

## 1 Dead, 17 Injured in Train Wreck

### Famous 'Olympian' Again Involved in Railroad Tragedy

INGOMAR, Mont., June 25 (AP).—Robert Eskert of Avery, Ida., was killed and 17 persons were injured today when the Chicago Milwaukee St. Paul and Pacific railroad's fast Olympian passenger train, struck a special train carrying Civilian Conservation Corps enrollees.

Eskert was a passenger on the CCC train. Another youth named Kohlbrenner was injured seriously.

The engine on the special train was derailed and rolled down a long embankment.

Most of the injured persons were on the Olympian.

Ambulances were sent from Forsythe, where the injured were taken.

It was the second Montana train wreck in less than a week involving the Olympian fastest of the Milwaukee passenger trains. The other occurred last Sunday at Custer creek, near Miles City, when a bridge collapsed beneath a sleeper coach, carrying at least 53 persons to their deaths.

Heavy rains, which were responsible for the collapse of the bridge, have continued through the week.

Officials here and at Roundup emphasized, however, that the wreck today occurred when the regularly scheduled westbound passenger train reached the eastbound carrier one mile west of here before the CCC train could reach a siding.

### OLYMPIAN ENGINEER BLAMED IN CRASH.

CHICAGO, June 25 (AP).—An official of the Chicago, Milwaukee St. Paul and Pacific railroad said today that the head-on collision near Ingomar, Mont., between the Olympian, fast passenger train, and a special train carrying CCC enrollees, was caused by "failure of the Olympian's engineer to follow orders."

"The engineer has had an excellent record," the spokesman said. "However, he had been scheduled to meet the special at Ingomar station. For an unknown reason he went beyond the station to the point where the crash occurred."

"He has told his immediate superiors that he could not explain why he passed the station. Apparently he overlooked his orders."

According to advices the railroad received from the scene of the crash, only one car of the passenger train was derailed. It did not overturn.

## Grading, Drainage Work Under way on Garden City Highway

County Judge E. H. Barron returned Saturday from Austin where he conferred with engineers of the State Highway Department on plans for immediate construction of the Midland to Garden City highway, fencing and grubbing for which already has been completed to the east line of the county through a WPA project.

Work on grading and drainage has been started by the county road force. Judge Barron said his conference at Austin indicated that contract for construction of the highway probably would be let in August, affecting the first thirteen miles from Midland.

The section in Midland county is 18.5 miles long, and the route has been grubbed and fenced, ending at the Glasscock county line in the K. S. Boone pasture. Grading was started from Midland but is now to be worked back this way to the thirteen mile point, that being the part included in first appropriations made. The county's work will put the road in shape for the caliche base which will precede hard surfacing.

Progress also was reported on See (Drainage, Grading) Page 6

## Home With Youngest 'Cabinet Bride'

Mrs. Harold L. Ickes, bride of Secretary of the Interior Ickes, is pictured above, watching with admiring smile as her husband gives a homecoming press interview over the microphones of the liner Ile de France upon their arrival in New York after a European honeymoon. Mrs. Ickes, the former Jane Dahlgren of Milwaukee, and onetime employe in her husband's department, said she was looking forward to being a Cabinet wife.

## Bohago Discovery In Yoakum Is Gauged at 216 Barrels on Retest

BY FRANK GARDNER.

The Bohago area of southern Yoakum claimed the spotlight at the week's close for the first time in many months as Bond Oil Corporation and L. C. Harrison (formerly Bohago Oil Corporation and Bond) No. 1 Marcella McCarty West, lone discovery well, registered marked increase in production after shooting with nitro and cleaning out. Last Fall, the well had been completed for a daily potential flow of 42 barrels, after acidizing with 12,000 gallons, bottomed at 5,255 feet. It was given a 520-quart nitro shot several weeks ago, and has since been cleaning out.

On new potential gauge, taken late this week, the well flowed 216.08 barrels of 32.0-gravity oil in 24 hours through tubing, with tubing pressure of 625 pounds and gas-oil ratio of 1.900-1. Failures drilled on precisely all sides of the Bohago pool operators—none, however, closer than a mile—serve to isolate the area, but more drilling is expected as the outcome of the discovery's bettered performance. For purposes of production, it had been classed in with the Wasson (Denver-Wasson) pool after first potential test, but operators have asked that it be granted a new pool allowable as a result of the re-test.

Further northeast, in central Yoakum, Magnolia No. 1 J. D. Webb is swabbing one barrel of oil hourly, bottomed at 5,380 feet. It has been shot and acidized at that depth after plugging back from 5,639 to shut off water.

Shell No. 2 Mrs. Dora Roberts, a quarter-mile north of the pool opener and second test in the Roberts area of southwest Yoakum, is drilling line at 4,303 feet. In the Denver pool, Shell No. 2 C. A. Dowden is unloading hole through 2-inch tubing set at 5,038, two feet off bottom. Shell No. 1 Lowe is drilling plug from 5 1/2-inch casing cemented on bottom at 4,823 feet.

Andrews Discovery Shut In. Southern Andrews' new discovery, Ray R. Rhodes, J. D. Tompkins and Walter J. Donnelly No. 1 Emma Cowden, is shut in while two 500-barrel storage tanks are being erected. Operators said that they plan to acidize the well Tuesday. On last test, it had flowed through 2-inch tubing at the rate of more than two barrels of oil hourly, cut five per cent with drilling fluid. Gas volume was estimated at 1,500,000 cubic feet daily. When shut down for three hours, it filled 2,500 feet with oil, approximately 90 barrels. The well is located 330 feet from the

Permyan Still In Anhydrite. No brown lime top had been called as J. T. Perryman, Jr. No. 1 C. H. Doak, northeast Gaines wildcat west of Cedar Lake, drilled yesterday to 4,200 feet in anhydrite. Eight miles farther northwest, Riddle & Warr, No. 1 J. B. Brown is drilling at 3,375 in anhydrite, with Yates sand not yet encountered. Re-check on Yates top in Anderson No. 1 Vance, Martin wildcat, showed it to have been at 2,330, instead of 2,410 as was first reported. It is drilling ahead below 2,665 feet in redrock and anhydrite. Magnolia No. 13 State-Walson, north offset to Samwan Oil Company No. 2 R. D. Kessler, 109-barrel sand plug discovery a mile and a half east of the Kermit field in Winkler, flowed 140.84 barrels on 24-hour gauge. It was shot with 340 quarts from 3,091 to 3,221, total depth. In the Estes pool of southeast

## Young Heir To Millions Is Sought

### Medill McCormick Believed Dead in Sandia Mountains

ALBUQUERQUE, N. M., June 25 (AP).—The bluff Sandia mountains, frowning down upon the Rio Grande valley, hid today the fate of John Medill McCormick, feared the victim of a fall from one of their precipitous peaks.

Searchers, who resumed their tragic task at dawn, expected only the worst—that they would find the mangled body of the Chicago publishing heir, much as last night they came upon that of his mountain-climbing companion, 20-year-old Richard Whitmer of Albuquerque.

Personally commanding the three-day search, Governor Clyde Tingley expressed the thoughts of the army of men he led into the Sandias today:

"That boy—his body—is in there somewhere, and we'll find him—we'll find him."

Mrs. Ruth Hanna McCormick Simms waited last night in Juan Tabo CCC camp, at the base of the mountains, hoping to learn that her 20-year-old son still lived.

She heard only that young Whitmer's body, skull crushed, almost denuded, was found at the base of "The Shield," sheer rock face of North Sandia peak.

The mountain climber's urge for new conquests led to the tragic venture, friends revealed today.

The youths had climbed steep South Sandia peak, and the even more rigorous slopes of "The Needle," nearby. Wednesday they set out to try the face of North Sandia. When they failed to return a search was launched.

Young Whitmer's clothes were torn from his body and he lay in a crumpled heap at the foot of "The Shield." Searchers theorized that two climbers were bound together, Alpine-fashion, by a rope, and that as Whitmer fell the strand slipped from his body, carrying his clothing with it.

Whitmer's fall, they believed, must have dislodged McCormick, dashing him also from the precipitous wall to which he clung.

The slip-up which they started was "an impossible climb," in the opinion of John Matthews, veteran Albuquerque mountaineer.

## Reprisals Against Franco's Bombings Planned by Reds

PARIS, June 25 (AP).—Far-flung aerial reprisals, including bombardment of "Italian-dominated" towns in the Balearic islands, have been threatened by the Spanish government unless Generalissimo Franco quits bombing civilian centers behind Spain's battlelines.

Despite urgent British and French admonitions against "rash" acts, the Spanish embassy in Paris insisted today that retaliation would be taken into consideration unless the insurgent chieftain abstains from that type of warfare.

The embassy said that since Franco's raiders operate largely from the Spanish Balearic islands, the reprisal raids certainly would be directed against "Italian dominated towns there."

The embassy itself did not elaborate on or confirm a previous implication that the government might carry aerial warfare to German or Italian cities or other non-Spanish objectives.

Sources close to the French office, however, said the Barcelona government had threatened to bomb cities of "those foreign countries" which share responsibility for insurgent bombardment of Spanish civilian centers.

Barcelona authorities insist that both Italian and German planes and fliers participated in repeated raids on Spanish coastal cities and towns.

### Drouth Broken---

## Rains Fall Over West Texas

### Hutton Heir Guarded in London Home

Detectives of Scotland Yard are shown, in the radiophoto above, as they stood guard about the London town house of Countess Haugwitz-Reventlow, the former Barbara Hutton, following reported kidnap threats against her two-year-old son, Lance (left). The main gate of the fortress-like, three-story Georgian mansion was kept locked, with a servant on guard. The spacious grounds were patrolled, callers had to identify themselves, and iron bars griled every window at night.

## Ernest O. Thompson Promises to Be In Midland for the Cowboy Contest, Says He 'Will Be Governor' by Then

When the Midland rodeo opens Sept. 3, Ernest Thompson will be on hand for the celebration as governor-elect, he told Roy Parks, general chairman of the rodeo, Saturday morning.

Thompson declared he will be here for the annual affair, which he described as "the Southwest's greatest rodeo."

"I always like a good rodeo," he said "and everyone is always sure of seeing the best in performers and animals at the Midland show."

The red-headed candidate for governor predicted he will be the next governor by the time he returns for the show.

Assurance that all sections of Texas will support him in his race for governor was voiced by Thompson Saturday morning when the candidate was entertained at an informal breakfast at the Scharbauer Hotel.

He spent Friday night here, coming to Midland from Odessa where he made two radio talks and addressed a gathering at the court house.

Yesterday he spoke at Big Spring, Colorado, Sweetwater and San Angelo.

Thompson, state railroad commissioner and formerly Amarillo's "fighting mayor" of 1929, was introduced at the Midland breakfast meeting by Mayor M. C. Ulmer.

"I have made 243 speeches in 184 counties," declared Thompson. "Before the first primary, I will speak in more than 200 counties."

"Everywhere I go I get fresh encouragement. The people believe in my program for farm and ranch prosperity, coupled with an era of industrial expansion for our state."

Among those at the breakfast were C. C. Duffey, Ed Whitaker, J. R. Buser, George Abell, Harry Adams, Clarence Scharbauer, J. W. House, Kemper Kimberlin, Harry Black, Doc Doherty, O. C. Harper, Roy Parks, George Glass, W. R. Bowden, Bob Hamilton, Fred Hogan, Foy Proctor, John Perkins, Al

Hendrickson and Marion Flynt.

Thompson came here from the Rio Grande valley and South Texas. He made 23 speeches in two days in the valley, and addressed 6,000 South Texans Thursday at a barbecue on the Bee county ranch of Sheriff Ira Heard of Refugio county.

Thompson is stressing the need for industrial expansion in Texas, at least to the extent that the products Texas buys may be made in Texas with Texas labor and Texas raw materials.

"We ship our hides to Boston for speculation, to Connecticut for tanning and to St. Louis for manufacture into shoes," he said.

"The trip doesn't make them any better shoes, yet we pay the freight both ways and keep men at work in foreign states. I believe in keeping some of this money at home and paying our wages to Texans and our taxes to Texas."

## Moisture in City Amounts To Half-Inch

### Planting of Feed To Be Started in Cloverdale Area

At 2 o'clock this morning, swirling waters from a down-pour that started slightly before midnight was over the curbs in many downtown streets. Although an accurate gauge could not be procured, it was estimated almost an inch of rain had fallen and it was still sprinkling heavily.

Respite from the drouth that has held this area in its sway for the past few weeks was received during the week-end when precipitation ranging from light showers to heavy rains fell over the entire area.

The total amount of precipitation in Midland amounted to only 4 of an inch but in several parts of the county it was considerably heavier. The heaviest rain in the city limits fell Friday afternoon, the gauge recording .27 of an inch.

In the Cloverdale area, three miles southeast of town, an estimated three-quarters of an inch fell yesterday afternoon and approximately one-third that much the night before. The precipitation was heavy enough to cause farmers of the vicinity to make plans to start planting feed Monday.

Reports from south of Midland indicated that area received less moisture than any other section. The southeast portion of the county was reported to have received the heaviest rains, an estimated half inch falling Friday afternoon and a like amount yesterday.

Employees on the Kenton Boone and Charley McClintic ranches, located about 20 miles southeast of town, estimated the total precipitation during the week was more than two inches. The McClintic farm, located northeast of town, received some moisture yesterday afternoon but not enough for planting.

All the ranches northwest reported good rains. In Andrews, a four-inch down-pour Friday afternoon flooded the streets and brought great benefits to ranchmen. Heavy rains were reported all the way from Andrews south to Odessa, where a scheduled political rally was drowned out.

