

## Next Governor

PAUL B. JOHNSON

JACKSON, Miss., Aug. 31 (AP)—Virtually complete unofficial returns today gave Paul B. Johnson, above, a margin of more than 25,000 votes over Martin Sennett Conner in their contest Tuesday for the democratic nomination for governor of Mississippi.

Johnson had the backing of Senator Theodore G. Bilbo, an advocate of a third term for President Roosevelt, while Conner was supported by Senator Pat Harrison, foe of Bilbo and an opponent of some aspects to the new deal.

## Ticket Sales for Rodeo Making Steady Progress

Advance sales of Midland Rodeo tickets were progressing today at the downtown office in the lobby of Hotel Scharbauer, but cattlemen again urged rodeo patrons to take advantage of the opportunity to avoid last minute gate congestion and secure tickets early.

A section comprising one-fifth of the grandstand has been reserved, all other portions of the big steel structure being open to those who buy only the general admission tickets. The reserved seats sell for 50 cents each and may be bought in advance for any or all six performances.

Books of six tickets may be purchased by those desiring to use them, or to send them to friends or customers. The ticket office will handle mailing of such books for those who desire same.

## Pope Launches New Peace Move; Notes Sent to Five Powers

VATICAN CITY, Aug. 31 (AP)—A new peace move by Pope Pius appeared to have launched today with the handing of notes to representatives of five principal powers involved in Europe's crisis.

## "Clean-Up" Is Urged Before Rodeo Starts

City officials of Midland today urged property owners to clean up all rubbish on or near their premises before the rodeo opens Saturday, thereby reducing the city of many fire and traffic hazards.

## Allowables To Be Cut in West Texas

### East Texas Field Will Get Boost of 100,000 Barrels

AUSTIN, Aug. 31. (AP)—Texas total oil production will be reduced more than 175,000 barrels daily during September while that of East Texas field will be increased 110,000, the state railroad commission indicated Wednesday.

In a statement signed by all members of the body which regulates the industry in Texas, the commission said that at this time it planned to set next month's allowables 15 per cent below the estimate of market demand made by the federal bureau of mines.

The bureau of mines estimated 1,408,000 barrels daily could be mined from Texas in September, and the new allowables therefore, would approximate 1,210,000. Current production is about 1,385,000 barrels a day.

In addition, the commission expressed its opinion that Texas' total output should be held at a figure 15 per cent below the bureau's estimate for several months.

A hearing in Austin was called for September 11 at which the commission will explain what it proposes to do about East Texas' production over which there has been much controversy lately.

Present allowables and the Saturday and Sunday shutdowns of fields long in effect will be continued until after the hearing when a new production order will be issued.

The reduction of 175,000 barrels in the allowables for all the state and in the increase of 110,000 barrels for East Texas will mean fields other than East Texas must suffer allowable reductions of around 285,000 barrels daily.

The declaration of policy was issued on the day the 15-day shutdown of wells throughout the state was lifted in conjunction with resumption of production in other major mid-continent oil states. The shutdown followed a general decline in the price of crude, since restored.

"As the industry knows," the statement said, "the commission is faced with federal court injunctions with regard to certain operators in that field and it appears the commission must allocate to the East Texas field at least 488,000 barrels of oil per day in order to satisfy the requirements indicated in the federal court decisions."

It stated there were 30,000,000 barrels of surplus crude and 10,000,000 of surplus gasoline in storage in the United States.

## Japanese, Fearing Russia, Pushing Troops to Borders

TOKYO, Aug. 31. (AP)—Japan's foreign secretary today said that European pressure by her non-aggression pact with Germany, may seize the initiative in the Far East are causing a great flow of Japanese troops through Korea and North China into Manchoukoo.

On August 29, the Japanese completed their march into Manchoukoo as far as the Outer Mongolian battle zone this correspondent found troop and supply trains choking the railways. They were being rushed toward vulnerable points along the more than 1,900 miles of frontier across which Chinese troops face those of the Red army.

Japanese military men are convinced one of the major considerations of the German-Soviet, non-aggression pact was an understanding by Germany—so recently linked to Japan by the anti-Comintern treaty—not to interfere with any Russian moves against Japan.

Hitherto most Japanese have felt that in a new Russo-Japanese war they believed bound to come they could choose the time and place for its opening. The Moscow-Berlin pact, however, changed this confidence into anxiety expressed to me by Japanese in all walks of life throughout Japan, Korea and Manchoukoo.

No estimates are available on the reinforcements for the Kwangtung army, Japan's powerful garrison in Manchoukoo. Its strength has been estimated at 500,000, approximately equal to that of all the Russian forces in far Eastern Siberia but all indications are that reinforcements are very large.

Some expressions concerning prospects of war with Russia vary. Army officers naturally expressed confidence in Japan's ability to win, although some admit the necessity of keeping large forces in China might prove an important difficulty. (Japan has about 1,000,000 men engaged in her two-year-old effort to conquer China.)

## JOINS WADLEY'S STAFF.

Miss Katherine Tally of Abilene has joined the staff of the ready-to-wear department at Wadley's department store. She has already agreed to take up her duties.

## Senator Coming

United States Senator Tom Connally, one of the state's most able law makers of all times, will be among the distinguished guests at Midland Rodeo. He will spend Labor Day here as guest of Clarence Scharbauer, president of Midland Fair, Inc., and will visit his nephews, Sam and Boyd Laughlin of Midland. Senator Connally, who lives at Marlin, passed through Midland last Saturday night en route to the Carlsbad Caverns.

## Sinclair Meets Oil Price Rate Of Other Buyers

TULSA, Aug. 31. (AP)—The Sinclair-Prairie Oil Marketing company, leader in the crude price reduction which resulted in a six-state shutdown, rescinded today its 20-cents a barrel slash.

The increase was effective this morning. The company posted in all fields, except East Texas, prices prevailing prior to August 11.

In East Texas, instead of a flat price, it posted \$1.10 a barrel for 39 gravity and above, with a two-cent differential for each degree lower gravity.

## War News

BERLIN, Aug. 31. (AP)—Authorized Germans said tonight a "pause" had come about in the crisis negotiations with Great Britain but negotiations "are not broken off."

Announcement of full mobilization of the British fleet on top of Poland's extension of mobilization yesterday, these persons indicated, were at least partly responsible for the "pause."

It was uncertain whether questions in Britain's latest memorandum would be answered.

WARSAW, Aug. 31. (AP)—Polish sources reported tonight German patrols had crossed the border into Polish territory at several points.

They also asserted a German bomber had flown over Polish Silesia and had been pursued by Polish planes.

LONDON, Aug. 31. (AP)—The British government tonight clamped censorship on press dispatches and simultaneously all telegraphic communications between London and the continent were halted.

PARIS, Aug. 31. (AP)—The cabinet met in urgent session shortly after Premier Daladier conferred with British Ambassador Phipps tonight.

## Gas Industry Talk Made at Rotary Club

Classification talk on the gas industry was given by W. Clinton Lackey, manager of the West Texas Gas Company, at the Rotary club today as a part of a series of vocational service programs in the organization. Lackey quoted statistics on the history of the industry, tracing it to its present place of importance in the world, and then describing its functions with relation to the public, to its employees and in giving service, both tangible and intangible.

Short talks were made by Clarence Scharbauer and John M. Hendrix on the rodeo which starts Saturday. Hendrix, here from Fort Worth to handle publicity for the rodeo, said delegations would be here from a wider territory than ever before. He called upon the people of Midland to continue the hospitality which has made the annual rodeo a popular entertainment event.

Clarence Scharbauer, president of Midland Fair, Inc., thanked the citizens for the cooperation given in advertising the rodeo. He paid tribute to Foy Proctor, chairman of the rodeo committee, saying "Midland would be proud of him—the best I ever saw."

Visitors at the luncheon were Mr. Basset of Odessa, Bobby Basset of Houston, Hendrix and Chas. L. Klapproth.

## Parade Route Is Announced By Committee

### Riders to Be Ready At 12:30 Noon on Saturday, Monday

Route of Midland Rodeo's two horsemen's parades, to be staged on the downtown streets Saturday and Monday at one o'clock, will be the same as last year, it has been announced by George W. Glass (chairman), H. G. Bedford and M. F. King, committee in charge of the procession.

All riders are requested to be on the grounds at the west side of the high school at 12:30 noon both days. The line-up will be put in order at 12:45 and the procession will start moving promptly at one o'clock, ending in time for all officials and contestants to reach the fair grounds to open the afternoon program at two o'clock.

The parade will proceed from the high school eastward on Texas avenue to Lorraine street, turning southward and going two blocks on Lorraine to Missouri, turning eastward to Main, then going northward on Main to Texas, turning eastward and disbanding at the Catholic church, so that horses may be ridden northward from there to hit the dirt road to the fair grounds.

Captains assisting the parade committee will be Bill Wyche, Frank Cowden Jr., Jack Wilkinson, Frank Williamson, Stanton Brunson, John Nobles Jr., Guy Cowden, T. Paul Barron and Claude Whitley.

Order of the parade will be: flag bearers, band, rodeo officials, rodeo judges, sponsor judges, cowgirl sponsors and hostesses, band, gaited horses, rodeo contestants, "Light Crust Doughboys," car to be awarded, town riders, band, chuck wagons, ranch cowboys, children (big ponies), children (Sietlands).

Although all riders are invited to participate in the two parades, and a two-mile procession is expected, committee members reiterated their advice to parents to see that children are mounted on gentle ponies, to avoid accidents.

Plenty of captains will be available to assist riders who have trouble, but use of gentle horses and those familiar with pavement and noise is advised, especially for children.

## War Materials Are Being Purchased by The United States

WASHINGTON, Aug. 31. (AP)—The government is about to begin a \$100,000,000 purchase program authorized by Congress to build up stores of essential war materials.

The high command of the army and navy, keeping in mind that the outbreak of a European conflict might close some foreign sources of strategic supplies, has hastened preparation of a list of materials to be purchased with \$10,000,000 which Congress provided to start the program.

The Treasury is expected to announce specifications for these materials within the next few days and call for bids on them in the very near future.

The government's military experts are considering limiting initial orders to these items, for an adequate supply of which, they say, the United States is dependent in whole or in part on outside sources: Manganese ore, for use in the manufacture of steel.

