

O'Daniel Continues to Pile Up Lead

After Japs Bombed U. S. Mission

This was the scene of destruction that met the eyes of the Rev. Father William Downs when he returned to his mission home in Swatow, China, after receiving medical treatment on the U. S. S. Sacramento for injuries sustained in Japanese-Chinese fighting. A 250-pound Japanese aerial bomb had made a direct hit on the home. Father Downs, whose home is in Erie, Pa., is shown standing among the ruins of the mission. Almost 2000 were killed and injured when Japanese bombed the south China coast.

O'Daniel Anticipates No Trouble With Legislature

By HOWARD C. MARSHALL.
FORT WORTH, July 25. (P)—W. Lee O'Daniel said Sunday he had no thought of being a dictator in the office of governor of Texas but expected to get along well with the legislature and to give the state a business administration.

O'Daniel said he had no one in mind at this time for the "business man's council" which he had stated in his campaign he would form to help him in meeting problems of government.

TP 8 Bennett Completed for Flow of 2,156 Barrels a Day

By FRANK GARDNER.
The Bennett pool of southeastern Yoakum today was credited with another large flowing producer, Texas Pacific Coal & Oil Company No. 8 Bennett. The well was assigned daily potential of 2,156 barrels, based upon gauging flow the second six hours of a 12-hour test. Flow the first six hours was 729 barrels. Bottomed at 5,240 feet, in line, the No. 8 Bennett was shot with 700 pounds from 5,055 to 5,235. Also in the pool, Honolulu No. 6-877 Bennett is drilling anhydrite at 4,170 feet.

Bennett production, is bailing hole after rigging up standard tools. Operators will test 7-inch casing, cemented at 4,985, tomorrow and drill plug that evening. Total depth is 5,000 feet in line.

BULLETIN

Orders were received today by D. J. Findley, division engineer for the State Highway Department, to make plans for the widening of an eight-mile stretch of highway 158, just west of the Midland county line, preparatory to the laying of a double asphalt surface on the segment.

Goodman Leading For Representative

With approximately 75 per cent of the votes in the district counted, Jas. H. Goodman, Midland attorney, today was boasting a lead of 872 votes over Clyde Bradford, incumbent for representative of the 88th district. However, a run-off between the two is assured.

Another Midland candidate for the office finished last in the five-man race, but he put up a surprisingly strong race for his first time in the political field. The candidate was Gerald B. Hallman, who did his campaigning while holding down a full time job. He trailed Goodman by only 30 votes in Midland and was high man in Andrews county.

JAS. H. GOODMAN

A. T. Folsom, Wink attorney, was third man in the race with a total of 2,855 votes, followed by Maburn Harris of McCamey with 2,648 votes.

Votes by counties follow:
Andrews County.
Hallman 150.
Goodman 117.
Folsom 50.
Harris 78.
Bradford 61.

Crane County.
Hallman 58.
Goodman 278.
Folsom 77.
Harris 250.
Bradford 153.

Ector County.
Hallman 203.
Goodman 925.
Folsom 351.
Harris 377.
Bradford 1,065.

Jeff Davis County.
Hallman 4.
Goodman 122.
Folsom 69.
Harris 28.
Bradford 45.

Loving County.
Hallman 5.
Goodman 31.
Folsom 38.
Harris 15.
Bradford 42.

Martin County.
Hallman 180.
Goodman 375.
Folsom 54.
Harris 178.
Bradford 89.

Texas Highways and Streets Becoming Safer for Citizens

AUSTIN, July 25. — Texas streets and highways are definitely safer for the motoring public as shown by a steady decline in fatal traffic collisions, state police reported today.

Final tabulations of casualties in June revealed that 115 persons were killed in 1,026 accidents, a saving of 44 lives if compared with June, '37, a total saving of 130 lives during the first half of 1938 compared with the same period of last year. There was a sharp drop in the number of crashes recorded in June compared with 1,417 reported in that month last year, when Texas' final death toll reached the unprecedented high mark of 2,043 fatalities.

A selective enforcement program — the placing of state patrolmen at strategic points where surveys show the largest number of fatal collisions taking place — which was put into effect recently, is the reason for the diminishing death rate, safety officials believe. With 300 mounted officers patrolling death stretches of highways there are authoritative predictions that Texas will rank as a safe state of the nation by the end of the year.

Encouraging to the recorders was the continued decrease in the number of pedestrians who met death under the wheels of vehicles, in most instances when pedestrians crossed streets at places other than intersections. The pedestrian death toll has steadily declined from 40 in January to 21 in June.

The fatal smash-ups involving bicycle riders brought a sharp warning from Captain Homer Garrison, Jr., assistant state police director, who pointed to the four death crashes of this type last month as examples of carelessness. He urged that riders of cycles carry lights and abide by traffic regulations that guide motorists. In addition to the four deaths there were 27 bicycle riders severely injured in collisions.

An analysis to determine the primary causes of 1,026 of the fatal and more serious crashes in June revealed that 89 involved drivers and pedestrians who had been drinking, 94 drivers ignored laws governing right-of-way, and 78 were driving too near the center of highways or on the wrong side. Speed ranked fourth as the principal contributing cause in 72 of the 1,026 collisions.

Heavy Rain Again Falls Here Sunday

Brings Total for Four Days in City To Almost 5 Inches

While rain and floods threatened towns and communities along Texas river banks Sunday, Midland had its own high water problem for more than two hours after a hard rain of 1.15 inches fell on the heels of the 3.63 earlier in the week, making a total of 4.78 inches for four days.

The streets, already soaked, were taxed to handle the drainage Sunday afternoon, the water extending from curb to curb in many parts of the city. In the eastern section, the water ran over the highway so deeply that several cars, drowned out, had water pouring in at one door and out the other.

Houses in the Mexican settlement were completely surrounded by water, some of them having the water up above floor level.

In the west end, where the intersection of highways 1 and 151 has prevented rapid drainage, the water backed up in the yard and trailer parking lot of S. E. Thomas, operator of Pagoda pool, forming a lake. The rain apparently was general over the Midland ranch and farming area, although it got lighter to the north in the Boiler well area.

"Little George" McEntire, Midland pilot, flew his plane over much of Glasscock county Sunday afternoon, aiding in the search for members of a seismograph crew who had not been reported for two days.

They were located, stuck in muddy roads about fifteen miles south of Garden City. They had carried customary camping supplies and rations and apparently had not suffered except from inconvenience.

Winter grass over the Midland country was assured from the rains of almost a week's period, several of the showers falling slowly, with cool, cloudy days between rains, thereby allowing the moisture to soak in.

The feed crop was believed made for the county, with cotton subject only to whether frost will be early or late, as most of the crop was planted late in June or early in July.

Constitutional Amendment Would Stop "Gift" Jobs

Publication of a proposed amendment to the constitution of the state of Texas was started in today's issue of The Reporter-Telegram, the article to be printed once each week for four successive weeks and to be voted upon by Texas voters at the general election in November.

The amendment would change the oath of office to be taken by all members of the state legislature and by all officers of the state of Texas to control the granting of state jobs to constituents of those seeking office.