Persons coming from the east yesterday afternoon reported moisture of varying degrees all the way from Abilene to Midland. Continued showers were reported yesterday in Odessa, Monahans and Wink.

At the airport, 10 miles west of town, only .25 of an inch was reported. A pilot who arrived yesterday afternoon from Houston reported precipitation over much of the way.

## Midland Selected Convention Site for Mayors, CC Heads

HOT SPRINGS, N. M. June 25. (Special).—Midland was selected as the next meeting place of the Southwestern Conference of Mayors and Chamber of Commerce representatives at the closing session held here today.

The next meeting will be held in September, and Mayor Fiorello LaGuardia of New York City is expected to be present.

The bid to select Midland as the next meeting place was placed before the gathering by Bill Collins, manager of the Midland chamber of commerce, and a director of the organization.

RETURNS TO HOME. Mrs. O. D. Arshman of Crane returned to her home Friday after sustaining a minor operation in a Midland hospital.

## Program of Residence Construction in Midland Goes on Unabated

Making Midland the premier residential city of the Permian Basin, the active program of home construction goes on unabated. With more than 300 new homes in the city, with architects, contractors, material dealers and those engaged in the building trades optimistic over prospects for continuation of the activity throughout the year. Typical of the larger homes recently completed is that of

Mrs. and Mrs. R. L. York, at the corner of Missouri and South H streets, shown in the extreme left photograph. The picture shows the back yard and terrace, with the "livable" porches and attractive landscaping. Next is the new home of Mrs. Adilee Abell, which she designed herself. Located on West Storey street, the residence has tennis courts, concrete swimming pool and other recrea-

tional features as well as novel treatment of the home itself. Next is the white brick home of Mr. and Mrs. J. C. Smith, located in Country Club addition, on West Kansas street. Interior arrangement of the home reflects good taste, convenience and comfort. On the extreme right is pictured a typical residential block in the new Elmwood addition in northwest Midland where, in a few months,

twenty acres of raw land have been converted into well laid out blocks and streets, with more than three dozen attractive homes built and sold to satisfied owners. While the eight story office building of the First National bank, four brick business or public edifices are being erected, the construction of residences continues to add to the building permits which, for the year 1938, are expected to pass the million mark.

## Good Neighbors Seek Compromise.

The fourteen weeks since the expropriation of the foreign oil companies' properties in Mexico have given both parties a chance to see just where they stand.

Neither party is happy as things stand now. The American companies have lost their property. The Mexican government has lost 14 weeks' valuable tax revenues. Production has been cut to 65 per cent of its former level. Many jobs have been lost. Business stagnates throughout the country.

If that is not a situation that calls for settlement, it is hard to imagine one. Waiting decision before the highest Mexican courts is the foreign companies' plea that their property be restored. Yet such a decision would be a terrific come-uppance for the Cardenas government, and a blow at the patriotic spirit it has been building up.

The American State Department policy has been sympathetic and tolerant beyond expectation. But it can scarcely go farther than it has gone. With billions of American money invested throughout Central and South America, it can scarcely sanction the seizure of any and all such property at will without compensation.

What seems the sensible thing to do? First, to get an impartial estimate, through an international commission, of the value of what has been taken. Then let some arrangement be worked out for Mexico to keep her subsoil resources, but pay the expropriated companies in oil until the debt has been worked out.

Like all compromises, that requires yielding on both sides. But it also implies advantages to both sides which neither side is now getting. It would guarantee to the foreign companies some sort of realistic compensation for their very real services in having developed from scratch the Mexican oil industry. It would secure eventually to Mexico the rights to its subsoil resources, and a national oil industry, which is its desire.

Naturally, this is an oversimplified view of a very complicated problem. But for the oil companies to wait grimly and uncompromisingly for the Mexican government to collapse under the oil strain would benefit no one in the long run. And for the Mexican government to use its unquestioned sovereign power in a high-handed and unwise manner endangers its reputation and future as well.

A workable compromise would, on the other hand, smooth the path to "good neighbor" policies which have become a vital part of the place of the United States in the world.

## Get Acquainted.

It has been said often about democracy that its greatest peril is the apathy of its citizens. Responsible for not a little of that apathy is sheer ignorance. A man is incapable of responding to threats to a political form with which he has only a nodding acquaintance. He is incapable even of recognizing those threats.

There is probably more talk of the perils to the democratic structure today than there has been in generations. The times are particularly in need of a public acquainted with its government. In the light of this need one of the happiest innovations in the field of civic enterprise in many years is the "Boy State" movement which a number of states are supporting.

For varying periods of time during the summer, sessions not unlike "summer camp" are held, but with the express purpose of acquainting young men in their teens with the structure of American government. Classes conducted by key government officials and judges are the preliminaries to a period during which the boys try governing democratic "states" of their own.

Rhode Island and Vermont are among the newcomers to the movement this year. Illinois was the pioneer in 1935. New York, Ohio, Indiana, West Virginia, and Utah are other states in the movement.

## War's Contributions.

News about the civilized used of mustard gas arouses conflicting emotions.

At a convention of physicians in Philadelphia a speaker reports that, administered in infinitesimal doses and highly diluted, the gas in liquid form can serve as a cure for respiratory ailments. He remarks that the gas's "sphere of action upon the respiratory tract is so great as to place it among the foremost remedies" for a variety of respiratory diseases. Phosgene gas, he further discloses, may prove to have comparable curative properties.

All of which is something to cheer about.

But the cheer dies in the throat when there comes forward the man who will seize upon that piece of news as a case in support of his pet contention that, though there are some terrible things about war, they are compensated for by the achievements war demands from science. He regards war as a ruthless but effective instrument of social progress. He wonders where we would be without it. He points out, for instance, to the advances made in surgery between 1914 and 1919.

Phosgene is preferable to him.

## AAU Swimming and Diving Meet to Be Held in Sweetwater

SWEETWATER, June 25. — For the first time in the history of the Gulf Amateur Athletic Union, the annual swimming and diving meet is to be held in West Texas, it has been announced by A. D. Adamson, of Texas A. & M. College, Gulf AAU swimming chairman. The meet is to be held at Sweetwater, July 16 and 17 and is to be limited to junior and senior men's events.

In the junior division, the events are to include: 60 yards free style, 100 yards free, 220 free, 60 yards breast stroke, 60 yards back stroke and fancy diving.

The senior division includes: 100

yards free style, 220 and 440 free, 100 yards breast stroke, 100 yards back stroke and fancy diving. Appropriate medals for first second and third place winners are to be awarded in all events in both divisions.

A. J. Stiles, AAU swimming commissioner of Sweetwater, is to be in charge of the meet, assisted by Homer Williams of Sweetwater, district AAU vice president. Bob Skelton of Houston, former world champion breast stroke title holder, is to be chief judge.

A new product for the emergency shelf is a cheese rarebit easy to prepare since it requires only heating before serving. Flavorful and smooth, the ingenious housewife will find several uses for this tasty product.

# The Town Quack

other \$50,000 job within another week or two.

One thing that really "gripes" me is to have someone tell me something and later deny it. Why say anything if you can't back it up?

Just as soon as we get a paved road from Garden City to Kermit we can start one from Rankin to Lamesa. And then watch us step.

Here's one I picked up out of the Pecos Enterprise:

Headline in the Odessa News-Times: "Your first chance to 'Snow White and the Seven Dwarfs' in the Permian Basin." Must be the sequel to 'Snow White'. The next one will probably be "Snow White etc. Up in Mabel's Room."

If some of you want to get the jump on the rodeo season they are having a good one in Kermit today. Free barbecue at noon.

## ABLE TO LEAVE HOSPITAL.

According to news received by friends here Saturday, Miss Joyce Hollman, who has been in a San Angelo hospital for the past seven weeks, is much improved and has been moved to the home of a relative in that city. She is gaining weight and is now able to walk a little.

## Babson Declares Center of Industry Drifting to Rapidly Growing South

BY ROGER W. BABSON. Copyright, 1938, Publishers Financial Bureau.

CHICAGO, June 25. — A new industry is being born in the South. At Lufkin, Texas next month the ground will be broken for a newspaper mill. This will be the first mill making newsprint from southern pine. Its effect will be far-reaching. It will be another step in the industrialization of the New South. Low costs in the South will force northern newsprint makers to follow the trek of the textile mills toward the Gulf.

Fast-growing southern pine will become a new major crop, possibly as important in the years to come as cotton is today. This is a significant event. The South's great problem, ever before the Civil War, was its one-crop economy. Cotton was king. When cotton prices were high or crops good, the South prospered. When cotton prices were low or crops failed, there were hard times below the Mason-Dixon line.

Southern editors and statesmen have patiently worked for decades teaching the lesson of farm diversification. Great progress has been made, particularly during the last fifteen years, in the rounding-out of southern agriculture. Here in the Middle-west, farm people are already alarmed by the inroads southern corn, beef, truck crops, and dairy products are making in their markets.

## INDUSTRIES TREK SOUTHWARD.

Meanwhile, there has been tremendous industrial progress. A big labor supply, the proximity to the cotton fields, good water-power, combined with union troubles in the North, long ago forced New England textile mills to move to the Piedmont section of the Carolinas

and Georgia. In more recent years, however, the migration of northern industries has broadened. From the northwestern and middlewestern states, other businesses have pulled up stakes and moved toward the Gulf. Today the South is not only the cotton-textile center of the country, but it has growing interests in iron and steel, in pottery, and in clothing, in chemicals, and in kraft paper.

The discovery of the great oil fields of Texas, Oklahoma and Louisiana gave the south another hypodermic. With petroleum came a myriad of by-product industries and service businesses. The fast-growing sections of the United States today are in the oil regions of the south and southwest. Furthermore, during the last decade the south has vigorously advertised its advantages as a vacation land. Hundreds of thousands of people now make an annual pilgrimage to Florida and the Gulf Coast, to Texas and Arkansas, to New Mexico and Arizona. The resort business has become a thriving industry.

## COTTON CRISIS APPROACHING.

While all these changes have been going on, cotton has still remained king. During the last five years our huge export markets for cotton have been steadily dwindling. Each season the world takes less of our crop than it did the previous year. At the same time, Brazil, Egypt, and North China have become important cotton-growers. Moreover, the Sino-Japanese War means that we will eventually lose another major customer—Japan. Yet, while our overseas markets are becoming smaller, our crops are becoming larger. Our 1937 cotton pick was the largest in all history!

Neither the Department of Agriculture nor the New Deal can guarantee good prices if the south raises more cotton each year than this country, or the world wants. Therefore, cotton acreage must be used for other products. This means the loss of jobs and livelihood for hundreds of thousands of field-hands and share-croppers. To add to the cotton crisis, mechanical cotton-pickers are going into use on more plantations each year. This means even less jobs for field-hands. Hence not only must new uses be found for cotton lands, but new employment must be provided for cotton workers.

## SOUTHERN NEWSPRINT A REALITY.

In the last few years, more and more attention has been focussed on the huge slash pine forests of Dixie. The southern pine reaches maturity in about 15 years—twice as fast as the slow-growing northern softwoods. Because of this rapid growth of the southern pine, good forestry methods produce real results. Hence, foresters have been intensely interested in finding new uses for the pine. The question has been: Could not this southern pine be used for newsprint? If so, there would be a tremendous market. Last year, newspapers used nearly 4,000,000 tons of newsprint, about 80 per cent of which comes from the spruce of Canada.

It is a long way from Northern Ontario to Southern Texas. Costs of transportation are high. Southern newspaper publishers have insisted that slash pine could be developed into newsprint. Dr. Charles H. Herty, noted Georgia scientist, has been experimenting for years. At last, the end of the road is in sight. At Lufkin, Texas, about 60 miles from the western border of Louisiana, the ground will soon be broken for the first southern newsprint mill. As

## Announcements

MONDAY.

Midland county public health board will hold a called meeting in the commissioners' courtroom Monday afternoon at 4:30 o'clock. All members are urged to be present.

Business and Professional Women's club will hold its regular dinner meeting and installation of officers in the private dining room of Hotel Schubarber Monday evening at 7:30 o'clock.

Circles of the Baptist women's missionary union will meet at the church Monday afternoon at 4 o'clock for a mission study lesson on "The Heart of the Levant." Mrs. J. Howard Hodge will teach.

Presbyterian auxiliary will meet at the church Monday afternoon at 3:30 o'clock for an inspirational meeting. Mrs. M. C. Osborn will be in charge.

## TUESDAY.

Mrs. B. W. Reer and Mrs. Tom Poffler will entertain the Business Girls' Auxiliary at the Pagoda Pool Tuesday evening at 7 o'clock with a swimming party. After the swim, the group will go to Crier park for games and refreshments.

## WEDNESDAY.

Midland county museum in the courthouse will be open from 2:30 until 5 o'clock Tuesday afternoon. The public is invited.

Wednesday Afternoon Sewing club will meet with Mrs. Fred Kiat, 604 S. Mineola, Wednesday afternoon at 2:30 o'clock.

## THURSDAY.

Needlecraft club will meet with Mrs. A. W. Watt, 107 N. Marienfeld, Thursday afternoon at 2:30 o'clock.

Midland county museum in the courthouse will be open from 2:30 until 5 o'clock Tuesday afternoon. The public is invited.

## FRIDAY.

Belmont Bible class will meet with Mrs. Herbert King, Friday afternoon at 2 o'clock.

## WEDNESDAY.

Story Hour will be held in the children's library at the courthouse Saturday morning at 10 o'clock.

## THURSDAY.

Midland county museum in the courthouse will be open Saturday afternoon from 2:30 until 5 o'clock. The public is invited.