Chromium ore, for special steel alloys used in armor plate and guns. Tungsten ore, for machine tools and alloy steels.

Tin, for food containers and automotive equipment.

Quinine, for medical purposes. Quartz crystals, for use in radio equipment, and for electric gauges used widely in industry and to determine pressures in gun barrels.

Manila fibre, to be made into rope for maritime purposes. Officials say the fibre is the only rope-making material that does not swell when immersed in salt water.

## Eighteen Girl Representatives Named in Group

Total of 18 girls has been named in the group of junior hostesses representing Midland firms, a report from the sponsor committee chairman this morning showed.

The concluding trio of riders to be named included: Ann Porterfield, Miss Piggy Wigley; Nell Ruth Bedford, "Miss C Ranch"; Dorothy Sue Miles, "Miss Humble."

These girls and the 15 others whose names had been previously announced will ride in the parades and grand entries at the rodeo, bearing the names of their sponsors, and will be introduced at some of the performances.

Wednesday was the closing day for naming representatives.

Miss Johnnie Lee Ponder of Dallas is a guest in the home of Mr. and Mrs. Fred Fromhold. She will be here during the rodeo.

## NAZIS HINT OF MILITARY PACT WITH RUSSIA AGAINST POLAND

### Danzigers Heil Nazi Warship

Ordered to Danzig on a "visit" at the height of the war crisis, the 13,000-ton German training cruiser Schleswig-Holstein is pictured getting an enthusiastic welcome as it warps into the dock at the entrance to Danzig harbor—its guns pointing directly toward a huge Polish munitions dump at adjacent Western platte.

## Doctor to Retire From Practice on Account Ill Health

Dr. J. M. Devereaux, for two years associated with Dr. John B. Thomas in the Midland Clinic-Hospital, who has been on a vacation trip to Kansas this month, will be forced to retire from his medical practice for a time, due to recurrence of an old ailment, it was announced today by Dr. Thomas after receipt of a telegram from his associate.

Dr. Devereaux, now at his old home in Kansas, will return here to wind up business matters, he advised Dr. Thomas, but must retire from active medical practice indefinitely. He and his family will remain in Kansas, he indicated.

Dr. Thomas expressed regret at losing Dr. Devereaux, who was associated with him as partner. In addition to his medical practice and hospital work, he was an active civic leader, a member of the Lions club, and with his wife and small daughter, prominent in social circles.

## Home Demonstration Encampment Opens Today at Ranch

Midland county home demonstration club women and 4-H club girls this afternoon are trekking to the Dick Midkiff ranch south of Midland for the annual encampment which opened there today.

A program of recreation, and of instruction along recreational lines, will be presented today and tomorrow.

A large attendance is expected at the encampment which was postponed from earlier in the month when rains made roads to the ranch impassable.

Families of the clubwomen are invited to attend the barbecue supper and the play tournament afterward which will feature tonight's activities.

Various clubs of the county will be responsible for the meals to be served at the camp.

A shallow lake will provide bathing and swimming recreation and ball games and other sports will fill the hours not devoted to programs.

## John Butlers Are Back From Trip

Mr. and Mrs. John P. Butler and daughter Jane have returned from a vacation trip to Estes Park and other places in Colorado and New Mexico. They visited Ouray and Durango, the most beautiful drive they saw probably being that between the two cities named, according to Mr. Butler. This road led through mining territory, Chama, N. M., was another stop on their journey. Cool weather was found along the way and the trip was a pleasant one, he said.

## Italian Army Split In Pair of Divisions

ROME, Aug. 31. (AP)—Division of the Italian army into two parts, respectively to be commanded by Crown Prince Umberto and Marshal Rodolfo Graziana was announced today.

No explanation was given for the brief order.

## Amon G. Carter to Attend Opening Day of Rodeo Here

### Coming "Cowboy Style" With His Handsome Palomino Horse and Saddle in Trailer; to Ride in Parade and Grand Entry Saturday

Visit of the Hon. Amon G. Carter, publisher of the Fort Worth Star-Telegram and often referred to as "West Texas' Best Friend," here during Midland Rodeo was announced today by the officials, following communications over a period of several days.

He will come by automobile with Ernest Allen, prominent Fort Worth business man, bringing in his trailer his handsome Palomino horse and the attractive saddle and trappings given the publisher recently by citizens of Fort Worth.

Spending Saturday here, Mr. Carter will ride in the street parade and grand entry and will be the guest of the fair and rodeo officials as long as he may have time to remain at the three day show. His acceptance of the urgent invitation to attend the rodeo was delayed for several days because of the illness of one of his staff members.

## Foreign Liners Are Allowed to Sail for Home From New York

NEW YORK, Aug. 31. (AP)—With her band thumping triumphantly away at German martial airs, the Nazi liner Bremen, released after a two-day detention by American authorities, sped for home last night—carrying extraordinary heavy food and fuel supplies but no passengers.

The British Aquitania cast off an hour and a half later, her ship musicians silent and her windmills darkened amid widespread reports that outside the harbor she would be picked up by a British cruiser and destroyer and convoyed across the sea.

The Bremen, the Aquitania, the British Transylvania, and the French liner Normandie were released late in the day by customs authorities after inspections much longer in the case of the Bremen than in the others—to make certain that none carried armament capable of use in raiding the shipping of other potential European belligerents. None did.

The Normandie, however, was under French orders to stay indefinitely in port, the last of a series of brief and contradictory instructions from Paris having brought a statement from the line here that she would not sail "at any time in the early hours of today."

It was assumed the owners wanted the great and luxurious liner safe in harbor until further developments in the weltering European situation.

As the Bremen pulled out she dipped her colors in salute to the big French craft lying in the berth next—and the Normandie responded.

Then across the water there floated from the Bremen not the customary gently melancholy tunes of leavetaking—"Aloha" and the like—but the sonorous notes first of "Deutschland Uber Alles" and then the "Horst Wessel."

Officers and men set up a cheer and some of them cried out hoarsely: "Heil Hitler!"

## Effort Made To Get Poles To Negotiate

### Text of Note From Britain Is Studied By Hitler, Aides

BERLIN, Aug. 31. (AP)—Adolf Hitler was reported today to be ready to play a Russian trump card in an effort to convince Poles they should come to Berlin and negotiate.

The Russian counselor of embassy called at the foreign office while hints spread unless Poland bows to pressure, Hitler intends to announce some degree of military cooperation with the Soviets.

Should Hitler win over Stalin to actively assisting Germany militarily, Poland would find herself in a highly precarious position.

Meanwhile, Hitler and his aides studied Britain's latest message, delivered last night.

## RUSSIANS TIGHTEN CONSCRIPTION LAW.

MOSCOW, Aug. 31. (AP)—Both houses of Russia's parliament today adopted a tighter conscription law which was commissar marshal Voroshiloff declared would show Russia's enemies "we shall not be caught unawares."

The bill extends some terms of service, lowers conscript ages for high school graduates, provides wartime mobilization for women training in medicine and communication technique.

BERLIN, Aug. 31. (AP)—Adolf Hitler declared last night the establishment of a special cabinet council "for the defense of the realm."

The decree reads: "For the duration of the present foreign political tension I decree for unified leadership in administration and economy as follows:

"Out of the reich's defense council a cabinet council for the reich defense will be formed as a permanent committee.

"Permanent members of the cabinet council are: General Field Marshal Goering, as chairman, the deputy for reich's administration, the general deputy for economy, the minister and chief of the reich's chancellery, the chief of the high command if the army.

"1. The chairman may also call in additional members of the reich's defense council as well as other persons for consultation."

"2. The cabinet council for the reich's defense can issue decrees with legal authority in case I do not order the issuance of a law through the reich's government or the reichstag.

"3. The authority of the Field Marshal General Goering accruing from the carrying out of the four year plan of October, 1936, in particular his right to issue orders, remains effective.

"4. The business of the cabinet council for the reich's defense will be conducted by the reich's minister and chief of the chancellery.

"5. I will determine the time for the discontinuance of this decree.

"Signed, Adolf Hitler, der Fuehrer.

"Field Marshal General Goering, Reich's minister and chief of the chancellery, Dr. Lammer."

At the chancellery the move was explained as intended to concentrate authority in a small group of high officials to conduct affairs of the nation efficiently in case of a conflict.

In his capacity as head of the inner cabinet group, Marshal Goering, who already is air minister, will wield authority second only to that of Hitler himself.

Other members of the council are Hitler's deputy party leader Rudolf Hess; General Wilhelm Keitel, chief of the high command of the army; Wilhelm Frick, minister of interior; Walter Funk, minister of economics and Dr. Hans Heinrich Lammer.

The council, under authority vested in it by the sweeping decree, will coordinate economic, military and financial forces of the nation.

The council may act on its own initiative under blanket authority given it by the Fuehrer, although Hitler may still issue decrees and direct legislation through the reichstag.

Goering's influence and power were greatly extended for it was specifically stated that he retains all authority vested in him as director of Germany's four year plan.

## MRS. RAMSEY IMPROVES.

Condition of Mrs. Mollie Ramsey, who sustained a broken arm in an accident at her home Saturday, was reported improved this morning. She has been confined to her bed but was able to be up this morning.

## Psychologist Offers Recipe for Avoiding a Crabbed Old Age

The calendar cannot be trusted to tell you the truth about old age. While you may be "officially" old at 65, the years following that milestone need not be ones of senility, says Dr. Donald A. Laird, well-known psychologist. In the current Rotarian Magazine, he offers six rules as insurance against the unhappy, crotchety old age. These rules were developed from reports of scientific studies by such authorities on human behavior as Dr. Francis G. Benedict, Dr. Christine Margaret Morgan, Dr. Francis M. Pottenger, and Dr. Edward K. Strong, Jr. Here are the "rules":

1. Keep in good health. (Exemplary habits with regard to food, drink, and matters of hygiene, and above all, a philosophy of doing away with worrying work wonders.)
  2. Maintain an intellectual interest in many things. (An education has been found to help make old age happier.)
  3. Enjoy your children and relatives—but don't live with them, if you can possibly avoid it! (Happiest old folks live alone so they can remain independent.)
  4. Mingle with the younger crowd at least occasionally. (Retain membership in your club, lodge and church—and serve on committees.)
  5. Keep occupied! (Choose hobbies and recreations which keep the hands busy, the mind occupied. One of the surest ways discovered to make old folks unhappy, crabbed, disillusioned, was for them to retire.)
  6. Prepare for old age. (Organize your thoughts, your life philosophy, and your activities in middle age with the inevitableness of age 65 before you. This is as important as making financial preparations for your "declining years.")
- And now, continues Dr. Laird, if you have doubts about your youthfulness, check your habits against these which follow. If you have lost or are losing interest in bridge games, the newspaper sports page, tennis, musical comedies, hunting, auto driving, full-dress affairs, golf, smokers, picnics, poetry, collecting stamps; and if you are gaining interest in "educational" movies, nature study, are galleries, museums, zoos, chopping wood, detective stories, raising flowers and vegetables, being left to yourself, methodical people—then, alas, you are growing old (regardless of your age!). In that case the above rules are given for your benefit.

