

Scenes Like This Portray Busy Season on Ranches at Calf Delivery Time

#### **Fall Meeting API** Chapter Set Saturday

#### · Entertainment And Business Session Called

Fall meeting of the Permian Basin chapter of the American Petroleum Institute will be held at Midland Saturday, November 5, at Hotel Scharbauer, a full program of business and entertainment having been scheduled, according to K. L. Sappington of Midland, chairman of the chapter. More than 200 oil men from over the Permian Basin of West Texas and New Mexico are expected to attend.

The opening business session starts in crystal ball room of Hotel money. Scharbauer at 2 p. m., with election of officers for 1939 and reading and discussions of technical papers. The Rankin, Midland, and Paul Collis-ton, Hobbs. Professor Fancher's Doct paper will deal with "Secondary Recovery by Water Flooding."

#### **Threatens** To Quit the Committee

Wild Statements **About Citizens** Hit in Message

SILVER CITY, N. M., Oct. 29 (AP).—A heated attack on methods of the congressional committee investigating un-American activities came today from Rep. J. J. Dempsey (D-NM), a member who threatened to resign from the group if "wild" statements about outstanding citizens continued to re-

ceive publicity. Dempsey, campaigning for reelection, came here today from Lordsburg, where last night he made public a long telegram of of the committee.

Dempsey, who with Rep. A. D. Healy of Massachusetts Thursday asked and was refused a committee recess until after the elections, as-sailed what he termed "wild and irrational statements" being made committee

"If this method is to be followed," his telegram to Dies said, "It can only result in undoing what good the committee has accomplished and finally must result in total repudiation of these investigations.

"If we are to expect such a continuation I have no other alternaouse to accept my resignation as a member of the committee and to insist that my name be used no further in connection with the comnittee's activities.

#### DIES TO TAKE AIR TO REPLY TO PROTESTS.

WASHINGTON, Oct. 29 (AP). Chairman Dies, Texas, of the house committee investigating un-American activities, announced today he would broadcast Monday night letters of President Roosevelt and other administration officials in an effort to show that "they have refused to cooperate" in his investigation of communism and fascism. He expected to reply especially the president's criticism of the house committee's handling charges against Governor Frank Murphy of Muchigan. Dies said also he had received a telegram from Rep. Dempsey of New Mexico, threatening to resign from the committee if witnesses are allowed to tear down the "characters of outstanding men.

#### Fire Death Toll in French Store Nears **One Hundred Mark**

MARSEILLE, France, Oct. 29 (P). -The official death list of last night's fire had reached 56 today and it was feared that the toll might reach one hundred. Many were missing, especially in the department store where the blaze tarted.

Firemen said "heaps" of bodies were at the bottom of a stairway which collapsed. Thirty-five persons were in hospitals. Some of the missing were workmen constructing a fireproof cellar to protect employes against air raid fires in the fivestory building. Floors of the store collapsed within twenty minutes after the fire was discovered.

same time giving due regard to the neighbor countries and to aiding them in solution of their problems if possible. It is to be hoped that during the next twenty years, Americans will be able to preserve the peace without bowing or making concessions to dictators or over-ambitious rulers. The American Legion and its allied organizations can do much to preserve these strong American

#### The Price of the Next War

conditions.

THE REAL FOR Europe avoided war. But not the costs of war. Some idea of the expense of playing with military adventures is given by these estimates of the cost to Britain of the scare.

British authorities estimate losses in trade and revenue during the period at \$200,000,000. Cost of military and naval mobilization was not less than \$70,000,000. About 42,000,000 gas masks were distributed free at a half-crown each, roughly \$25,000,000 more. At least \$15,-000,000 was spent for sand-bags, and not less than \$5,000,-000 in preparations to evacuate school children from congested areas.

All that is well over \$300,000,000. In addition, hundreds of shops closed in a business slump the like of which ernment's income. Countless personal losses add to the elections which may cost them their political heads. toll of the war that was not a war.

Now add to this a similar cost to France and Germany, and lesser losses to other countries involved. And you can guess, this being the cost of a mere scare, the price of the next war.

# The Fords Tell Their Plans

for 1939

F WE KNEW anything better we could do for the country than make good motor cars, we would do it.

By every one doing his best in the job he thinks most useful, this country is going to regain its momentum. We have tried to do our best in our job.

When business was suddenly halted in its recovery more than a year ago, we determined that we should keep going anyway, if not at full-volume motor car production, then at getting ready for greater motor car values that would help future production.

#### EXPANDING FOR THE FUTURE

We began to build 34 million dollars' worth of new plants and equipment. We felt that if we could not employ all our men building motor cars, we would employ as many as we could building better production facilities.

We were told, of course, that this was no time for expansion, that a wiser business policy would be to "hold everything" —which means, stop everything. But no one ever got anywhere standing still.