## FRIDAY.

Stitch and Chatter club will meet with Mrs. V. L. Feazell, 1400 N. Marienfeld, Friday afternoon at the usual hour.

## SATURDAY.

Midland county museum in the courthouse will be open Saturday afternoon from 2:30 until 5 o'clock. The public is invited.

## Water Plant Here Is Completed by Bottling Company

The Midland Bottling Co. has recently completed its \$10,000.00 water plant on South Pecos street and is now operating at capacity output, offering the public electrified water.

The water is originally drawn from the company's private wells and is first softened by a chemical filtration process which removes objectionable minerals, including fluorides which cause brown stains on the teeth of growing children.

The water is then pumped thru an electrode box where the process of electrolysis forms aluminum hydroxide, which sets in suspension the vegetable and animal matter normally in solution in all waters. This passes into a coagulating chamber and then through quartz filters for its second complete filtration, after which it is free from all accumulation that is undesirable for human use.

The final process is to treat the water with ozone, which kills all germs and add three times as much oxygen as is originally in it, together with giving it a smooth, somewhat sweeter flavor that is most desirable in drinking water.

Thursday afternoon at 2:30 o'clock.

Midland county museum in the courthouse will be open from 2:30 until 5 o'clock Thursday afternoon.

## FRIDAY.

Belmont Bible class will meet with Mrs. Herbert King, Friday afternoon at 2 o'clock.

## THURSDAY.

Stitch and Chatter club will meet with Mrs. V. L. Feazell, 1400 N. Marienfeld, Friday afternoon at the usual hour.

## SATURDAY.

Midland county museum in the courthouse will be open Saturday afternoon from 2:30 until 5 o'clock. The public is invited.

PAUL MOSS for DISTRICT JUDGE 21 years in civil, trial and appellate practice Admitted, U. S. Supreme Court

# Good News

## Your Hard Water Troubles ARE OVER

# Electrified

PURE!

## GERM FREE WATER

## Our New \$10,000 Water Plant Is Now In Operation

We offer the people of Midland a delightfully soft water that is absolutely free of all germs . . . Use it for drinking . . . Use it for cooking . . . Use it for washing those delicate fabrics.

Protect your growing children's teeth with this electrified water—it prevents brown stain.

The 10,000 volts of electricity used in processing this water assures you of a fresh water that is delightful to taste and one that is germ free.

## Miss Doris Tidwell, John Rhoden Wed Saturday Night

Standing before an arch of greenery in the home of the bride's parents, 316 S. Big Spring, Miss Doris Tidwell, daughter of Mr. and Mrs. J. L. Tidwell, and John W. Rhoden Jr., son of Mr. and Mrs. John W. Rhoden Sr., were married Saturday evening at 7:30 o'clock in the presence of the immediate families and a few close friends of the young couple.

Rev. W. C. Hinds, pastor of the First Methodist church, read the ritual of the single ring service.

At either side of the altar base of ferns, before which vows were spoken, were tall floor baskets, filled with gladioli in shades of pink, salmon and rose-red. Floor baskets and bowls of roses and other summer blossoms were used throughout the reception rooms.

Preceding the ceremony, Miss Clea Dee Tate played selections of love songs.

Miss Lydia G. Watson was at the piano for the professional. To the strains of Mendelssohn's "Wedding March," the bride entered attended by her sister, Cleo Tidwell, as maid of honor. She was met at the altar by the bridegroom who was attended by his brother Floyd Rhoden, as best man.

During the ceremony "Nocturne in F Sharp" by Chopin was played softly by Miss Watson.

The bride wore a blue crepe costume made with high fitted waist, a pleated bodice with insert of self material cording in openwork design, and short sleeves pleated at the top. She carried a bouquet of shaded pink gladioli and fern.

The maid of honor wore a salmon pink crepe printed in small flower design. Her flowers were a corsage of pink carnations.

A reception was held following the ceremony. The bride's table stood

"There's a lotta mistakes in this letter, Miss Priss." "Hmm—that musta been the one you dictated while you were eating taffy."

## What Do You Know About-- Our Town's Business

Editor's Note: Data in the following questionnaire were obtained by the Business and Professional Women's club in the course of a detailed survey made last winter and were presented briefly by Miss Maria Spencer, program chairman and president-elect of the club, in a resume of the year's work given at a recent meeting.

- I. What is the population of our town and county?**  
 Answer: Approximately 10,000 people. Of this number 450 are colored and 400 are Mexicans.
- II. How many persons are gainfully employed?**  
 Answer: Approximately 3,500. Thirty were on relief.
- III. What are the principal industries of our town?**  
 Answer: The principal industries are agriculture, cattle, and oil.
- IV. How many persons are employed in each?**  
 Answer: Employment is as follows:
  1. Agriculture: Approximately 481 people of whom about half own their farms while the others are tenant farmers.
  2. Cattle: Approximately 285 people of whom 40 are owners, 120 full-time employees, and 125 transient employees.
  3. Oil: Total of 752 persons of which 685 were men and 67 women. Of the total, 28 major companies employ 355 persons; 27 supply companies, drilling contractors and pipe lines employ 285; and 44 independent companies and individuals employ 112. Those in the independent division are practically all owners.
  3. The professions: Total of 76 persons. These include: Teachers (other than public school), 12; lawyers, 19; preachers, 9; doctors, 8; nurses, 2; dentists, 3; chiropractors, 2; optometrists, 2.
  4. Public service: Total of 263 persons. This included: Federal, 15; state, 12; county, 30; city, 34; schools, 60; WPA, 115. Of these 93 are women.
  5. Transportation: Total of 68 persons, including 66 men and two women.
  6. Personal service: 308 persons, including 67 men and 241 women.
  7. Trades: Total of 685 men and 307 women, divided as follows:
 

Trade	Men	Women
Communication	62	76

## Visitor Presents Special Numbers At Story Hour

A piano solo and story by Mary Lou Hudson, who is visiting here from her home at Henderson, were special numbers at the Story Hour held at the courthouse Saturday morning.

A story by Betty Jo Greene and a poem by Dianne Debnam were additional numbers given by the children themselves.

Mrs. W. Bryant told the following stories: "Jack the Giant Killer"; "Tired of Being a Little Girl"; anonymous; "Coyote and Evening Star" by Alice James; "The Brave Tin Soldier" by Hans Christian Anderson; "The Ant and the Grasshopper" by C. M. L. from the "Fables of Aesop."

Children present were: Betty Ruth Pickering, Eloise Pickering, Jimmie Kathryn Kendrick, Mary Lou Hudson, Jean Anne Preskitt, Evelyn Ware, Edwin Ware, Edna Frances Smith, Betty Jo Greene, Janice Jones, Charles Jones, Dianne Debnam, Stephen Lee Debnam.

Out-of-town guests present for the wedding were: Mmes. and Messrs. A. L. Smith, R. B. Haynes Jr., Louie E. Douglas, William Hovis, R. E. Dansby, Chase Sutton, Roy T. Whiteman, T. I. Harkins, all of Houston, and Gerald Batts of the same city; Mr. and Mrs. R. R. Porterfield, Mrs. J. A. Haley and Mrs. Ben W. Smith of Midland; Mr. and Mrs. J. Everts Haley of Canyon; Mr. and Mrs. R. E. LeMay of Wichita Falls; Mr. and Mrs. Sidney H. Dunken Sr., Mr. and Mrs. Dick Carmody, and Mr. and Mrs. Douglas Woods of Dallas.

## Midland Girls Leave for Camp Mary White

Eight Midland girls are leaving during the week-end for Camp Mary White at Mayhill, New Mexico.

Most of the parents chose to go Saturday to New Mexico and spend the night rather than make the round trip today.

Those going either yesterday or today were: Mr. and Mrs. Raymond Lawrence, taking Lela June; Mr. and Mrs. P. J. Mims, taking Margaret; Mr. and Mrs. Jack Jordan, taking Catherine; Mr. and Mrs. E. H. Griswold, taking Betty; Mr. and Mrs. Glen Lewis, taking Jean; Mr. and Mrs. M. A. Monaghan, taking Marjorie; Mrs. Clyde Barron, and son, Edith, taking Dolores; and Mr. and Mrs. J. B. Hoskins, taking Mary Lou.

## Club Quilts for Hostess at Meeting Friday Afternoon

Members of the Stitch and Chat club meeting with Mrs. W. P. Hedges, 406 E. Tennessee, Friday afternoon, quilted a quilt for the hostess.

Each woman gave recipes for sandwiches.

Next week each one present will bring her favorite cookie recipe. Birthday gifts will be for Mrs. V. L. Feazel.

Refreshments were served to: Mmes. Chas. Ward, L. M. Hedges, V. L. Feazel, Jewel Hedges, L. G. Boyett, F. D. Reven, Miss Laverne Boyett and the hostess.

The club will meet Friday of this week with Mrs. Feazel, 1400 N. Maricfield.

## Marriage of Boy Scout Executive In May Announced

Announcement is made here of the marriage of Darold Wilson, field executive of the Buffalo Trail Council, Boy Scouts of America, and Miss Mary E. Bryant, daughter of Mr. and Mrs. W. E. Bryant of Waxahatchie, the ceremony having taken place at Barstow, Texas, on May 26. Rev. A. W. Smith, pastor of the First Baptist church, Barstow, officiated.

The bride has taught home-making in the Monahan high school for the past three years. She is a graduate of Cisco high school and of Texas State College for Women. During her senior year in college she was president of the Alice Freeman Palmer club and member of the Round Table and of the Mary Swartz Rose club. She is at present attending the summer session at TSCW, Denton, where she will be joined by her husband before returning to Grand Falls where they will be at home beginning August 1.

Mr. Wilson, who maintains headquarters half the time at Midland and half the time at Pecos, has conducted his Boy Scout work here for several months. He is a graduate of North Texas Agricultural college and Abilene Christian college. He has done graduate work at the University of Texas and is a graduate of National Training School at Mendham, New Jersey.

## Feminine Fancies

Venetian blinds which have been essentially the same for some 150 years have at last given way to the trend toward improvement.

One variation enthusiastically approved by its dealers is a blind in mohair is in the ascendancy as a material for draperies, we are told by the proprietor of a drapery shop. Although there are some linsens, chintzes, and homespuns used, mohair leads the list.

Flowered designs, especially large-flowered ones, are popular.

Off-white celanese is tops for glass panels with these drapes. Soft, almost neutral tints in this material are delightfully sheer and silky-looking.

For the minimum-budget, here's a suggestion that every housewife who is determined to have dainty

## Bridal Table Decorations Need Not Work Hardship on the Family Purse

What could be lovelier for the June wedding feast than this cake centerpiece with its little bride and groom? All it requires is some spool wire, some crepe-paper, a jar of paste, a pair of scissors and patience.

By following the directions given in today's menu column, you can easily make a "cake" as beautiful as this one or even more beautiful, if you have ingenuity.

By Mrs. Gaynor Maddox, NEA Service Staff Writer.

THE home wedding can be beautiful without bankrupting father. There can even be a tall wedding "cake" with little figures of the bride and groom, all for little money. To make the beautiful white "cake" centerpiece, follow these tested instructions carefully.

The wedding cake is made in three tiers, using cardboard for the foundation. The tiers measure 6 1/2 inches, 10 inches and 13 inches in diameter. They are each 3 1/2 inches high.

**Inexpensive Decoration.**  
 Each layer or tier is made like a round box and is covered with white crepe paper that has been crushed. When this is completed, place one above the other and hold together with spool wire.

The arch over the cake is made of three heavy wires 48 inches long. Each wire is covered separately with strips of white crepe paper and wound to the thickness of a pencil. Fasten the wires together at the top with spool wire, then spread the wires about two inches at the bottom and fasten to each side of the cake, holding in place with spool wire.

The roses are made of white duplex crepe paper. The center

## Belmont Class Meets at Home of Mrs. Attaway

Mrs. W. L. Fickett taught a lesson from the seventh chapter of First Corinthians at the weekly meeting of the Belmont Bible class Friday afternoon at the home of Mrs. W. G. Attaway, 404 W. Ohio.

She also asked a series of questions covering the fifth and sixth chapters of the book.

Mrs. John Collins of Fort Stockton was a guest.

Refreshments were served to the visitor and the following club members: Mmes. Herbert King, Fickett, W. J. Stewart Jr., J. M. King, John King Jr., A. W. Lester, C. E. Strawn, and the hostess.

Next Friday the class will meet with Mrs. Herbert King.

draperies, money or no money, would do well to heed:

For criss-cross curtains in the bedrooms use canvassing (yes, plain canvassing), edged with colored ball fringe. The trick is to allow double the usual amount of material for each curtain so that it will drape gracefully.

Men have walked to high heaven in recent years because women have invaded their realm of clothing and filched therefrom shirts, trousers, ties, and whatnot.

It is rather amusing to note that men are paying them back by taking over for themselves that once-popular dress material, ratin. (we could never understand why it was not pronounced as spelled).

One of the news things in masculine wear these months is the sport shirt of ratin. Made up in off-white with natural color wood buttons, this style makes us want to buy it right off the counter. Listen to the masculine chorus—Just like a woman!

## Revival Services Come to End Today

Revival services that have been going on at the First Methodist church here will close today with two services being conducted by Bishop H. A. Boaz, in charge of the revival.

The noted church official announced his sermon this morning would be a discussion of the church entitled "Upon This Rock I Will Build My Church." A short Sunday school service will be held, after which the general assembly will meet and all children under the age of 12 will be accepted.

Subject for the evening service has been announced as "What Then Will I Do with Jesus, which is called the Christ?"

Largest crowds of the two weeks of the services are expected to attend the final services.

HEALTH BOARD TO MEET.