## • BRUCE CATTON IN WASHINGTON

BY BRUCE CATTON  
Reporter-Telegram  
Washington Correspondent

ALLENTOWN, Pa.—For the immediate present, at least, this particular corner of industrial Pennsylvania is feeling optimistic. Its people—those hard-working, self-reliant folk we dub "Pennsylvanian Dutch"—are confident their community can come back from the depression.

It came back once before. The city used to be a great textile center, but the mills migrated off east and south. Yet the city rose again

to become a retail market center of more than average importance.

The riveting racket which nearly drove me from my bed here one night is proof enough of the town's optimism. The building game is booming and night-shifts are working on construction.

Allentown is partly steel. It has its own plants, lies cheek-by-jowl with Bethlehem, whose great factories are humming with navy orders. It has a big factory of the Mack Motor Co. Its farmers are getting in a first-rate potato crop.

## U. S. Sets Up Wartime Protection For Tourists, Currency, Agriculture

No Americans will be left stranded if war comes to Europe, for U. S. preparedness includes plan for speedy evacuation of nationals from foreign shores. But these tourists found they could get out space on New York-bound liner President Roosevelt—and they aren't waiting for hostilities to start.

BY NORMAN KAHN  
NEA Service Writer

### TO GUARD SECURITIES FROM SHOCK

Elaborate precautions have been taken to stabilize currency and cushion the shock on American securities if war breaks out in Europe. The Treasury Department and the Security Exchange Commission are holding secret these plans, formulated last year. Most important factor in American efforts to counteract the economic effect of European war would be the tri-partite monetary agreement among the United States, Great Britain, and France. It is generally believed this would be the principal guide to treasury officials in maintaining stability in the event of war.

Steps have been taken to prevent the dumping of European-held American securities on the domestic market. The tri-partite monetary agreement would help treasury and security officials gauge the temper of foreign financial reactions if war comes. American private investments in Europe total about \$2,400,000,000. Short term banking funds abroad aggregate about \$230,000,000. Long term United States investments were estimated by treasury officials at \$2,400,000,000, of which about \$1,300,000,000 is in such in-

vestments as factories, land, and equipment.

There is no American gold in foreign countries, but about 60 per cent of the world's gold is in this country.

The SEC has the power to close the New York Stock Exchange for 90 days any time it deems such action beneficial to the nation's economical stability. Through special legislation the exchange could be closed longer. Observers believe the SEC would close the exchange for the statutory 90-day period in event of hostilities.

### SURVEY PLANS TO REGULATE CROPS

The Department of Agriculture instituted a survey a year ago to determine what action might be necessary to keep crop production here on a normal basis. The three chief commodities involved are cotton, wheat, and corn.

Loans on wheat and cotton through the Agricultural Adjustment Administration will play a significant part in stabilization of farm commodity markets. Despite anything that happens in Europe this fall or winter, farmers in America will receive specified prices for their cotton and wheat acreage.

in spite of a bad drought.

### BUSINESS INDICES NOW FAVORABLE

The usual business indices are favorable. Retail trade is excellent. A good deal of residential construction is going on, and—as a sleepless night bears witness—there is a substantial amount of store and office building construction, together with a good deal of remodeling of downtown business properties.

Relief rolls are substantially down. At the worst of the depression, the general assistance (direct relief) rolls carried some 4200 families; the list now is down to 1504, having risen a trifle lately due to WPA layoffs.

In the business and professional community, there seems to be an all-but unanimous feeling that the New Deal has outlived its usefulness. By all accounts, anti-Roosevelt feeling in this class is stronger now than in 1936. As one of the city's most prominent business

executives explains it:

"Then there were some business men who were for him, who felt that the New Deal reforms were overdue and that its experiments were well-intentioned. Now there are none who feel that way."

Some shift of sentiment away from Roosevelt is reported even among the people who are on relief. An official of the relief bureau remarks that the long depression has divided the relief "veterans" into two groups. In one group are the people who are perfectly satisfied to remain on relief and who, for one reason or another, have small hope of ever getting off of it anyway.

These people will be pro-Roosevelt just as long as they continue to feel that the New Deal stands for a liberal relief policy.

WHAT UNWILLING RELIEF CLIENTS THINK

The other group—much larger—

is composed of those who want jobs and make every effort to get them, who hate to be on relief and will be off the minute it is humanly possible. Among them, says this may, there is emerging a feeling which goes something like this:

"After all, this depression has been going on for a long time, and the New Deal has had plenty of chance to do something about it. It hasn't done very well, because we're still on relief, and we're still on relief because industry hasn't got any jobs for us. Maybe we'd be better off if the New Deal were replaced by an administration which would turn business loose and give it a chance to make jobs for us."

It would be a mistake to say that the working man in general has lost his confidence in Roosevelt. The confidence isn't as strong as it was, probably, or as universal, but it still exists. A labor union leader says flatly that his members are as pro-Roosevelt as ever.

That compendium of neighbor-

## Texas Today

By the Associated Press

The American hog, chief source of the American breakfast, is not choosy about its diet. But Fred Hale, chief of the division of swine husbandry at the Texas Agricultural Experiment Station, suggests there should be method in feeding as well as discrimination in preparation of rations if growers are to obtain the most from one of Texas' leading cash crops. Raising hogs economically and profitably, it appears, has problems.

"In fattening hogs," he says, "methods of preparing and feeding farm grains affect the net results about as much as does the kind of ration fed."

Hale says among questions asked the station are: What is the best method of feeding grain sorghum, wheat and barley to fatten hogs?; does it pay to grind these grains for fattening hogs?; what other feeds should be fed with farm grains to make a balanced diet?

After extensive study the station found it does not pay to soak milo heads for a fattening ration. Pigs used in the test made greater gains when fed dry milo heads in self-feeders, free choice, than did other swine fed soaked milo heads by hand three times daily. The labor involved in soaking and feeding the milo heads was about five times greater than that for dry milo heads, but the milo heads should be fed on a platform of some kind. Experiments demonstrated pigs gained 16 pounds more a head in 90 days and required 58 pounds less grain and eight pounds less protein supplement for each 100 pounds where the grain was fed on a platform instead of in the dirt.

Experiments demonstrated, Hale says, it is not necessary to soak threshed whole milo for fattening hogs. The pigs gained as fast and as economically on the dry as on the soaked milo grain and, furthermore, it requires more labor to feed the soaked grain.

Another interesting point is that pigs will make as fast and as economical gains when fed whole milo or whole kafir grain in self-feeders, free-choice, as they will when fed ground milo or kafir. Pigs fed at the Texas Station for 90 days gained 193 pounds per day on whole kafir, and 194 pounds per day on ground kafir. Only 3.17 pounds of kafir was saved by grinding 100 pounds. The saving was too small to pay for the grinding. Observations made during these experiments show that pigs made 23 trips to the self-feeder in 24 hours. Out of every 100 pounds of whole kafir fed on self-feeders, only 2 pounds of whole kafir was undigested. This, together with

hood information, a filling station man, beligerently announces that he still thinks Roosevelt the best friend the working man ever had, and adds that he believes all the other working men feel the same way.

body on the sidewalk.

It takes two different kinds of riding to ride a horse race and to kick out a bronc. A. J. Norton was using the jockey style when the paint mare threw him off on the race track early Wednesday morning.

Senator Tom Connally will be one of the honor guests at Midland Rodeo Labor Day. He is one of the state's most outstanding United States Senators in all of the history of Texas. A good turn-out should accompany his visit here.

And Jim Goodman is back in town, too.

meal and 20 parts green alfalfa meal. A simple mineral mixture composed of equal parts by weight of bone meal, ground limestone or oyster shell flour and salt will usually furnish the necessary minerals.

## Eskimo Will Face Trial in Strange Case of Murder

WINNIPEG, Man. (U.P.)—Bound for bleak Baffin Island, John McLean, Winnipeg barrister, on arrival there will try one of the strangest cases in Canadian legal history—Rex versus Eskimo Katcho.

The Eskimo is charged with murdering his two sons, maltreating them so that they developed brain fever and died. He will go on trial at Pangnirtung, on the southeast corner of Baffin Island.

McLean admitted he was puzzled over the punishment for Katcho should he be found guilty. In the Eskimo code execution for such an offense would be unjust. To take Katcho south to a penitentiary would be condemning him to death from tuberculosis. On the other hand, McLean said, to keep Katcho in the custody of the Royal Canadian Mounted Police post at Baffin Island would be to make him the envy of all his friends and would be no punishment.

Yet justice must be done and McLean will represent the crown in the prosecution. An attorney will be provided for the Eskimo. The trial probably will start in Mid-September.

TOLEDO, O. (U.P.)—A boulevard drive of 23 miles linking Toledo's many parks has been realized after a quarter-century of planning.

**A GOOD TIRE IS LIFE INSURANCE!**  
The public has been deluged with confusing tire price advertising. When you buy tires remember this:  
**A Low Price Doesn't Always Mean Value  
Too Low a Price is a Danger Signal**  
A good tire is LIFE insurance. You have a right to know what grade tire—first, second, third or fourth line—you are buying.  
See the nearest Fisk dealer. He will tell you the truth—and give you top value and SAFE mileage in whatever grade tire you buy.

