have many

Low moans and groans are coming from the U. S. Housing Authority publicity office. For months the boys there have sought to educate the public as to the distinction between the U. S. H. A., whose administrator is Nathan Straus, and the Federal Housing Administration, whose administrator is Stewart McDonald, whose title is Federal Housing Administrator. Time and again these agencies have been referred to by the wrong names and the PHA publicity boys haven't liked it, either. But just now has come Congressman James I. Farley of In-

Prompt Ambulance Service

SEVING MIDLAND SINCE 1891

ELLIS FUNERAL HOME Phone 105

Stamps and Coins

diana, friend and admirer of U. S. H. A., with a fine ecomium and defense of the Straus outfit inserted in the Congressional Record and designed for distribution. And Farley entitles his blurb: "The National Housing Administration."

Wages lower than the federal minimum aren't particular to the south. About half of Deiaware's factory workers were found earning less than \$10 a week, about half of Connecticut's knickers-trousers factory workers less than 30 cents an hour and about 28 per cent of District of Columbia working women less than \$10 a week. These are only random samples. But they seem significant.

POLITICS IN MARYLAND. Congressman David J. Lewis, seek-

ing to unseat the aristocratic and socially impeachable Senator Millard Tydings in Maryland, went to work in the coal mines at the age of 9. Lewis is possibly the only senatorial candidate this year who actually was born in a log cabin—in Center county, Pa. He educated himself and eventually made higher mathematics his hobby, reveling in problems of geometry and trigonometry. He has fathered, wholly or partly, parcel post, the Guffey Coal Act, the Social Security Act and the original New Deal federal relief bill.

letters side by side and carefully worked it out.

Wheat Growers Face Poser on Decision

COLLEGE STATION. — Under the new farm act, a wheat loan must be offered at the rate of 52 and 75 per cent of parity if the June 15 price of wheat is below 52 per cent of parity or the July crop estimate is above normal domestic and export needs. It is generally agreed that the loan will be offered on both counts.

With the parity price of wheat at \$1.15, the loan may vary from 60 to 85 cents per bushel. The loan rate on wheat this year will have a bearing on the price of the entire crop," Morgan said, "so we must think not only about the 200 million bushels put up for loans but also about the price on the other 750 million bushels of wheat. We have a carryover of around 200 million bushels, and it is estimated that the winter wheat crop will be 760 millions and the spring crop another 250 million. That gives us a total supply of about 1,200 million bushels.

The normal domestic consumption and export of wheat is around 750 million bushels a year, so we will have left some 450 million bushels to store. We can figure on exporting between and 80 and 100 million bushels. The prospects for the export figure holding up are pretty fair, but if we put the loan far above the world price of wheat, we will shut off our exports. That would mean that we would face a carryover of some 500 or more million bushels of wheat in 1939.

Visual Instruction Taught at Texas U.

AUSTIN, Texas. — Popularity of the course in visual instruction taught at the University of Texas by Dr. B. F. Holland, assistant professor of educational psychology, is considered by university educators as an indication of the development of this phase of teaching throughout the country. The university is the only institution in Texas which at this time offers such a course, whereas in Pennsylvania there is a state law prescribing a course in visual teaching aids as a requirement for a degree in education, and 44 colleges in that state offer such a course.

CORNS CURED

World's easiest corn cure. Corn-Off guarantees money back unless corn lifts off in 10 minutes without pain. No acid burn or soreness. \$50.00 REWARD if you don't say so. PALACE DRUG CORN-OFF

I'll have to admit that the sports editor outgessed me on the outcome of the fight. A couple of weeks ago, he predicted the negro would win.

I believe the big fights are just as crooked as the big wrestling matches and "big shots" of the game couldn't afford to let Schmeling take the championship back to Germany with him and keep it there. Not with another \$1,000,000 gate in sight when Louis and Baer fight this fall.

Thanks to somebody who didn't sign their name, I don't have to think up anything else for this column because I can use their letter. Here 'tis: Your reference to Miss Ada Fum

concrete to the abstract. Today every progressive teacher uses a variety of graphs, charts, and other illustrative material.