Midland county public health board will hold a called meeting in the commissioners courtroom at the courthouse Monday afternoon at 4:30 o'clock. Mrs. Harvey Sloan, has announced. All members are urged to be present at the meeting.

## Thursday Sewing Club Disbands For Summer

Thursday Sewing club held its last meeting of the summer at the home of Mrs. Joe Roberson, 620 W. Tenth Thursday, disbanding until September at the close of the afternoon.

The eight members present occupied themselves with various kinds of handwork during the club hours and at tea time a refreshment course was served.

Attending were: Mmes. W. L. Fickett, C. A. Ponder, C. O. Fredregill, Herbert King Jr., C. E. Strawn, Paul Smith, and the hostess.

## University Club to Suspend Dances Through Summer

The monthly University Club dances will be discontinued for the summer, it was officially announced Saturday by Ed Beasley, secretary-treasurer of the organization. Decision to abandon the dances for the next three months was reached following an affirmative vote of the club. The first part of October will probably witness re-opening of the dance schedule.

During the three months' interim, no club dues will be assessed members, Mr. Beasley said.

## Miss Lucile Thomas Will Tour Europe

Among the important vacation journeys of Midland citizens will be that of Miss Lucile Thomas, who will leave Monday on the first lap of a European tour which will last approximately six weeks. She will go first to New York to spend about two days and then will sail on the Champlain of the French line as a member of the Tri Delta sorority cruise.

The group will land first in England and subsequently travel to Holland, Belgium, France, Switzerland, Austria, Germany, and Italy, embarking from France on the return over-seas trip. Return landing at New York is scheduled for August 19. The return trip will be made on the palatial Ile de France.

Drink Pineapple Kist made with electrified water. (Adv.)

# CARDINALS COME FROM BEHIND TO DEFEAT BARONS ANOTHER

## CLUBS MEET IN 2 GAMES TODAY AT BIG SPRING PARK

BIG SPRING, June 25. (Special).—The Midland Cardinals came from behind in the last three innings here today to score four runs and win a hard 4-2 victory over the Big Spring Barons.

The victory gave the visitors two in a row and they can do no worse than break even in the series although they might lose both games of a double header here this afternoon. The first game is scheduled to start at 2:30.

The Barons got away to a two run lead in the fourth inning here yesterday afternoon when Decker walked, stole second, Sweet doubled and Seibert doubled. But that was the lone threat of the day for the home club as Frank Nelson bore down with his fast one and gave them only two more hits the rest of the game. The win was the third within seven days for Nelson and placed the Midland club in third place in the league standings.

Marvin Keller pitched all the way for the Barons and lost his third in a row to the Cardinals. He shut them out for the first six innings but in the seventh Ballinger singled, went to third on a single by Morris and scored on a long fly by Beers. In the eighth, Nelson walked, Barnhill forced him at second, Guinn singled to send Barnhill to third, Garbe was out on a grounder to first, Barnhill scoring to tie the score. In the final frame Suytar led off with a double, Ballinger walked, Morris lined out to Seibert who threw the ball into left field attempting to double Suytar off second and the first baseman raced all the way home, Ballinger going to third. Ballinger was trapped off third after Beers singled and stole second, but Nutt singled to score Beers.

The box score:  
Midland AB R H PO A E  
Barnhill, 2 3 1 0 1 4 0  
Guinn, 3 4 0 1 0 0 0

Walks—Nelson 4, Keller 4, Struck out—Nelson 4, Keller 3, Left on base—Midland 4, Big Spring 4. Umpires—Pettigrew and Rowland. Time: 1:45.

### WTNM Averages

Thanks to some lusty hitting by the team as a whole, the Hobbs Boosters are now leading the league in team hitting. George Donaldson, Hobbs outfielder, dropped 28 points and ended up hitting .472, but Stevens of Lubbock also slumped falling to .380. Suytar of Midland, Carr and Stevens of Lubbock are tied for home runs with 16. Donaldson replaces McDonald of Clovis in runs batted in, with 69. Averages through games of June 19. (Hobbs-Wink double header not included) follow:

Showing the Complete Evolution of a No-Hit, No-Run Delivery

How to pitch consecutive no-hit, no-run games—by Johnny Vander Meer.

## At the End of the Trail—An aging Gladiator Looks at Defeat

One of the most dramatic fight pictures ever made, this photo shows bewildered Max Schmeling, trapped against the ropes, staring helplessly at his foe, as Champion Joe Louis moved in with the killing blows that paralyzed the German contender and left him sprawled insensible on the floor in the first round of their heavyweight title bout in New York. Schmeling's face in this picture tells the whole story of his beating at the hands of the young negro whom he had knocked out when they met in 1936. Louis' outthrust jaw, flailing right fist and left hand cocked for a blow to scribe better than words the ferocity of the attack with which he outlasted the German contender in the record 4 time of two minutes and four seconds.

### The Payoff

By Jess Rodgers.  
Cleaning the cuff. Do any of you want Baer against Louis? . . . The odds should be about 100-1 but a lot of ballyhoo will probably narrow the odds to 2-1 and a lot of chumps

will fall for it. . . The fact that Max Schmeling really was injured will cause a lot of people to see the fight pictures that would have missed them otherwise. . . Everybody will want to see whether the blow to Max's kidney was a foul or not. . . Gerald Bloss, a native of the Buckeye State, is doing handspins these days. . . The reason: Look where Skinsniyati and Cleveland are in the standings. . . And both of them with new managers. . . Here's hoping the two meet in the World Series. . . Charlie Barnabe, the Big Spring Baron manager, disgusted at the ineffectiveness of his hurlers, took the mound and defeated Clovis the other day. . . He admitted he didn't have much on the ball the last few innings except a lot of brain work. . . Charley is around 35 and probably isn't in such very good condition but he may make his club a number one relief man. . . And manager Jodie Tate of Wink played a game at second for his club not long ago. . . Of interest to local baseball fans: Bud Brewer will not be able to play for Albuquerque again this year because of a siege of illness. . . Andy Dais, the wild right hander that developed a sore arm while toiling with the club here last year, has won five and lost three with the Class-C Jacksonville club. . . If Jack Nook is still with that club he isn't hitting as much as .250. . . The Sporting News lists all hitters down to that figure. . . Big Spring Herald Hank Hart says some of the Barons are more interested in improving their social standing than their standing in the league. . . What has happened to Lubbock? . . . You guessed it—they have quit hitting. . . By the time this is printed, our stereotyper, "Little Johnny" Rhoden, will have joined the ranks of the Benedicts. . . And that will make the entire force down here "hitched" except the society editor. . . Night softball is going to be a reality here soon. . . That bunch sure "don't do us right" on turning in scores or any dope on the games. . . Archie Estes and Lloyd Burris

## Pigskin Play Shoe.

Utterly comfortable, and so easy to play in, is a perfectly plain, very low-heeled sport shoe of dark pigskin in pastel shades or dark and natural leathers with contrasting binding and narrow tie fastening, patterned after the old-fashioned American gaiters. Flexible and good looking, too, they are just the shoes to wear with trim flannel slacks.

## Nephew of Midland Man Blast Victim

Mr. and Mrs. Pearl Blair returned Saturday from Hobbs, N. M., where they were called Thursday night by the tragic death of his nephew, Alex Blair, in the nitroglycerin explosion which took a toll of eight lives.

The Midland man was to meet the train here Saturday night and accompany the body to Arkansas City, Ark., where burial will take place sometime Monday.

## New Clinic Will Be Opened Here Soon

Announcement was made Saturday by Doctor I. Sellers Moore that the Moore-Absher Clinic, recently constructed on North Colorado st., will be opened about the middle of the week. The hospital unit will be opened in August.

Doctor Moore came to Midland from Ozona, after having practiced at Houston, San Antonio and Little Rock, Arkansas, and is a graduate of the University of Arkansas Medical school.

Doctor L. A. Absher of Portland, Tenn., will be associated with Doctor Moore after Aug. 1.

## Cafe Damaged by Fire Friday Night

A fire that was believed to have been caused by a "short" in some exterior wiring Friday night caused minor damage to the Log Cabin, just outside the west city limits, before it was extinguished by firemen. Employees of the cafe said a large sign on the front of the building developed the short, causing the roof to catch on fire. Damage to the building was not extensive.

## One Killed, Another Injured in Collision

SAN ANTONIO, June 25, (AP).—Second Lieutenant James Hatfield, 24, Orlando, Fla., was killed and another Randolph Field student officer injured today when their automobile collided with a truck on the Austin highway.

## Civil Service Order Of President Rapped

WASHINGTON, June 25, (AP).—President Roosevelt's order extending civil service to over 100,000 government employees today met with criticism and praise from congressmen.

Administration supporters and civil service advocates generally said it was a step forward for the merit system; but some congressmen questioned this. The order would give civil service status to present job holders if they pass a non-competitive examination and win a recommendation from the head of the agency employing them. It is effective February 1. The civil service commission said 71,000 of the employees were in agencies supported by emergency funds.

## Stock Market Boom Continues Saturday

NEW YORK, June 24, (AP).—For the sixth consecutive day, the stock market climbed today, ending a week of the steepest price rises in six years and adding some \$5,000,000 to the total quoted value of listed shares.

## MAJOR HOOPLE OUT OUR WAY

Oil News---

CONTINUED FROM PAGE ONE

Ward, Gulf No. 96 Estes rated daily potential of 1,722.96 barrels a day, based upon flow the second three hours of a six-hour gauge, during which it tanked 215.37 barrels. Flow the first three hours was 356.04 barrels. Pay between 2,510 and 2,660 feet depth, was shot with 990 quarts. Gas-oil ratio was 1.335-1.

McKee To Re-cement. Twenty-five sack cement job from 2,267 to 6,197 having failed to harden, Magnolia No. 1-A J. H. McKee, northern Pecos Ordovician test, is cleaning out cement. It will be re-cemented 90 feet up from bottom. The well encountered sulphur water from 6,322-67, in the Ellenburger, lower Ordovician, which it topped at 6,102. Zones in the Simpson, middle Ordovician, which showed oil will be tested.

In the Pecos Valley pool, Pantex No. 1 Pecos River Bed gauged natural flow of 310.75 barrels a day, with gas-oil ratio of 400-1. Pay was topped at 1,798, and total depth is 1,825.

Gulf No. 8 Waddell, Ellenburger production prospect in the Sandhills pool of western Crane, had swabbed wash water out of casing 1,200 feet from surface, with nothing showing. Total depth is 6,083. Farther northeast, Gulf No. 4 McKnight is drilling at 4,735 feet in hard lime.

Designation of T. B. Cranfill, trustee for American Liberty Oil Company, No. 1 J. B. Tubb, Crane test a mile and a quarter southeast of Humble's gasser, has been changed to Rushton L. Ardrey, trustee. It is 440 feet out of the southwest corner of section 20, block 32, public school land. Drilling with rotary to depth of 4,500 feet is scheduled to start immediately.

R. H. Henderson No. 1 University, northwest Crockett test, topped Yates sand at 890, 18 feet higher than Choate & Hogan No. 1-K University, discovery well in the new Choate & Hogan pool. It is drilling ahead at 1,180 in sand.

In the McElroy pool of Crane-Upton, Gulf No. 175 McElroy flowed 821.53 barrels a day, with gas-oil ratio of 836-1, after 530-quart shot, bottomed at 3,050. Pay was topped at 2,790.

Drink Orange Kist made with electrified water. (Adv.)

Mrs. S. P. Hall and son, Billy Joe, are spending a two weeks vacation at Commerce, Texas.

New Grocery Store Under Construction

The new Conner Brothers grocery store to be built at 411 West Texas is shown above as it appears from an architect's drawing. The building will be the property of Bill and Ellis Conner, proprietors of the two Piggy-Wiggly stores here. Felix Stonehocker is contractor in charge of the building and Wyatt C. Hedrick is the architect.

Building Permits Continue to Soar Toward Record Mark

Midland building permits continued to soar on toward the \$1,000,000 mark during the past week when issuance of \$51,450 worth were recorded by City Building Inspector Frank Prothro.

Two new buildings to house grocery stores accounted for most of the amount for the week, one calling for a \$20,000 building and the other for a \$19,000 structure. The next largest permit was issued for the L. M. Short dwelling that is to be erected at 1011 West Louisiana street.

The permits issued during the past week brought the total for the year to approximately \$675,000. With the year not yet half gone, city officials are confident the year's total will be well over the \$1,000,000 mark. Last year's record of \$802,000 is expected to be passed within the next two months, assuring a new record for the city this year. One deal, expected to culminate with the building of a \$50,000 structure in the business district, is being held up temporarily but is expected to be settled within the next two or three weeks.

Permits issued since June 1 follow:

Glen Kinsey, permit to build \$250 temporary storage house at 1001 E. Wall. Texas-New Mexico Pipe Line company, permit to construct \$9,000 office building at 221 N. Colorado street. Tom Irwin, permit for \$150 remodeling job on home at 707 South Front Worth. Sinclair Refining company, permit to erect \$500 storage tank in East Midland. Paul A. Green, permit to build \$2,700 dwelling at 2007 W. College. O. H. Jones, permit to build \$4,000 residence at 2011 W. College. Phillips and Gosten, permit to build \$20,000 store building at 113-115 North Colorado. Conner Brothers, permit to construct \$19,000 store building at 411 West Texas. L. M. Short, permit to construct \$5,750 residence at 1011 West Louisiana. raw materials.

Large Crowds Attend Services Each Night

"Where Did the Devil Come From?" is the subject of the illustrated lecture tonight at the large tent on South Main street. This is the second week of pictured Bible lectures known as the "Phophecy Speaks" series. Each lecture is made plain and interesting by the use of many large beautifully colored pictures that are thrown on the screen.