## Reich-Soviet Pact Shifts European Pattern Again

The new Europe is shaping up this way in the wake of the non-aggression agreement between Germany and Russia. The Oslo "peace bloc" nations, all neutrals, have taken leadership in seeking a peaceful way out for Europe. The other neutrals are largely intent on preserving their neutrality. Yugoslavia, under German-Italian pressure, and Bulgaria apparently have made no final commitments.

Mrs. Bucy Honored With Ranch Barbecue Supper on Birthday

Honoring Mrs. Loraine Bucy of Lubbock who is visiting here, her sister, Mrs. Teague Hutchinson, and Mrs. Buddy Hutchinson were hostesses for a chicken barbecue supper in the back yard of the former's ranch home about 25 miles south-east of Midland, Wednesday evening. The occasion was Mrs. Bucy's birthday.

Home-barbecued chickens formed the special dish on the supper menu along with salad, buns, and other accompaniments.

Present were: The honoree and her two children, Martha Jane and Ralph Davis, Mr. and Mrs. Percy J. Mims and family, Homer Medlin, Mrs. Buddy Hutchinson, Mr. and Mrs. Teague Hutchinson and children.

Mr. and Mrs. Don Davis and Mr. and Mrs. Ben Dublin were unable to be present for the supper.

Mrs. Wade Heath Hostess to Party For Bridge Club

Mrs. Wade Heath entertained for the Wednesday Bridge club with a two-table party at the home of Miss Cordella Taylor, 405 North A street, Wednesday at 2:30 o'clock.

Summer flowers formed house decorations. Bridge games supplied diversion for the group with high score being held by Mrs. Ralph Geisler and cut by Mrs. Hugh West.

A party course was served at tea time.

Attending were: Meses. Jack Wilkinson, Bill Blevins, West, Ben Black, Louis Thomas, Geisler, Frank Miller, Miss Lucile Thomas and the hostess.

Kansas City Visitor Honored at Supper Given by Marlins

Mrs. E. H. Brady of Kansas City, Missouri, who is here visiting her brother, J. B. Martin, and family was named honor guest when Mr. and Mrs. Martin held an informal barbecue supper in the back yard of their home, 2001 W Indiana, Wednesday evening.

Barbecue and accompanying dishes were served to about 40 guests. The group spent the evening in playing various games or in conversation, as leisurely fancy dictated.

Want a Peach of an Idea for Dessert? Then Surprise Folks With One of These

Peaches in a regal dress—a fresh peach glaze pie with fluting of cream. Late August in its finest aspect.

By MRS. GAYNOR MADDOX, NEA Service Staff Writer.

PEACHES and cream give a lovely complexion to life. And they add smiles to the menu in pies, cakes, dumplings and shimmering salads.

Fresh Peach Pie Glaze. Eight fresh peaches sliced, or 4 cups sliced peaches, 3/4 cup sugar, 1 package orange flavored gelatin, 1 1/2 cups hot water, dash of salt, 1 baked 9-inch pie shell.

Combine peaches and sugar and let stand 10 minutes. Dissolve gelatin in hot water. Add salt, and pour over peaches. Chill. When slightly thickened, turn into

Menu. BREAKFAST: Sliced oranges with chopped mint, dry cereal, rice muffins, grape jelly, coffee, milk.

LUNCHEON: Potato and onion soup, hot French bread, cheese, cherry tarts, tea, milk.

DINNER: Grapefruit cocktail, breaded veal chops, brown gravy, potato balls, summer squash with parsley, romaine with French dressing, fresh peach pie glaze, coffee, milk, gelatin in hot water. Add salt, and pour over peaches. Chill. When slightly thickened, turn into

cold pie shell. Chill until firm. Garnish with whipped cream, if desired.

Fresh Peach Upside Down Cake. (1 egg)

One and a quarter cups sifted cake flour, 1 1/2 teaspoons baking powder, 1/4 teaspoon salt, 3/4 cup granulated sugar, 4 tablespoons softened butter or other shortening, 1 egg well beaten, 1/2 cup milk, 1 teaspoon vanilla, 4 tablespoons butter, 1/2 cup brown sugar firmly packed, 6 peaches pared and sliced.

Sift flour once, measure, add baking powder, salt, and sugar, and sift together three times. Add butter. Combine egg, milk, and vanilla. Add to flour mixture, stirring until all flour is dampened. Then beat vigorously 1 minute. Melt 4 tablespoons butter in 8x8x2-inch pan or 8-inch skillet over low flame. Add brown sugar and cook and stir until thoroughly mixed. On this arrange peach slices. Turn batter out on contents of pan. Bake in moderate oven (350 degrees F.) 50 minutes, or until done. Loosen cake from sides of pan with spatula. Serve upside down on dish with peaches on top. Garnish with whipped cream, is desired.

Its a Scarf---It's a Bustle--- A Hood and a--- Well, Look at It

An ingenious little hood, which comes in black, brown, gold, green and bright red silk jersey, may be worn as a turban, a snood hat, a bustle, a pocketbook sash or a hood, as the name implies. Above, three gold hoods are used—one around the head, another to form a monk's cowl and a third for a pocketbook sash. The dress is brown wool, the gloves brown suede.

Two of the clever new hoods—one for a peaked turban and the other for a "tummy muff" sash—lend glamor to a simple, basic dress of moss green crepe. As the season progresses, you'll no doubt hear more and more about "tummy muffs."

Three of the hoods, direct descendants of the traditional head-dress of the Caucasus, combining a peaked hood with two long, versatile scarf ends, are used to dress up a simple velvet evening gown. The one on the head is the way the hood looks when you buy it. The other two, knotted and pinned to form a bustle, show how handy a couple of them can be in any wardrobe.

Charles Brown Is Complimented by Employee Staff

Members of the staff of Midland Steam Laundry entertained with a surprise birthday party at Cloverdale Wednesday evening honoring the proprietor, Charles Brown.

The group gathered at the Park at 7 o'clock where the long supper table was centered by two birthday cakes, one for Mr. Brown and one for Lu Wertha, year-old daughter of Mr. and Mrs. Cotter Hiett whose birthday is the same as Mr. Brown's. Each cake bore the appropriate number of candles.

Mrs. Charles Brown asked the blessing, after which Cotter Hiett proposed a toast to the two honor guests.

A picnic supper, featuring fried chicken as the chief dish, was served and the evening was spent informally.

Present were: Mr. and Mrs. Charles Brown, Meses. and Messes. Joel Weathered, Chas. Lynch, Bill Davis and son Don, E. L. Thompson, S. H. Martin, R. E. Roach, Cotter Hiett and daughter Lu Wertha, B. F. Munn, Tommy Irwin, Meses. Annie McLaughlin, Hilda Henshaw, Marian Koonce, Cella Shafer, Lou Ellen Long, Dutch Mayfield, Emma Hendrix, Ben Buffington, Greene, Misses Lou Alma Henshaw, Lillian Arnett, Vivian Arnett, Winnell Richman, and Ed Kostris, Dale Truelove, Jack Martin, Lois Skinner, Jimmie Van Arsdale.

Chilled Fruit Desserts

Heavy desserts are out as far as most summer appetites are concerned and, as fresh fruits are at their very best and are least expensive in midsummer, it's pretty smart to use them just as much as possible. Pile the fruit attractively—red and purple plums, nectarines, golden pears, black cherries, white grapes—in a shallow fruit dish and chill in the refrigerator before serving. Here's a dessert that induces leisurely conversation.

Modern Bathroom Fixtures

Ultra modern bathroom furnishings—hamper, stool, basket and medicine chest—are of gleaming mirrors, and there are some of crystal-clear combined with glass that are lovely, too. New rubber shower curtains, in fascinating designs and marvelous colors, have permanent pebbled or swirled finishes. An inexpensive new cotton base shower curtain, pleasant to the touch, can be washed and ironed and actually becomes more water-repellent after each laundering.

Inexpensive Window Charn

Theatrical gauze, marquisette, voile, are all inexpensive curtain materials. Choose these fabrics discerningly as to color and pattern in relation to the furnishings of the room they are to decorate and you will have charming windows at surprisingly low cost.

Hobby Runs to Fireplaces.

CLEVELAND, O. (UP)—Charles E. Rush, new-head of the Cleveland public library, has as a hobby, the collecting of chimney and fireplace descriptions. After 20 years, Rush has a collection of 1,000 fireplace figures. All are represented by a catalogue system, with pictures and detailed descriptions.

port card grades, misrepresenting ages, deceiving parents, forging excuses, and even "chiseling" on relief.

Teachers are not expected to tell their pupils what is right and wrong. Instead, they are to manipulate the lesson so the students may decide, from their own discussion.

A special lesson prepared for this fall deals with the practice of dropping slugs in parking meters. The lesson, prepared by H. L. Cleland, director of guidance for the board of public education, will contain copies of newspaper editorials deploring the fact that the slugs nearly ruined Pittsburgh's newly-installed meters.

Historic Log Bequeathed. NORRISTOWN, Pa. (UP)—A log book of the U. S. S. Constitution was bequeathed to a grandson in the will of Mrs. Helen S. Clayton, whose estate was valued at \$209,195.

A carburetorless-car may be the handwork of one University of Texas student engineer. He has devised a "mechanical injector" which will outlast and out-perform the ordinary carburetor, he believes.

Airline safety operations for the year ending June 30 showed an increase of 50 per cent over the previous year.

Stuffed Apples Are the Stuff For Hot Days

Apples blush with excitement when you promise to stuff them. Pears get excited, too, when you plan to poach them. And the hungry family will welcome these seasonal fruit desserts.

By MRS. GAYNOR MADDOX, NEA Service Staff Writer.

Apples blush with excitement when you promise to stuff them. Pears get excited, too, when you plan to poach them. And the hungry family will welcome these seasonal fruit desserts.

Breakfast: Grape and pineapple juice, puffy omelet, wholewheat toast, coffee, milk.

LUNCHEON: Hot tomato soup, cucumber cups stuffed with salmon and celery salad, hard rolls, poached pears, tea, milk.

DINNER: Celery and carrot strips, beef and kidney pie, broiled tomatoes, romaine salad, baked apples stuffed with bananas, cheese, coffee, milk.

Baked Apple Stuffed with Banana. (Serves 4 to 6) Four large baking apples, 1 banana, 3-4 cup sugar, 2 teaspoons butter, juice of 1 lemon, juice of 1 orange, 2 tablespoons water.

