94 Game and Fish Laws Enacted by The Legislature

AUSTIN. — The recent regular session of the Legislature passed 94 new game and fish laws, but sportsmen of extreme West Texas won't have to be walking law libraries when they go hunting or fishing for only two of the many local laws enacted apply to that section of the State, the Game Department announced today.

The Game Department does not make hunting and fishing rules and regulations, but is charged with enforcing game and fish laws the legislature passes, it was pointed out.

One of the West Texas laws forbids the sale of fresh-water fish caught west of the Pecos River. This measure will affect that portion of Val Verde county lying west of the Pecos, as well as Terrell, Pecos, Reeves, Culberson, Hudspeth, El Paso, Jeff Davis, Presidio, and Brewster counties.

The other makes certain changes in the universal hunting and fishing license law. It formerly applied to Harris county in southeast Texas, and to 21 other counties, all located in the Hill country and extreme west Texas. Under the new law, Medina county joined the group of counties requiring the licenses, and Harris and Maverick counties dropped out, leaving 21 counties in which the law is now in force.

The new law requires that 90 percent of the license money collected in each county must be spent for game and fish restoration work in the county in which the money was collected. Also, it is no longer necessary, under the new law, for shooting preserve operators to pay to the Game, Fish and Oyster Commission 10 percent of the total amount collected in the sale of shooting privileges. The \$5 shooting preserve license is still required, however.

Requirements for the licenses are the same as under the old law. In the 21 counties, which include Crockett, El Paso, Hudspeth, Culberson, Val Verde, Terrell and Brewster, resident hunting licenses shall sell for \$2 and be required of all hunters except those under 17, persons hunting on lands they own or on which they reside, or persons holding non-resident hunting licenses. Further, the resident hunting licenses are good in any of the 21 counties and over the State as a whole. Resident fishing licenses shall sell for 55 cents and be required of all fishermen except those under 17, persons fishing on lands they own or on which they reside,

Prices Received by Farmers in July Reported Lower

The mid-July prices received by Texas farmers for agricultural products were reported lower for most items than a month earlier. Prices of lint cotton advanced slightly during the month but cottonseed showed a material drop in the areas selling new crop seed and average \$1.90 a ton less for the State. Strengthening of dairy product prices was indicated by small advances in fluid milk prices and by butter products holding unchanged. Other items reported higher for the month are eggs, potatoes, hogs, sheep, and lambs, but all of these products, except hogs, are lower than in July 1938. Comparisons with a year ago are irregular, with about half of the items showing declines. Among the commodities for which lower prices than a year ago are reported are wheat, corn, cottonseed, dairy, and poultry products and hogs. Prices are higher than a year ago for other feed grains, hay, cotton, wool, cattle, and sheep.

For the United States sharp declines occurred in prices received and persons holding artificial lure or commercial fisherman's licenses. A resident fishing license bought in one of the 21 counties is good in all the others.

Counties to which the universal license law applies other than those named above include Mason, Menard, Kerr, Schleicher, Sutton, Kimble, Real, Edwards, Blanco, Llano, Kendall, Gillespie, Kinney, and Medina.

A section in the universal license law reduces the bag limit in the 21 counties from three gobblers per season to two.

Surveying the 94 new laws it must enforce, the Game Department announced that only seven are general in nature, that is, applicable to the State as a whole.

One of the most important of the general laws gives the collared peccary, or javelina, the status of a game animal. Javelinas may not be killed now except during an open season of from Nov. 16 to Dec. 31, both dates inclusive, and the bag limit is two per season. Sale of javelinas or their hides, except those imported from other states or from Mexico is forbidden.

Other general laws include those placing the Starling on the unprotected list, forbidding, in the interest of safety, fishing from bridges maintained by the State Highway Department, and requiring that out-of-state trappers purchase licenses costing \$200 each before engaging in trapping in Texas.

for grains and fruits, but these were offset by price increases for chickens, eggs, milk, and potatoes. Prices of meat animals showed no change from June, also cotton and cottonseed prices were unchanged from the previous month. The index of all prices received on July 15 stood at 89 percent of pre-war, the same as in mid-June. The all-commodity index was 6 points lower than in mid-July a year ago. Only a few farm products, principally lint cotton, potatoes, apples, veal calves, lambs and wool, brought higher prices this month than in July last year. Prices received by farmers for commercial vegetables during the first half of July were at about the same level as July 1938. Cabbage, cantaloups, and cucumbers brought somewhat higher prices in the first half of the month than they did last July. Tomatoes, watermelons, and green peas sold at slightly lower prices, while lettuce and onions were unchanged.