"Never again will the nations of the world be united under one ruler, as they were in the time of Alexander, until that glorious day when Jesus Christ shall come in the clouds of heaven and set up His kingdom of glory which shall have no end," declared evangelist Lee Carter in his lecture Friday night. He said we are living in the time of the ten kingdoms spoken of in the second and seventh chapters of Daniel. As proof for his statement he read Daniel 2:43, 44 which says—"they shall not cleave one to another, even as iron is not mixed with clay. And in the days of these kings shall the God of heaven set up a kingdom, which shall not be destroyed."

Carter says that tonight two prizes are to be given away to those who bring the most people out to the meetings for the first time. He is planning for and expecting a very large attendance tonight. The public is invited to attend each of the lectures. Song service starts at 8:15. There is no admission charge.

Drainage, Grading - CONTINUED FROM PAGE ONE

highway 158, from Midland to Kermit, and on the new road from Odessa to Kermit, the highway commission last Monday having ratified the Winkler and Ector counties' agreement on plans for construction. The project now is subject to final carrying out of the parts assumed by those counties and by Midland business interests. It was pointed out that funds are needed for construction of the new five mile grade in Winkler county, to take the place of one previously built by that county over another route. Midland business leaders have raised much of the fund but committees of the chamber of commerce were expected to meet early this week for final work of securing the money.

Roosevelt Defends Right to Fight for Choices in Congress

WASHINGTON, June 25 (AP).—President Roosevelt, declaring a right to intervene in democratic primaries, gave virtual notice today he was prepared to fight personally for election of a congress favorable to his policies.

In his 12th "fireside chat" by radio to the nation last night, the president made it plain he would not hesitate to speak out when he thought a contest between a "liberal" and a "conservative" warranted.

"As president of the United States, I am not asking the voters of the country to vote for democrats next November as opposed to republicans or members of any other party," he said. "Nor am I, as president, taking part in democratic primaries.

"As the head of the democratic party, however, charged with the responsibility of carrying out the definitely liberal declaration of principles set forth in the 1936 democratic platform, I feel that I have every right to speak in those few

Former Deputy to Face Murder Trial in His Home County

SOUTH PARIS, Maine, June 25 (AP).—Francis M. Carroll, 43, former deputy sheriff, today expressed willingness to have citizens of his own county try him on a charge of murdering Dr. James G. Littlefield, for whose slaying Paul N. Dwyer, 18, is now serving a life sentence.

Requesting extension of the date of trial, set yesterday, defense counsel Clyde Chapman told the court when he entered the case that Carroll, a church deacon and father of five children, was held on a morals charge involving his daughter, Barbara, 18.

Candidate for RR Commission Heard Here Friday Night

Robert A. (Bob) Stuart of Fort Worth personally brought his candidacy for railroad commissioner here with an address Friday night in front of the Scharbauer Hotel. Stuart, former state senator, was on a tour which called for 50 addresses last week in different cities of West Texas. Stuart declared he is in favor of payment of the old age assistance of the old age assistance of the ad valorem tax. Both of which he said could be brought about through

the conservation of oil and gas that are now being burned and wasted in the oil fields.

Stuart said Texas has too high freight and gas rates and as railroad commissioner he will attempt to lower them.

"I'm running on my record," said Stuart. "I served Texas for six years as state senator. I served Tarrant county as district attorney. I'm now president of the board of regents of the seven Texas State Teachers Colleges, four of which are located in West Texas. I was co-author of the bill that created Texas Technological College and I was Federal Housing Administration director for West Texas—the largest district in the

United States." Stuart said as railroad commissioner he will give relief to the independent truck operators "who are being persecuted off the highways they have helped build."

RETURN HOME.

Mr. and Mrs. J. A. Clifford and Miss Mary Elizabeth Randolph, who have been visiting in the home of Mr. and Mrs. N. W. Bigham here, returned to their home in Weslaco Saturday.

VISITS PARENTS

Mrs. Frank Radke of Ft. Worth is visiting her mother, Mrs. J. T. Weathered Sr.

### Hand Still Faster Than Eye

Fight fans who have seen seemingly lightning-like punches travel through the air, and wondered at their speed, now have their question answered. Using an electrical controlled measuring device, Al Albin, one of Max Schmeling's sparring partners, sends his right fist through the "electric eye" control at the rate of slightly more than 40 miles an hour.

### Hypnotic Relief for Childbirth Pain

In preparation for the arrival of her baby, Mrs. Ethel Pardie Gaynor, 45-year-old expectant Los Angeles mother, is shown above in a trance as R. A. Gilbert, hypnotist, gives her a "treatment." Painless childbirth through "hypnotic suggestion" is Gilbert's aim and the treatments are necessary to prepare Mrs. Gaynor for a deeper trance at the crisis. In addition to the obstetrician, three hypnotists, including her husband, will attend the mother during delivery.

### A Supreme Court Justice Hob-Nobs With the Legislators

Could that be a Supreme Court justice smiling in the center of the above picture with his arms encompassing former congressional colleagues in a good fellow gesture? Yes, it is Justice Hugo Black, a precedent breaker, who did it again by going over to Capitol Hill to renew old memories. The former senator is pictured with two other Alabama: Speaker William Bankhead of the House of Representatives, left, and another Bankhead, Senator John. "I'm just another of the many visitors," said the jurist, not a whit perturbed by the fact that Supreme Court justices rarely visit the halls of Congress.

### Million-Dollar Smiles

This big check marks a big step in the fight on infantile paralysis. Written for \$1,010,000, it represents the proceeds from the President's birthday fetes held over the U. S. last January. Shown presenting the check to President Roosevelt on the porch of his Hyde Park, N. Y., home are, left to right, Basil O'Connor, Averill Harriman, Dr. Leroy Hubbard, Clay Williams and Keith Morgan, chairman of the committee for the celebration of the President's birthday. The check goes to the National Foundation for Infantile Paralysis.

### Watching Over the Dregs of War

All's quiet on the Tancheng front! The Japanese army has moved on to the west, leaving utter desolation and ruin in its wake. High on the battlements above the city, troops stand guard to prevent any aftermath uprising within the territory. But their guns are smoking hot no longer, for below a bewildered populace is attempting to bandage the wounds of battle. The battered and scarred roofs of Tancheng's houses may be seen in the background.

### Found and Photographed at Last—A Perfect Specimen of Albino Robin

A white (albino) robin is a rarity in the world of birds, but pictures of one are even more rare. Here are pictures of a perfect specimen discovered by Albert Dixon Simmons, Cleveland naturalist, in years of close study of birds. At left the perfection of the white plumage may be seen, and the center picture notes the contrast as compared with the parent bird, which reared the strange youngster as carefully as the rest of the family. This lack of discrimination lends strength to the theory that birds are color-blind. The photo at right shows the albino bird with wings spread, bravely learning to fly. Such birds are especially rare because their conspicuousness increases all natural dangers and hazards. Simmons refused to reveal where he found the white robin, fearing that it might fall victim to some collector who might like very much to add a stuffed albino bird to his collection. With some of the same characteristics found when albinos appear among flowers, animals and humans, this rare bird gives an appearance of having pink eyes, because the eyes are colorless, revealing the background of blood-vessels which gives a pinkish tinge to pupil and iris. Albino traits are caused by lack of pigment, and in so pure a state as in this case it is extremely rare among birds. (Copyright, 1938, by Albert Dixon Simmons.)

### No, He Isn't!

Let it be understood right now that the fellow above is NOT the kidnaper of 10-year-old Charles Mattson. But innocent Leo Frederick Ash—with black beard, hollow cheeks, and bashed nose—looks so much like the FBI sketch of the abductor that he was arrested nine times in various cities until the Washington state patrol gave him an identification card as protection against police.

### Champion Cowhands to Attend Cowboy Reunion

Three top cowhands who won handsome saddles as champions in rodeo events at the Texas Cowboy Reunion last year are planning to attend the ninth annual Reunion at Stamford this year on July 4, 5 and 6. A fourth will not return, having answered the call to the "last round-up." Upper left in the pictures is J. L. McCarson, Palo Pinto, riding "Old Doc," who won the cutting horse contest. Vance Davis, upper right, riding "Buster," won the calf-roping championship. He works on the Quien Sabe Ranch, Garden City. Tom Hudson, Benjamin, lower left, who won the oldtimers calf-roping contest, died last January. He is shown with his prize saddle on "Boots." Dan Utley, San Angelo, lower right, is mounted on "Argentine" in the saddle he won as champion bronc rider last year. He has won this event four years in succession and is coming back again.

### How Los Angeles Greeted Shriners

Up in the air goes turbaned Ed West, above, catapulted from the arms of California cuties. But this Noble of the Mystic Shrine is no more up in the air than the city of Los Angeles, turned topsyturvy as the Shriners, in 64th Imperial Council session, descended on the city with colorful parades and pageants, seasoned with the customary sideline pranks. Wearers of the red fez were everywhere on the Southern California landscape, sampling Hollywood night life between their official sessions.

### Germany Sends New Envoy to England

Von Dirksen

READY to participate in vital negotiations between Britain and Nazi Germany, Dr. Herbert von Dirksen, new German ambassador to England, arrived recently in London and presented his credentials to King George VI.

### Honored for Work in Helping Blind

Alger

FOR his "outstanding achievements" in prevention of blindness and conservation of vision, Dr. Ellice M. Alger was awarded the 1938 Leslie Dana gold medal. He is professor of ophthalmology at New York Post-Graduate Medical School.

### A Father Collapses After Finding His Sons' Bodies

A father's dogged determination to continue the search for his missing sons resulted in the finding of the lads' bodies in a sand quarry at Guyancourt, near Versailles, France. The intensely dramatic photo at left above shows the father, Dr. A. E. Simkov, a white Russian physician, collapsing after leading a searching party to the bodies of his sons Georges, 18, and Andre, 12. At right, an official police photographer is shown taking a picture of the decomposed body of one of the Simkov lads. The boys, who disappeared April 20, were first believed kidnaped. The father had continued his search after police abandoned it.

# Paris Visit of Britain's Rulers To Cement Accord With France

### Flowery Welcome Is Planned for King and Queen

By MILTON BRONNER  
NEA Service Staff Correspondent.  
PARIS.—This great, beautiful capital with its mercurial people is getting ready to give to King George VI and Queen Elizabeth of Great Britain one of the finest receptions of modern times when they come here as the guests of the nation from June 28 to July 1.

Not since the late King Edward VII arrived in Paris on May 1, 1903, has any royal visit been anticipated with so much eagerness as this one of his grandson. In 1903 King Edward made his first trip to France after his accession to the throne. It was a gesture of friendship to a sorely-worried nation—a nation that feared a Germany armed to the teeth under Kaiser Wilhelm II. That visit paved the way for the entente cordiale which stood the test of fire in the world war.

History repeats itself. The forthcoming visit of the British royal pair is their first foreign journey since their accession last year. Again it is a visit to a sorely-worried France—a France that fears a Germany armed to the teeth under its Nazi leader, Adolf Hitler.

### VISIT SEALS FRIENDSHIP OF BRITAIN AND FRANCE.

But this time the royal visit is not to pave the way for an entente cordiale between Britain and France. That entente is already in being. The chiefs of the army, navy and air forces of the two countries are in constant touch, concerning their planes in case of war. King George's visit sets the seal on this entente.

The organization known as "Les Amis des Champs Elysees" is decorating the famous thoroughfares Champs Elysees, Avenue de l'Opera, Rue Royale, Rue de la Paix, Place Vendome and Rue de Rivoli. There will be no flamboyant pillars and arches such as Nazis and Fascists use, but a striking blending of the British and French national colors and above all a use of roses and other fresh flowers.

The honored guests will be housed in the famous Quai d'Orsay Palace in which King George V and Queen Mary stayed when they came to Paris in 1919. The place is being refurbished and redecorated and the rooms are being filled with the art treasures of France. The King's bedroom will be fitted with the most beautiful pieces made for the great Napoleon and used by him in his various palaces. The Queen's rooms, decorated in her favorite colors of pale green and cream beige, will contain the choicest pieces made for Queen Marie Antoinette.

### PLAN BUSY PROGRAM FOR ROYAL VISITORS.

The official program is designed to crowd as much as possible into the shortest space of time. The King and Queen and their retinue will travel June 28 via

This large drawing room in the royal apartments of Paris' famed Quai d'Orsay is being made ready for the visit of King George and Queen Elizabeth of England.

With the memory of the assassination of King Alexander of Yugoslavia on French soil still fresh, France has assigned this crack corps of motorcycle police to protect Britain's rulers upon their forthcoming visit to Paris.

Dover and Boulogne. They will arrive at the Bois de Boulogne station always favored by King Edward VIII, and will be received

### Redecorate Quai D'Orsay Palace For Royal Pair

en at the Elysees Palace by the Wednesday, June 29, the King will lay a wreath on the tomb of the Unknown Warrior in the Arc de Triomphe and then attend a reception at the Hotel de Ville (the Paris city hall).

In the afternoon the royal visitors will go to the world famed art gallery, the Louvre, and then go on to a garden party at Bagatelle. In the evening President and Mme. Lebrun will be guests of the royal pair at the British embassy dinner and all will go on to a gala performance at the Opera.

Thursday, June 30, the King will see a display of France's military might at Satory. He and the Queen will lunch at the palace of Versailles where they will also see the famous fountains in full play. That night they will dine at the Foreign Office.

Friday, July 1, they will go to Villers-Bretonneux where the King will unveil the great Australian national war memorial after which they will return to England.