Wash and core apples. Peel banana and cut in quarters. Insert a piece of banana in center of each apple. Place in baking dish, sprinkle with sugar, dot with butter, and add fruit juices and water. Bake 50 to 60 minutes in slow oven (325 degrees F.), basting frequently. Serve hot or cold.

Poached Pears. (Serves 4 to 6) Six ripe pears, 2 cups water, 3-4 cup sugar, grated rind of 1-2 lemon, grated rind of 1-2 orange, 1-2 cup port wine or purple grape juice, if desired.

Peel, halve, and core pears. Simmer gently with water, sugar, lemon and orange rind until tender. Remove from fire, add wine or grape juice and chill thoroughly before serving.

Coming Events

FRIDAY

Women's Golf Association will meet at the Country Club Friday morning at 10 o'clock in a called business session. All members are urged to be present to vote on the date of the city tournament.

Belmont Bible class will meet with Mrs. A. W. Lester at her home at the Magnolia Tank Farm, Friday afternoon at 4 o'clock.

Miriam club will meet with Mrs. Martis Miller, 106 E. Malden Lane, Friday evening at 8 o'clock.

Partitioned Dishes Attractive

Sectioned dishes make serving both attractive and easy. For desserts with a separate sauce or cream, there is a lovely new leaf-shaped serving bowl of clear glass with deep compartment and matching small side dishes. This can be used attractively as a salad dish, reserving the sauce compartment for dressing.

To Remove Paint From Windows

Sponge paint stains on glass with hot water in which a little oxalic acid has been dissolved.

FEMININE FANCIES

By Kathleen Eiland

Our vote for the most coquettish hat we've seen in many moons goes to a dashing, sophisticated little creation composed mostly of ostrich plumes, piled softly and tilted forward or laid sleekly as a cap. As contrast to the clear light red, blue veiling is used for a note of color at back and front of hat.

It's the kind of hat we'd have no earthly need for in our role as the average working girl. But we look at it and delight in its bold gaiety, nevertheless.

Seeing some linen handkerchiefs adorned with sizeable figures of sunning puppies embroidered in wool thread, we were constrained to ask if they were designed for children's use. We were promptly informed they were for grown-up ladies. Wonder if they were made with the outdoor girl specifically in mind? We can't imagine a coy, little blue-eyed lassie all in fluffles and ruffles and curls using such. But a golfing girl or one on a hike—yes.

The dark-colored handkerchiefs which are brightened by colored designs painted on, sometimes outlined with embroidery, are rather pretty.

Lovely is the adjective that best describes housecoats and lounging pajamas in cordella—a kind of combination chemise and corduroy—especially if a soft, luscious pink is the color in which they are made up.

Honesty Course Put in Schools. PITTSBURGH (U.P.)—Pittsburgh school children, in regular classes this fall, will learn the consequence of dropping slugs in parking meters, dodging income tax returns, playing hooky, and other common delinquencies. The course material will be part of regular classes in character guidance, to be given to local grade school students for the first time beginning in September. Classes will be held once a week. Organized along lines recommended recently by the Cuyahoga county, O., grand jury, the courses are, however, a continuation of similar classes started in high schools here in 1927. The Cleveland jurors urged that crime could be reduced and public morals improved if such courses were introduced in the schools, especially for impressionable children in the eighth and ninth grades. Honesty Teaching Stressed. The teaching of honesty ranks high in Pittsburgh's plan of character guidance. Students and teachers discuss all sorts of common infractions as changing re-

Barbering Work Totals 88 Years For Wisconsin Husband and Wife

PLATTEVILLE, Wis. (U.P.)—G. T. "Dode" Alcott wants to be a barber for 12 more years. If he succeeds, he and his wife will have cut hair and trimmed whiskers for a combined total of 100 years. Mrs. Alcott was forced to retire a dozen years ago when her feet gave

out after she had barbered for 37 years. She is the only woman known to have plied the trade in this area. It was a first-class sensation in little Platteville, Mrs. Alcott recalls, when she and her husband opened a barbershop here in 1901. "The night we opened there was

such a crowd out in front that traffic on Main street was almost blocked. A lot of women were in the crowd, too, some with their noses pressed against the plate glass window. "That was the day, you must remember, when it was considered very daring for a woman to set foot in a barber shop, but few ever did, except maybe to have their hair thinned or the ends singed." Mrs. Alcott learned her trade at Hurley, S. D., where she took it up to help her husband on busy days. When they moved to Missouri Alcott, Ia., they found several women barbers and she took the work up in earnest.

Her busiest days came when the bobbed-hair style swept the country. It was only a short step from barbering to beauty culture and Mrs. Alcott gave the first permanent in this vicinity. Children were Mrs. Alcott's specialty, although she gave shaves and haircuts to men, too.

"Someone always is reminding me these days that I was the first barber ever to cut his hair," she recalled. "Grown men, they are now, and a lot of them with none too much hair left for anybody to cut. It all seems a very long time ago."

Elements Scar Mission of 1783

TUCSON, Ariz. (U.P.)—Unless funds are forthcoming for a complete rebuilding program, historic mission San Xavier del Bac, said to be one of the oldest missions in either California or Arizona, faces destruction by the elements, according to Father Mark Boucher, O.F.M., pastor of the church.

Located nine miles from Tucson, the mission was built in 1783 by the Jesuits. It has been partly restored several times, but storms during the last few years have so damaged the structure that complete rebuilding program is necessary, Father Boucher said.

A recent electrical storm, described by Papago Indians living on the San Xavier reservation as the worst in their memory, destroyed nearly all the cupolas on the west tower, and knocked a massive iron cross to the courtyard in front of the church.

One bolt, Father Boucher said, smashed into the west side of the mission and demolished several feet of plaster. It continued along a wall and bored a three-inch hole in a flight of stairs.

Another bolt jumped to the choir loft roof and spread over most of the building, the priest said, but did not damage the decorations and murals on the altar. Sudden dust and high wind storms, as well as lightning, have buffeted the mission so severely, Father Boucher reported, that few portions of the structure, with the exception of the murals and decorations near the altar, have escaped.

The aged adobe walls of the mission have been cracked and defaced. Many of the windows are broken.

Union Troubled In South Africa

ST. LOUIS (U.P.)—Isak Le Grange, assistant editor of Die Afrika, magazine, said here that opinions in his homeland vary greatly on the subject of granting aid to Great Britain in its ventures.

Le Grange, 34, and his wife visited in St. Louis. A graduate of the University of Missouri school of journalism, he is on a month's tour of the United States.

"Opinion is divided as to whether the Union (of South Africa) will be willing to fight for Great Britain if it gets into a war," said Le Grange. "There are some English who feel more attached to their homeland than to the dominion. On the other hand, this attitude has given rise to a strong South African nationalism which desires a free state patterned after the Irish Free State."

Nazi Problem "Difficult"

There has been no action by Nazis in the territory, but some propaganda, he said, and most of it is centered in what was German Southwest Africa where some desire a return to German rule. Such agitation, he said, "forms one of the most difficult problems with which the country will have to deal."

Relations between whites and natives is the greatest problem. Le Grange said.

"All natives working in the European settlements must carry passes to leave their work and go to other parts of the city," he said. "Although there are 7,000,000 natives in the area compared to 2,000,000 whites, they are allowed to vote only in Cape Province, and only for their own representatives.

Immigrants Closely Checked

"While there is plenty of room in the territory for additional workers, only persons having capital are allowed to enter. Immigration has been virtually stopped except for those with funds."

"There is no use for a man who depends on the work of his arms to go to South Africa. All of the hand work is for the natives."

However, South Africa is beginning to get its own industries and there is a place for white workers in those fields, he said. Biggest openings are in the agriculture and the mining of gold.

Le Grange, commenting on newspapers of South Africa, said: "I taught the American rules of unbiased press stories. It is rather disconcerting to me always to have to read a story which has been written to suit the publisher. There is no impartiality or independence in the newspapers."

Of 306 non-airline accidents reported upon by the Air Safety Board, 64 involved engine failures.

Approval of 10 WPA Projects Announced by State Officials

SAN ANTONIO.—Approval of 10 projects involving expenditures of \$294,008 in Works Projects Administration funds and \$145,698 supplied by local governmental agencies, was announced today by Steam's S. Tucker, deputy state administrator.

Projects approved, with amount of WPA funds, sponsor's funds, and number of workers to be employed, follow:

AUSTIN COUNTY Beeville: Improve city part by leveling ball diamond and constructing grandstand, building picnic units and park buildings; Federal funds, \$8,474; sponsor's funds, \$4,021; workers, 41.

BOWIE COUNTY County: Improve road from DeKalb to a point 12 1/2 miles north-east, together with 3 branch roads; Federal funds, \$70,289; sponsor's

funds, \$13,259; workers, 216. LAMB COUNTY Pittsburgh: Construct one-story native stone gymnasium and three class rooms at existing school; grade and landscape campus and improve football field; Federal funds, \$5,683; sponsor's funds, \$9,592; workers, 81.

HARRIS COUNTY Pelly: Improve streets by grading, shelling, and topping with oil-soaked fuller's-earth; Federal funds, \$7,614; sponsor's funds, \$3,981; workers, 87.

NACOGDOCHES COUNTY County: Improve various roads in Precinct No. 1; Federal funds, \$3,281; sponsor's funds, \$5,068; workers, 48.

NAVARRO COUNTY Frost: Erect gymnasium and addi-

tional classrooms at existing school, improve school grounds and athletic field; Federal funds, \$16,345; sponsor's funds, \$8,491; workers, 79.

RUSK COUNTY Henderson: Improve municipal water system by installing pipe fittings and service on water main extensions; Federal funds, \$4,332; sponsor's funds, \$4,115; workers, 82.

TARRANT COUNTY County: Improve 39 miles of road in Precinct No. 1, placing asphalt surface on 24 miles; Federal funds, \$118,624; sponsor's funds, \$58,223; workers, 216.

TITUS COUNTY Mount Pleasant: Drain swamps and ponds in Mount Pleasant to provide malaria control by elimination of mosquitoes; Federal funds, \$8,954; sponsor's funds, \$1,960; workers, 48.