Each one taking office would be required to swear "that I have not directly nor indirectly paid, offered or promised to pay, contributed, nor promised to contribute any money or valuable thing, or promised any public office or employment, as a reward for the giving or withholding a vote at the election at which I was elected."

They Meet in Run-Off August 27

CECIL COLLINGS

PAUL MOSS

Collings, Moss to Meet In District Judge Run-Off

In one of the closest district fights ever recorded in this area, final counting of votes showed today that Cecil Collings, present district attorney, Big Spring, and Paul Moss, Odessa, to be in a run-off for the office of district judge.

Collings was the leader after all votes in Ector, Midland, Martin, Howard and Glasscock counties were counted, but only by the narrow margin of 38 votes. He had a total of 4,099 votes, compared to 4,061 for Moss. Clyde Thomas, Big Spring, votes and Collings and Moss today were starting their campaigns to win over Thomas supporters. So far, Thomas has not indicated which way he would throw his vote.

In the district attorney race, Martelle McDonald polled a total of 5,178 votes compared to 6,385 votes for three opponents. Boyd McLaughlin, Midland attorney, was second in the four-man race and will go into the run-off August 27 with McDonald. Laughlin polled 2,827 votes. Third in the race was Walton Morrison of Big Spring and trailing was Don Traynor of Midland. McDonald carried all counties in the district except Midland, Laughlin being high man here. District Judge results by county follow:

Ector County.
Collings 253.
Thomas 387.
Moss 1,061.
Howard County.
Collings 2,189.
Thomas 2,351.
Moss 643.
Midland County.
Collings 1,121.
Thomas 676.
Moss 1,032.
Martin County.
Collings 411.
Thomas 294.
Moss 340.
Glasscock County.
Collings 138.
Thomas 95.
Moss 85.

For District Attorney—Ector County.
Morrison 177.
Laughlin 823.
McDonald 1,289.
Traynor 193.
Howard County.
Morrison 1,942.
Laughlin 184.
McDonald 2,823.
Traynor 115.

Midland County.
Morrison 248.
Laughlin 1,646.
McDonald 299.
Traynor 564.
Martin County.
Morrison 165.
Laughlin 135.
McDonald 638.
Traynor 25.

Glasscock County.
Morrison 117.
Laughlin 39.
McDonald 126.
Traynor 14.

Opening of Scout Camp Is Delayed

Because of the heavy rains over southwest Texas, Camp Fawcett, Scout Camp of Buffalo Trail Council, scheduled to begin its annual summer session Tuesday, has been postponed for a week, reports from Sweetwater said. The rains received this week over a vast territory of West Texas has made the road from Rock Springs to Barksdale impassable. However, Chief Executive Stiles reported to Camp Committeemen in Midland that the camp itself was in fine shape and had not been damaged by the rains.

This last-minute postponement of the camp will be quite a blow to the many scouts who were planning to leave Tuesday. Some forty-odd boys were "all packed up and rarin' to go" from the two troops here. Nevertheless, the Buffalo Trail Council, with a clean slate behind it, wishes to maintain its record of safety this year; therefore, in order to place all risks at a minimum, the camp was postponed. Such safety measures as this are exemplified throughout the United States in Boy Scout activities and was best illustrated in the National Jamboree held last year in Washington.

The camp periods now will be August 2-9 and 9-16. This will comprise the two regular periods held annually at Camp Fawcett. Immediately after Fawcett is closed, a pioneer camp, located sixteen miles south of the regular camp, will be started by the most experienced and able campers. This camp will last one week, during which time the boys will construct their own shelters, mess hall, and parade ground. They will also build a rudimentary dam in a spring-fed stream which traverses the camp.

The camp-site is on land owned by Doctor Eads, and honorary First-class Scout of the Buffalo Trail Council.

Gerald Mann, Woodul are In Run-Off

'Bandwagon' of New Governor Carries Brooks to Victory

DALLAS, July 25. (P).—Returns from the Texas Election Bureau at 11 o'clock this morning from 246 out of the 254 counties in the state, 85 complete, showed:

Governor: Crowley 13,833; Hunter 90,758; McCraw 123,072; O'Daniel 448,267; Thompson 173,517. All others were far behind.
Lieut.-Governor: Brooks 230,888; Nelson 170,675. Others in the race were far behind.
Attorney General: Mann 251,366; Woodul 267,785; Yarbrough 171,382. All others were trailing far behind.

The majority of Governor-Elect O'Daniel continued to increase with returns from each county.

Latest night left Brooks and Stevenson to run it off for lieutenant-governor; Woodul and Mann

AUSTIN, July 25. (P). — Governor Allred today urged friends throughout the state to work at county democratic conventions Saturday for the selection of a state convention delegates friendly to O'Daniel.

In high good humor at the outcome of the gubernatorial race, Allred said "O'Daniel's victory is unparalleled not only in the state but in the nation, friends should see that delegates who are friendly to his program are elected."

for attorney general; Sadler and Giles and McDonald for land commissioner; Critz and Davidson for the supreme court; and Graves and Stephens for the criminal appeals court. It seemed that L. A. Woods had edged back into the office of superintendent of public instruction with a clear majority and Lockhart and Sheppard far outdistanced the field in their contests.

Mead of San Angelo proved a better vote getter for lieutenant-governor than did most of the candidates for governor, tabulating 37,898 on basis of incomplete returns. Pierce Brooks, former San Angelo realty dealer, however, was the surprise contender of the campaign leading the contest with 206,902.

Tarrant county, home of three of the candidates for governor, treated Carl Crowley almost unjustly with 360 ballots as it gave Clarence Farmer 924 and heaped fruits of victory on O'Daniel with 6,399. McCraw tallied 4,332 and Thompson 4,734 there. It was the biggest vote of any county for Farmer, who got a fair start in the race but who faded rapidly once the three leaders steamed up.

Potter county treated its favorite son well, giving Thompson 4,556, O'Daniel 1,768, McCraw 760, and Hunter 317.
Dallas county treated McCraw as a stepson and gave him 11,448 while the patron of flour and mountain melody was speeding along with 19,174. Thompson registered 5,641 there and Hunter 5,894. Crowley edged along with 567.

Amarillo Will Hold 'Old Southwest Days'

AMARILLO, July 25.—Not only the Will Rogers route, but all other highways will lead to Amarillo for "Old Southwest Days," which will be staged three nights, Aug. 15-16-17, at Butler field.

Because the pageant will portray the late Will Rogers, first as a young man when he came to the Panhandle and got his first job as a cowboy and later as a star of Ziegfeld follies, unusual interest is being taken in the spectacle, especially by those who know and loved the plainsman philosopher.

Motorcades from Chicago and Los Angeles are being formed to join the celebration.
In the cross-country cavalcade from the Pacific coast will be business men, officials and film notables.
Highway 66, now known generally as the Will Rogers route, is finished as an all-weather type road, will be opened officially at the celebration. The paved highway, however, has been open to traffic since last spring and all points along the route report a decided increase in tourist travel.

50 Killed as Bomb Tossed Into Crowd

HAIFA, July 25. (P). — A bomb blasted a crowded Arab market today for the second time within a month, killing 39 Arabs and wounding 56. It was the worst explosion since the recent crisis developed.