The index of prices paid by farmers declined 1 point from June 15 to July 15. This was not enough to change the ratio of prices received to prices paid which remained at 74 percent of pre-war. A year ago, this ratio was 77 percent. Prices paid for feed advanced from May to June, but receded with the drop in feed grain prices during the past month. Prices paid for all commodities bought by farmers averaged 120 percent of pre-war in mid-July as compared with 123 a year ago.

Texas Cotton Crop to Be Smaller This Year

A Texas cotton crop of 2,577,000 bales of 500 pounds gross weight is forecast by the Crop Reporting Board. The indicated production is compared with 3,086,000 bales produced in 1938 and 4,077,000 bales the 10-year (1928-37) average. The reported August 1 condition, at 67 percent of normal compares with 79 percent a year ago and 69 percent the 10-year average for August 1. The condition of 67 percent indicates an average lint yield for the State of 142 pounds per acre. This compares with a yield of 168 pounds for 1938 and a 10-year average yield of 147 pounds. The forecast of yield and production is based upon condition as of August 1, and the final outcome will depend upon whether the various influences affecting cotton during the remainder of the season are more or less favorable than usual.

Prospects on August 1 are reported above average in Districts 4, 5, 6, 9, and 10. In other districts below average prospects are reported. Except for the southeastern counties and for local areas of the

Inventive Youth Springs a New One

Walter Bura, 22, of West Orange, N. J., had read about how Julius Caesar attacked enemy cities with huge rocks thrown from spring catapults. It gave Walter the bright idea for the contraption pictured above. At left he is shown lying on the sled of his home-made catapult, with elastic airplane shock cords drawn taut. A trigger releases the cords and then—there he goes—at right, high in the air, to land 130 feet out in Lake Mohawk, Sparta, N. J., where he made this demonstration. A board used to protect him from friction, falls below him.

State, moisture was needed on August 1. In only a relatively small portion of the State, however, were prospects reported to be exceptionally poor. In the Blackland area and in most of East and Southeast Texas prospects were relatively good.

For the United States a crop of 11,412,000 bales is indicated, compared with 11,943,000 bales produced in 1938, and an average of 13,800,000 bales for the period 1928-1937. The yield is based at 223.7 pounds lint per acre and the area in cultivation on July 1, less the 10-year average abandoned, at 24,424,000 acres. The condition of the crop is placed at 74 percent of normal.

MEANS WITHOUT MEAT.

SEATTLE. — Art Means, Washington guard who will be a member of the College All-Stars in their game with the New York Giants in Chicago, Aug. 30, is allergic to all forms of meat, and is a strict vegetarian.

Water Deliveries To Start From Dam

First regular deliveries of water from the \$5,000,000 irrigation project being built in Willacy county with Public Works Administration funds will begin about September 15, George M. Bull, PWA Regional Director, said today.

The irrigation project, which will be one of the most complete in the nation, is located in Texas' dry but immensely fertile Rio Grande Valley. Drawing water from the Rio Grande River, the project will furnish water for 70,000 acres.

Between 20,000 and 25,000 acres will begin getting water in September, and additional acreage will be added from time to time until December 31 when the project is expected to be completely in service.

The project will include reservoirs and pumping stations, some 15 miles of lined canals, and 130 miles of underground pipelines.

Workmen, 1,300 of them—are now

busy lining the miles of canals with concrete. The contract for lining the canals is the largest of its type ever let in the United States; only one larger, in India, has been let in the world.

The contract, let to the Cement Gun Company of Allentown, Pa., was begun in May and will be completed in November. The contract calls for shooting mortar on 12,000,000 square feet of wire mesh. Cost of this phase of the irrigation project is \$1,077,000. Work on all phases of the project is now being rushed in order to meet the deadline for substantial completion, according to PWA engineers.

Total employment on the project currently is around the 1,600 mark, the Regional Director said. He pointed out that an even greater amount of employment has been created in the industries supplying materials for the project. According to the Bureau of Labor Statistics of the U. S. Department of Labor, two and a half times as many man-hours of work are created in producing, processing, and transport-

ing materials as are created at the project site itself.

The area which the Willacy county project will irrigate is capable of producing as many as three or four crops a year. It lies in a region which has become one of the nation's chief sources of winter vegetables and citrus fruits. The area produces a wide range of vegetables including carrots, beets, turnips, okra, cucumbers, tomatoes, and it isn't uncommon to see 40 acre fields of parsley.