Besides, we are not defeatists. We up not believe this country has seen its best days. We believe this country is yet in the infancy of its growth. We believe that every atom of faith invested in our Country and our People will be amply justified by the future. We believe America is just beginning. Never yet have our People seen real Prosperity. Never yet have we seen adequate Production. But we shall see it! That is the assurance in which we have built.

Business is not just coming back. It will have to be brought back. That is now becoming well understood in this country; for that reason 1939 will be a co-operative year. Manufacturers, sellers and buyers will co-operate to bring back the business that is waiting to be brought back.

This construction program is almost completed. It has increased activity and payrolls in a number of related industries. It has given us better facilities for building better cars and trucks, and eventually our new tractor which is being perfected.

#### THIS MEANS MORE VALUE

The current program has provided a new tire plant, which will turn out a part of our tire requirements . . . a new tool and die plant that will help us cut the cost of dies . . . and a steel-press plant that will enable us to make more of our own automobile bodies. These are in addition to the plants we already had for producing glass, iron, steel, plastics, and many other things.

We don't supply all our own needs, of course, and never expect to. The Ford engine is one thing that no one's hand touches but ours. Of nearly everything else we use we build some quantity ourselves, to find, if possible, better and more economical ways of doing it. The experience and knowledge we gain are freely shared with our suppliers, and with other industries.

We take no profit on anything we make for ourselves and sell to ourselves. Every operation, from the Ford ships which first bring iron ore to the Rouge, is figured at accurate cost. The only profit is on the finished result—the car or truck as it comes off the line. Some years, there is no profit for us.

Henry and Edsel Ford, on the occasion of the 35th anniversary of the founding of the Ford Motor Company, June 16, 1938

But we see to it that our customers always profit. A basic article of our business creed is that no sale is economically constructive unless it profits the buyer as much as or more than the seller.

Our new plants have helped us build more value into all our cars for 1939. That means more profit on the purchase to the purchaser.

We have not cut quality to reduce costs.

We simply will not build anything inferior.

#### NEW TESTING EQUIPMENT

While we were putting up new plants to produce cars, we constructed new equipment to test them. The first weather tunnel of its kind ever built for automobile research went into operation at our laboratories this year.

It makes any kind of weather to order. The weather it delivers every day would take months to find in Nature. Our cars are weather-tested to give you good service in any climate anywhere. In other tests, every part of the car is punished unmercifully. Then our engineers tear it down to see if they can find abnormal wear or any sign of weakness.

The money we spend on tests saves you money on repairs. And your family car is safer and more dependable when we put it in your hands.

#### THE NEW CARS

We have two new Ford cars for 1939—better cars and better looking—but we also have an entirely new car.

It's called the Mercury 8. It fits into our line between the De Luxe Ford and the Lincoln-Zephyr. It is larger than the Ford, with 116-inch wheelbase, hydraulic brakes, and a new 95-horsepower V-type 8-cylinder engine.

We know that our 1939 cars are cars of good quality. We think they're fine values in their price classes.

With new cars, new plants, new equipment, the whole Ford organization is geared to go forward.

#### Kids Won't Get A Lot of Kick **Outa'** This Idea

Midland youngsters that annually get a lot of fun out of marking up store windows with soap on Hallowe'en night are in for some surprises tomorrow night if several merchants here do what they have said they would-cover their windows with glycerin — before leaving the stores that night. According to a druggist, that is one sure way to keep from having the windows all covered with funny pictures and names the next morning after the kids' "big night." His advice is to take a small rag, pour the glycerin on it and go over the entire surface of the window. Then sit back and laugh at the kids.

Horned Frogs Overwhelm Bears, 39-7

## LLDOGS TAKE 19-14 THRILLER FROM THE ODESSA **TWO TOUCHDOWNS SCORED BY EACH CLUB IN WILD AND WOOLY FIRST QUARTER; FRANCIS WINS IN LAST**

For ten minutes Friday night the Midland Bulldogs and the Odessa Broncs put on the wildest, daffiest, most unbelievable brand of football ever witnessed in these parts, then settled down to play normal ball. Midland finally came out on top of a 19-14 score but it was only after

that crazy first period that left spectators limp in their seats. Four touchdowns were scored in that first 10 minutes, and Odessa had a 14-12 lead that stood up until late in the final period when Midland made another touchdown and copped the battle.