On the same spot, 23 were killed July 6. New racial clashes followed the explosion and traffic was suspended while many were injured rioting.

BEHIND THE SCENES IN WASHINGTON

WASHINGTON, July 25.—National Chairman Postmaster General James A. Farley's trip to Alaska during the primary season in which President Roosevelt promised to participate hasn't failed to attract comment.

Rumors have been revived that Farley and Roosevelt are at odds over New Deal campaign tactics and more personal matters up to the point where an open break impends.

The truth is that Farley feels this way and that way. His deep loyalty to the President is tempered by dissatisfaction because Harry Hopkins, Harold Ickes, Tom Corcoran, and others are more definitely within the White House inner councils than he. Farley has been alternately in and out of the effort to make the Democratic party safe for the New Deal.

Farley's recent appeal for election of a Roosevelt Congress which will support Roosevelt policies and Roosevelt principles, his encouragement of young William E. Dodd, Jr. in the Virginia primaries against a conservative Democratic congressman, and his part in early stages of the Iowa primary contest, indicate no real break with the man he plotted to the presidency.

Recently Farley appeared to be working hand in glove with Roosevelt toward unseating the gubernatorial senatorial nomination in New York, although that doesn't seem to have lasted.

On the other hand, Farley has been less than lukewarm toward mixing into certain state contests where P. D. R. wanted him to work behind the scenes. Old personal loyalties, a cautious unwillingness to stir up intra-party strife, and his annoyance at entry of simon-pure New Dealers into the political field, with Roosevelt's approval have thus far caused him to take an almost negative part in the Roosevelt effort to reform the party.

But he may swing farther in either direction after his return late in August. Roosevelt has pleased Farley's critics by publicly announcing his intention to take part in certain primaries, and then he has pleased Farley by taking his go-slow counsel against that of New Deals who wanted

ARMY DOESN'T LIKE FARTIES—IN PRINT. ARMY officers in Washington have received orders not to facilitate elaborate reports of their parties in the local newspapers, but to try to keep accounts down to bare facts. That's because the army, which constantly seeks higher

'Brother, You're Super-Colossal!'

is more than 10,000,000 acres larger than the forested area of any other state.

About 22,600,000 acres are classed as protection forest. This area, comprising chiefly cedar brakes, east and west cross timbers, post oak and mesquite regions, produces fence posts and fuel, but its chief value is watershed protection.

Siecke said past production was reached in 1907 with 2,229,559,000 (billion) board feet, which placed Texas third among lumber producing states that year. The annual production dropped to 1,500,000,000 feet by 1910 and retained this level until 1929.

Fifth of Texas Is Covered With Trees

DENTON (AP)—Approximately one-fifth of the area of Texas is covered with forest trees. This fact was contained in a paper prepared by E. O. Siecke, Director of the Texas Forest Service at A. & M. College, and read at the course in conservation of natural resources conducted at the North Texas State Teachers College here.

Of the 16,935,000 acres comprising the land area of Texas, approximately 35,000,000 acres are covered with forest growth, Siecke said. "This

The Jown Quack advertisement featuring a cartoon of a man with a quack sound effect and text: 'When it comes to the administration of the state's affairs, the governor is pretty well subject to the will of the legislature, which is a good thing. And now that a run-off is necessary in the representative race, the local voters had better be turning their attention to this situation. We don't have any local races to bring out a big vote, but we have two local candidates in district run-off races. It's a question of whether we want Midland men in district offices, or do we want to see those of other parts of the district handle the jobs for another term.'

As Ab Hendrickson said today, "I'm fer him. That's what we have elections for, to see who the people want." The people spoke in a loud voice, and O'Daniel is going to be governor. I don't think a tenth of the people who voted for W. Leo know any more about him than I do, which is exactly nothing except that he is a master entertainer, but it's a sure thing that he's going into the governor's chair without obligation to factions, groups or individuals, so he ought to be able to stand on his own legs. He is the head of a

Classification of Cotton Offered

COLLEGE STATION (AP)—The service which provides free classification of cotton produced by organized one-variety groups now is available, announces E. A. Miller, agronomist of the Texas A. and M. College extension service.

Forms and instructions may be obtained from any of the cotton classing offices of the bureau of agricultural economics. Addresses of offices in Texas are: P. M. Box 1368, Dallas; P. M. Box 1140, Austin; and 509 U. S. Court House, El Paso. The service, which will be inaugurated with the current crop, provides free classification of a sample from each bale produced by a member of a qualified improvement group. Notification of the grade and staple length according to the U. S. cotton standards, will be returned to the grower from whose bale the sample was drawn. The service is not available to individual growers, but only to members of organized cotton improvement groups.

Miller urged one-variety associations that desire the free service to apply as promptly as possible, so that the bureau may arrange details for handling and shipping the samples. Only those communities that will qualify by meeting the rules and regulations of the bureau of agricultural economics will be eligible to receive the classing service, Miller said.

Newport Mill Seen as Viking

NEWPORT, R. I. (AP)—Philip Ainsworth Means, a Promet, Conn., archaeologist, has offered to prove that Newport's famous Old Stone Mill was built by Norsemen in the 12th century—if Newport advances him \$5,000 to \$10,000 for the project.

In a letter to the Newport Park Commission, Means said he is convinced the mill is about 600 years older than believed. He took exception to the accepted history of the mill that Governor Arnold patterned it after the Chesterton Windmill at Warwickshire, England.

"In 1937 I made a study journey to Germany, Denmark, Sweden, Norway and Iceland, where I made an intensive study of materials in libraries in those countries," Means wrote. "I believe the Old Stone Mill is of Norse origin. I can prove it was not built by Governor Arnold under the circumstances mentioned. Equally sound proof of what the building is can be obtained only by scientific excavation." Park commissioners said Means told them he would accept, at a \$1-a-year salary, the job of supervising the excavating. But the commission failed to share Means' enthusiasm. It rejected the offer.

There are 82 appointments-at-large to the U. S. Military Academy at West Point, two of which are made upon recommendation of the vice president, especially conferred by the president of the United States.

Past Records Raise Indians' Pennant Hopes

CLEVELAND (AP)—Cleveland fandom is poring over baseball statistics to rationalize a belief that its Indians really may be headed pennantward this year.

They attach faith to mid-July figures of the past eight years, which show that the Tribe never has descended in the season's second half and that in four of those years it improved its position.

The statisticians reason thus that the club this year should hold at the season's end the first place it occupied early in July.

In four of the past eight years, the Indians finished in September exactly where they were in mid-July.

Rose in Other Years In the other four, the Tribe bettered its position in the final half of the season, coming from sixth to fourth once to squeeze into the first division, from fifth to fourth another and in the other two instances from fourth to third. Last year, the Redskins in mid-July were in fifth place. The New York Yankees were leading, pursued respectively by Detroit, Chicago and Boston. And the Indians finished in exactly the same spot—fifth—at the end.

The Yanks won, holding their mid-season lead. In mid-July, the Tribe had held a percentage variously around 500 and generally was 10 to 11 games behind the Yankees.

Two years ago, in 1936, Cleveland also was in fifth place at mid-season. The Yanks were leading then, too, and Detroit, Boston and Washington were trailing.