Perhaps the greatest impetus to visual instruction was given by the perfection of the 16 millimeter motion picture film and the development of a 16 mm. portable projector. Dr. Holland asserted. In his course teachers and prospective teachers are taught how to produce and use their own materials. Such aids as excursions, charts and diagrams and maps, flat pictures, and blackboard work are stressed.

Last spring the State Department of Education called a conference on visual instruction, which created considerable interest, he added. Since then the department has presented a number of radio programs emphasizing this method of teaching. The University of Texas has been pioneering in this field for many years. The first course in visual instruction was offered years ago by the late Dr. J. J. Weber. Dr. Holland took over the course in 1934. The university also operates a Visual Instruction Bureau as a branch of its Division of Extension, through which sound and silent motion pictures, slides, maps, charts and other visual aids may be obtained. This bureau has vastly increased the extent of its service to the state in recent years, Dr. Holland said.

Arrange Short Course For Boys and Girls

COLLEGE STATION. — About 2,500 boys and girls from Texas farms and ranches will have the undivided attention of Texas A. & M. College July 6 to 9 when the Junior section of the annual Farmers' Short Course will be held at College Station. This is the first time that adult and junior Short Course visitors have met on different dates, according to Roy W. Snyder, Short Course general chairman. The arrangement has been made because the yearly increasing attendance at Short Course has taken place at the same time when summer sessions of the College have also been growing. Each year it has been harder to make room for both groups and this year it was impossible. General assembly every morning and the night programs will be joint meetings of the boys and girls, with

lently with the head and legs. The disease may be easily confused with other illnesses and only a veterinarian can distinguish it with certainty. "Blind staggers" is caused by a virus which may be transmitted by mosquitoes, flies, and other blood-sucking insects. It is therefore advisable to stable work animals when not working them, and in every way to protect them against insects, Snyder said. Horses and mules that begin to show symptoms of the disease should be isolated from healthy animals and protected from biting insects. Where possible, Snyder pointed out, such animals should be placed in a screened inclosure.

New Vacuum Spray One of the newest vacuum cleaner models is provided with a separate spray attachment especially useful this time of year for treating garden. Furs, furniture and rugs with anti-moth preparations. The attachment is inexpensive, easy to attach to the vacuum and gives out an effective, penetrating spray.

**Triple-Hostess Gift Tea Compliments Bride-to-Be**

Complimenting Miss Doris Tidwell, bride-elect of John W. Rhoden Jr., whose marriage is scheduled for Saturday, a trio of hostesses, Mrs. W. F. Prothro, Mrs. Roy Tillman, and Mrs. T. L. Beauchamp, entertained at the home of the latter, 701 S. Colorado, with a gift tea Wednesday afternoon from 4 o'clock until 6 o'clock.

Roses and other cut flowers were used in the party rooms. Mrs. Tillman presided at the register table where guests signed their names and wrote advice and good wishes for the bride on a scroll.

No set program had been arranged and guests, many of whom have known the honoree all her life, spent the tea hours in conversation and in inspecting the gifts which were displayed about the rooms, gifts which ranged from silver to china to kitchen utensils and linens.

Cleo Tidwell, younger sister of the bride-elect, and Joyce Beauchamp presided at the punch bowl, serving a party plate to guests.

The invitation list included: The honoree, Mmes. Jimmie Smith, Ernest Neill, Clinton Dunagan, J. C. Jones, J. W. Rhoden Sr., J. M. Livingston, N. E. Beauchamp, John E. Mills, Bonner, Lacy, A. C. Caswell, Kelso Adams, Harvey Kiser, Forest Hunter, John Andrews, W. T. Beauchamp, Marvin Beauchamp.

Mmes. J. M. Flanagan, C. C. Watson, E. J. Voliva, Ray Gwyn, S. H. Gwyn, D. E. Holster, E. V. Guffey, Phil Scharbauer, Miss Kathleen Eiland, Mmes. J. F. Barber, Everett Klebold, Charles Brown, W. T. Tatton, B. F. Haag, J. S. Tidwell, E. L. Prothro, J. L. Tidwell.