WICHITA COUNTY Wichita Falls: Construct a municipal gymnasium for use of boys and men in various athletic and social activities; Federal funds,

Sea Island Cotton Ginned in Valley

HARLINGEN. (AP).—Two bales of long-staple Sea Island cotton, the first grown in the lower Rio Grande valley, were ginned here recently and sold to Lilly Mills at Shelby, N. C., for a premium of 30 cents a pound. About two and one-half hours were required to process the one and three-fourths inch staple, because it is necessary to feed the cotton by hand to the two-roller Foss gin.

Due to its long, silken fibers, its tendency to tangle when processed with machinery, and inability of machinery to separate trash from the fibers, all Sea Island cotton must be fed by hand into the special gin. Bars working on a treadmill arrangement separate the seed from the lint, and bring the lint into contact with the two leather rollers scored to hold it. Trash also is picked from the seed cotton before processing.

Cost of processing a bale of Sea Island cotton is about \$6, or considerably more than for short staple varieties, said Clarence Parker, manager of the gin.

No seed from the cotton this season will be sold to growers. Because the variety is extraordinarily prone to cross-pollination in one season, new seed is obtained from an area comprising five Florida counties, which supplies seed to all Florida, Georgia, and the Rio Grande valley.

About 1200 acres were planted to Sea Island cotton in the valley this season, but considerably more acreage is expected to be seeded to the long staple next year.

Kangaroos Hand-Served. SYDNEY, Australia. (U.P.)—Two hundred kangaroos, wallaroos and wallabies are hand fed daily at Koala park here. However, to get their hand-served meal they have to hop from all corners of the 40-acre park and keep themselves nicely balanced on their tails while the food is being handed out.

The United States Post Office has been contracting for airmail carriage since 1926.

Shanghai Story: How Japs Moved British Line Back,

When Japanese troops tore down British barbed-wire barricades at Shanghai, China, re-erected them 100 feet within British defense sector, England's sector headquarters, left, ended up outside the barriers. Chinese residents of area fled homes, climbed through wires to diminished British sector.

International Petroleum Exposition for 1940 Now 72% Sold Out, Reported

TULSA, Okla., Aug. 31. — A total of 72 per cent of the space now available for the 1940 International Petroleum Exposition has been reserved for the May 18 to 25 show at Tulsa, according to an announcement by President W. G. Skelly.

The report is the first available since August 15, the deadline on the free option granted exhibitors at the last show to renew their form-er space.

Deluged with telegrams, letters and even with long distance phone calls the last several days before the option expired, General Manager Wm. B. Way and his staff have just completed an analysis of the space sales to date, the report said.

Of the 165,338 square feet of outside exhibit space, a total of 132,432 square feet has already been reserved, and 363 of the 685 booths in the five huge exhibit buildings have already been taken.

A total of 201 contracts have already been issued as against 442 last year. However, 136 other exhibitors, who have asked for a change in lo-

cation or for additional space, have made reservations and contracts will be issued as fast as the desired accommodations can be provided.

The reservations do not include space requested from over 50 firms who have never before exhibited. These firms will be given contracts as soon as the changes requested by former exhibitors under their option are made.

Skelly, in the report, stated that this is the earliest period in the history of the exposition that 72 per cent of the space has been reserved. He particularly pointed out that his 72 per cent consists of more space than was sold for any of the first nine expositions. The last show, or the tenth, was increased 50 per cent in size.

"The eleventh or 1940 Exposition will be as big as the 1938 show and indications are at present that the grounds used as a park south of the cafeteria will be turned into additional space in order to provide for the requests for large exhibit tracts."

Way reports that the option deadline was set a month earlier this year because of the trend for exhibitors to spend more time in working up their displays.

"No longer do exhibitors throw together an exhibit, put up a few signs, and otherwise get ready within a few weeks. Some of the large exhibitors plan the contents of their exhibits from six to nine months in advance and actually take this much time in preparing them."

"Two of the larger exhibitors have already sent representatives from their home office to survey the grounds and lay plans for elaborate moving exhibits."

"The Housing Committee reports that the attendance prospect is keeping pace with the exhibits and that the committee and its paid staff is working overtime at present in an effort to provide decent accommodations during the 1940 show."

All requests for reservations should be made to the International Petroleum Exposition Housing Bureau, Tulsa building, Tulsa.

Interest in the exposition from foreign countries is also being shown following the formal presentation of an invitation by the United States Department of State and a representative of the Exposition to the ambassadors of the oil producing nations in Washington recently.

For the first time in the history of the Exposition a government has sent its representative in advance to check up on the show and report back on the advisability of its government sending a large delegation of technical experts.

The instance with the visit of John B. Tua, member of the Italian consulate organization in the United States, who visited Way to obtain first hand information.

Morton Downey to Be Casa Manana's Star Last 4 Days

PORT WORTH, Aug. 31. — Morton Downey, the golden-voiced Irish tenor, will be the headliner of the Port Worth Casa Manana during the final four days, ending on the night of Labor Day, Monday, Sept. 4.

Downey comes to Casa Manana after having starred throughout the summer in Billy Rose's Aquacade at the New York World's Fair. The smiling singer is well and favorably known over the southwest, having been the headliner throughout the 1938 Casa Manana.

On the bill with Downey will be Ray Noble and his orchestra—featuring Larry Stewart and Elizabeth Tilton, vocalists—as well as the Great Yacopis, most spectacular act in the history of Casa Manana; Herman Hyde, marvellously humorous musician; the Men of Manana; Wanda Ticknor, Texas Sweetheart No. 1, and the 70 Texas Sweethearts in four beautiful scenes.

Eddie Cantor and his 13-year-old singing protegee, Leni Lynn, will headline the show through Thursday night.

Value of Contour Furrows, Ridges Now More Evident

LAMESA, Texas. — The value of contour furrows and ridges is becoming more and more evident as the summer advances, according to C. W. Firestone an Engineer with the Soil Conservation Service at Lamesa.

Numerous farmers and ranchers of the area report increased grass growth in their pastures this year as a result of moisture having been held on the land by furrows and ridges. In many cases the density of grass along the furrows and above the ridges have been doubled in one seasons growth.

Mr. F. L. Grissom of Southeast of Lamesa, furrows part of his pasture in 1939, with a two bottom lister. With only one good rain after the furrows were constructed the density of grass was more than doubled at the end of the growing season.

Good progress is being made toward furrowing the 125,000 acre Clayton ranch. These furrows and ridges are being made by the use of a single disc, plow. This imple-

ment has proven most satisfactory on brushy or stony land as it will make good furrows without any danger to the plow or tractor. Furrows that were made on the ranch in the late spring are already showing good results.

The Dean ranch is being furrowed with a double disc plow with discs spaced three feet apart. This plow is pulled by a caterpillar tractor which makes furrowing in brushy land possible.

Farmers whose pastures have been treated for soil and moisture conservation observed last spring that the first green grass appeared along the contour furrows where water had been held and permitted to soak into the soil. During heavy rains, farmers found that the furrows and ridges held practically all the water on the area where it fell. With extended periods of hot, dry weather, it can be observed that the grass along the furrows remains green while vegetation on untreated areas has a tendency to become dry

and turn brown.

Improvements of pastures is only one phase of the soil and moisture conservation program demonstrated.

LCRA Project Will Be Ended on Time

The huge power, water, and flood reduction project of the Lower Colorado River Authority near Austin, Texas, will be completed within the time allotted by the Public Works Administration, according to advices received by Acting PWA Commissioner E. W. Clark.

The Authority notified the Acting Commissioner that it would complete all phases of the \$22,350,000 project prior to the June 29, 1940 deadline. Only exception was the powerhouse at Marshall Ford Dam which, although equipment contracts have already been let, will be delayed due to work on Marshall Ford Dam which is being raised in height in order to provide greater protection

from floods to the area below Austin.

The project, largest of its kind in the southwest, includes four dams—Buchanan, Marshall Ford, Inks, and Austin. Buchanan will produce power and provide storage for flood waters, Marshall Ford which will produce power is, however, primarily a flood storage dam, Inks and Austin will produce power.

Power generated by the series of dams will be fed through transmission lines, being built as a part of the PWA project, to communities in a sixteen county area and will connect with the lines of private companies which will take part of the power as a result of a recent agreement between the Authority and the companies.

The project when completed will provide greater protection against floods than has ever been known along the frequently treacherous Lower Colorado River.

In addition, the project will create new recreational areas which are expected to prove highly popular.

The project, the largest to be built with PWA funds in Texas, is the result of nearly a half century of effort to utilize the waters of the Lower Colorado.

Texas Granite Is Defended in Austin

AUSTIN.—From University of Texas research laboratories, champions arose here today to defend the Texas gray granite against, of all things, monument salesmen.

In a mimeographed release describing the types and location of the stone, defending its wearing qualities, and asserting that Texas possesses more commercially accessible deposits than any other section of the nation, Dr. V. A. Barnes, C. A. Parkinson and R. F. Dawson of the university's bureaus of economic geology and engineering research laid slow development of the state's granite industry at the doorstep of stone salesmen pushing out-

of-state products.

Pointing out that Texas imports about 90 per cent of its granite, they summarized recent exhaustive bureau tests:

"There are several Texas deposits containing enormous quantities of stone, as good as and in some cases, exceeding that found in the rest of the world."

"Unfair trade practices—misrepresentation of Texas granite—has discouraged the development of local industries."

They scoffed at arguments often advanced by "monument salesmen supplying out-of-state stone" to the effect that the Texas stone would not stand up.

"Our tests show it as nearly indestructible as any granite known," they countered. The said reports on pink granites, marbles, limestones and sandstones, covering about 250 different localities, would follow.

Without trees, civilization would disappear.

## Canada Echoes To Wheat Cry. "Let 'er Roll"

BY RONALD V. DODDS United Press Staff Correspondent

WINNIPEG, Man. (U.P.)—Across the broad, seemingly endless prairies of western Canada the wheat's beginning to roll. Along the flat surface of the vast granary ar starting to roar massive, impatient steel mammoths, rumbling along with the world's bread behind them.

Across the prairies you can see them coming, miles away, like a ship coming into sight above the horizon, roaring down the rails, eating up distance that are measured by thousands of miles. "Grain special," you hear as it tears by, and you try to count the cars. First it's 20, 50, 70, 90, and you give up. "Grain special," and you're waiting for it in England, in China, in France, all over the world.