The Tribe pushed up in the final half of the season and edged into fourth place to make the first division. Again the Yanks held their first-spot position, even as Indian fans hope and calculate their club will this year, and went on to take the pennant.

Finished Third in 1935 It was a similar story in 1935. New York was leading and Cleveland was in fourth position, except that the Detroit Tigers edged out the Yanks for the pennant. The Indians moved from fourth up to third, their best finish in the past eight years. The duplicated that position the following year.

Here is the way it ran in the five years previous to that. In 1934—Cleveland was in fourth place, New York was leading. Detroit elbowed out New York for the pennant and the Indians worked up to third at the close.

In 1933—Cleveland was in sixth place, Washington was leading and won. The Indians moved up to two notches to fourth place and to the first division.

In 1932—The Yanks were leading and won, Cleveland was in fourth place and finished there.

In 1931—Cleveland was in No. 4 and finished the same. Philadelphia was leading and won.

Announcing Another Roosevelt

With a "proud father" grin on his face, Franklin D. Roosevelt, Jr., third son of the President, is pictured above as he announced to besieging reporters and cameramen the birth of a seven-pound son to his wife, the former Ethel du Pont, at the Lying-In Hospital, Philadelphia. The baby is the President's eighth grandchild. Although his son is not yet named, Franklin, Jr., wired friends of the arrival of "Batling Frank 3rd."

Tests Arranged For 113-Ton Gun

WATERTOWN, Mass. (AP)—A 113-ton streamlined defense gun, mounted on a special steel flat-car for easy transportation over the nation's railroad network, soon will be moved to Aberdeen proving grounds near Washington for government tests.

First to be built under a national rearmament program, the 30-foot weapon can hurl a 200-pound projectile and pierce a battleship 20 miles off the coast.

Uncle Sam's newest weapon places the guns of World War days in the horse and buggy era. Where they fired one shot a minute, the new gun will fire from two to three. Where two to three men were required to swing the old type guns into firing position, one man,

literally with a flick of his finger, can manipulate the new one.

Engineers at Watertown arsenal where the mounted monster is housed said improved breech mechanism has speeded the firing and made it easier to raise, lower or swing the gun about. They add that the gun is believed the heaviest practical mobile type.

The guns in wartime would be mounted in batteries of two over any standard size railroad track and could be set up, ready for use, in five minutes. Steel braces, thrust into the earth along a railroad embankment, keep the flat-car from derailling when the gun is fired.

Cost of ammunition would range from \$500 to \$800 per shot. Officials said that if private companies aided in construction, a complete unit could be made in 60 days. If built only by the government, one would be completed in six months.

Smart salesmen have learned the trick of SOUTHERN SELECT for SUMMER FAG

Salesmen know a trick or two about beating the heat. Top trick in the bag is "time out" for SOUTHERN SELECT when the going's tough. When the pavement sizzles and ambition is at low ebb—make a bee-line for the nearest bottle of SOUTHERN SELECT—sit down—sip it slowly—and relax. Forget the heat for ten pleasant minutes while you enjoy the golden goodness of SOUTHERN SELECT. You'll be surprised how fatigue takes to its heels and early-morning pep returns. You're refreshed and ready to step out for a full day of work or play. When vitality lags—try SOUTHERN SELECT—it works every time.

Advertisement for Southern Select beer with a circular logo: 'THERE'S A Real Reason WHY SOUTHERN SELECT HELPS. Heat exhaustion is caused by loss of salts and water through abnormal perspiration. Work-ers in industrial plants are given salt tablets and extra water to protect them in hot weather. SOUTHERN SELECT, because it contains the necessary salts and abundant fluid, helps you similarly.'

Job Hunting Outfit

By MARIAN YOUNG
NEA Service Staff Correspondent.
NEW YORK.—When you have finished telling the high-powered executive who you hope will be your employer all about your experience, education and other technical qualifications for the job, you can't very well add, "And I'm a woman of good taste, too." Now can you?

Yet, there is a way for any job-hunter to let the interviewer behind the desk know that she has excellent taste, and, in addition, is a neat soul who won't throw paper on the floor instead of in a waste basket, wear soiled blouses to the office or turn up some bright morning with a dirty neck.

Clothes are the answer. What she wears couldn't possibly be more important in the lifetime of the would-be career girl than on the day she goes to ask somebody for a job. The way her hair is combed and the amount and kind of make-up she has on, are of utmost importance, too.

The greatest mistake you can make when you buy your "job hunting" outfit (and this is one of the times when it isn't even a little bit

foolish to buy a special ensemble without keeping in mind the accessories you have or the color scheme in your wardrobe) is to get something too dressy. The next greatest mistake is to appear for an interview in an outfit that is too informal. For example, twin sweaters, a gored skirt, sports hat and flat-heeled shoes, all of which would be ideal on a campus but not in a business office.

The best costume for seeking a job in a large city at this time of year would be a black or navy sheer dress, simply tailored, of course, and finished with white lingerie touches at throat and sleeves or a white pique collar. You'll keep the white touches truly white and there won't be any wrinkles in the dress even if you have to stand up for an hour in a bus or subway to prevent them.

With a black sheer, wear a plain black hat. It ought to be interesting and one hundred per cent flattering. Just skip the idea of a long, flowing veil or any fantastic trimming that will take your prospective employer's mind away from you and what you are saying. Wear dark shoes, too. White shoes and melting asphalt do not go together. Gloves and purse can be white, if you like.

For job-hunting in a smaller city, a subdued print might be a good choice. And you can wear white accessories, including shoes.

Get the complete ensemble at least two weeks before your first appointment to be interviewed. And wear the hat and dress for half an hour at least three times between then and the big day. Wear the shoes enough to get used to them. In other words, until they are properly broken-in. Anyone is more comfortable in clothes to which she is fairly well accustomed. Get used to the new job-hunting outfit before you wear it into an office. This way, you won't be thinking of yourself and your clothes when you should be thinking about the job.

Fish Ducks Dog

WOODSTOCK, Ont. (U.P.)—Ontario carp can compete with the muskellunge, northern pike, tuna and tarpon for fight and drive. At least two Woodstock boys believe so. They caught a carp, struck it on the head, and then tied the fish to their dog's leash. The carp revived, struggled back into the water, and pulled the dog with it.

Couple Married Sunday In Quiet Home Ceremony

Miss Bernadene Kenison of Ft. Dodge, Iowa, became the bride of Wilmer B. Stowe in a simple single ring ceremony at the home of Mr. and Mrs. T. D. Kimbrough, 810 W. Kansas, Sunday afternoon at 2:30 o'clock. Rev. J. E. Pickering, pastor of the First Christian church, officiated, and only intimate friends were present.

The bride wore a navy blue and white ensemble with blue accessories. The flowers she carried were roses.

Both the bride and groom received their degrees from Northwestern University at Chicago. Until her marriage the bride taught in the high school at Ft. Dodge. Mr. Stowe, son of Judge H. W. Stowe, of Ft. Dodge, is associate with Mr. Kimbrough in his law office here.

After a short wedding trip, Mr. and Mrs. Stowe will be at home at 710 N. Main.