Miss Katherine Beauchamp, Cleo Tidwell, Joyce Beauchamp, Mmes. Jerry Phillips, E. B. Patterson, J. S. Allen, J. L. Barber, Miss Lydia Watson, Mrs. S. L. Alexander, Miss Mittie Lee Allen, Mmes. N. G. Oates, H. S. Tate, A. J. Norwood, T. E. Dozier, M. D. Johnson, Harvey Powlidge, C. O. Crane, J. B. Terry, Miss Kate Sinclair, Mmes. R. E. Van Huss, T. A. Fannin, Mary S. Ray, J. M. Prothro, P. P. Barber, J. F. Nixon.

**BRIDE-ELECT IS HONORED BY YWA**

First of the pre-nuptial courtesies for Miss Doris Tidwell fiancée of John Rhoden Jr., was the miscellaneous shower with which YWA girls entertained Monday evening at the home of Miss Peggy Mathis, 1508 S. Loraine.

The usual YWA program was omitted but group songs were sung. The hostess then left the room supposedly to serve refreshments. When she returned she bore a tray on which were heaped packages which she presented to the honoree, with a humorous remark that "this was all that I could find."

Afterward a party plate was served to: Miss Tidwell, Misses Louise Farrington, Peggy Jo Howze, Alta Merrill, Helen Ruth Merrell, Boerne

GROW Young GRACEFULLY

This is exactly what happens to the woman who wears a Charis-designed foundation. These unique garments are the result of scientific study of the feminine figure. They are adjustable to the special needs of different figure types. They provide correct support. They recreate the lovely contours of youth. If your figure needs a change for the better—change to Charis.

**Tittle-Tattle Tale of Style**

(From Bonwit Teller, New York)

ROYAL blue tittle-tattle braid—the kind used to trim the most gala dresses of Scandinavian peasants—finishes this full-skirted country club frock of sleek white crepe. Notice the large, loose pocket and the Swedish good-luck charm with crown and pendants. The clogs, more comfortable than the peasant shoes from which they were derived, are made of white suede with cork soles.

beast figures in china or bright colored pottery are no longer new but just as likeable as ever. Flower designs are dainty for entertaining and plain gay pottery sets pep up the informal dining table.

As illustrative of the varied styles, we recently noticed no less than five different shapes and sizes of salt and pepper shakers in one window display—all in the fine quality gold leaf chinaware, too.

Wonder if they are a re-acton from the widebrimmed hats we've been seeing the last few months—the "Fee wee" hats which are so named because they are ridiculously small and intended to show most of a lady's hair?

Especially attractive is one of these tiny things of felt in a miniature edition of a "stovepipe" model, its only trimming consisting of a ribbon banding and bow.

From our perusal of fashion sketches we note that the button-all-the-way-down-the-front dress is forging into a favorite's place. Although rather severe in style, these are undoubtedly comfortable and trim looking—and SUCH a comfort to the home laundress!

A chic variant of this style is a hopped mesh dress with its tortois buttons marching from throat to hem but (and here's the individual note) having fly panels to half conceal them.

We approve the new, gracefully flared dresses which have gores from top to bottom, each separate gore ting in the waist and widening out in the skirt.

**Better June Day Menus by Addition Of Milk Dishes**

Here are a few recipes using dairy products. Some are new and some are old standbys, but all are reminders that the more milk and dairy products you use, the healthier your family will be.

- Bavarian Cream (with eggs).
  - 1 1/2 tbs. gelatin
  - 1/2 cup cold water
  - 2 egg yolks
  - 3/4 cup sugar
  - 1/8 tsp. salt

**Making of Fruit Juice Discussed at Valley View Club**

To make the best quality fruit juice, several points were brought out by Mrs. J. D. Bartlett at the meeting of the Valley View home demonstration club at the home of Mrs. Lois Lewis Tuesday afternoon.

The first step is to look the fruit over carefully and take the ripe, sound fruit and make it up by itself. The next step is washing until all dirt and sand is removed. Do not let fruit stand in water.

Utensils recommended for preparing and heating are heavy enamel-ware and aluminum. Juice can be extracted from cold fruit. Grapes and some berries give a clearer juice with better flavor when pressed unheated. By heating the fruit before extracting the juice the yield will be greater. Heat juice to 145 degrees Fahrenheit. Remove at once from fire.

If less juicy fruits are used a longer period of cooking will be required. Mrs. Harvey Kiser gave a talk on the importance of fruit in the diet. The value of canned fruit was discussed by Mrs. Floyd Pace. Mrs. B. L. Mason and Lodell Vest, who will attend the short course from the Valley View women's and girls' clubs, were presented with a miscellaneous shower.