From all parts of western Canada at this time every year the wheat begins to come. Hundreds, thousands, millions of bushels of it.

To all parts of the world it goes. Out through Canada's great seaport facing the Orient, Vancouver, across to China, around through the Panama Canal, to Europe. Down the rails east to Montreal, across the Atlantic to a waiting continent. Up to the north, where the northern lights play on the freight cars, too Churchill and out through Hudson Bay.

### Hard Work for Everybody

It's a rush for everyone, getting out the wheat. Down the rails pounds the wheat train, stops, and the feeder from the elevator is swung around. Down pours the wheat into a freight car. That one's filled, the train moves up a bit, and it pours into the next.

For the men who grow it, it's a gamble. One night they're rich, thousands of bushels waiting to be harvested, the very weight of the kernels bending the stalks. The next day they're wiped out, and the wheat crushed beyond hope, by a hailstorm. But they stick it out. Perhaps it's the thrill they get when they see the wheat rolling.

Or, to sit and see a 40 bushel crop wither away and fade under a blazing, merciless sun, see it dwindle to 30, 20, 10 bushels an acre. The prairie's beautiful, but it's cruel. Some years it will pour out all its riches; the next year it takes them back.

### Winnipeg Is Center

In Winnipeg, center of the world's grain markets, men and women are getting ready for the final rush, when accounts are to be settled, when the balance between a Ukrainian farmer in Saskatchewan and a flour mill in Yokohama has to be made straight, somehow. Up on the boards they'll be chalking the latest quotations, so many shillings in Liverpool, so many cents in Minneapolis, so many centavos in Buenos Aires, so many shillings in Melbourne.

They'll be at the exchange and the brokerage houses 24 hours a day, for the lights never go out, and black coffee in Winnipeg will mean rolls for breakfast in Paris.

All over western Canada it means work, hustle, excitement. In Winnipeg's railroad yards, largest in the world, they're in full swing. In the offices experts study charts. A sudden rainstorm in Alberta, that means a hundred more cars to be conditioned. A rise in temperature in Saskatchewan, that means they won't need so many there.

Three thousand elevators are serviced from Winnipeg, on the Canadian Pacific Railroad lines alone. That means work, night work, repairs, the glare of welding, the hum of lathes, the rattle of steam winches, in the night and into the early morning. The mammoths that go out after the world's bread live there, and they have to be made ready.

Everyone feels it from the grimy faced apprentice, smoking a furtive cigarette, to the executive telephoning that he won't have time for golf. The wheat's rolling!

### Ships Coming In

Up on the barren shores of Hudson Bay they're getting ready. By the two's and three's ships are coming in, high out of the water, their rusty, flaking sides showing, their propellers thrashing. But they won't be when they go out, they'll be down to the Primoll line.

**Handling of Tourist Trade Organization Is Set Up in Texas**

Ten young women of the southwest—publicists, office secretaries and receptionists for chambers of commerce—have set themselves the task of aiding their local organizations in the handling of Texas' No. 1 crop—the tourist trade. From a "tourism" school conducted last week in El Paso, where girls from southwest Texas, New Mexico and Arizona were guests of the El Paso Gateway Club and chamber of commerce, emerged a permanent organization named "Southwest Welcomers," all the members of which are to be prominent in the development of "tourism" in the southwest.

Miss Edith Gay of the Big Spring chamber of commerce was made president; Miss Bernice Strawn of Sul Ross College, Alpine, first vice-president; Miss Shirley Whitlow of Douglas, Arizona, secretary; and Mrs. Jo Betty Bush of Lordsburg, N. M., second vice-president. Miss June Long of Silver City, N. M., and Mrs. Geneva Fry of Fort Stockton were named on the resolutions committee; Miss Strawn and Mrs. Leona Moore of El Paso, publicity; Miss Mildred Hill of Lordsburg, N. M., Flossie Osborn, Alamogordo, N. M., and Miss Masie Martin, El Paso, program; Miss Maxine Jones, Carlsbad, N. M., and Miss Ophelia Greene, Midland, dates of meeting.

For two days the visiting girls sat around a "conference" table in the office of the El Paso chamber of commerce delving intensively into the problem and questions of the tourist business—where it comes from, where it goes, what it does, and above all what it wants. Capt. E. H. Simmons, General Manager of the El Paso chamber of commerce, L. P. Bloodworth, assistant manager, and L. A. Wilke, executive secretary of the Gateway Club, were leaders of the program, with El Paso business men, and representatives of outstanding tourist centers as speakers.

Representatives attending the school also spent several hours at the information desk of the El Paso chamber of commerce, where a daily stream of tourists register and receive information concerning El Paso and the surrounding territory. They were guests of the Hotel Paso del Norte, the Hilton and Cortez Hotels during the tourism school, with dinners, luncheons, and breakfast provided by the Gateway Club and chamber of commerce.

"Southwest Welcomers" will work to promote all special interests and events, not only in their home towns, but in surrounding tourist centers as well. Adopted as insignia of the organization is a carved wooden badge, representing a Southwestern cowgirl extending a "handy stranger" greeting. The organization will meet again in El Paso at a date to be announced later, and plans will be discussed for holding meetings in other sections.

Multi-fatal crashes, or those claiming several lives at a time, are to blame for the excessive death toll in relation to the number of crashes, it was pointed out. Multi-fatal crashes themselves are a monument to excessive speed, and excessive speed itself is a product of the straight and open highway where there is little traffic congestion, state police said. It is an axiom that doubling the volume of traffic on a given stretch will not cut down the number of accidents but it will reduce the number of deaths.

In July 16 persons died in eight accidents on the Sunday before July Fourth—heaviest blot on the month's traffic record. In one of the eight accidents, four persons were killed on a county road; in another of the eight, one person was killed in a small town; in the remaining six accidents, 11 persons were killed on state-designated highways. Similar study of the multi-fatal crashes shows 11 accidents claiming two persons each, one accident taking three lives and others claiming four, two crashes killing five persons each and one crash in which six persons died.

The high Sunday toll just before July Fourth also sent the percentage of Sunday fatalities to almost 31 per cent as compared with 25 per cent for the first six months of the year.

**Divorced Wife of Nobleman Suicides**  
NEW YORK, Aug. 31. (AP)—Mrs. Clarissa P. Curtis Cantacuzene, 39, member of a socially prominent Boston family and the divorced wife of Prince Michael Cantacuzene, Russian nobleman, was found dead today in a three-room apartment near lower Fifth avenue.

Police said she died of suicide by illuminating gas.

**SPARTAN HERE.**  
A Spartan, flown by Henry Thompson, made the only landing reported from Sloan Field for this morning. The ship came from Tulsa, Okla., and is to remain here overnight.

**Humpty Dumpty Sat on a Wall**

**"Mass Killings" on Highways Listed**

AUSTIN, Aug. 31.—What state police termed "mass killings" were peculiar to July traffic, which showed a nine per cent increase in the number of fatal accidents and a 14 per cent increase in deaths as compared with the same month a year ago, accident investigators declared today.

Of 159 fatalities recorded in July, 150 actually occurred in July traffic and the rest resulted from previous months.

Multi-fatal crashes, or those claiming several lives at a time, are to blame for the excessive death toll in relation to the number of crashes, it was pointed out. Multi-fatal crashes themselves are a monument to excessive speed, and excessive speed itself is a product of the straight and open highway where there is little traffic congestion, state police said. It is an axiom that doubling the volume of traffic on a given stretch will not cut down the number of accidents but it will reduce the number of deaths.

In July 16 persons died in eight accidents on the Sunday before July Fourth—heaviest blot on the month's traffic record. In one of the eight accidents, four persons were killed on a county road; in another of the eight, one person was killed in a small town; in the remaining six accidents, 11 persons were killed on state-designated highways. Similar study of the multi-fatal crashes shows 11 accidents claiming two persons each, one accident taking three lives and others claiming four, two crashes killing five persons each and one crash in which six persons died.

**Midland Oil Man Injured in Crash**  
EVANSVILLE, Ind., Aug. 31. (AP). B. Nysewander, 45, Midland, Tex., president of the Montecito Corporation, oil firm, was in St. Mary's Hospital here last night with a back injury and shock suffered when his airplane ran out of gasoline and made a forced landing in a plowed field.

The plane, bringing Nysewander from Shreveport, La., to Evansville on business, sat down 12 miles southeast of Campton.

Pilot George Christopherson, 30, Amarillo, Tex., escaped injury.

**Play Nights for Tired Students**  
AUSTIN.—To rest their study-tired brains and bodies, some 60 to 80 University of Texas summer students "pop in" each Wednesday night at the Women's Gymnasium for an old-fashioned, informal "play night."

Some swim, some dance—either ballroom or folk variety—some play pingpong, others just play games. Sometimes, flood lights are turned on in the patio after dark and the whole group joins in a "sing-song."

"It's all voluntary," Miss Ruth Bass, assistant professor of physical education and instigator of the idea, said today. "Nobody is urged to come, no one who comes is urged to do any certain activity."

Originally started by one of Miss Bass's physical education classes, "play night" now draws superintendents, principals and teachers who have already voiced their intention of starting "play night" in their own schools this fall.

**Long Termers To Enter U. S. Desert Prison**

LA TUNA, N. M., (U.P.)—Prison gates will open less frequently for inmates at the federal detention farm here with its designation by Attorney General Frank Murphy as a long-term penitentiary.

As a short term prison, La Tuna housed prisoners serving sentences of a year or less. Under the new designation, gates will shut on persons sentenced for terms of one to twenty-five years.

Completion in 1940 for a \$200,000 improvement program now in progress was a factor in the change from a detention farm to a federal long-term penitentiary.

**Pressure Builds Up**  
A west extender of the South Lovington pool of Lea county, New Mexico, L. H. Wentz No. 1-A State showed rise of casing pressure from 675 to 850 pounds after a 24-hour shut in. The previous 24 hours, it had flowed 113 barrels of oil through various-sized chokes on tubing. Production is natural, and the well is bottomed at 4,980 feet in lime. Two-inch tubing is set at 4,975 feet, with perforation at 4,850. The first 37 hours of testing, the well swabbed a total of 412 barrels, of which 190 barrels were circulating oil.