Naomis Have Lesson, Discuss Plans for Business Meeting

Naomi class members met in the private dining room of the Scharbauer Hotel Sunday morning. Mrs. A. E. Horst taught the lesson from fire, one of the nation's major Mrs. Earl Griffin gave the devotion.

Plans were presented for a business meeting the first week in August.

Twelve members were in attendance.

Shorts Taken from TSCW's Features

LIFE IN SEVENS.

Life is just a bowl of sevens to Bernice Bayless (note the seven letters in each name), student at Texas State College for Women. Born on a Tuesday in January in 1907, the day and month both having seven letters, she is the seventh child in her family. By the time she received her first degree she had attended seven schools. She majored in English-seven-letter word—and in 1937 she began her seventh year of teaching the seventh grade in seven contest prizes.

NICKEL ONLY.

Nickel or nothing, say the students at Texas State College for Women, according to reports from the merchants around the campus. The girls have gone Scotch the past few years, and five-cent magazines, soft drinks, groceries and supplies have a greater lead than ever before on the more "ritzy" products. Storekeepers also comment that the girls now spend a greater per cent of their money on necessities.

FORM ONE PLAN.

Sixty-two girls planned a model kitchen which is now being built in the Home Economics Department at Texas State College for Women. Considering the usual differences

between Woman No. 1 and her kitchen ideas and Woman No. 2 and her kitchen ideas, it is a small miracle that not only was a single plan finally evolved but the final blueprint was approved by all.

Program at Church Under Direction Of Young People

The Young People's Division was in charge of the general assembly program at the Methodist church last evening.

Two songs were sung by the entire assemblage: "There Will Be Showers of Blessing" and "He Keeps Me Singing."

Misses Joyce Beutach and Cleo Tidwell sang a special "Give Me Thy Heart."

"Man's Religion" was the topic that Mrs. Ray Gwyn spoke on. Clyde Pace gave the seven best habits and read "It's In Your Face," the author is unknown.

They closed the program singing "God Be With You 'Til We Meet Again."

The Wednesday Afternoon Club will meet at 2:30 with Mrs. R. C. Moore on S Baird.

Announcements

TUESDAY

Chef les Amis will meet with Mrs. Bob Clarke, 410 W. Kansas, Tuesday morning at 9:30 o'clock.

Midland county museum in the courthouse will be open Tuesday afternoon from 2:30 o'clock until 5 o'clock. The public is invited to attend.

Women's Bible class of the Church of Christ will meet Tuesday afternoon at 3 o'clock.

Business Girls' auxiliary will meet with Mrs. John B. Mills, 912 W. Kentucky, Tuesday evening at 8 o'clock.

WEDNESDAY

Midland County health program will be broadcast over KRLH at 11

"Scram over to Mary's and see if you can dig out the woman's angle on this. An' if she won't talk, ask her little brother."

Midland county museum in the courthouse will be open Thursday afternoon from 2:30 o'clock until 5 o'clock. The public is invited.

Announcements

THURSDAY

Midland safety council will present its weekly program in the "Old Observer" series in a broadcast over station KRLH Thursday morning from 11:50 o'clock until noon. Billy Noble will have the role of the "Old Observer."

Midland county museum in the courthouse will be open Thursday afternoon from 2:30 o'clock until 5 o'clock. The public is invited.

FRIDAY

Belmont Bible class will meet with Mrs. W. P. Collins, 710 S. Weatherford, Friday afternoon at 4 o'clock.

Slitch and Chatter club will meet Friday afternoon at 2 o'clock at the home of Mrs. E. L. Reagan, 211 E. Kentucky.

SATURDAY

Story Hour will be held Saturday

Big Fish Out of Sky Creates Plane Mystery

KLAMATH FALLS, Ore. (U.P.)—The first "mysterious aerial bombing" to occur on the Pacific coast occurred here when what is believed to have been at least a 10-pound fish hurtled down through a tree and struck the rear trunk of Francis McCarthy's automobile, inflicting a large dent.

Although the fish is believed to have fallen from or been thrown from an airplane that was heard flying overhead about the time the "bombing" occurred, a police investigation revealed no clues.

Babylonian King Named As First Archeologist

CHICAGO, (U.P.)—Modern archeologists can trace their profession to an ancient Babylonian king, according to Dr. Waldo H. Dumbarton, of the University of Chicago.

Nabunaid, the last king of an independent Babylonian empire about 2,500 years ago became interested in archeology after he had inaugurated an extensive building program throughout his kingdom. Records uncovered by modern scholars contain references to inscriptions of kings who preceded him in Babylonia for 2,900 years.

He identified buildings of the Assyrian, the Cassite, the old Babylonian (the great Hammurabi) and the first Semitic empire under Saragon, though his findings have been occasionally corrected by modern research workers.

Fifth most important of the world's trees, the fig tree originally grew in southern Asia and Europe. It was introduced into other sub-tropical lands from thence.

Farmers are enabled to gather four or five crops of hay every year by drying grass artificially. The grass is cut when it is six inches high.

SWAN DIVE—Marshall Wayne's easy grace depends on muscular coordination and cast-iron nerve control. Wayne clinched top diving honors for the U. S. A. in the last Olympic competition.

HALF-TWIST—Splice-second timing—perfect form! Naturally, Marshall Wayne can't risk jitters. Discussing smoking, he says: "Camels are easy on my nerves—they set me right. Most divers I know prefer Camels."

JACK-KNIFE—Muscles tense in the blue—a thrilling pause—an arrowlike flash into the pool, leaving scarcely a ripple. As one spectator exclaimed: "It's perfect—the water seems to part to let Wayne in!"

INTERMISSION—and a Camel! "Always after an exhausting tournament," says champion Wayne, "I light up a Camel for a very welcome 'lift.' Camels add a lot to my comfort and contentment!"

"Camels agree with me in a lot of ways!"

SAYS **MARSHALL WAYNE** OLYMPIC PLATFORM DIVING CHAMPION

OTHER CAMEL SMOKERS TELL THEIR EXPERIENCES TOO

(Left) IONE REED, movie stunt girl. Her most famous exploit: a dangerous leap from speeding auto to train. Healthy nerves are a big "must" with Miss Reed. "Camels," she says, "are so mild that steady smoking never gets on my nerves."

"CALLING ALL CARS!" finds Radio Patrolman Harold Sickles (right) always alert, ready for action! He says: "I can't afford jittery nerves. So my off-duty smoke is Camel. I smoke Camels plenty 'for digestion's sake' too."

ARE CAMEL CIGARETTES REALLY DIFFERENT FROM THE OTHERS?

THEY CERTAINLY ARE, ELMORA, FROM MANY ANGLES. CAMELS NEVER TIRE MY TASTE AND THEY ARE EASY ON MY THROAT TOO. EVEN AFTER STEADY SMOKING, THEY DON'T BOTHER MY NERVES. CAMELS ARE SWELL!