Refreshments were served to: Visitors, Mmes. A. C. Francis, Susie G. Noble, Nettie C. Romer, Mary Thompson, Royce Lester, Minnie Pollard, Preston Vest, B. C. Vest, Miss M. Elizabeth Wilson, county health nurse, and Lodell Vest; new members, Mmes. J. E. Dyess, Jack Tisdale, Nancy Tisdale; members, Mmes. Louie Stewart, B. L. Mason, Floyd Pace, Harvey Kiser, Ernest Wilson, Marion Holder, Bennie Bizzell, G. C. Brunson, Earl Fain, J. D. Bartlett, and the hostess.

**Announcements**

**FRIDAY**  
Tapestry club will meet with Mildred Jones, 800 S. Pecos, Friday afternoon at 2:30 o'clock.

Tapestry club will meet with Mildred Jones, 800 S. Pecos, Friday afternoon at 2:30 o'clock.

Stitch and Chatter club will meet with Mrs. W. P. Hedges, 406 E. Tennessee, Friday afternoon at 2:30 o'clock.

**SATURDAY**  
Story Hour will be held in the children's library at the courthouse, Saturday morning at 10 o'clock.

Midland county museum in the courthouse will be open Saturday afternoon from 2:30 o'clock until 5 o'clock. The public is invited.

Minuet club will hold its monthly dance in the Crystal ballroom of Hotel Scharbauer Saturday evening at 9:30 o'clock. Layton Bailey and his orchestra will play.

- 1 tsp. vanilla
- 2 egg whites
- 1 cup cream
- 1 1/2 cups scalded milk.
- Soak gelatin in water 5 minutes. Beat egg yolks. Add sugar and scalded milk slowly, stirring, return to double boiler, add gelatin and salt. Cook until thickened. Remove and cool. Add beaten egg whites, cream whipped and vanilla. Pour into cold wet mould and chill. Serves 6.

- Green of Lima Bean Soup.**
- 1 cup dried lima beans
- 3 pints cold water
- 2 small onions
- 1 small carrot
- 2 tbs. butter
- 2 tbs. flour
- 1 tsp. salt
- 1 tsp. pepper
- 1 cup milk

Soak beans overnight. In the morning drain and add the cold water, cook until soft with onions and carrot, and rub through sieve. Melt butter in saucepan and add flour, salt and pepper. Stir butter mixture into boiling soup and add milk before serving.

Dried peas or lentils may be used instead of lima beans.

- Waffles.**
- 1 cup milk
- 1 3/4 cups flour
- 1/2 tsp. salt
- 3 tsp. baking powder
- 2 eggs
- 3 tbs. melted butter.

Mix and sift dry ingredients, add milk gradually, yolks of eggs well beaten, butter and whites of eggs beaten stiff. Cook on a greased hot waffle iron. Serve with syrup or honey.

Condensed coffee, a pasty preparation that contains sugar and milk besides the coffee, may be purchased in Japan.

Lumber Shipments Show Moderate Gain

AUSTIN.—Mixed tendencies were shown in the lumber industry during May as compared with April, production and shipments having

shown moderate gains but unfilled orders having declined, the University of Texas Bureau of Business Research has announced. In comparison with May, 1937, the statistics were quite unfavorable.

Reports from the Southern Pine Association show an increase in average weekly production per unit of 4.8 per cent over April, but a decline of 19.8 per cent from May last year; an increase of 5.7 per cent over April in average weekly shipments per unit but a decline of 13.8 per cent from May a year ago; a decline of average unfilled orders per unit of 10.1 per cent from April and of 36.7 per cent from May last year.

Fewer Charters Are Granted During May

AUSTIN.—The number of new charters granted Texas corporations during May was substantially below that of both the preceding month and the corresponding month last year, according to the University of Texas Bureau of Business Research. Total capitalization of these firms was moderately below that of the preceding month and sharply below May, 1937.

Reports from the office of Secretary of State show a total of 122 new charters granted during the month a decline of 23.8 per cent from April and 26.1 per cent from May last year. Total capitalization of \$1,785,000 during May was down 5.5 per cent from the preceding month and 35.4 per cent from the corresponding month last year.