**Gamecocks May Wear Tiny Mitts for Boxing**  
HOUSTON, Tex. (U.P.)—"Boxing bouts" between gamecocks were planned by an operator here, who asked a district court for an order

prohibiting police interference. The operator's attorney said that tiny padded boxing gloves will be tied over the cocks' spurs and that they will fight two-minute rounds. Under such circumstances, the legal brief pointed out, the fights will be endurance contests rather than cockfights, which are illegal.

The operator said that the fights will be "bloodless" and not detrimental to spectators. The judge delayed his ruling on the application until he could study the points involved.

**Notice to Bowlers**  
BEGINNING SEPTEMBER 3 THE PLAMOR PALACE WILL BE CLOSED FOR ONE WEEK TO RESURFACE THE ALLEYS

In order to have them in the best of condition for the fall and winter season. PLAMOR PALACE SOUTH OF COURT HOUSE

**Oil News—**

Continued From Page One.

total depth. Operators have filed intention to treat with 8,000 gallons. Oil Development No. 2-802 fee rated an estimated 130 barrels a day after topping pay lime at 4,990 and drilling to total depth of 5,214 feet. It also will treat with 8,000 gallons.

Shell Oil Company, Inc. announced location for No. 10-C Baumgart, east-side Denver well 2,310 feet from the north and east lines of section 866, block D. J. H. Gibson survey. Natural output of 110 barrels a day was evidenced by Alcco Oil Company No. 6 H. O. Wooten, and it will be treated with 10,000 gallons. Pay was topped at 4,933, and total depth is 5,135 feet. Alcco No. 5-A Miller made 112 barrels a day naturally from pay section between 4,984 and 5,154 feet, total depth. Operators will give the well 9,500 gallons of acid. Another new Alcco producer is No. 4 J. P. Nystel which rated 115 barrels a day after drilling pay lime from 4,976 to 5,155 feet, the total depth. A 9,500-gallon acid treatment, in successive stages, is scheduled. Gulf Oil Corporation No. 2 Futch is drilling at 4,415 in lime and anhydrite.

In the southwest extension of the Bennett, location of Mabee No. 11 Willard has been changed from 1,230 feet from the north, 440 from the west line of section 741, to 2,200 from the south, 440 from the west line of the same section. A 5,250-foot rotary test, it will start drilling Sept. 4. It offsets to the west Mabee No. 7 Willard, a producer. Magnolia Petroleum Company No. 1 H. O. Mahoney, a southeast outpost to the area, is drilling anhydrite below 4,000 feet.

**London Shops Stock 'Crisis' Food Cartons**

LONDON. (U.P.)—The danger months of August and September have provided Great Britain with a new thriving business in "emergency" supplies.

Air raid precaution preparations have stimulated hardware lines and shops in Piccadilly now offer emergency food boxes which can be saved for the "crisis" or used if your Aunt Emmy drops in unexpectedly. They range in price from about \$12 to \$50. The former includes boneless sardines, individual cans of flour, tongue, pate, rice, assorted cheese, biscuits, breast of turkey, Malayan curried chicken, soft salad, cheddar cheese, paprika chicken, butter, ceylon tea and fruit cakes.

The British Medical Association has also issued a booklet, entitled, "How to Stock Your A. R. P. Locker." It gives a complete list of foodstuffs mostly canned and dried, based on scientific standards and sufficient for the needs of a household consisting either of man, wife and three children or four adults.

The suggested stock and the amounts in pounds: Canned foods: corned beef, eight; salmon, four; sardines (or herrings) four; milk, whole condensed, sweetened, two; milk whole dried, three; or evaporated seven and one-half; black treacle, one; golden syrup, one; tomatoes, six; tomato puree, two; and carrots, three. Other foods: Sugar, four; chocolate, plain eating, one; cocoa, loose, one; prunes, one; apricots, dried, one; raisins, one-half; rice, two; cornflower, one-half; haricot beans, one; dried green peas, one; lentils, one-half; oatmeal, two; plain biscuits, five; dripping, one and one-half; lard, one; white flour, ten; bacon, one; eggs, one dozen; tea, one-half; salt, one; cream of tartar, one; baking soda, one-half, and dried onions, one packet.

**Health Booklet Printed**

The British Medical Association has also issued a booklet, entitled, "How to Stock Your A. R. P. Locker." It gives a complete list of foodstuffs mostly canned and dried, based on scientific standards and sufficient for the needs of a household consisting either of man, wife and three children or four adults.

The suggested stock and the amounts in pounds: Canned foods: corned beef, eight; salmon, four; sardines (or herrings) four; milk, whole condensed, sweetened, two; milk whole dried, three; or evaporated seven and one-half; black treacle, one; golden syrup, one; tomatoes, six; tomato puree, two; and carrots, three. Other foods: Sugar, four; chocolate, plain eating, one; cocoa, loose, one; prunes, one; apricots, dried, one; raisins, one-half; rice, two; cornflower, one-half; haricot beans, one; dried green peas, one; lentils, one-half; oatmeal, two; plain biscuits, five; dripping, one and one-half; lard, one; white flour, ten; bacon, one; eggs, one dozen; tea, one-half; salt, one; cream of tartar, one; baking soda, one-half, and dried onions, one packet.

**Storage Tips Offered**

The foregoing would supply one week's ration for four adults in the event of severe air raids. There are suggestions for storage and the booklet also points out that pickled eggs may be substituted for fresh eggs and soda bread made with dried milk and water for baker's bread.

Some recipes for one meal: "During the first day one or two plain biscuits, chocolate, raisins, corned beef, sardines and tinned tomatoes. This gives ample choice without cooking." The booklet explains that glass-stored foods have been avoided because "glass is breakable and tin is not."

"If money is no object, other meats such as tongue can be substituted for corned beef," the booklet adds. Piccadilly shops also are advertising a "schoolboy evacuation outfit," just in case the children must be sent to the country during nig hostilities.

**"Fortune" Told for Author by Professor**

AUSTIN.—Long before Laura Lettie Krey, noted historical author, moved into the best-selling "Field with her Texas novel "And Tell of Time," a University of Texas professor of history indirectly "told her fortune."

Required to write one of her first historical papers under Dr. E. C. Barker, noted University historian and her professor at the time, she turned in the result of her investigation and awaited the verdict.

**New Leader**

Following the resignation of the Japanese Cabinet on account of the German-Russian non-aggression pact, General Nobuyuki Abe, former vice minister of war, was summoned by the emperor to form a new cabinet and radically revise Nipponese foreign policy.

**Masters' Grill to Be Opened Friday**

The Masters' Grill, Midland's newest restaurant, will open in the morning at 5:30 o'clock, according to W. P. Masters, veteran West Texas cafe man.

This new establishment is in the Crawford hotel here and will be operated by Masters and Mrs. C. E. Trammell. Completion of the grill was rushed in order to help take care of the large roveo crowds. It is extremely modern in every respect and is cooled by washed air.

**Cement Plants Show Increased Business**

AUSTIN.—Activity at Texas cement plants picked up during July, a University of Texas Bureau of Business Research index revealed today.

Production of these plants rose 24.2 per cent over June and 5.9 per cent over July last year. Shipments and stocks displayed mixed tendencies, the former dropping 16.9 per cent below June but gaining 5.5 per cent above July, 1938. Stocks on hand as of July 31 stood 19.2 per cent higher than a month earlier but 20.2 per cent lower than on July 31, 1938.

**Commercial Failures In State Increasing**

AUSTIN.—With liabilities more than doubled, commercial failures in Texas in July gained 75 per cent over the like month last year, University of Texas economists disclosed today.

Failures dropped 22.2 per cent below the June figure, however, the University Bureau of Business Research report said. Liabilities, on the other hand, gained 19.9 per cent over June.

**VERY EXCLUSIVE**

MERION, Pa.—Although 52 countries have competed for the Davis Cup, only four—America, France, England and Australia—have won the trophy in the 40 years it has been up for competition.

**PATIENT IMPROVED.**

Condition of Mrs. M. C. Brothers of Stanton who is ill at the home of her daughter, Mrs. Hursiel Howard, is reported improved today.

**FROM HOLLAND.**

J. C. Moore of the high school faculty is back in Midland. He spent the summer at his home in Holland, he reports, "just loafing."

**HEAR COLONEL ERNEST O. THOMPSON**  
Chairman of Interstate Oil Compact and Member of Texas Railroad Commission, speak on "The Oil Situation Now" Over Texas Quality Network Radio Stations at 9:30 P. M. THURS., AUG. 31

**To Make a Long Tale Short**  
years ago fools used to blow out the gas—now they step on it. You can't drive a car, new or used, with safety with one hand around your Sweetie's neck and the other on the steering wheel. Do you know that a party of five can make a long trip in a used car with no more transportation cost than train fare for one?

**NO TRIP TOO LONG FOR THESE:**  
1936 Chevrolet 5-passenger Sedan. Completely reconditioned. Looks and runs like new. Hydraulic brakes, turret top, safety glass. A real bargain. Down payment \$120.  
1938 Buick Century Sedan. Excellent condition throughout. A low mileage family car that shows little wear. Deluxe equipment throughout, including radio and heater. Down payment \$250.  
1936 Ford Tudor Sedan. Motor completely overhauled. Body, upholstery and tires all good. A good clean car that will give thousands of miles of inexpensive service. Down payment \$100.

**ELDER CHEVROLET**  
WE SELL THE BEST, AND JUNK THE REST. Phone 22

**SMILE and SAY GOODBYE to WASHDAY DRUDGERY**  
No more steaming tub and back-wrenching ironing board! We'll do the family's laundry for you economically—and give you time to keep young!

**Midland Steam Laundry**  
Phone 90

**America's Newest New Mexico's Finest**

**The HILTON HOTEL**  
In Albuquerque

New... beautiful... strikingly Southwestern in its character and appointments, the HILTON HOTEL at Albuquerque is not only the most up-to-date hotel in the whole country, but the only major hotel built in America in seven years.

Be sure your trip includes Albuquerque and the new, colorful, comfortable HILTON HOTEL.

**OTHER HILTON HOTELS:**  
IN TEXAS: LONGVIEW, ARILENE, EL PASO, PLAINVIEW, LUBBOCK.  
IN CALIFORNIA: HOTEL SIR FRANCIS DRAKE, San Francisco, HILTON HOTEL, Long Beach (Open in June)