Camels are a matchless blend of finer, MORE EXPENSIVE TOBACCOS—Turkish and Domestic

PEOPLE DO APPRECIATE THE COSTLIER TOBACCOS IN CAMELS

THEY ARE THE LARGEST-SELLING CIGARETTE IN AMERICA

Tobacco growers know "inside" reasons for preferring Camels

These planters tell what they know about Camel's finer, more expensive tobaccos

"At the warehouse sales," says Leon Mullen, experienced planter, "Camel buys the choice grades of tobacco. That's the reason why most of us men who grow and know tobacco smoke Camel cigarettes. We certainly appreciate the difference in the tobacco Camel buys."

"Almost every one of my fine baskets of tobacco went to Camel buyers last year," says G. A. Langley, who knows tobacco growing from every angle. "Better tobaccos mean better smoking," he adds. "That means Camels to me—and to most other growers too."

Alton Barnes, a planter who has grown and graded many a fine crop, says this about Camels: "Year after year the choicest lots of my tobacco have gone to the Camel buyers. Naturally, we growers select the best tobacco for our own smoking. So we choose Camels."

"I know from experience that Camel buys choice tobaccos," says Mr. Cecil Claybourne, veteran planter. "Many's the time they've paid more to get my finest lots of tobacco. Yes, most of us planters smoke Camels. We sure find a difference in their finer tobaccos."

CARDINALS SPLIT TWO WITH HOBBS; TO BIG SPRING TODAY

TEAM TO RETURN HOME WEDNESDAY WITH THE BARONS

HOBBS, July 25, (Special).—The Midland Cardinals made it two out of three with the Hobbs Boosters here Sunday when they captured the second game of a double header after losing the first one.

In the first game, the Cardinals got off to a three run lead in the first inning off lefthander Marshall Scott, ace of the Hobbs staff, but Tom "Wahoo" Warren threw a couple of home run balls later in the game to give the home club a 6-5 victory. The pay-off blow was a homer by James White, Midland youth playing third base for the Boosters, in the eighth.

In the second game, Benny Franklin kept eight Hobbs blows well scattered to give the Cardinals a 7-4 win and a split on the day's play.

The Cardinals will be in Big Spring today and tomorrow, returning here Wednesday with the same club.

Lubbock Prepares For All-Star Game There on August 6

LUBBOCK, July 25.—All that is needed is a football game to make one realize that the fall of the year is really at hand. The weather in this West Texas town is ideal for the cool days and nights of the past week have brought out vests, light coats, and sweaters, and turned on the gas in numerous homes. With just two weeks to go, the football game will be a reality, but we cannot count on the autumn weather—but the nights will be cool and delightful.

Saturday night, August 6, at 8:30, the referee's whistle will start the gridiron clash between two picked teams from North and South Texas—the players are the stars of last year's football campaign.

For the past three years the North squad in the all-star Texas High School football game has defeated the southern aggregation, but this year the picture looks altogether different. It will be remembered that the balance of power in interscholastic football was in the South last fall, so those pig skin toters will be performing before what is expected to be a record attendance—and, the odds are in favor of the South.

With Lynn Waldorf of Northwestern University guiding the destiny of the southern squad and Harry Strudleiner of Wisconsin University taking charge of the Northern Eleven, these two teams will be out to give an exhibition of fast clean football.

Hornsby, Crazy About Horses, Finally Gets One

By HARRY GRAYSON
Sports Editor, NEA Service.

Rogers Hornsby, simply crazy about horses, finally has a useful one.

Burling Rogers Hornsby's frequent run-ins over playing the ponies, Joe Engel, president of the Chattanooga club, presented the former major league pilot with a steed which he may ride or use to plow a field.

The gag featured Hornsby day, as the old National League batting champion made his home bow as manager of the Southern Association Lookouts.

Engel was kidding, all right, but he also was making it clear to Hornsby which was the only safe type of horse to tie to.

It will do no good, however. Once a horse player, always a horse player, and the Rajah, like the rest of us, no doubt will buck "em as long as he has the price.

Hornsby, once the \$40,000-a-year player-manager, lost a fortune on the bangtails... bet thousands on races he never saw. He was a good customer... a bookmaker's darling.

It's peculiar how fellows as smart in all other ways as Hornsby will, by long distance telephone or otherwise, chuck it in on races in which one of any number of things can happen.

MANY THINGS CAN HAPPEN.

A horse may be left at the post. He may bolt... jump the fence in his eagerness to get back to his oats. He may get away slowly, be pocketed, bumped, go wide, or bear out enough to lose. He may be cut down. The jockey may be taken suddenly ill... become nervous. The nag may be the victim of poor judgment on the part of the boy aboard.

The horse may stumble or fell. Saddles slip. Saddle girths slip and break. Bridle straps break and stirrups snap. Shoes come loose and horses lose them. Horses sometimes run a fever going to the barrier. It usually settles in their throats... like asthma.

Houston War Games To Start August 6

PT. SAM HOUSTON, Texas. — With most of the modern war implements in evidence during the great maneuver of part of the Third Army near San Antonio August 6 to 20, national guardsmen participating may have an opportunity to see the most efficient individual infantry weapon thus far devised.

Revolutionary in performance, the new rifle developed for Uncle Sam's doughboys, paradoxically enough, permits higher accuracy at 40 shots a minute than at a slower rate. Of true semi-automatic type, it is expected to increase the fire power of a military unit so armed four-fold.

Designated as M-1, cal. 30, this latest fire arm represents several outstanding improvements. It is pronounced the best mechanism of its classification in modern ordnance by officers at Fort Sam Houston, where it has been demonstrated.

Developed over a period of 10 years by its inventor, John C. Garand with co-operation of the Army Ordnance Department, the weapon has fewer parts and weighs but a few ounces more than the venerable Springfield.

Already thoroughly tested in service by the 29th Infantry in the Infantry School at Fort Benning, Ga., the new super-efficient arm is being issued to the 9th Infantry of the Second Division at Fort Sam Houston, the first tactical unit in the United States Army to be so equipped. The 23rd Infantry at the same post will be the second regiment to get the new rifle.

After personally firing the gun, and observing its performance in the hands of others, Major General Frank W. Rowell, commander of the Second Division said:

"I am deeply impressed with the characteristics of this rifle. Surprisingly enough, instead of a strong recoil, I was aware rather of a slight 'push' after discharge.

The general added, with a touch of levity that the only "objection" he found was that the ease with which it could be fired might create too many expert rifleman ratings.

Major George A. Woody, of the Ordnance Department, who has been associated with the inventor declared that the ease with which men may be instructed in the rifle's use is another great advantage.

In this connection, a school of instruction for company officers and non-commissioned personnel, is being conducted at Fort Sam Houston under direction of Major O. P. Windingstad, division Ordnance Officer, and Lieut. A. R. Del Campo, a recent transferee from the Cavalry at Fort Clark.

An instance of the intense interest aroused in those who have attended the classes is seen in the fact that, although contrary to the usual custom, a "Smoking Permitted" sign is posted, the men have been so engrossed in the workings of the rifle that they have foregone the opportunity to light a "fag."

Auto Plunges 50 Feet, Lands Upright, 5 Escape

PHILADELPHIA, (U.P.)—Death took a holiday here when an automobile carrying five passengers broke through a guard rail and plunged 50 feet to a cobbled stockyard.

The vehicle landed squarely on its four wheels; the tires and springs absorbing the shock. The passengers escaped with minor bruises.