Gatun Dam, in the Panama Canal system, is 105 feet high, about a half mile wide at its base and 100 feet wide at the top.

Uruguayan Girls Will Go to Bat

Demonstrating the "new" game she is taking back to Uruguayan girls, Miss Alcira Ibarburu explains to her mother the idea behind a baseball bat. After a year as a foreign exchange student at Texas State College for Women she plans to teach the girls in her country the sports and activities she learned over here. Her mother, who speaks no English, traveled twenty-eight days from their home in Montevideo, Uruguay, to see Alcira graduate.

Farmer Slays Two Lawyers in Court

LOS ANGELES, June 23, (AP).—Arthur Emil Hansen, 38-year-old Wakonda, S. D. farmer, shot and killed two lawyers who were opposing him in a civil case Wednesday in the hall of records.

Hansen's victims were, J. Irving Hancock, 26, and Robert D. McLaughlin, 43.

"I regret nothing I did; I had nothing to lose," Hansen told Capt. William Penprase, sheriff's captain. "When I entered that courtroom and saw those two attorneys who had cheated me out of everything I owned, and who were whispering together to harass me further, I saw red. I'm glad they're dead; they can't hurt anybody else."

Capt. Penprase said Hansen's confession to the shooting was made in a jury room a few doors away from the courtroom of Commissioner Kurtz Kaufman, where Hancock and McLaughlin were shot.

Hansen won a judgment of \$5,000 several months ago. Subsequently John Hancock, father of the slain attorney, won a judgment against Hansen and levied in Hansen's judgment.

Employment Shows A Slight Decline

AUSTIN.—Employment in Texas during May declined moderately from the preceding month and substantially from the corresponding month last year, according to the University of Texas Bureau of Business Research. Total pay rolls, however, were moderately above the preceding month but slightly below May a year ago.

Reports to the Bureau from 2,521 representative Texas establishments, employing 103,609 workers, showed a decline from April of 1.2 per cent in the number of employees and a decline of 5.8 per cent in the number of workers from May, 1937. Total weekly pay rolls of these establishments were 1.4 per cent

larger than in April but 0.8 per cent under May a year ago. In the manufacturing industries of the state employment decreased 0.9 per cent from April and 8.9 per cent from May last year; while total weekly pay rolls were up 3.3 per cent from April and down 3.2 per cent from May last year.

Industries making a better showing than the state average were: Beverages, commercial printing, petroleum, refining, foundries, machine shops, public utilities, dyeing and cleaning, and laundries.

The average motor car now in use is nearly five years old.

"Now my wife will have to go buy a dress that will make your wife jealous."

Modern Professor's Hobbies Range From Onion Soup to Acrobatics

NEW YORK (U.P.).—Time was when all professors spent their leisure time in research work, delving into a complex scientific theory or poring over a heavily bound book of ancient renown. Now things have changed. According to a recent survey of Hunter College staff members, such hobbies as making onion soup, collecting dolls and noting the changing seasonal moods of the Hudson River, capture the interest of the modern professor.

The hobbies of the hunter faculty range from the field of sports to politics, and include the arts, domestic interests, interior decoration, science, photography, and collecting.

Among the interesting possessions owned by various teachers are razor blades 3,500 years old from the island of Milas, a mathematics book printed in 1520, and caricatures dating from the 16th century. The Hunter staff can organize its own orchestra and vocal ensemble from hobbyists alone, and at least two instructors have collections of their own paintings.

One hobby that is used in a practical way is photography and several instructors use the pictures for geology, geography, and biology courses. Other staff members, however, have a purely artistic interest in this field.

Even the auction sale enthusiasts are present. One professor who owns a pre-Revolutionary home in Dutchess county, N. Y., admits spending much of her spare time looking for additional antiques for the house. Other instructors are particularly interested in old tables, old English silver, and relics of the 18th century, including Japanese prints.

One instructor boasts of country club trophies won in tennis, which is the leading sports hobby. Golfing and horseback riding come next. Other sports listed by the staff include fishing, mountaineering, acrobatic dancing, swimming, hiking and table tennis.

Different libraries gathered by hobbyists are devoted to Shakespearean, and also German art, mathematics, and insurance books. One instructor keeps her own specimens of rocks and minerals, another has the local newspapers of all the places she has visited and a third

has more than 200 artistic Christmas cards.