### Moves to Determine Padre Island Owner Are Being Delayed

AUSTIN, (AP).—Any legal moves to determine the rightful owner of Padre Island, a long, narrow strip of sand off the southernmost shoreline of Texas, appear remote. Subject of controversy months ago, the island, born of tidal washings or subterranean upheaval, stretches 125 miles along the Gulf coast from just below Corpus Christi to Port Isabel.

Hurricane winds sometimes lash sea water completely over the mile-wide isle but generally it functions inertly as a natural breakwater for the mainland, separated from the shore by the shallow Laguna Madre which varies from one to three and a half miles in width.

The strip affords pleasure to fishermen and is said to have been considered by oil prospectors as a possible producing area. Conversion of the island into a pleasure resort by eastern capital and connecting it to the mainland with long bridges at each end has been proposed, but the announcement flared into a discussion of ownership.

About a year ago Gov. James V. Allred vetoed a bill by which the state would have acquired the island by purchase. It provided \$500,000 for the purpose.

The governor asked land commissioner W. H. McDonald and attorney general William McCraw to investigate the status of title.

McDonald looked into the matter and recommended the attorney general file a suit with a view to establishing ownership. The governor then asked the attorney general to take whatever action was needed. The attorney general's office, however, declared a survey was necessary since the boundaries of the island never had been properly described.

The governor then asked the land commissioner for a survey but the commissioner replied no funds were available.

R. J. McMahon, state reclamation engineer, was appealed to and indicated he would be glad to survey the strip if the governor would make a deficiency appropriation.

The governor refused, saying, in his opinion, a survey was not necessary in trying a suit to establish title. The attorney general, however, claimed he would be helpless in court without a description of the island.

If the suit were filed the state might claim the island as part of the public domain on grounds the constitution reserved the bays and islands of Texas' shoreline as state property.

There are records, however, that 11 1/2 league or nearly 5,000 acres of the 141,000, were granted in 1829 by the Mexican government to

### Great American Life Deposits Million Dollars

An important chapter in the history of Texas insurance was written recently when the Great American Life voluntarily deposited \$1,000,000 with the Insurance Commissioner of the State of Texas giving its policyholders, present and future, the advantage of Registered Insurance. This was announced by Roy McKee, District Manager of the Company.

The purpose of the deposit was described by the Great American's District Manager to be consistent with the company's practice of regarding the security of its policyholders above every other consideration.

"Old line legal reserve life insurance has become a proud phrase in American finance in the last one hundred years," Mr. McKee said. Its operation involves the accumulation of reserve funds calculated to guarantee the fulfillment of every policy provision, and it is the law of every state in the Union that these reserves be maintained at all times and are adequate for the purpose for which they are intended.

The significance of the Great American's million dollar deposit is that it is in excess of the reserves required by law and represents an added safety factor that voluntarily gives the company's policyholders the maximum element of security possible under an old-line life contract. The fund is in addition to a capital deposit of Five Hundred Thousand Dollars voluntarily made two years ago, which amount was also in excess of the company's legal reserve requirements, the present combined total of one million five hundred thousand dollars making the Great American Life the only life insurance company in Texas voluntarily maintaining such deposits in excess of the reserves required by the laws of the state.

Effective immediately, Great American policies will display on their face the official seal and signature of the State of Texas Insurance Commissioner. All policies now in force will also share equally in the advantage of this security.

The corporate history of the Great American Life Insurance Company is an interesting chapter in the financial and commercial chronology of Texas. From obscurity the company has grown to a position of importance not only in life insurance circles of the state, but of the nation. Perhaps the first significant highlight of its corporate career was the purchase for cash of its own 10-story home office building. The structure is owned outright by the company without encumbrance. Next came the announcement of its million dollar capital and surplus figure. Much emphasis is placed on that achievement, particularly from the policyholders point of view.

The reason is that among all old line legal reserve life insurance companies organized in the United States in the last 21 years, only seven possess today an amount of cash capital and surplus (policyholders' surplus) equal to or in excess of that of the Great American Life.

Simultaneous with the announcement regarding Registered Insurance, Mr. McKee reported that on May 1st, the Great American reached the 30 million dollar mark of insurance in force. The impressiveness of this volume can best be visualized when it is remembered that the Great American's first policy was issued February 2, 1931. In seven years therefore, several of which witnessed severe national economic uncertainty, an amount of new insurance has been individually written and placed in force which many companies have not duplicated or approached in twice or even three times as many years of operation.

The Great American Life Insurance company occupies approximately one-third of its own 10-story home office building. Its rapid rate of progress however, will require the inclusion of at least 10 per cent additional floor space within the next 60 days. This will be achieved by a rearrangement of the entire 8th floor; the company completely occupies the 9th and 10th floors already. This latter space houses the executive and administrative departments. The industrial and Filing Departments absorb about one-third of the 7th floor and the Art Department approximately the same portion of the 3rd. The company operates in the State of Texas, Oregon, Louisiana, North Dakota, Idaho,

Father Nicholas Bailli, member of the Franciscan Order, and that the land has passed to his nephew, Juan Jose Bailli.

In an age-worn record of titles confirmed by the state legislature, then in its infancy, there is listed under the date of 1852 an approval of the Bailli ownership.

Whether, a century or so ago that acreage constituted the entire island, with the remained formed later by wave action, is a matter of speculation.

### Vitt Head Man On Field, Wife Boss at Home

CLEVELAND, (AP).—What does the wife of a successful baseball manager think about the game?

For one thing, Mrs. Oscar Vitt, wife of the Cleveland Indians manager, lets her husband guide the team. She manages their home and family. The Cleveland Indians have been leading the American League most of the season.

"It's nice when you win, but when you lose—that's another matter," Mrs. Vitt said in a United Press interview.

Don't Talk Shop. She said that during the baseball season the Vitt family always is under somewhat of a tension. "But we don't talk shop" much at home.

Although Mrs. Vitt goes to most of the Indian's games, she is not actively interested in any other sport.

"Baseball is not a game for a woman to play. If I played any game, I should choose golf or tennis," she said.

"But as a spectator I am more interested in baseball than in any other game."

Her interest in the games dates from 1911, when she met "O' Os'."

They were married in 1915. At that time Vitt was a player.

Mrs. Vitt used to cheer for Oscar to keep up his batting average. Now she has to cheer for the whole Cleveland club, she said.

She said that she had not been in Cleveland since 1916. Vitt then was third baseman for the Detroit Tigers.

As for "Ladies Days," "They are all right if the ladies bring in men paying customers," Mrs. Vitt said. "The Vitt's son, Bob, has no aspirations to be a star of the diamond."

He hopes to be a doctor. That is, his mother said, if he does not tire of school before he receives his medical degree. He's a freshman at the University of California.

Mrs. Vitt said that her husband was the only one in the family who followed a sport as a career.

"I've traveled around with the clubs Mr. Vitt has managed ever since we were married. My favorite part of the country? California. That's where we have our home."

### Schools in Van Zandt County Are Approved

AUSTIN, (AP).—L. A. Woods, state superintendent of public instruction, announced that standardization certificates have been approved and sent to 43 Van Zandt county schools, the largest number for any Texas county.

"Very few counties have made as rapid progress in four years as Van Zandt," Dr. Woods said.

In the 1935-36 school year, the year the new requirements of standardization became effective, five schools in Van Zandt county met the requirements. In former years standardization was based upon physical condition of the school, whereas now, in addition to that requirement, the work done by pupils in each grade is taken into consideration.

Standardized school in the county have the same rating in the state department of education as grades in an accredited and affiliated system, Dr. Woods said.

### Teaching of Social Virtues Disappears

DALLAS, (AP).—Direct teaching of the social virtues has practically disappeared from the permanent texts adopted for the primary grades in Texas, according to a survey made by Dovieul Bullion as part of her work for an advanced degree at

Colorado and California. Senior officials of the Great American Life Insurance Company are: Chas. E. Becker, President; Senator J. J. Strickland, Chairman of the Board; R. H. Brand, Executive Vice President; W. J. Hiller, Secretary; Actuary; G. F. Fallay, Treasurer; Perry Clemens, Vice President; E. G. Harrison, Vice President; Wm. L. Dugger, Vice President; A. C. Cutler, Assistant Secretary; Dr. Frederick Fink, Medical Director, and Sylvan Lang, General Counsel.

### Candidate

E. B. Barnes, candidate for Treasurer of the State of Texas, who was here Saturday contacting voters. Barnes is originally from Snyder, but for the past 16 years has lived in Austin.

Southern Methodist University.

Instead of learning the social virtues—such as appreciation of home, respect for mother, cooperation of teamwork, kindness, courage, self-control, obedience, honesty, thrift, and patriotism—from textbooks, students are being taught these ideals and virtues in home-room programs, playground activities, and auditorium exercises, the survey showed.

Of eighty-three textbook selections considered, only two contained direct teaching of the virtues. Five stories named the virtues but without exhortation. Seventy-six presented situations in which the virtues were involved, or practiced, without directing attention to qualities desired. In none of the selections was there any material on temperance or religion.

### Sherman Woman Is Named Press Head

SHERMAN, (AP).—Mrs. L. (Hope Ridings) Miller, elected recently president of the women's national press club at Washington, D. C., is a native of North Texas and obtained the major part of her education in that region.

She was born at Bonham, the only daughter of Dr. and Mrs. A. L. Ridings who now live at Sherman. She attended the Sherman high school and Austin college, but obtained her B. A. degree at the University of Texas. She received the Master's degree from Columbia University, New York, at the age of 20, the youngest of 1,800 students receiving the degree that year.

Mrs. Miller met and was married to Dr. Clarence L. Miller while she was head of the English department of Paris junior college.

After locating at Washington, Mrs. Miller won the attention of the managing editor of the Washington

### Collection of Books Given to University

ABILENE, (AP).—Judge James P. Stinson of Abilene, Hardin-Simmons University trustee, has presented several hundred books from his personal library to H-SU.

The collection includes works on theological and historical subjects, and numerous volumes by Texas authors.

Unusual are several compilations of the works of southern authors.

Several lives of Christ are in the collection. In this group a two-volume "Trial of Jesus From a Lawyer's Viewpoint," by Walter M. Chandler, prompted Judge Stinson, Taylor county democratic chairman, to reminisce.

"The tornado tragedy at Clyde recalls the storm that devastated Cisco, in 1893. It was just after the death of Jefferson Davis, and we heard about it at Killeen, near my boyhood home in Bell county, as Mr. Chandler, author of that work on the life of Jesus, was delivering the memorial oration for the late former president of the confederacy," Judge Stinson said.

Post, of which newspaper she is society editor, by submitting a feature story on the death of an Indian named Two-Guns White Calf, one of six redmen whose likenesses were used in designing the Indian head on the buffalo nickel.

Mrs. Miller's mother has written many poems over the name of Grace Dupree Ridings, and her father, a captain in the United States medical corps in the world war, is president of the railway surgeons' association of Texas.

### Fossils 50,000 Years Old

HEMETT, Cal. (UP).—The fossilized teeth of a horse that was kicking up his heels on the American continent 50,000 years ago have been found in Wilson valley near here. It took the recent California floods to wash them out. Paleontologists estimated the date when the horse's molars were in use.

It is reported that the most common cause of accidents recently has been the lack of concentration on the part of the driver.

America consumes one-half of the world's total annual output of paper, using 10,000,000 tons a year.

### Farm Population Remains the Same

COLLEGE STATION, (AP).—Farm population in Texas is shown by a survey recently completed by C. Horace Hamilton, economist in rural life, Texas Agricultural Experiment Station, to have remained virtually stationary in 1937.

There was an increase amounting to approximately 1,000 persons but the number of farms operated decreased by more than 20,000. The total farm population Jan. 1, 1938, was found to be 2,291,000 compared to 2,290,000 a year earlier, and the number of farms fell from 498,000 to 478,000.

"This decrease in the number of farms," Hamilton said, "is due largely

to the increase in farm tractors and to the consequent consolidation of farms into larger units. In the last two years the number of tractors increased approximately 75 per cent.

"The number of tractors in use on Texas farms in 1937 was estimated by farm implement news, at 98,966.

Increased farm births totaling 59,000 against 20,000 deaths gave farm population a gain of 39,000. However, migration from farm to city and city to farm showed a loss of 46,000 in favor of the cities. Movements from farms in other states to Texas farms and the reverse movement gave Texas a gain of 8,000 for a net increase of 1,000.

### Unkissed Husband Sues.

SAN FRANCISCO (UP).—Countless divorces have been asked by the wife on the ground that their husbands never kissed them, but a husband turned the tables and asked for divorce on the grounds that his wife never kissed him.

# ONE MILLION DOLLARS VOLUNTEERED

Additional Fund Voluntarily Deposited with the State of Texas Gives Great American Policyholders Security Far in Excess of Legal Reserve Requirements

ONE MILLION DOLLARS has recently been deposited with the Insurance Commissioner of the State of Texas by the Great American Life Insurance Company for the purpose of VOLUNTARILY providing its clients with the unsurpassed security of REGISTERED INSURANCE. This \$1,000,000.00 is in addition to a Capital Deposit of \$500,000.00 already being voluntarily maintained with the State Treasurer of Texas. The significance of this forward step is best found in the fact that the Great American becomes the ONLY old line legal reserve life insurance company in Texas maintaining a capital deposit in excess of legal reserve requirements.

From this date forward Great American policies will display on their face the official seal and signature of the State of Texas Insurance Commissioner, a facsimile of which appears above, as testimony of the fact that policy owner protection and security are, and always have been, the foremost considerations of the Great American Life Insurance Company and its management. Policies now in force automatically share this added security.