All claims for victory by Odessans MUSTANGS DEFEAT

For the benefit of the few re-

maining persons who wouldn't admit that Jay is the best back in West Texas the little field general put on a demonstration that should

have convinced all. He made two of he Midland touchdowns and was a on the ball. It was that good old Midland line

that meant the difference between defeat and victory. Time after time during the first half Caudle and Callon of the Broncs swept the Midland ends and went off tackle for huge gains but it was different in the last half. In fact, the Broncs made only one first down in the last

It would be impossible to name the Midland boys that looked good without going over the entire lineup: Bryan, Hejl, and Van Dyke a ends, Ford and Foster at tackles,

Klatt and Eidson at guards, Whit-taker at center, Geddes, Harris, Big "Lug" Ford played the best

game of his career on the team. He point was low.

but not as good as the Friday night before. They played steady ball against Odessa while they played inspired ball against Wink. However, no complaint could be voiced there because it was impossible to get the boys to the mental peak the reached the week before.

The game started off sensibly enough and lasted that way for the game Francis fumbled and aside the gallant Rams, 24-13. Odessa recovered on the Midland 26. 7 with one period to go but out

Today, men make better mouse-traps, better automobiles, better furniture. But when you want them, you don't have to travel to a distant forest to find them. They are described and displayed for you in your own home—in the advertisements in this paper.

The advertising section is the most valuable part of the paper to you as a buyer. Reading it will pay you dividends every day.

#### The Midland Reporter-Telegram

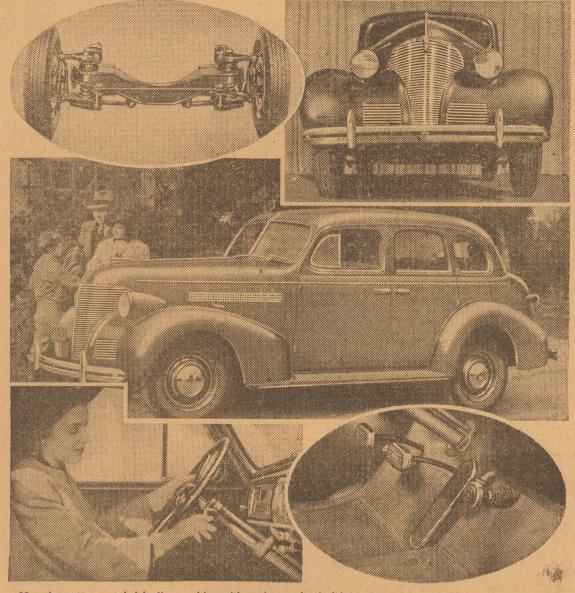

#### At the Library

<sup>\*</sup> Zaca Venture, by Charles William Beebe: In 1936 the author sailed with the owner and crew of the Zaca, a two-masted diesel schooner, on a two month's expedition to the Gulf of California. They spent much of their time in dredging, seining, and diving for marine life, concentrating their researches on the Inez bay region, Cape San Lucas, and Clarion island. Their adventures such as whale-sharking, their findings, many of which are well described. Here is the true romance of science-a handful of people on the ageless waters, studying creatures which have evolved through untold milleniums and are still there today, living, feeding, fighting, courting, and dying. This Is Democracy, by Marquis

W. Childs: In this book the author presents the case of the Labor government in Scandinavia where they continue to preserve democracy and even to extend it in important fields of national economy. In Norway, veden, and Denmark labor bargains collectively with industry (which is also organized), issues newspapers, pushes forward social and economic reforms through dem. ocratic processes of government and improves the standard of living so that all in all, the Scandinavian countries continues to be citadels of enlightment in a Europe that threatens to return to barbarism. These countries are not separated from the rest of the world. They, too, are confronted politically and economically with the problems raised by communism, fascism, and the foreign and trade politics of the so-called democratic nations outside their borders. Despite tarrif barriers, foreign political pressures, world depression, empire trade agreements, internal dissensions and the various disasters of these last years, Scandinavian countries continue to make progress in the distribution \_of

goods and with labor governments in power, to legislate beyond the needs of a narrow group of trade unionists. Here is the story of countries where servants are trained in special school conducted by House hold Assistants Trade Union with the demand for graduates far exceeding the supply despite the possibilities of a sit-down strike in the kitchne; where the head of a government takes a trolley car home at the end of the day's work. Labor and capital are not wholly at peace and living on milk and honey in shrewd, incisive analysis of inter- A. Booklist) these northern Utopias. On the controry, there are strikes there,

Chevrolet Takes Big Strides Ahead for 1939

New Aero-stream styled bodies combine with major mechanical improvements to provide new beauty; safety; comfort and operating ease, in the 1939 Chevrolets, presented October 22, and featured at the big auto shows this month. The new models are offered on two chassis, the Master De Luxe and the Master 85, both of which are powered with Chevrolet's famous six-cylinder valve-in-head engine. A new vacuum gear shift mechanism with steering column control, optional on all models at small extra cost, does 80 per cent of the work of shifting gears. The Master De Luxe series features a new riding system, in which a brand new Chevrolet Knee-Action mechanism is scientifically co-ordinated with new ride stabilizer and double-acting hydraulic shock absorbers to furnish a smooth, soft ride. Central picture is the new Master De Luxe Sport Sedan. Upper right: front end view of the 1939 car; Upper left: Master De Luxe front suspension unit, complete; Lower left: accessibility and finger-tip ease of operation are two major features of Chevrolet's vacuum gear shift with steering column control; Lower right: As the handbrake on all models is re-located under the cowl, front compartment floor is cleared in cars with vacuum gear shift.