Among the domestic pursuits listed were bringing up baby, making picture frames, knitting and embroidery, and gardening. One instructor in the department of biological sciences has flowers growing in her garden throughout the year, even in December, January and February.

ON OUT-OF-STATE TRIP.

Mr. and Mrs. Pearl Parrott and three children, Miss Charline, Jill, and Glenn, are leaving today on an

Department Store Sales Show Decline

AUSTIN.—Texas department store sales, measured in dollars, during May declined moderately from both the preceding month and the like month last year, according to the Bureau of Business Research of the University of Texas. Reports from 104 Texas establishments show a decline in sales of 2.5 per cent from April and 5.2 per cent from May last year. During the first five months of the year, however, aggregate dollar sales of these establishments were 1.2 per cent above the corresponding period a year ago.

Physical volume of department store sales is about equal to that of a year ago, since retail prices declined in about the same proportion as dollar sales, the Bureau's report said.

Vacation Party Has Varied Experiences

Mr. and Mrs. D. G. Stookey and two sons, who have returned from a two weeks motor trip in New Mexico, had a number of interesting experiences while away. At Elephant Butte dam they were out on the lake when a storm came up. However, they were in no real danger, Mrs. Stookey explained, as they were near shore and in a motor boat with a good pilot.

Going into New Mexico by way of Hobbs and Socorro, the Midland party visited Albuquerque and Santa Fe and drove on to Chama, in the border mountains of the New Mexico-Colorado line. Here they spent most of their time, catching plenty of fish in the trout streams, and making short trips to Taos, Indian pueblos, and cliff dwellings. They returned to Midland by way of El Paso.

Dairy Manufactured Products Show Gain

AUSTIN.—Manufacture of creamery butter and American cheese in Texas during May was substantially above that of both the preceding month and the corresponding month last year, the University of Texas Bureau of Business Research has announced.

Ice cream manufactured was 35.7 per cent greater than in April but 11.2 below that of May a year ago. This decline from a year ago evidently reflects curtailment of consumer income since ice cream is still regarded as a semi-living product.

The two owners are offering a special introductory lubrication and wash job tomorrow and Saturday in order to acquaint the public with their high-class work. Their advertisement appears elsewhere in this issue and gives complete details.

Caribou, in order to free themselves of mosquitoes, run against the wind.

HELP 15 MILES OF KIDNEY TUBES

To Flush out Acids and Other Poisons Waste

Doctors say your kidneys contain 15 Miles of tiny tubes or filters which help to purify the blood and keep you healthy. Most people pass about 3 pints a day or about 3 pounds of waste.

Frequent or scanty passages with smarting and burning shows there may be something wrong with your kidneys or bladder.

An excess of acids or poisons in your blood, when due to functional kidney disorders, may be the beginning of nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness.

Don't wait! Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 Miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

Large Crowds Attend Bible Lectures Here

Hundreds are attending the unusual and interesting series of illustrated Bible lectures now being given in the big tent on the corner at the intersection of South Main and Washington streets.

Evangelist Lee Carter says that many new benches have been added to take care of the large crowds that are attending the lectures each evening. About three-hundred gallons of water are sprayed under and around the tent each afternoon so that the air will be cool and free from dust for the evening service.

Another interesting feature connected with the meeting is the song service. Mr. Stewart, the song leader, has the songs thrown on the screen so that no books are needed. He says that the people seem to enjoy the unusual way of conducting a song service. The song service begins at 8:15.

The subject announced for this evening is, "A Trip Through God's Universe."

There is no admission charge and the public is invited to attend.

FOR TREATMENT.

Keith Perryman, son of Mr. and Mrs. J. C. Perryman, was admitted to a Midland hospital for treatment today.

IS TRANSFERRED.

Jerome Kabel, mechanic at Sloan field, left Midland today, having been transferred to Brooks field, San Antonio.

While Fathers Feud, Georgia Youngsters Carry On a 'Romeo and Juliet' Romance

ATLANTA, Ga. — Many years ago in Verona, there were two powerful families, named Montague and Capulet. They were enemies. But Romeo Montague and Juliet Capulet loved each other despite the family rivalry.