Burling Rogers Hornsby's frequent run-ins over playing the ponies, Joe Engel, center, president of the Chattanooga club, presents the former major league pilot, right, with a horse that he may ride, enter in a derby, or use to plow a field. The gag features Hornsby Day, as the old batting champion makes his home bow as manager of the Lookouts. The long-billed cap on the little Negro astride the steed makes him look like a Ubangi.

With or without fever, the horse may not feel like running that afternoon. There is no explanation for this.

Then, sometimes when a horse wins with plenty to spare, those holding tickets on him see him disqualified for some rule infraction. They have no way of knowing whether an owner is waiting for

Talk About Double Headers!

Promoters in the southwest have introduced a new wrinkle to the mat game, and the not-so-affectionate scene above shows the innovation being unfolded before Houston fans. The wrestlers are sent into the ring in teams, which makes the referee's job the toughest of the evening. Sol Slagle, the referee in this case, is trying to untangle, from bottom to top, Steve Malakoff, Lou Plummer, Pete Malakoff and Dee Willie Davis.

Injured Woman Travels 5,000 Miles in Bed

LONDON (U.P.)—After a 5,000-mile journey over land and sea, which she made on stretchers and in hospital beds, Mrs. Grace Steele of Galashiels has returned home from a visit to her son, who is manager of the Royal Trust Company in Edmonton, Alberta.

Despite the fact that she is almost blind, Mrs. Steele, who is 84,

a spot, and is simply running his thoroughbred for conditioning purposes.

This is done every day. One race is worth 20 workouts, and the instructions to the jockey are not to press the animal.

PLAYERS BABES IN WOODS.

On top of this there is that certain amount of phenagling and monkey business that goes with every race meeting.

The great majority of horse players are babes in the woods. That is why bookmakers call their money sucker money. A bookmaker is successful as long as he sticks to bookmaking keeps his books fairly well balanced. How can he lose?

There is the story of Frankie Moore of Cincinnati and Newport, Ky.

Hornsby was said to have been into Moore for something like \$225,000 at one time... so far that Moore, when he acquired yearlings himself, named one Overboard after the great right-hand hitter.

But Moore was a gambler as well as a bookmaker. He plunged, and the result was that he went overboard like the namesake of Overboard's horse.

You can't get away from it. All hoss players must die broke.

Patrolman Saves Mouse While Crowd Backs Cat

PITTSFIELD, Mass. (U.P.)—Necrotic strollers were treated to a real life imitation of "Of Mice and Men."

A mouse, pursued by a cat, darted across a North street sidewalk. Cornered the mouse turned to face the death blow. A small group assembled to watch the slaughter. Seeing an opening, the mouse dashed under the cat and fled down the street. Again the mouse was edged into a store entrance. The onlookers cried for blood, and the cat tried to comply.

But success—in the person of Patrolman Royal R. McGuire—appeared on the scene. Dispersing the crowd, he drove the cat away and allowed the mouse to scape. Then he continued to try doors along his beat.

"Drink Cards" Suggested

SAN FRANCISCO (U.P.)—Richard E. Collins, chairman of the State Board of Equalization which re-forms the liquor laws of the state, favors the issuance of a "drink card" to all male citizens so that bartenders can ascertain whether the person has reached his majority and is entitled to buy a drink.

NOTICE

Notice is hereby given to all persons having claims against the Estate of Byron Bryant, deceased, to present the same within the time required by law to Georgia Bryant, whose residence and post-office address is Midland, Texas, she having been appointed administratrix on the 18th day of May, 1938.

Oil News-
CONTINUED FROM PAGE ONE
will be pulled at 4,934. Last cores to 4,914 showed intervals of slight porosity and saturation.
Shell No. 3 Roberts, west outpost in the Roberts area of Yoakum, cemented 5 1/2-inch oil string on bottom at 4,550, using 225 bags of cement for the job, and is now standing.
Both Gaines Tests Fail.
Both of the northeastern Gaines wildcats today were plugging to abandon. Riddle & Warr No. 1 J. July 5-12-19-25.

B. Brown, southeast of Seagraves, showing of sulphur water in last cores from 5,522-41, total depth.
Farther southeast, west of Cedar Lake, J. T. Perryman, Jr. No. 1 C. H. Doak, which went originally to total depth of 5,128, found top of cement plug at 4,983. This was drilled out to 4,996, then lead wool was driven to 4,995. Well was shut with 100 quarts and responded by flowing sulphur water. Some reports put the estimate of water flow as high as 150 barrels an hour, but this was doubtful. Plugging is now underway.
Osage Drilling Company No. 1 Mrs. B. E. Miller, northwest of the Seminole pool in central Gaines, is shut down at 1,100 feet in red shale because of high water near the location.
Tatum Failure.
Another failure reported today is Rowan & Nichols No. 1 State, northeast of the town of Tatum in Lea county, N. M. The wildcat logged slight show of water at 5,045, one-fourth barrel of salt water hourly at 5,060, then drilled from 5,060-75 in two hours. At 5,075, it bailed three to four barrels of sulphur water an hour, then was deepened to 5,076, total depth. At that point bailer was run 13 times in an hour and a half, but water gained 230 feet in the hole. Only show was a slight scum of oil from 5,041-45.
East of Tatum, Tide Water No. 1-L State is spudding today.
Jim Mascho No. 1 Cloyd, southwestern Lea Delaware test, is drilling at 2,635 in anhydrite.
In the Mason Delaware pool of northwestern Loving, Argo No. 1 TXL swabbed 15 barrels of oil, natural, in 12 hours, bottomed at 3,981, corrected by steel line from 3,984. It was the shot with 30 quarts from 3,945-75 and is now cleaning out after shot. Black lime was topped at 3,894 and Delaware sand at 3,926.
Crane Area Spread.
Magnolia No. 1-15 University, mile and a quarter southeast extension of the area in eastern Crane recently discovered by Magnolia drilled continuous pay from 3,190 to 3,235, and oil could not be bailed below 100 feet from bottom. It is now standing with 7-inch pipe cemented at 3,180 with 65 sacks.
Yates sand was topped at 2,150, datum of plus 492. Texas No. 1-G State, test a mile and a half northwest of the discovery. On the marker it is running 83 feet higher than the pool opener. Drilling continues at 2,300 feet in anhydrite lime.
Gulf No. 4 McKnight, Ordovician test in western Crane, is coring at 6,265 feet in oil stained sand. It topped Simpson, middle Ordovician, at 6,160, which is said to be low.
Magnolia No. 1-A McKee, northern Pecos deep test, recovered bailer and is now fishing for sand pump at 5,210 feet.

Hold Everything!

"These moth balls aren't worth two cents! I haven't hit one all day!"