Seven thousand acres of citrus fruits are already planted in the area which the Willacy county project will serve but, lacking water, they have heretofore been unprofitable.

The project's pumping station below Mercedes will take approximately 150,000 acre feet of water a year from the Willacy county project. The water will be used the year round its maximum use will occur in the spring and in the early fall. The project is being financed with a 30 percent grant from PWA and

a PWA loan for the remaining 70 percent of the cost.

Tropical Hardwood Found By Grand Coulee Workers

GRAND COULEE, Wash. (U.P.)—Remnant of a prehistoric era in the Pacific Northwest, a 25-pound block of tropical hardwood has been uncovered by excavators at work on Grand Coulee dam.

The wood block, with a grain resembling that of rosewood, was buried more than 100 yards deep in clay near the dam. It was found by workers constructing a tunnel as a slide-control measure near the mammoth man-made waterfall.

The discovery adds weight to a theory that the Pacific Northwest at one time was in a tropical climate. The wood block is believed to date back tens of thousands of years.

Approval of 23 WPA Projects Is Announced by State Chief

SAN ANTONIO.—Approval of 23 Work Projects Administration projects involving expenditures of \$642,347 in Federal funds and \$361,761 supplied by local governmental agencies, was announced today by STEARNS S. TUCKER, deputy state administrator.

Projects approved, with amount of Federal funds, sponsors' funds, and number of workers to be employed, follow:

BEXAR COUNTY
SAN ANTONIO—Lay water main and construct football field at new stadium; Federal funds, \$47,977; sponsor's funds, \$15,699; workers, 241. This is the first unit in the master project for constructing a \$477,000 concrete stadium and athletic field.

BREWSTER COUNTY
SUL ROSS COLLEGE—Construct a low-water concrete bridge and bridge approaches over Cibolo Creek at the Bexar-Guadalupe county line on the Seguin road; Federal funds, \$20,550; sponsor's funds, \$23,688; workers, 41.

CAMP COUNTY
CAMP STANLEY—Construct ammunition dump, build roads and drainage structures at Camp Stanley; Federal funds, \$125,770; sponsor's funds, \$79,023; workers, 350.

CAMP NORMOYLE
Improvement of Quintana Road at Camp Normoyle; Federal funds, \$2,780; sponsor's funds, \$807; workers, 27.

CHILDRESS COUNTY
Remove old timber bridges and build 39 new bridges with rock masonry headwalls and reinforced concrete decks; construct rock baffles and build bridge approaches; Federal funds, \$56,421; sponsor's funds, \$14,717; workers, 102.

CLAY COUNTY
NEWPORT SCHOOL DISTRICT—Build new school at Newport County Line School site; Federal funds, \$5,863; sponsor's funds, \$3,182; workers, 75.

DAWSON COUNTY
LAWESA—Construct and erect street markers throughout city and improve streets; Federal funds, \$13,753; sponsor's funds, \$16,392; workers, 57.

ERATH COUNTY
STATE HIGHWAY DEPT.—Improve 5 1/2 miles of highway from Lingleville east toward Stephenville by grading and constructing drainage structures, providing flexible base and erosion protection; Federal funds, \$29,313; sponsor's funds, \$14,933; workers, 134.

HARRIS COUNTY
LA PORTE—Improve Houston Yacht Club basin by extending breakwater, providing safe anchorage and additional space for cyster propagation; Federal funds, \$1,459; sponsor's funds, \$1,070; workers, 28.

HILL COUNTY
Improve 6 miles of road in Precinct 2 by widening right-of-way, placing gravel surface, and rebuilding four timber bridges; Federal funds, \$8,257; sponsor's funds, \$6,346; workers, 72.

DR. GEO. W. TRUETT
at
PAISANO CAMP MEETING
(August 5, 6, 1939)

I sat beneath Paisano Peak
And heard the mighty Truett speak;
Majestic was his gentle face,
The noblest of the human race.

I heard a sermon as I looked,
A greater one than e'er was booked;
His face with goodness fairly shone,—
A sermon, poem there alone.

His voice, enchanting as a dream,
Delighted all and made them beam,
Bewitching them with peace and love
Like that which comes from Heaven above.

His diction was so pure and sweet
That none could e'er with him compete,
The simplest statement made with grace
That lifted it from the commonplace.

Of atmosphere and faithfulness
He spoke in tones of earnestness,
'Til all who heard him as he stood
Resolved they wanted to be good.