The rewards of faultless trusteeship on the part of life insurance management is reflected in the extent to which American citizens have turned to this financial fortress for the protection and security that only old line legal reserve life insurance can guarantee. In this connection the Great American Life finds extreme gratification in having extended its sphere of service and protective guardianship to the point where it can now announce:

## 30 MILLIONS OF INSURANCE IN FORCE

Important emphasis is laid on this achievement when it is remembered that the Great American's first policy was issued February 2, 1931. In seven years, therefore, several of which witnessed severe national economic uncertainty, a financial institution has been raised from obscurity to a position of eminence and prestige, not only among the great insurance organizations of the South but of the entire United States. Of even greater importance than the attainment of \$30,000,000.00 insurance in force, from the policyholder's point of view, is the fact that among all old line legal reserve life insurance companies organized in the United States in the last 21 years only 7 possess today an amount of cash capital and surplus (policyholders' surplus) equal to or in excess of that of the Great American.

It is a tribute to the territory served by this Company that its record of advancement is one which many companies have not duplicated nor approached in twice or even three times as many years of operation. To all whom this Company has the privilege of serving now or in the future the Great American management renews its pledge of protective trusteeship, progressive advancement, and above every other consideration, SECURITY and SERVICE.

CAPITAL & SURPLUS OVER ONE MILLION DOLLARS

A TEXAS OLD LINE LEGAL RESERVE INSTITUTION

Trio of Colts Held at 3-1 in Hambletonian

GOSHEN, N. Y. (UP). — Odds on the Hambletonian stake, Aug. 10 at Good Time Park, have settled momentarily at 3 to 1 on three colts which appear to have the best chances to win the \$40,000 purse for top-flight 3-year-old trotters.

The favorites are Dale Hanover, 2:03 1/4, champion juvenile of 1937, owned by Elbridge T. Gerry, New York; Earl's Mr. Will, 2:04 1/2, owned by J. J. McIntyre, Cleveland, and Blair, 2:05 1/2, owned by H. Stacy Smith, Newark, N. J.

Promoter, husky colt owned and trained by Dr. H. M. Parshall, Urbana, O., made it a foursome at 3 to 1 odds until recently when he was declared to sick to train for the stake race.

Earl's Princess Martha, rated during the winter at 8 to 1, has dropped to 4 to 1 in the early summer books, and is owned by E. F. Shropshire, Lexington, Ky. The Duchess, originally rated at 4 to 1 has maintained that ground as the property of Count Mangelli, of Italy. Henry Boyd Hanover, owned by Hanover Shoe Farms, Hanover, Pa., has dropped to 10 to 1, however.

Among the dark horses of the forthcoming season are Ava, owned by the president of the Hambletonian Society, L. J. Mooney, Fremont, O.; Esther Mite, trained by Walter R. Cox, at Goshen, and Junior Hanover, from Hanover, Pa.

Seashore Camp Considered for British Felons

LONDON (UP). — British convicts soon may go to the seaside to work and play.

Under the home secretary's latest scheme to add to the "attractions" of prison life, a big camp will be built on the South Coast, where good conduct men "on their honor" will be able to relax—and work—away from the atmosphere of prison walls.

Convicts chosen to have a holiday at the state's expense will have no more supervision than that ordinarily given to navvies engaged on road or other reconstruction work.

After a working day of eight hours "guests" of the camp will spend their evenings in rooms devoted to entertainment, writing and reading. They will not be permitted to leave the camp at night.

Work will be reforestation, land reclamation and agriculture, and there will be no barred wire or walls around the camp, which is to be built on a site well away from seaside towns.

"Mouse Roulette" Appears. OAKLAND, Cal. (UP). — "Mouse roulette" has been introduced here. A mouse is dropped through a hole in a glass covered roulette wheel where it scampers around the spinning wheel until it finally takes refuge in one of the slots which become the winning number. The game is tough on the mouse, sport for the players and pays 50 to 1 for the lucky player.

BEAUTIFUL MODERN CLEAN ECONOMICAL AUTOMATIC. These are the banners you'll be carrying after you have used a MODERN, AUTOMATIC GAS RANGE just one week. Raining Death at China's Army

From machine gun nests like that pictured above, a steady rain of fire falls upon the Chinese army. The Japanese gunners are shown as they directed an attack on the Chinese military flank near Weishanhu. Sections of shaking, crumbled walls and piles of rubble are used to shield the nest from the eye of the opponent's lookout. Because of the constant fire which it pours forth, the machine gun nest is one of the most difficult military weapons to overcome.

Pump Priming Declared Limited to U. S.

LONDON (UP). — The world is heading straight for another depression unless some alternative to pump priming is adopted, according to A. V. Alexander, head of the co-operative movement in Britain and former cabinet minister.

How long it will be before the next slump arrives, Alexander said, depends mainly upon how much longer the nations of the world believe that the various forms of pump priming can be made to respond to their immediate objective of postponing it.

Declaring that in his opinion, pump priming was "not by any means confined to the United States," the former first lord of the admiralty, now a Labor member of parliament, referred to the huge rearmament program here as a measure tantamount to "pump priming" at least in its results.

Contrasts Spending Figures. "Our expenditures on special armaments—including the cost of air raid defenses—has increased our total arm bill to \$1,850,000,000 this year. If you study our normal programs you will find that expenditures reaches only \$560,000,000. The balance of \$1,290,000,000 is the cost of special war precautions," Alexander declared.

"We in Britain," he continued, "reckon that for every million pounds sterling (\$5,000,000) spent we can create employment for 4,000 persons for one year. All you have to do is to multiply the number of extra millions (\$528,000,000) spent by 4,000 to see that this exorbitant production of employment for more than 1,000,000 people, 1,032,000 to be precise. But that is not all.

"Obviously but for this measure or equivalent employment in industry, our present number of registered unemployed would grow from 1,750,000 to 2,750,000. If this is not pump priming, what is it? "True, it is not done deliberately as a pump priming measure. But it has the same effect and, like other types of pump priming, can produce only temporary results. In other words, its immediate effects can last only as long as the present rate of rearmament continues. The question is: what then? Subsidies Prime Pump. Other measures which, said Alexander, were even more closely akin to pump priming included

Artillery Used At Vimy Ridge To Kill Canary

MELVILLE, Sask. (UP). — The story of the bombardment of a canary at Vimy Ridge during the World war was revealed at a veterans' reunion here.

It was related that a tunneling company was digging a sap out under the German lines. The sappers used canaries to detect gas. One of the birds escaped from its cage, flew out of the tunnel and perched on the barbed wire of no man's land.

Fearing the Germans would detect the tunneling if they saw the bird, the commanding officer ordered the canary to be shot.

Infantrymen peppered it with shot. Then a machine-gun was turned on it, still without scoring a hit. Desperately, the officer phoned back to the artillery, giving the location of the bird. The big guns loosed a bombardment and one well-placed shell blew the bird to bits.

The German interpretation of the unexpected bombardment was never learned, but the sap was continued safely and played an important part in the assault of the Canadians on Vimy Ridge in April, 1917.

subsidies such as wheat, meat, and sugar. "The only difference between the British method and the method adopted in the United States seems to be a matter of form. In the United States it would seem that they collect the money needed for pump priming out of direct taxation of profits. Our treasury simply proceeds by taxation of Argentine beef, for instance. In other words, we get our money from taxes on commodities for which our consumers have to pay.

"Nor are we the only ones. What about the Germans? How do they get their money? By lowering the standard of living, subsidizing shipping and adopting similar measures of which the effects are the same as temporary expedients adopted elsewhere. "The way people shout," he concluded in an almost mocking tone, "you would think that the United States was the only pump primer in the world. Well, this is not so. And unless something far more substantial is done in the very

Good Workers Receive Jail's Best Dinners

CAMDEN, N. J. (UP). — Atop the Camden county court house is an ultra-modern "skyscraper" jail used principally for untried prisoners and others unable to furnish bail.

Warden George Roundey has saved the county about \$10,000 through his system of dual menus. Though no inmate is required to work, those who do are given more palatable meals.

Roundey is an advocate of an "installment plan" for paying fines.

"Take the case of a man who is fined \$25 or \$50 for something that perhaps could not be made out as a clear-cut case of negligence," he said. "Why send him to jail in disgrace when, under a more moderate law, he could pay his fine at the rate of \$1 a week, just as he does when he makes a purchase. It seems a simple thing that a man with plenty of money can pay his fine and go while the poor man has to stay in jail until the law considers him purged of his crime."

Theatre Calendar

YUCCA Now thru Tuesday — Loretta Young, Joel McCrea, and Stuart Erwin in "Three Honeys."

Wednesday and Thursday — Leo Carrillo, Bonita Gramille in "The Beloved Brat."

Friday and Saturday — Maureen O'Sullivan, Denny O'Keefe and Mickey Rooney in "Hold That Kiss."

RITZ Now showing — "You and Me" featuring George Raft and Sylvia Sydney.

Tuesday and Wednesday — Jack Holt with Dick Purcell in "Flight Into Nowhere."

Thursday — Robert Paige and Jacqueline Wells in "Highway Patrol."

Friday and Saturday — Buck Jones in "Boss of Lonely Valley."

Jobs Increase In Landscaping

CAMBRIDGE, Mass. (UP). — Although one of the smallest professions, landscape architecture today is one of the strongest in salaries, employment of trained men and an increasing public demand for service.

That is revealed in a survey of 168 graduates of Harvard university's landscape architecture department by Prof. Bremer W. Pond, chairman. The landscape architecture school, recently incorporated in the Graduate School of Design, was founded in 1900 and is the oldest in America.

Salaries of graduates range from \$1,500 to \$30,000 yearly. The 149 graduates who have remained in the practice of landscape architecture are known to be employed, Prof. Pond said.

The largest group of graduates, 72, now are employed as experts by federal, state or municipal government agencies in planning new town, park, recreational and highway areas.

The next largest group, 44 graduates, is in independent practice. Others are university and school faculty members. Projects on which graduates have been employed include model towns and recreational areas of the TVA; highways, camping sites and recreational facilities in national parks; George Washington Memorial highway; White House grounds, the Theodore Roosevelt Memorial and grounds of public buildings in Washington; New York City park department, and considerable work on the approaching New York World's fair.

Marketing of Grape Fruit Juice Starts

HARLINGEN, (P). — Two national agencies will aid in marketing this year's Rio Grande Valley grapefruit juice pack, the Texas grapefruit growers stabilization committee announces. The total pack is 4,700,000 cases compared with approximately 2,200,000 cases last year.

The national association of food chains has agreed to conduct three special nation-wide sales drives on juice, beginning July 14. The surplus commodities corporation agreed to take 500,000 cases for distribution to the needy.

A committee representing the Valley citrus industry has been named by the South Texas camera association to cooperate with the surplus commodities corporation in making its purchase. Government inspectors now are in the territory sampling the juice preparatory to tests of the product by the department of agriculture.

\$60,000,000 Mill Nearly Finished

CLAIRTON, Pa. (UP). — Completion of the huge Irvin works of the Carnegie-Illinois Steel Corporation—the largest private construction project ever undertaken in the Pittsburgh district—is expected sometime next August. Work on the \$60,000,000 plant began May 22, 1937, when the first earth was spaded by William A. Irvin, vice-chairman of the United States Steel Corporation, parent concern of Carnegie-Illinois.

When placed in full operation, the Irvin works will have an annual capacity of 600,000 gross tons of finished steel in sheet and tin plate sizes. Semi-finished steel will be drawn from a new mill being erected at Carnegie-Illinois' near future, watch for the next slump."

RELIGIOUS LEADER

Crossword puzzle grid with clues. HORIZONTAL: 1 Founder of the Mohammedan religion, 3 An orthodox Mohammedan, 13 In a line, 14 Music drama, 16 Weird, 17 Tribunal, 18 One who lays tile, 19 Maids, 21 Indian peasant, 23 Pert girl, 26 Musical note, 28 Grief, 30 Definite article, 31 Measure of area, 32 Wind instrument, 33 Gibbon, 37 Fabaceae tree, 40 Victuals, 41 Mohammedan God, 42 Young sheep, 43 Male courtesy title, 45 Sneaky, 46 Biblical prophet, 47 Reverberated, 50 Helmet-shaped part, 52 Note in scale, 53 Senior, 54 Form of "a," 55 To value, 58 Epochs, 61 Sour, 62 Wiser, 64 Mohammedans' holy city, 65 This leader conquered, 66 Form of "me," 15 Note in scale, 20 He is the of his people, 22 To possess, 24 Female fowl, 25 He was an by birth, 27 To sin, 29 Measures of cloth, 30 Trunk drawer, 31 Branch, 33 Exclamation, 34 Money changing, 36 Every, 38 In the style of, 39 Fence bar, 44 Grayish green, 46 Departure, 48 Greek sorcerer, 49 Doctor, 5 Maxim, 6 Roof point covering, 7 Small valley, 8 To move as a soldier, 9 Half, 9 List, 11 Sea eagle, 36 Every, 38 In the style of, 39 Fence bar, 44 Grayish green, 46 Departure, 48 Greek sorcerer, 49 Doctor, 5 Maxim, 6 Roof point covering, 7 Small valley, 8 To move as a soldier, 9 Half, 9 List, 11 Sea eagle.

Edgar Thomson works in Brad-dock. Completion of the new facilities at Braddock is also expected in August. The Irvin shop project in Mir-film township has already called for the transportation of thousands of tons of earth and steel, and the employment of hundreds of men. The plant's tin division operation and work is being rushed on the 80-inch hot strip mill, completion of which will permit full capacity production.

Vandals Blur Cliff Writing

CUSTER, S. D. (UP). —Hieroglyphics on the walls of Red and Craven canyons in the Black Hills have been destroyed by vandals in many places.