A fellow named Shakespeare wrote quite a story about it. Something like that is going on down in Georgia these days, and the romance involves Jerry Rivers, winsome daughter of Georgia's Gov. E. D. Rivers, and Jack Mangham, Jr., son of Rivers' political rival for the governorship at the September primaries.

Jack's father, J. J. Mangham, Bremen, Ga., banker, was a friendly supporter when Governor Rivers was elected two years ago. But as Rivers veered New Dealward, Mangham grew less enthusiastic for his administration, and decided to run against Rivers.

But meanwhile there were developments in the romantic sphere as well as the political. The son and daughter of the two political rivals met last summer while their fathers were still political friends and allies. Jerry and Jack had their first date in June, and all last winter and spring the two have gone to all fraternity dances together at the University of Georgia, where Miss Rivers is a junior.

So while the rival candidates travel over the state pitching political epithets at each other, their children are at home "pitching woo" (if that's the correct phrase for "romancing" among the younger generation). Mangham Jr. has not failed to make the 50-mile drive between Bremen and Atlanta each week to see Miss Rivers.

The 18-year-old only daughter of the Rivers family insists the political rivalry won't make any difference to her and she hopes it won't to Jack.

Jack Jr. hasn't made any statements, but has let his regular calls at the governor's mansion answer for him.

Gov. E. D. Rivers of Georgia and his daughter Jerry, at top, draw the Capulet role in Georgia's modern Romeo-and-Juliet revival. Daughter Jerry insists political rivalries won't keep her from dating Jack Mangham, Jr., son of Rivers' rival candidate for governor.

J. J. Mangham, above, with his son Jack, Jr., draw the Montague role in Georgia's political-romantic battle. Jack, Jr., hasn't allowed his father's political estrangement from Governor Rivers to interfere with his romancing with the governor's daughter, Jerry.

Home Construction Widespread in Texas

LITTLE ROCK, June 23.—New home construction continues to be widespread throughout Texas, according to figures of the lending activities of the insured savings and loan associations in the state for the month of May just compiled by the federal home loan bank of Little Rock.

Loans for the building of new homes aggregating \$733,089 were made to 321 Texans during the past month and \$117,088 was advanced to 146 borrowers for the modernization and reconditioning of other houses. Further interest in home ownership is indicated in the 220 loans totaling \$450,015 made by the associations to assist borrowers in the purchase of existing dwellings.

The total of all loans made by the Texas associations during May was \$1,773,762 which compares favorably with other recent months, the aggregate amount loaned since January 1, 1938, being \$6,416,503. The associations are reported to have ample additional funds available for lending. The loans are repayable on the popular direct-reduction plan under which payments, about equal to rent, retire the obligation over a number of years.

Saving accounts in the associations showed further gains during May, the new funds received in the past month amounting to \$894,724. The total new savings invested since January 1 in the Texas associations exceed \$6,000,000. Included in the compilation prepared by the Little Rock bank are the figures of the Midland Federal Savings and Loan association whose shares are insured by the Federal Savings and Loan Insurance corporation. There are now 119 associations in Texas who offer this insurance protection to their investors.

Incident to the payment of the usual semi-annual dividend to the savers on June 30, further material increases in savings accounts in the associations are anticipated.

Midland Teachers Sail for Europe

Miss Ruth Garden and Miss Annie Frank Stout, teachers in the Midland city schools, were to sail at midnight Wednesday from New York for a European tour. They will visit Italy, France, Belgium, and England and possibly Germany, friends said.

After the tour, Miss Stout will sail for home while Miss Garden, a teacher of journalism in the high school will go to Cambridge, England for a two-weeks lecture course before returning to America.

Czech Flyers Ready to Fight Nazis

(NEA Radiophoto) Standing at attention beside their war plane, Czechoslovakian flyers are pictured on the western frontier during mobilization by their country in the face of threatened attack by Germany. The efficient Czech air force is one of the factors which gave Hitler pause in his march to the east, for the great south German industrial centers are near the Czech air bases and vulnerable to attack from the sky.

Reduced Rates on All FLB Loans Continued

The reduced interest rates on federal land bank and commissioner loans have been extended by federal legislation for a period of two years, according to word received today from the federal land bank by Joseph H. Mims, secretary-treasurer of the Midland National Farm Loan association.