He seemed to understand his Lord,
And knew the meaning of His Word,
'Til all who heard him as he spoke
From sin and death to Life awoke.

It may not seem the thing to say,—
He does such good both night and day,—
I wonder why a man like this
Should ever leave for Heavenly bliss.

Reverently,
W. W. Luskey

Midland, Texas
August 8, 1939

Seven Additions to Fine Arts College at University Made

AUSTIN.—The University of Texas as a major objective establishment of a distinguished College of Fine Arts—as Dr. E. William Doty, fine arts dean, today announced that his faculty will be bolstered by seven additions in September.

The department of music was to receive three additional instructors, drama and art departments, two each.

On its first birth date, the fine arts faculty will be enlarged by the following additions: William M. McVey, instructor in sculpture; Boyer Gonzales, instructor in art; E. P. Conkle, professor of playwriting; Bradford White, instructor in costume design; Homer Ulrich, associate professor of music; Anthony Donato, instructor in violin; and Miss Margaret Corbin, instructor in voice.

Already known to Texans for his monument in Texarkana to Col. James Bowie, and 2,600 square feet of carving on the recently erected San Jacinto monument near Houston, McVey was formerly a member of the Cleveland Museum of Art Teaching staff. He studied at the Worcester, Mass., School of Art, at Rice Institute, and in Paris under the famous French sculptor, Despians.

Gonzales, born in Galveston in 1909, and student under the distinguished American painter, Henry McFee, and the Japanese-American artist, Kunyoshi, comes to the University from assistantship to McFee in San Antonio.

Author of thirty printed plays, of which "200 were Chosen," and "Prologue of Glory" were produced on Broadway, Professor Conkle joins the drama staff from the University of Iowa. He is a former holder of Rockefeller and Guggenheim Fellowships in creative writing, and his "Prologue of Glory" was among Burns Mantle's Ten Best Plays of 1937-38.

A graduate of the University of North Carolina, White will round out the college's department of costume design and speech, under Professor Gordon Minter. White has studied both at Wisconsin and the Yale University Drama School.

To become associate professor of music, in charge of chamber music, cello and wood wind instruction, Ulrich leaves a post as head of the Monticello College music department. A pupil of Alfred Wallenstein and Max Rostal on the cello and Hugo Fox on the bassoon, he will direct the University Symphony Orchestra here.

Acclaimed as one of the outstanding young violinists in the United States today, according to Dr. Doty, Donato leaves a post as head of the violin department at Iowa State Teachers College. In the past four years, Donato's pupils have taken five national contests, Dr. Doty said. One of his compositions, "Sinfonietta," was broadcast this spring by the Columbia Symphony Orchestra under Howard Barlow.

Miss Corbin leaves an instructorship in voice at Drake University for the same post here, Dr. Doty declared. She has also held instructorships at Denison University, Ohio, and the State Teachers College at Hattiesburg, Miss.

New Orleans Will Use Tin Cans Under Streets

NEW ORLEANS (U.P.)—Traffic soon will roll over streets made partly of metal, but it won't conflict with the city's anti-noise campaign.

The metal-tin cans will be on the bottom. The scheme, a money-saving idea of Mayor Robert S. Maestri, will salvage the over-supply from city dumping grounds.

The idea is, the mayor said, to provide a base for paving. Due to the low, swampy nature of city land, paving without an upholding base often buckles and sinks.

Once before, Maestri experimented with a paving base. City workmen dumped sand into prepared ground in marshy sections of the city. Sinking was reduced to a minimum.

"Blind Dates" Mustered 300 Strong for Party

WILMINGTON, Del. (U.P.)—A local record of some sort was set when 350 male "blind dates" attended a dance at the same time at the Hotel duPont. The occasion was the convention of Alpha Iota, a business school sorority, only 75 or so of whose members knew local boys. So Phi Theta Pi, a Godley College fraternity, came to the rescue with a date-bureau recruiting service to furnish the needed escorts for the out-of-town boys.

Cryptic Operation Fails Juvenile Theft Ring

SPOKANE, Wash. (U.P.)—Police have broken up a gang of juvenile thieves that operated in syndicate fashion and was so secretive in its dealings that code letters and numbers were used to designate its eight members.

The gang, whose operatives ranged in age from 11 to 15 years, had headquarters in a clubhouse. After rounding up the youths, detectives went through records kept by their leader and found an itemized list of articles they had stolen.

My Darling—
Please make arrangements to meet me tomorrow or Saturday. I will be at the Yucca from 2 till 11.
Love,
Maisie