Big Boom Hits Sleepy Village

WAPPAPELLO, Mo. (U.P.)—After the U. S. Army engineers department at West Memphis, Ark., requested bids for construction of the huge Wappapello dam and artificial lake near here, this settlement changed almost overnight from a ghost hamlet into a boom town.
Six million dollars are to be spent near here in construction of the dam, basic improvement in the new St. Francis river flood control program for which \$16,000,000 is to be expended.
The main street of this little town, dormant since lumber operations ceased 20 years ago with exhaustion of nearly all the fine timber, no longer is inhabited by livestock and chickens.
Hogs Are Driven Out
The "hog wallow" right in the heart of Wappapello, whose population a short time ago was only 250 at most, has disappeared. Hogs have taken to the hills to make room for the influx of tavern proprietors, hamburger cooks, job seekers, land sharks and others who move in on the "ground floor" where money is to be made.
Sight of chickens on main street, a common sight earlier this year, is a rarity.
Vacant sleeping rooms are not available, and many persons are building additions to their homes to accommodate job seekers.
Property Value Doubled
Property valuations have doubled and it is predicted that during the three years it will take to build the dam, Wappapello will become a thriving city of perhaps 5,000 population.
The dam, when completed will be an earthen structure approximately 2,600 feet long and 70 feet high. Approximately 1,700,000 cubic yards of earth will fill the dam; 19,000 cubic yards of dumped riprap will be used; 19,000 cubic yards of class A and 18,000 cubic yards of class B concrete will be used in the construction along with a total of 1,350,000 pounds of reinforced steel and 36,600 pounds of structural steel. Included in the project will be gates, conduit lining and gate hoists, hydro-electric service units, head gate and operating equipment, power and lighting system, traveling crane, stiffer derrick, gate house, and an operator's house and garage.

omic reasons, the coastal area expects between 10,000 and 15,000 hunters in the field daily during the season.

Personals

Mrs. J. C. Smith left Sunday for market at Fort Worth and Dallas.
Mrs. Hazel Moore who has been the guest of Mr. and Mrs. Jack Cecil returned to her home at Houston Saturday.
Miss Katherine Lucky has returned to her home in Dallas. She has been the houseguest of Mr. J. E. Harwell and family.

I THANK YOU!

It is indeed a pleasure for me to thank the voters of Precinct No. 1 for the substantial majority given me in Saturday's election for Constable. I wish to pledge you my best service when I assume the duties of this office, serving you at all times to the best of my ability.

R. D. (Big) LEE
Constable Elect

TO THE VOTERS OF MIDLAND COUNTY:

I appreciate your hearty support which re-elected me to the office of Sheriff, Tax Assessor-Collector. I shall do my best to deserve your expression of confidence.

A. C. FRANCIS

rial Gardens in 1910 and since has supervised them. They were laid out in memory of the 172 children who died in the Collinwood school pour—and a few of the seasick-tragedies.
Miss Miller was the first woman to attend Cornell University's school of forestry.
She formerly was supervisor of nature studies in the Detroit schools, then taught in Groton's Lowthorpe school of horticulture.
In 1904 she came to Cleveland to lecture and remained to start gardens in the vicinity of several schools.

Guests Are Seasick At Yacht Wedding

MARBLEHEAD, Mass. (U.P.)—Torrential rain and stormy seas didn't prevent Miss Doris Arrington and Robert Manning from being married on the deck of a 48-foot powerboat four miles off this town.
Though drenched by the down-pour, Philatelists in odd parts of the more than 20 guests watched the wedding and then ate luncheon in the cabin.

MANY THANKS

Even though unopposed in my candidacy for re-election to the office of District Clerk, I wish to thank the voters of Midland County for their consideration at the polls last Saturday, and wish to pledge my unselfish service to all during my next term.

NETTYE C. ROMER
District Clerk

Thank You

I deeply appreciate the splendid vote you gave me for District Judge in Saturday's primary and sincerely hope that you may never have cause to regret it.

CECIL COLLINGS

My Sincere Thanks

To the citizens of Midland county and the voters of Precinct No. 3, I want to express my gratitude for my re-election, without opposition, to the office of Commissioner of Precinct No. 3. I will work for the county and my precinct in every way possible, with full appreciation of my responsibility to the citizens.

TYSON MIDKIFF

THANKS

I wish to express my sincere appreciation to those friends who supported me in the recent election. It has always been my steadfast purpose to serve the public to the best of my ability; and it is a joy for me to know that the office of County Clerk has been handled most proficiently during my tenure.
I will continue to serve you during my next term as I have in the past.

SUSIE G. NOBLE
County Clerk

TO MY FRIENDS

Even though defeated in the race for County Clerk, I wish to express my most sincere thanks to those who supported me in Saturday's election.

MRS. J. M. (Crosby) Flanigan

SINCERE THANKS

I am grateful for the support my friends extended to me during this campaign, and I will appreciate your efforts in behalf of Boyd Laughlin for District Attorney in the run-off.

DONALD D. TRAYNOR

MY MOST SINCERE THANKS

I am deeply grateful for the generous support, many courtesies and kind words that have been extended to me during this campaign. I sincerely appreciate the fairness of my opponents and their supporters in Saturday's election.

It will be difficult for me to win in the run-off without concerted effort in my behalf on the part of my friends, and I earnestly solicit your continued help and support.

BOYD LAUGHLIN
CANDIDATE FOR DISTRICT ATTORNEY

IN APPRECIATION

To the citizens of Midland county, I wish to express my thanks for the expression of confidence by reason of the fact that I did not have an opponent for the office of county judge, also for the liberal vote accorded me in Saturday's election. I will continue to give my best efforts to the administration of the affairs of the office.

E. H. BARRON

Thank to Voters

I wish to give my sincere thanks to the people of the county and of Precinct No. 1 for the confidence shown in re-electing me to the office of Commissioner of Precinct No. 1, without opposition. I will give my full time and efforts to filling the duties of the office to the best of my ability.

J. C. ROBERTS

THANKS TO VOTERS

Even though unsuccessful in the race for Constable of Precinct No. 1, I wish to thank every citizen for the support or consideration given my candidacy. I hold nothing but goodwill toward all.

A. C. Blackburn

Expect Many Ducks On Marshes in South

HOUSTON (AP)—When the great flocks of Canadian geese and ducks start southward this fall, a goodly number is expected to light on the Texas coastal marshes.

Marshlands strung up and down the vast coastal plain offer the ducks a warm, comfortable home. Heavy rain in the spring and summer have given the area an abundance of salt grass, which is the peccolide-resistance of geese.

Duck hunters around Katy, Cove, Austwell, Rockport, Galveston, Orange, Amahuc, Corpus Christi, Eagle Lake, Bay City, Mauer Lake and Sandy Point look for herds of the birds from the northland, if the ducks and geese leave the Canadian Provinces by way of the Mississippi Valley fly-way.

Hunters say there was a noticeable increase in the number of ducks and geese migrating to this area the past two seasons. If the ratio is maintained this fall, duck numbers will find a veritable paradise from the Sabine River on the east to the Rio Grande on the west of the Texas shoreline.

The goose country, between Beaumont and Matagorda Bay, has an abundance of salt grass and hunters expect much goose hunting whether the ducks stop here or fly onward to Mexico.

The reduction in the duck bag limit to 10 a day has done much, sportsmen say, to conserve the flocks. Some hunters have put away their guns rather than spend the money necessary for a good duck hunt and have their bag limited to 10.

This one factor, observers say, has helped matters a lot in the Texas duck country. Regardless of how many duck hunters quit for econ-