logical Seminary at Austin. Members of the American Le-gion will be special guests. 7:30 p. m. People's Hour. Dr. Currie will preach, pending other announcement Sunday morning.

#### CHRISTIAN SCIENCE SERVICES. "Everlasting Punishment" is the

subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, October 30

The Golden Text is: "Rejoice not against me, O mine enemy: when I fall, I shall arise; when I sit in darkness, the Lord shall be a light unto me" (Micah 7:8).

Among the citations which comprise the Lesson-Sermion is the following from the Bible: "This shall be the covenant that I will make with the house of Israel; After those days, saith the Lord, I will put my law in their inward parts, and write it in their hearts; and will be their God, and they shall be my people" (Jeremiah 31:33).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: Through repentance, spiritual baptism, and regeneration, mortals put off their material beliefs and false individuality. It is only a question of tme when 'they shall all know Me (God), from the least of them unti the greatest'" (page 242).

land Episcopal Church at 2:00

m. You are cordially invited

M. E. Stubblefield, Paster.

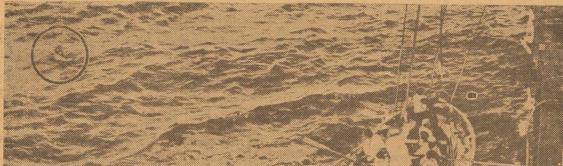

War clouds dispersed for the present by the partition of Czechoslovakia, there remains much work before all details of the four-power peace pact can be put into effect. Pictured above entraining at London are some of the 1200 British legionnaires picked for police duty in the Czech areas in which plebiscites are to be held under direction of an international commission.

#### Arab Guerillas Harass British in Palestine

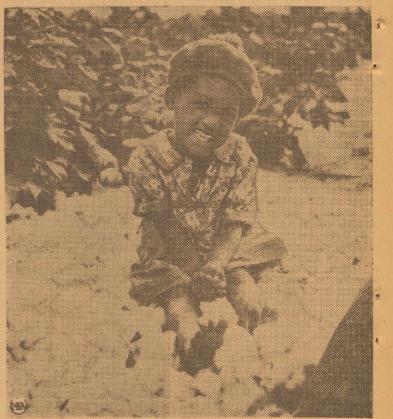

British troops striving to maintain order in Palestine are constantly harassed by bands of Arab guer-rillas. In the photo above, a turreted armored car is shown driving around a rock barricade erected by the terrorists to delay reinforcements sent to Tiberias. This Jewish town on the shore of the Sea of Galilee suffered a raid by Arabs in which 21 Jews were killed.

Rescue Sailor as Lifeboat Drill Becomes Reality

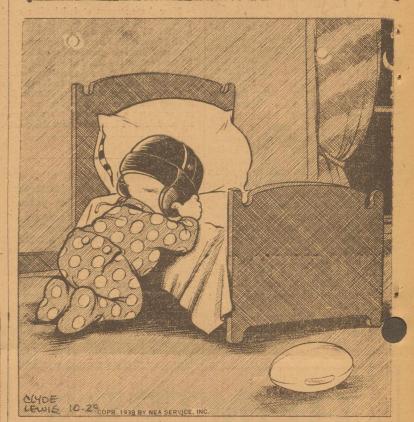

#### Soft Seat in the Southland

The sun shines bright on this happy child of North Carolina as she rides to market on a load of downy cotton. Surpluses and cotton prices may worry the planters who employ her Mammy and Pappy but they have no place in her light-hearted  $\Im$  scheme of things.

"Bless my ma, bless my pa, bless the team-Rah! Rah! Rah!"

"Of course, if we're disturbing you, I know where I can buy a dress just like this for 339.30."

Forms at Left

Death was cheated by Coincidence in dramatic fashion during a recent trip of the S. S. Boringuen from Puerto Rico to New York. When the dread cry "Man overboard!" sounded on the ship, it at first seemed just part of the game being played—a routine lifebo at drill. But the fact that a life was really at stake vas quickly realized when seamen spotted one of their mates thrashing about in the sea. By the happy coincidence of the boat drill, everything was in readiness for a quick rescue. In the unusual photo above, the sailor is seen in circle at left, while at right the rescue crew goes into action