Edges of the markings on the cliff walls have been chipped and bullets fired into them, making it impossible for archeologists to determine the origin of the writings, according to Mary Hemphreus, manager of 12 Mile ranch, at the canyon entrance.

"Many of the photographs are intact, however, particularly the ones in the more inaccessible parts of the canyon," she said.

Theories as to origin of the markings vary. Indian students insist they were made by Sioux Indians, comparatively recently. Others believe they were made by Pueblo Indians who came from the Southwest into the Black Hills. Another group argues they were made by the Aztecs of Mexico.

Even more common than these beliefs, however, is the theory that the Coronado, who is generally believed to have come no further north than Nebraska or Kansas, came to the hills and left a map traced on the walls of Red canyon. Coronado searched for the "City of Gold" and may have left tracings on the walls so he or his followers might again find the route, proponents of this theory argue.

The pictographs are of various sizes, kinds and colors. Some resemble figures found on Indian wigwams. Some are in the shape of a cross with the circle in the center. Some are colored in red and black. Lines varying in groups of five, ten, or more appear at frequent intervals.

Borglum Gives Opinion. Miss Hemphreus said Gutzon Borglum, sculptor, from experience in carving the national memorial at Mt. Rushmore in the southern Black Hills, expressed belief the pictographs were etched into the walls several hundred years ago.

E. B. Renaud, of the University of Denver, has done some work on the pictographs, but not sufficient to do more than describe them accurately. He has recommended that sufficient funds be provided to go into the matter thoroughly. F. O. Baker, former history instructor at the Edgemont schools, contends the carvings were done by Coronado, basing his belief on his possession of a map allegedly drawn in 1540 by Coronado.

Charm in Job Placed First.

PHILADELPHIA (UP). — For a girl seeking a job, charm is more important than training, according to Harry W. Nock, office executive of E. I. du Pont de Nemours company.

Big Spring Rodeo Judges

Foy Proctor, Midland, and R. K. "Keet" Dunn, San Angelo, are two of the judges for the fifth annual Big Spring Cowboy rodeo and reunion July 2-3-4. Proctor, prominent Midland cattleman, is well known over West Texas, having grown up with the cattle business at Midland. Quality of his judging has made him a choice for three consecutive years. Dunn is a native of Sterling City and for the past several years has been ranching in Glasscock county. This is his first year as a judge. The other judge is Dud Arnett, formerly of Garden City.

Wildlife Acres In U. S. Almost 8 Million Now

WASHINGTON (UP). — Wildlife sanctuaries in the United States have been nearly doubled in extent during the last two years, the Interior Department reports, and now total 7,951,937 acres.

Another 4,064,104 acres have been set aside in Alaska, bringing the grand total to approximately 12,000,000 acres.

The 1,968,000-acre Desert Game range in Nevada and the 1,033,647-acre Fort Peck Game range in Montana are the two largest feeding and breeding grounds for wild animals created since 1936. An antelope refuge of 273,000 acres in the Hart mountain region of Oregon also was established.

Scattered from corner to corner of the country, 30 migratory bird and waterfowl refuges were created, the largest of which is the Sabine refuge in Louisiana, containing 143,110 acres.

Smoke Problem In Cincinnati Night Baseball

CINCINNATI, O. (UP). — National league outfielders who have taken part in night games at Crosley Field this year against the Cincinnati Reds have adopted "Smoke Gets in My Eyes" as their theme song.

Smoke from trains on nearby railroad tracks and from a neighboring dump have engulfed the park during night games this season and made the job of outfielders in following the flight of high fly balls extremely difficult.

Cincinnati railroad officials have announced they would take every precaution in an effort to lessen the evil.

WPA Goes in for Swing.

BERKELEY, Cal. (UP). — The WPA has gone in for swing—and it's swing music and not the swing of picks. The piano harmony class of the WPA educational program, sponsored by the Berkeley schools, is using a device known as the "clock of keys" that will enable beginners to play swing music in three months.

The nursery rhyme, "Three Blind Mice," is found in a music book dated 1609.

'Message Drum' Used in Jungle Put on Exhibit

PHILADELPHIA (UP). — The rare Drexel collection of primitive and Oriental instruments has been placed on display in the music section of the Franklin institute.

The collection was presented to the institute by Mrs. George W. Childs Drexel, who acquired the instruments during a score of years' travel on her yacht to out-of-the-way parts of the world.

String and percussion instruments, woodwinds, metal horns and rattles are included.

A huge metal horn, nearly 7 feet long, that was used by Jews during an attack on Jerusalem contrasts strangely with a tiny reed pipe the size of a cigarette holder, used by head-hunters.

A jungle "telegraph" drum is the first of its kind ever brought from Africa. Also in the collection are pottery tom-toms, marriage and funeral drums, pipes of Pan and string instruments made from turtle shells and gourds. Some of the instruments are in-laid with precious stones.

Rainfall in Dickens County Shows Gain

DICKENS, (P). — Rainfall for '38 in Dickens county is more than four inches greater than at the corresponding time a year ago, records show. Approximately 11 inches fell the first five months of this year, compared with 6.9 inches in the same months last year. More than one inch has been recorded in June.

"Farmers in Dickens county had a difficult time starting their crops this season," said County Judge Marshall Forby. "Numerous rain, sand and hail storms destroyed their planting again and again. However, one of the best seasons in several years is in the ground, making prospects bright for feed and cotton crops."

**GRACE LUTHERAN CHURCH**  
H. Graumann, Pastor.

Services are held every second and fourth Sunday at the Midland Episcopal Church at 2:00 p. m. You are cordially invited.

**Bay State Cuts Auto Fatalities**

CENTRE LOVELL, Me. (UP).—Public insistence on careful driving resulted in Massachusetts' winning first honors in the 1937 national highway safety contest, according to Frank A. Goodwin, motor vehicles registrar.

The Bay State official told delegates to the Eastern States Motor Vehicle Administrators conference here that "you cannot get any better government or any better law enforcement than public opinion demands."

He said Massachusetts residents for many years have demanded strict and impartial enforcement of motor vehicle laws.

"As a result of this attitude," he said, "the courts, police, and all law-enforcement officers in Massachusetts perform their duties strictly, with a minimum of favoritism or 'fixing'."

He attributed the attitude of continuous press and radio activity "in the interest of safety."

Goodwin believes such public opinion a great aid in solving traffic problems through the familiar "three E's—Engineering, Education and Enforcement."

He praised the teaching of highway safety to Massachusetts school children, attributing to such training the annual reduction of child fatalities from 290 in 1923, with less than half the present total of machines registered, to last year's low record of 115.

**Morning Noon, Night Baths Bring Comfort In Very Hot Weather**

BY ALICIA HART,  
NEA Service Staff Writer.

The girl who is determined to look cool and be pretty comfortable most of the time in spite of summer's hot weather, takes a lukewarm bath every night before going to bed (no matter how late it is), a shower with the water at body temperature every morning and, during the day, as many medium cool showers as she can manage.

Furthermore, unless it's very late, she dwades over her evening tub, using bath, nail and complexion brushes and trying to relax completely so that sleep will come quickly, heat or no. She puts bath crystals or oil of a cooling, refreshing scent, in the water. Occasionally, she may pour in a few dashes of her favorite cologne instead of an oil or a handful of crystals. In either case, she rubs on quantities of cologne after the bath.

You know, of course, that regular use of a good hand brush will soften, even wear away calluses that developed on hands or fingers as a result of not wearing gloves while playing golf or driving a car. If you do not have one of the new foot brushes, scrub your feet with a bath brush, thereby discouraging callouses there, too, and keeping heels smooth.

If your skin is dry and sensitive, pour a few drops of body lotion or a bit of special shower oil on the wash cloth before your morning shower. And pat on a small amount of body lotion or just plain hand lotion afterward. Also, remember to

wear suntan oil on the beach even after all danger of burning is past. And if you cannot bear to sleep with night cream on your face, figure out a way to use it sometime during the day.

Make your bathroom as cool looking as possible. For instance, you might substitute a washable white rug for the richly colored one you liked last winter, pastel or white towels for the wine and flamboyantly colored ones, and unpainted wicker, white or pale gray clothes hamper for the bright one that matched the winter rug. P. S.: Incidentally, who ever started the idea of keeping thick, practically unbreakable glasses in the bathroom? Now is the time for a change. Let's have nice, cool looking, ever so thin glasses in the bathroom this summer. Several varieties of thin ones cost even less than those thick types.

surrounded by tradition and hereditary privilege, this younger son of a Bavarian family says of his contemporaries "we were squeezed in between Norsemen and natives on post-war generation, too young for one and too old for the others." The war years meant hatred and near-starvation; later, after confusion and uncertainty, he threw in his lot with the republic, and opposed Hitler, and is now in exile.

Australia Advances, by David M. Dow: Australia is shown to be ahead of the United States in much of her social policy, particularly in meeting economic and labor problems. Some of her historical background is sketched, but most of the book is devoted to a clearly written summary of present condition which the author, by reason of several years in this country is able to compare with the American situation. . . . To be highly commended to all who are aware that they know almost nothing about the vast Australian continent." New York Times Book Review.

**At The Library**

New non-fiction at the library: "The Fight to Live," by Raymond L. Ditmars: An authoritative and fascinating study that will appeal to youthful and adult readers alike, of the methods of self-preservation and the defense mechanisms of both animals and men, including insects, reptiles and fish. Illustrated by photographs of living subjects.

Fashion in Spinach, by Elizabeth Hawes: A famous American dress designer tells what is wrong with the fashion racket—and what women can do about it.

Conquest of the Past, by Prince Hubertus zu Loewenstein: An autobiography: Born in the aristocracy,

ing an interesting picture of the construction methods of the time. Of particular interest is the description of plantation life at the Hermitage during General Jackson's time.

Also at the library are: "The Promenade," by G. B. Lancaster: The story of a woman and of a nation that does for New Zealand what the author's "Pageant" (also in the library) did for Tasmania. Here again the reader will find a weaving of history and human story—the same humor, tenderness and pity. Down the century come young colonials, sailors, soldiers, statesmen, politicians, herdsmen, planters, native boys and girls, all in the setting of a stirring time and a brave new country.

The Yearling, by Marjorie Kinnan Rawlings: Through twelve-year-old Jody Baxter and his experiences in the wild hammock country of Florida, Mrs. Rawlings portrays the beauty of nature and a natural life. As Jody comes to maturity, he begins to realize that life is a hard business and yet, in the end, all the better for that.

Gone to Texas, by John W. Thomson, Jr.: The scene of this novel of adventure is laid in southern Texas and Mexico, shortly after the close of the Civil War when there was more or less unrest and insurrection in Mexico. Traffic in arms and other contraband forms part of the plot. A light novel of action in the out-of-doors, with only a slight love theme. I See a Wondrous Land, by Gudmundur Kamban: A sledge drawn by two black oxen waits before the great door. Inside, in the center of

the hall, a man lies dead, his head cleft by a sword. His young wife stands beside his body. From this dramatic opening scene laid in the tenth century in southern Iceland to the last chapter with its battle between Norsemen and native on the shores of Wineland, this novel will hold you enthralled. Following the old Norse and Icelandic sagas, Mr. Kamban tells the story of the five great westward waves of exploration and colonization in the terms of five men—Erik the Red, Bjarni Herjolofson, Leif the Lucky, Thorfinn Karlsefni, and Gudleif. And it is a story of great fights, and feasts, of courage and hardship, love and hate, painted on a great canvas and peopled with living men and women.

Nature's Insecticide Best.

MONROVIA, CAL. (UP).—Fred Record, insect expert, informed the Foothill Garden club here that while there are 600,000 identified varieties of injurious insects, only 122 insecticides with which to fight them are known. Nature's chief insect control agent, he said, is the little ladybird beetle which specializes on pests in orchards and groves.

*Cooler Tires  
Are Safer Tires*

Frictional heat in tires has long been recognized by tire engineers as accounting for more lost tire mileage than all other causes combined.

The broad, massive appearance of tires demanded by operators has resulted in an unneeded volume of tread rubber at the shoulders of truck tires. Due to rubber being a very slow conductor of heat, (3,000 times slower than copper, for example) the padding of tire shoulders has resulted in higher shoulder temperatures, such temperatures often exceeding those at which tires are originally cured at the factory.

In an effort to prevent excessive shoulder temperatures, tire companies have tried thousands of different kinds of rib, block, groove and button designs at the shoulders of truck tires—none of them, however, proving universally satisfactory.

Designs sufficiently open to allow free escape of heat have proven impractical due to wearing defects. On the other hand, when shoulder designs were closed up to overcome such defects, excessive temperatures built up immediately. As a result, one of the conditions had to be tolerated or a compromise design had to be used which handled neither condition satisfactorily.

In analyzing the problem, Seiberling engineers finally came to the realization that experimentation on tire shoulder design by Seiberling as well as by all other rubber companies had been only in one direction; namely, the road contact area of the tread. With such realization, the need for a different approach was apparent.

The solution of the problem was found by designing a tread shoulder for maximum wear and then ventilating the side of the shoulder below the road contact area so heat could freely escape. "HEAT-VENTED" treads were the result.

As in the case of many other truck-tire developments, Seiberling has blazed a new trail in research and accomplishment. "HEAT-VENTED," the descriptive name given the new principle of tire shoulder design for further lowering operating temperatures of truck tires, is exclusive with Seiberling, and is covered by patent No. 1,877,988, with other patents pending.

Not only does HEAT VENTING make possible more rapid dissipation of heat, but the vents also serve as shock absorbers to road impacts and shoulder strains and lessen the amount of heat generated by a tire in performing a given amount of work.