On federal land bank loans through national farm loan associations the temporarily reduced rate of 3 1/2 per cent per annum will be continued for all interest installments payable prior to July 1, 1940.

The temporarily reduced rate of 4 per cent on land bank commissioner loans is also continued until July 1, 1940, Mims said.

"The temporary interest reduction does not change the contract interest rate, that is, the rate written in the mortgage at the time a loan was made," Mims said. "At present the contract rates on new land bank loans are 4 per cent for loans through unimpaired associations. The contract rate on all commissioner loans made through the land bank is 5 per cent. Under the law, as now amended, both land bank and commissioner borrowers will resume interest payments at their respective contract rates on July 1, 1940.

"Farmers who now obtain new loans through an association at the 4 per cent contract rate will get the benefit of the 3 1/2 per cent rate for all interest installments payable prior to July 1, 1940, and after that will not have to pay more than the 4 per cent contract rate for the balance of the term of the loan, which may be for as long as 20 to 30-odd years."

TO HOT SPRINGS.

City Engineer A. M. East and chamber of commerce manager Bill Collins left this morning for Hot Springs, N. M., to attend a meeting of the Southwestern Conference of Mayors and Chamber of Commerce Representatives to be held there on Friday and Saturday. Securing of WPA and PWA grants will be the general theme of the session. Collins is a vice-president of the organization. Butler Hurley accompanied the two.

Research Engineer To Demonstrate New Acid of Dowell Co.

P. E. Fitzgerald, research engineer for Dowell Incorporated, of Tulsa, Okla., is visiting his district office at Midland. He is making a special survey of the Mid-Continent, Gulf Coast and Rocky Mountain areas and is demonstrating Dowell's new sustained action acid.

A kit consisting of two pressure bombs has been designed for demonstration. Fitzgerald will make demonstrations at Dowell local offices as well as at various production offices while he is in the area. Dowell sustained action acid is an inhibited hydrochloric acid solution to which has been added an auxiliary chemical capable of sustaining the action of the solution so it will reach greater distances in time or dolomite formations. The material is added in small amounts so that no other properties of the acid are changed in any appreciable way, other than the rate of reaction.

The need for sustained action acid has long been recognized. In most fast acting limestones it has been found that the conventional acids spend themselves in the pores immediately around the bore hole. As a result spent acid was forced back into the formation. Numerous methods were tried to overcome this difficulty; larger quantities of acid were used; more pump trucks were utilized; the percentages of acid were reduced. All were tried in an unsuccessful effort to get unspent acid further back into the formation.

The value of a slower acting acid can readily be seen. Slower acting acid tends to retain its effectiveness longer. Consequently the pores through which it is forced are enlarged much farther away from the bore hole. As a result longer channels are established which offer less resistance to flow of oil into the well.

Sustained action also is proving its worth as a retreating acid. It is found that this new acid, due to its 60 per cent slower action, retains its effectiveness beyond the place where the original treatment acid reached. As a result virgin formation is treated and wells which will not respond to a conventional acid retreatment will respond favorably to a sustained action acid retreatment.

Art Restorer Believes Painting May Be a Goya

NEW ORLEANS (UP).—With a private system of solvents, scraping and retouching, B. R. Foster has reclaimed paintings estimated to be worth hundreds of thousands.

There is never much telling, he says, what is beneath the grime and varnish under which he does his "sleuthing."

He got a canvas some time ago, for example, of a New Orleans alderman painted in 1802. One of the alderman's eyes were gone when he got the canvas, the shirt front was badly torn and the whole thing was rather grimy.

Now that the torn shirt, the eye and the dirt have been repaired, Foster has suspicions that the alderman's portrait might have been painted by the Spaniard, Goya.

Foster works for the Louisiana State museum in a room cluttered with old paintings, brushes and rags. The chief tools of his trade are rags and chemicals.

Hollow Tree as Bank Good to the Last Coin

SAUGUS, Mass. (UP).—Several years ago Thomas P. McCarrier began using a hollow tree as a bank, depositing loose change in the cavity.

Last year a limb broke from the weight of the coins, and McCarrier retrieved most of his savings.

But recently a gale toppled the tree and at the roots was the last half-dollar of the bank's capital.
